

Kerala Forest Department

Forest Statistics

2016

Prepared by-Statistics wing, Forest headquarters, Thiruvananthapuram.

Preface

The State of Kerala is endowed with rich natural resources. Tropical climate with plenty of sunshine and rainfall favours forests with rich biodiversity and endemism. Western Ghats, one of the Biodiversity hotspots, is running all along the length of Kerala and forms its eastern boundary. Increasing population and changing lifestyles of the people is exerting great pressure on forests. The greatest challenge faced by present day foresters is to accommodate developmental needs without causing destruction of its rich forests.

A manager has to base his decisions on the available data/ information on the subject. The broader and the accurate data base better will be the quality of decisions and efficiency of administration. Analysis of the past performance is a pre-requisite for developing future strategies of management.

'Forest Statistics' is one such effort made by Statistics Wing headed by Deputy Director (Statistics), to compile and provide vital statistical data much needed by the policy makers to formulate future policies. It is equally needed by various Scientific Institutions, Research Scholars and students of science in their endeavour.

I hope this compilation of data base about the Kerala Forest Department will be of value for various segments of the society.

Tiger Census : Monitoring of tigers, co-predators, their prey and habitats was carried out in the forests of Kerala as part of the all India tiger estimation, as per the guidelines issued by National Tiger Conservation Authority (**NTCA**) from 16th to 23rd December 2013. The status report of tigers in India published by the Ministry of Environment, Forest and Climate Change (**MoEF&CC**) shows that the population of tigers in Kerala has increased to 136 from the population of 112 in 2010. The report states that the tiger population and occupancy has shown a substantial increase in Western Ghats landscape. A comparison of the population of tigers as per the past estimations is given in table 7.8.

Nilgiri tahr Census:-

The Nilgiri tahr is an endemic species showing restricted distribution in the mountain landscapes of Southern Western Ghats in the states of Kerala and Tamil nadu. Low population status, discontinuous distribution and human intervention in a highly fragile ecosystem brought Nilgiri tahr in the IUCN red data book under the status 'Endangered'. It is also listed in the schedule I of Wildlife (Protection) Act1972. The estimated populations of Nilgiri tahr in Eravikulam National Park during last 10 years surveys are given table 7.14.

Participatory forest management (PFM)

The State has adopted participatory forest management (PFM) as a strategy for conservation of bio-diversity and for the improvement of livelihood of forest dependent people by forming partnership institutions at grass root level since 1998. The institutions in territorial forest divisions are called vana samrakshana samithies (VSS). Those in Sanctuaries and National Parks are called eco-development committees (EDC). During the year 2015-16, there were 400 numbers of VSSs and 190 numbers of EDCs.

Detailed statistics on VSS/EDC are given in tables 8.6 to 8.9.

Vanasree ecoshops

During the year 2011-2012, vanasree ecoshops are started in various places to enable the vana samrakshana samithies to sale processed and semiprocessed non timber forest products collected by adivasis from forest areas. The profits from these outlets are being ploughed back to the MFP collectors through the VSS. The public will also be getting unadulterated and genuine forest products from these outlets. There are 37 vanasree ecoshops in the state under forest development agencies (FDA) including 2 mobile units. The details of these outlets as on 31.03.2016 are shown in table 8.10.
