AGRICULTURAL CENSUS 1990 - 91

PRELIMINARY REPORT

**DEPARTMENT OF ECONOMICS AND STATISTICS
GOVERNMENT OF KERALA
THIRUVANANTHAPURAM**

APRIL - 1993

PREFACE

Ministry of Agriculture (Department of Agricultural and Co-operation) Government of India is conducting Agricultural Census on an All India basis once in five years since 1970-71. Kerala State also participated in all the five censuses.

Due to administrative and technical reasons the field work of Fifth Agricultural Census relating to the year 1990-91 could be started in Kerala State only in June 1992. The field work of the census was conducted by the investigators of the department under the immediate supervision of the taluk level and district level officers.

This preliminary report is brought out on the basis of details collected in the schedule designed for listing of households in the sample wards/divisions selected.

I am much thankful to the officers of Agricultural Census Division, Ministry of Agriculture and Rural Development, Government of India for their valuable suggestions and advice in the conduct of the census.

This report was prepared by Smt.S.Indira, Joint Director and Sri.P.Surendran Pillai, Assistant Director under the guidance of Sri.K.P.Madhava Kurup, Additional Director. I place my sincere thanks to the field staff and other officers of this department for their wholehearted co-operation in the survey. I also express my deep appreciation of the earnest efforts taken by the personnel of the Computer Division of the Directorate headed by Sri. C.C.Chериан Kunju Deputy Director for the timely preparation of the report.

I hope that this report will be useful to the planners and administrators especially in streamlining schemes beneficial to marginal and small farmers.

Dr.M.Kuttappan,
Director.

Thiruvananthapuram,
13..04..1993.

AGRICULTURAL CENSUS 1990-91

Preliminary report

1. Introduction

The first comprehensive Agricultural Census was conducted in India with Agricultural year 1970-71 as reference period by the Department of Agriculture and Co-operation in collaboration with State and Union territories. This was organised as part of the World Agricultural Census Programme sponsored by the Food and Agricultural Organisation of the United Nations. Encouraged by the utility of data generated, it was decided to conduct Agricultural Census quinquennially. Accordingly the second third and forth Agricultural Censuses were conducted with reference years 1975-76, 1980-81 and 1985-86 respectively.

The present census, fifth in the series, has 1990-91 as its reference period. Due to certain technical and administrative problems, there was delay in undertaking the census in Kerala state. The listing work of the present survey was carried out during the period June 1992 to December 1992.

2. Coverage and Sample Design of the Census

The agriculture census 1990-91 is comprised of two phases, Main census and Input survey. Under the main census, information is collected in respect of (i) number and area of operational holding, (ii) tenure and tenancy status, (iii) land utilization, (iv) irrigation status, (v) area under crops. Under the input survey, information was collected in respect of (i) multiple cropping (ii) application of chemical fertilizers, manures and pesticides, (iii) livestock,

(iv) agriculture machinery and (v) rural credit. All information relating to main census was collected separately for the social groups viz scheduled castes and scheduled tribes and others.

The Current Agricultural Census, as in the past is conducted on a Census-cum-sample basis. Complete enumeration method by retabulating the land records available at village level is adopted in most of the States and Union Territories where comprehensive land records are maintained. In the states like Kerala where comprehensive land records are not available, the data are collected through household enquiry method by adopting a stratified two stage sampling method.

Like the last census, for the present census also development block was considered as the stratum in rural area and municipality/city corporation in urban area. From each block 20% of panchayat wards and from each municipality/corporation 20% of wards/divisions were selected using systematic random sampling method. Altogether details were collected from 2302 sample wards-1998 from blocks and 304 from municipalities and corporations-as against 2166 (2041 + 125) wards during the Fourth Agricultural Census 1985-96.

The main object of agricultural census is to collect size class wise information in respect of operational holding as distinct from ownership holding. An operational holding is defined as all land which is used wholly or partly for agricultural production and is operated as one technical unit by one person alone or with others without regard to title, legal form, size or location. The technical unit has been defined as that unit which is under the same management and has the same means of production such as labour force, machinery and animals. This implied that the holding might be either fully owned or fully rented or partly owned or partly rented or cultivated under any other arrangement. The land of the holding might be located in one single compact block or spread over the scattered fragments. The entire area might be in a single territorial jurisdiction or might be spread over to more than one such jurisdiction. The common factor was that it was under single management having its own set of facilities and resources.

The holder or the operator as far as the agricultural census is concerned is the person who was responsible for the management of the holding. He had to take decisions on all major agriculture operations. It was the extent of responsibility of decision taking that accounts. He might do the work of one or more operations himself and may direct and supervise the work done by others under his instructions. The operator might thus be an owner, a member of owner's household, tenant, share cropper, etc. The operational holder might be individual, joint or institutional. If the holding was operated either by one person alone or by a group of persons who are the members of the same household, it was considered as an individual holding. If two or more persons belonging to two different households shared jointly the economic and technical responsibility for the operation, it was treated as joint operational holding. Holdings such as government farms, sugarcane factories, co-operative farms, land managed by trust etc. were treated as institutional holdings. Operated area included both cultivated and uncultivated area provided part of it is put to agricultural production during the reference period. It covered the land occupied by buildings that are within the cultivated area. Operated area would exclude government forest land, government waste land etc.

During the 1st three censuses, the data in respect of main census was collected utilising the services of the personnel of the Revenue Department under the technical guidance of this department. During the forth as well as present census, the data on main census were collected utilising the services of investigators of this department, in addition to their normal duties, under the close supervision of taluk and district level officers.

This preliminary report gives details regarding the number and area of operational holdings in respect of all the eleven size classes ranging from less than 0.05 hectare to 20 hectares and above for individual, joint and institutional holdings with break down for scheduled castes scheduled tribes and others.

3. Results of the survey

The total number of operational holdings in the state have increased from 48.97 lakhs in 1985-86 to 54.19 lakhs in 1990-91 recording an increase of 10.67%. The area comprised in those holdings during the respective years were 17.73 lakh hectares and 18.02 lakh hectares respectively. The average size of the holding has decreased from 0.36 hectare to 0.33 hectare during the above period.

The number of individual holdings have increased in all the districts. The area of individual holdings has declined in Kollam, Alappuzha, Kottayam, Ernakulam, Trissure, Palakkad, Malappuram, Wynad and Kannur. The number of individual holdings belonging to Scheduled Caste has increased from 4.86 lakhs to 5.21 lakhs and Scheduled Tribe from 0.49 lakhs to 0.66 lakhs. Area of the holding of the Scheduled Tribe increased from 0.29 lakh hectares to 0.34 lakh hectares, where as the area of the holding of Scheduled Caste remained stagnant.

The details regarding joint holdings ie. holdings operated by two or more persons belonging to different households and share jointly as partners the economic and technical responsibility for the operation of the holding were also collected. During the current census, it is estimated that 3827 holdings are operated jointly in contrast to 7421 holdings during 1985-86. The area operated is 4103 hectares as against 11476 hectares in 1985-86.

The number of institutional holdings has been estimated as 53040 and these holdings accounted for an area of 1.48 lakh hectares as compared to 45553 numbers having 1.07 lakh hectares in 1985-86.

The district wise number and area of total operational holdings (including institutional) in the state is given below.

DISTRICT WISE NUMBER & AREA OF TOTAL OPERATIONAL HOLDINGS

1990 - 91

S1. No.	District	Number	% to Total	Area(ha.)	% to Total	Average Size Of Holdings

6. Reserve	100	100	100	100	100
Total	3,270	3,270	3,270	3,270	3,270

Provisional number and area of operational holdings in the state under different size classes for scheduled castes, scheduled tribes and others and total are given in appendix. Number and area of operational holdings for scheduled caste, scheduled tribe and others and total in different districts are also given in appendix. Eleven size classes have been adopted for classifying the holdings according to the size. Detailed district-wise tables in respect of the estimated number and area of operational holdings have been prepared separately for scheduled caste/scheduled tribe and others. But for discussion and comparison of results, these eleven size classes have been regrouped into five size classes viz. (1) below 1 hectare (marginal) (2) 1 to 2 hectares (small) (3) 2 to 4 hectares (semi-medium) (4) 4 to 10 hectares (medium) (5) 10 hectares and above (large). For the purpose of comparison the particulars of the number of holdings and area in respect of the operational holdings (including institutional holdings) in Kerala are given below :-

Size class	1985-86		1990-91	
	Number (lakhs)	Area (lakh hect.)	Number (lakhs)	Area (lakh hect.)
1. Mar- ginal	44.82 (91.53)	08.16 (46.02)	50.16 (92.56)	08.80 (48.83)
2. Small	02.82 (05.76)	03.82 (21.55)	02.81 (05.19)	03.81 (21.14)
3. Semi- medium	01.04 (02.12)	02.72 (15.34)	00.98 (01.80)	02.54 (14.10)
4. Medium	00.25 (00.51)	01.31 (07.39)	00.21 (00.39)	01.13 (06.27)
5. Large	00.04 (00.08)	01.72 (09.70)	00.03 (00.05)	01.74 (09.66)
Total	48.97 (100.00)	17.73 (100.00)	54.19 (100.00)	18.02 (100.00)

Figures in brackets are percentages.

The number of holdings (including institutional) below 1 hectare was 44.82 lakhs during 1985-86 where as it increased to 50.16 lakhs in 1990-91. The percentage of marginal holders having less than one hectare has increased from 91.5 to 92.6 and they operate 49% of the total area. More or less the same trend is noted for schedule castes and tribes in the state. Percentage of large holdings having 10 hectares and above in size was 0.08 in 1985-86 and 0.05 in 1990-91. The holders belonging to this group operated an area of 9.66% of the total area.

Considering the increasing demand for data at block level, the number and area of individual holdings in 7 size classes viz. 0.02 hectare, 0.02-0.5 hectare, 0.5 hectare to 1 hectare, 1-2 hectares, 2-4 hectares, 4-10 hectares and above 10 hectares have been prepared for each block, municipality and corporation. The above tables have been given in appendix.

Certain other interesting findings observed may also be noted.

On the basis of the Agricultural Census it is estimated that there are about 56.5 lakh households in the state. Of these about 3.3 lakh households were having no land of their own. This accounts for about 5.8% of the total households.

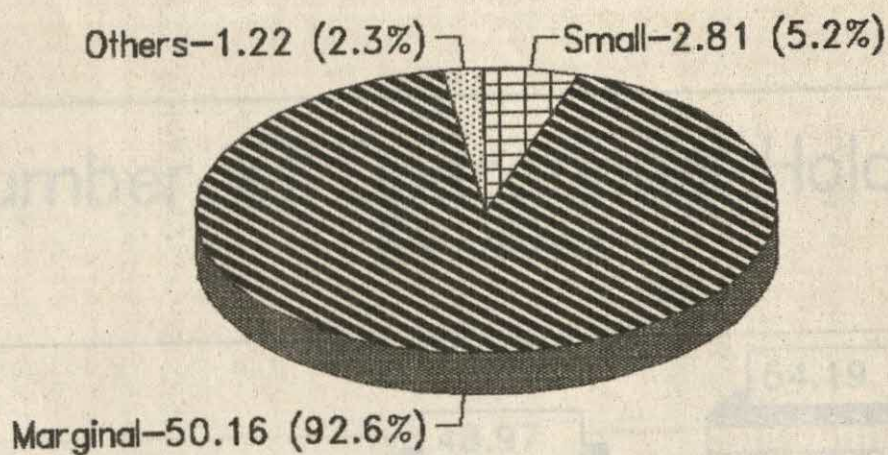

About 12.2 lakhs operational holders have reported agriculture as their main occupation.

About 1 lakh operational holders have reported as having no land of their own.

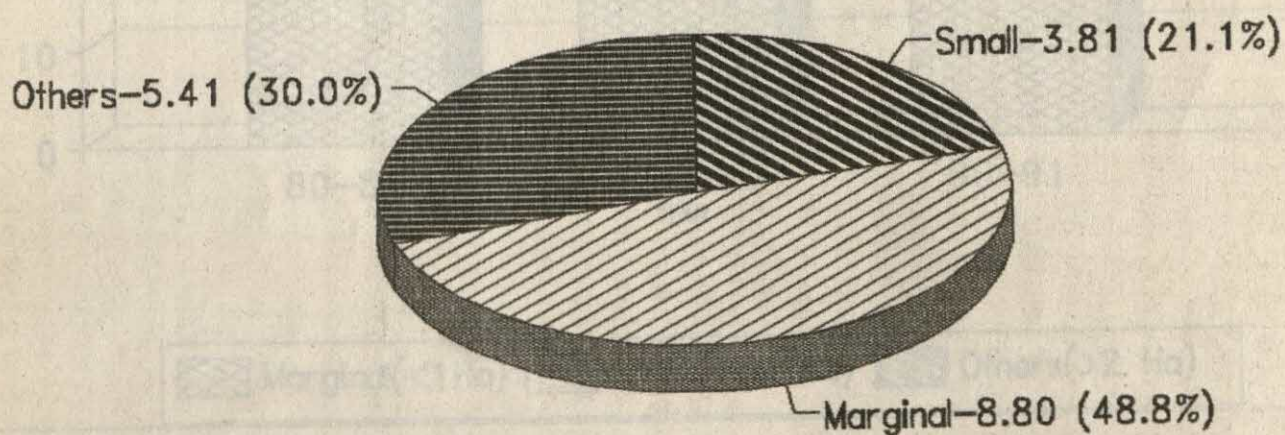

About 15% of the holdings are situated outside the ward of the operational holder.
