GOVERNMENT OF KERALA

ANNUAL SURVEY OF INDUSTRIES 1976-77

DIRECTORATE OF ECONOMICS AND STATISTICS
1981

P R E F A C E

This report on Annual Survey of Industries 1976-77 is the twelfth publication in its series. It provides a broad outline of the factory sector of the State. Aggregates of principal structural characteristics of individual industry groups as well as for the sector as a whole have been presented in this report. District-wise break up of these data have also been furnished in order to highlight the relative level of industrial development of the Districts.

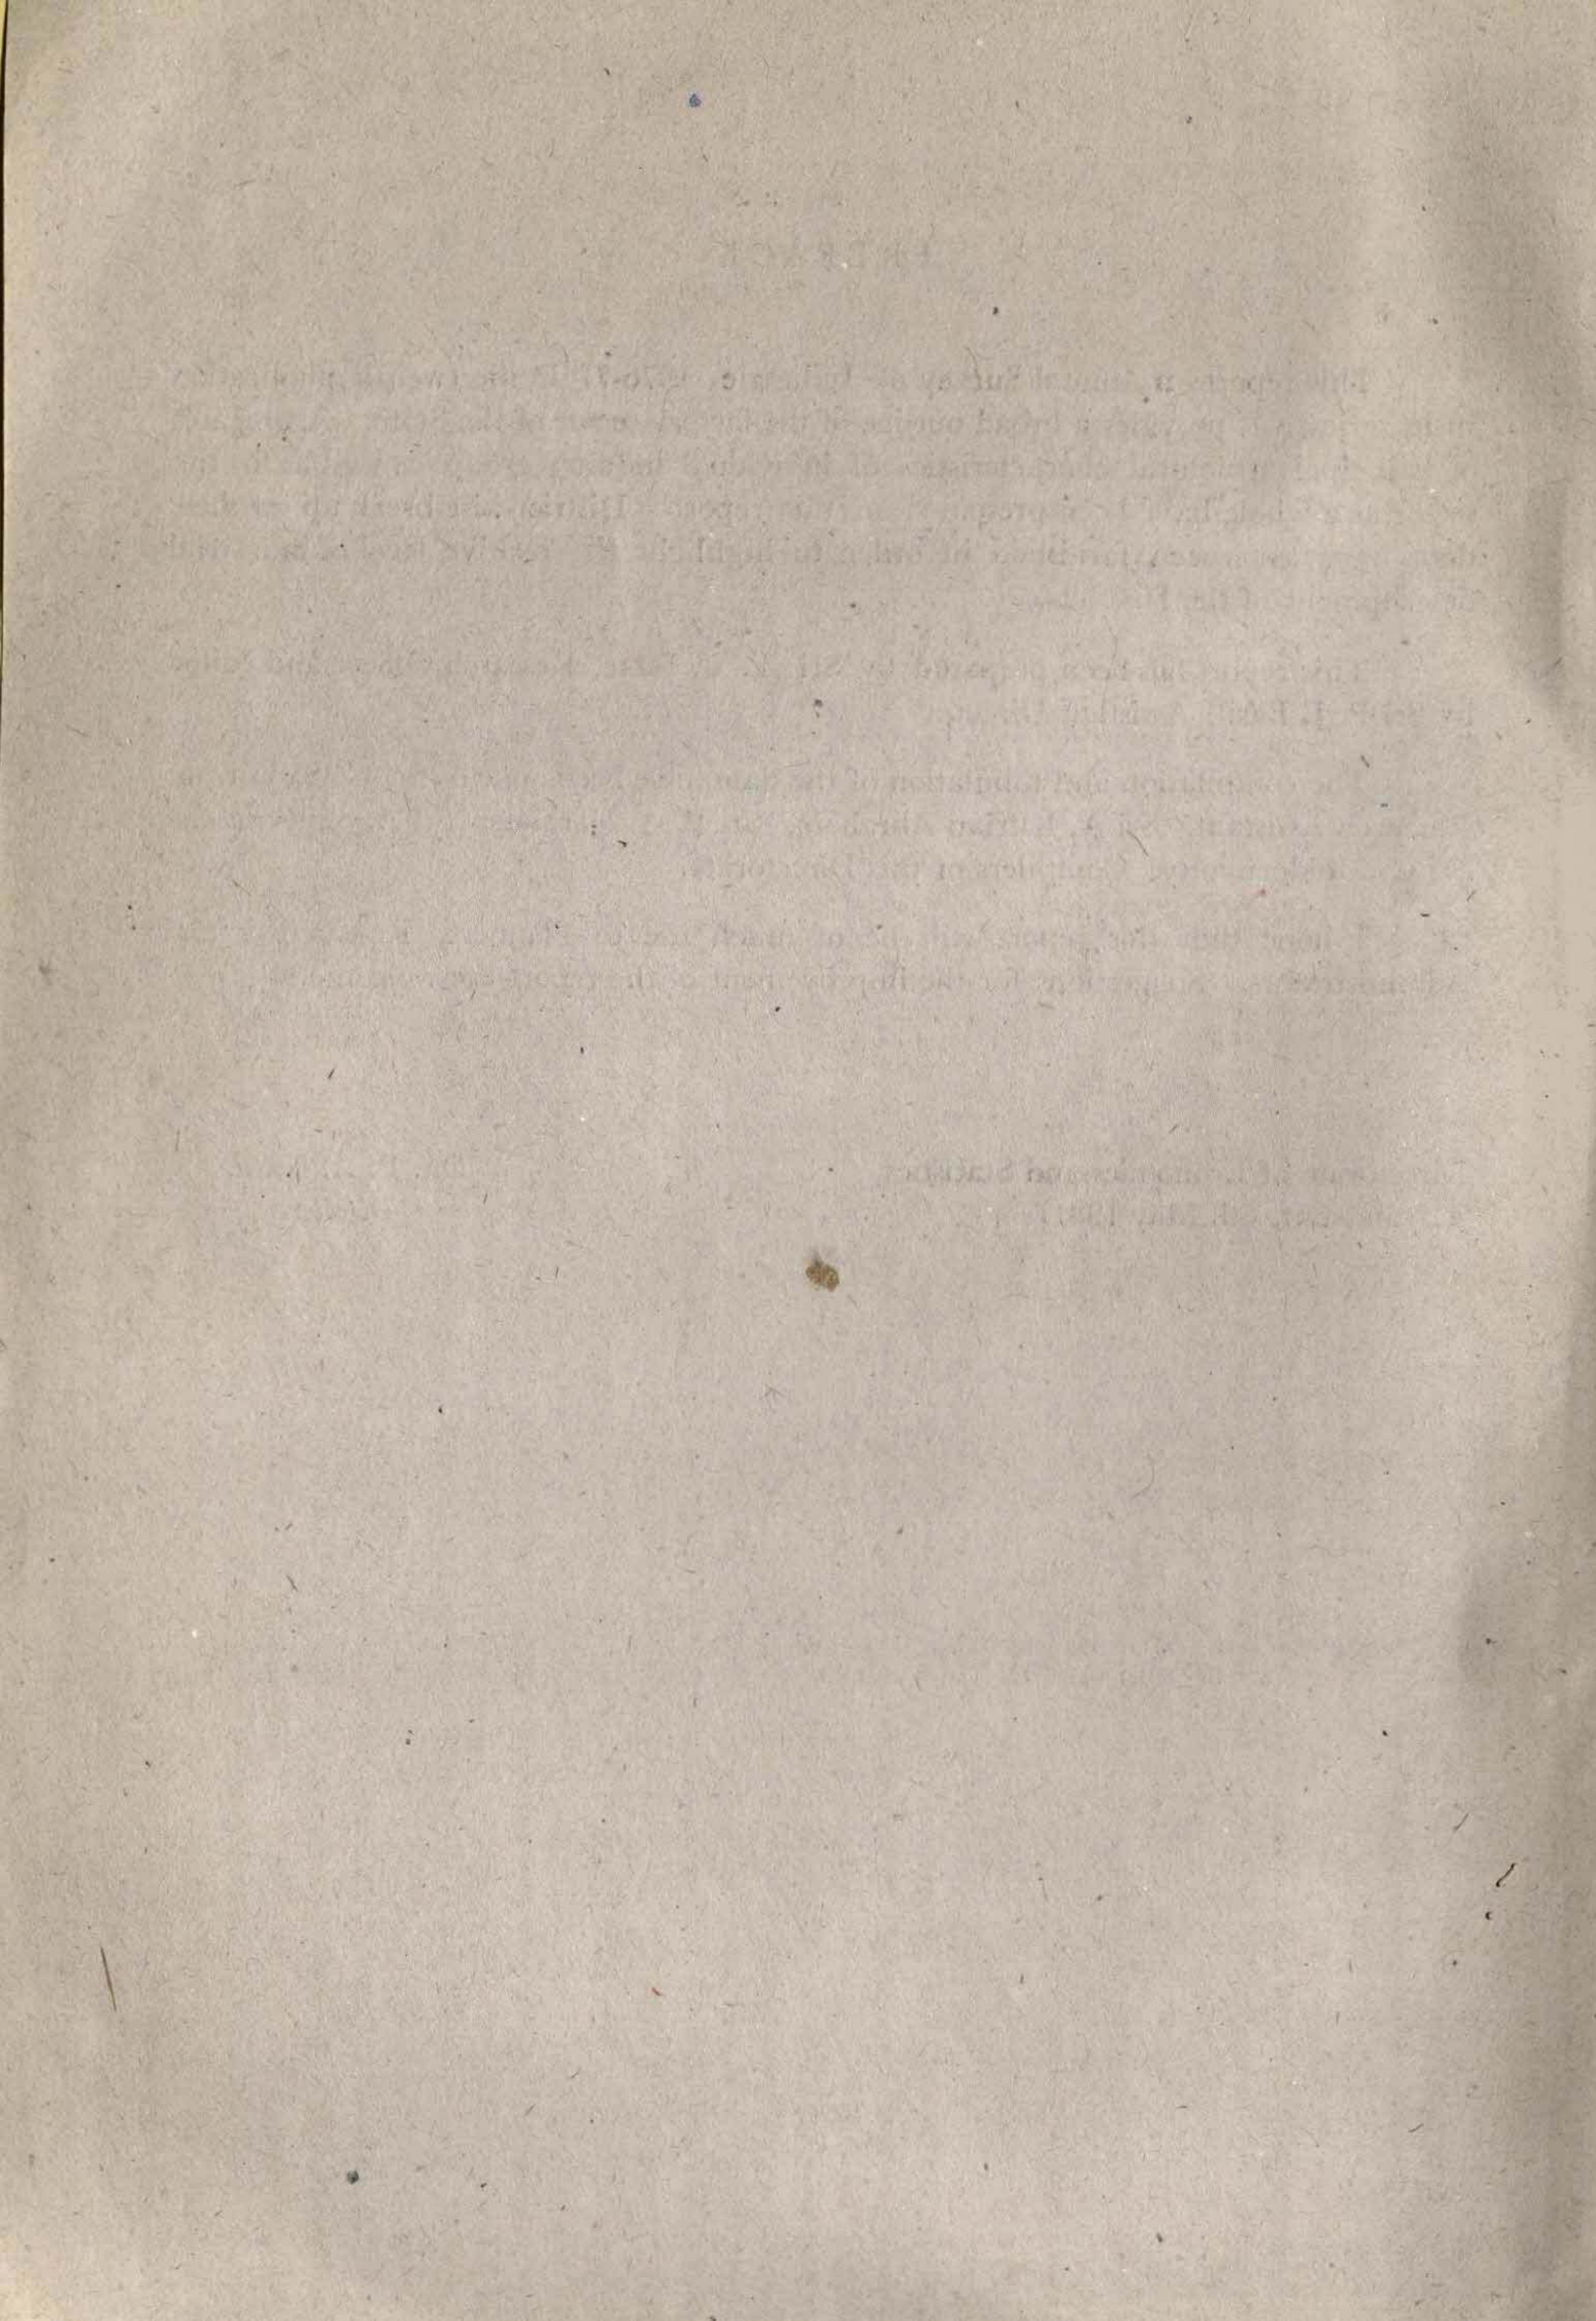

This report has been prepared by Sri T. V. Isaac, Research Officer and edited by Sri P. J. Basil, Assistant Director.

The compilation and tabulation of the data have been done by Sri G. Sadasivan, Research Assistant, Sri A. Kurian Abraham, Sri P. A. Varghese, Sri A. Sudevan and Sri C. Moideenkutty, Compilers of this Directorate.

I hope that this report will be of much use to Planners, Researchers and Administrators. Suggestions for the improvement of the report are welcome.

Directorate of Economics and Statistics,
Trivandrum, 6th May 1981.

DR. P. A. NAIR,
Director.

ANNUAL SURVEY OF INDUSTRIES, 1976-77

SECTION I

The Annual Survey of Industries (ASI) is the principal source of data on various aspects of the factory sector. The survey is conducted annually under the statutory provisions of the Collections of Statistics Act, 1953 and rules framed thereunder in 1959. The field work of the survey is carried out by the Field Operation Divisions of the National Sample Survey Organisation, Government of India.

Coverage

The ASI covers the entire factory sector which comprises industrial units registered under sections 2 (m) (i) and 2 (m) (ii) of the Factories Act, 1948. These sections respectively refer to units using power and employing 10 or more workers and those not using power and employing 20 or more workers on any day of the preceding twelve months. Certain units though not strictly engaged in manufacturing activity but would come within the scope of the Factories Act, 1948 are also covered in the ASI. These include activities like production and distribution of electricity, gas and water and some services like sanitary services (pumping and sewage), cinema studios, laundries and job dyeing. But oil storage and distribution units, units under the control of the Defence Production Ministry, restaurants and cafes and technical training institutes not producing anything for sale or exchange are excluded though these may be registered as factories under the Factories Act, 1948.

The primary unit of enumeration in the survey is the factory for all industries other than electric light and power industry. In the case of this industry the unit of enumeration is an undertaking.

The frame for the A. S. I. 1976-77 comprised of—

- (i) The list of electricity undertakings as on 31st December 1976, maintained by the Central Electricity Authority, and
- (ii) The list of factories registered under the Factories Act, 1948 as on 31st December 1976 and not covered in (i)

For the purpose of ASI, the factories in the frame are classified into census and non-census sectors. Factories employing 50 or more workers and using power and those employing 100 or more workers and not using power constitute the census sector. All units in the electric light and power industry are included in the census sector irrespective of the size of employment. The remaining units in the frame constitute the non-census sector. This classification is made based on the employment data available from the survey previous to the year in which the frame is revised. (The frame is being revised once in every two years). All units in the census sector, all electricity undertakings and all units in those industries in the non-census sector in which the total number of units was less than 50 in the entire country were completely enumerated. All units in the census sector and in the complete enumeration groups and one half of the units in the non-census sector were surveyed by the Field Operation Divisions of the National Sample Survey Organisation. The remaining units were surveyed by specially trained Investigators of the Directorate of Economics and Statistics so as to achieve complete coverage of all units in a single year.

The reference period of the survey was the financial year commencing from 1st April 1976. Information were collected from all the establishments whose accounting year ended any day during the reference period. 716 units in the census sector and 1836 units in the non-census sector were contacted for the collection of details for the survey. Out of this only 685 units in the census sector and 1537 units in the non-census sector have responded to the survey. The coverage achieved during the year worked out only to 87.07%.

Concepts and Definitions

1. *Reference year* for ASI 1976-77 means the accounting year of the factory ending on any date between 1st April 1976 and 31st March 1977.

2. *Registered Factory* is one registered under the Factories Act, 1948, employing 10 or more workers and using power and 20 or more workers and not using power. Closed factories with fixed assets on site, both in census and non-census sectors, are also inculded till they are deleted from the lists maintained by the Director of Factories and Boilers in the State.

3. *Gross Value of Plant and Machinery* represents the total original (undepreciated) value of plant and machinery as at the end of the accounting year. It includes the book value of own constructed plant and machinery, if installed, and the approximate value of rented-in plant and machinery at the time of renting-in but excludes the value of rented-out plant and machinery. The total value of plant and machinery acquired on hire-purchase basis is also included.

4. *Fixed Capital* represents the depreciated value of all fixed assets of the factory as on the closing day of the accounting year. Fixed capital covers all goods, new or used, that have a normal economic life of one year or more (for example land, buildings including those under construction, plant and machinery, transport equipment, etc.). It includes the fixed assets of the head office allocable to the factory. Assets solely used for post-manufacture distribution as well as intangible assets are, however, excluded from fixed capital.

5. *Working Capital* comprises stock of materials, stores, fuels, semi-finished goods and finished goods, cash in hand and at bank, net balance of amounts receivable over amounts payable as at the end of the accounting year. It, however, excludes fixed deposits, long-term loans and investments.

6. *Productive Capital* is the total of fixed capital and working capital as defined above.

7. *Invested Capital* is the total of fixed capital and physical working capital comprising stocks of materials, stores, fuels, etc., semi-finished goods and finished products and by-products as at the end of the accounting year.

8. *Outstanding loan* represents all loans whether short-term or long-term, whether interest bearing or not, remaining outstanding according to the books of the factory on the closing day of the accounting year.

9. *Workers:* The term 'worker' is used in the same sense as defined in section 2 (1) of the Factories Act, 1948 where a worker is defined as a person employed directly or through any agency whether for wages or not, in any manufacturing process or in cleaning any part of the machinery or premises used for manufacturing process or any kind of work incidental to or connected with the manufacturing process or the subject of the manufacturing process. However, persons holding positions of supervision and management or employed in a confidential position are excluded.

10. *Employees* relate to all persons engaged by the factory in work connected directly or indirectly with the manufacturing process and include all administrative, technical and clerical staff as also labour engaged in production of capital assets for factory's own use. It includes employees in the so called sales department as also those engaged in purchase of raw materials etc. and fixed assets for the factory. They also include the working proprietors and their unpaid family members who work in or outside the factory. Persons in the head office connected with the manufacturing activity of the factory are also included in this item.

The number of workers or employees is an average number per working day (days on which the manufacturing process was carried on.) It is calculated by adding, for each category, persons attending and on leave with pay (including those on strike but excluding those on unlimited leave or leave without pay) in each shift over all the shifts worked on all days (working and non-working) and dividing the result by the number of days on which the manufacturing process are carried on.

11. *Man-days* worked represent the total number of man-days worked by the factory during the accounting year. It is obtained by summing up the number of persons of all categories attending in each shift over all the shifts worked on all days (working and non-working).

12. *Wages* include all payments made to workers in cash as compensation for work done during the year for example, basic wages, dearness allowance, over-time payments, shift allowance, leave wages, wages for paid holidays and regular bonuses such as production bonus, good attendance bonus, incentive bonus, etc. which are paid more or less regularly for each pay period.

13. *Emoluments* include the salaries and wages paid during the year to persons in employment. It includes profit sharing, festival and other bonuses and ex gratia payments paid at less frequent intervals (i. e. other than bonuses paid more or less regularly for each pay period.) Benefits in kind in respect of supplies made or services rendered such as housing, medical, education and recreational facilities are included in this item. It excludes factory expenses in the shape of employer's contribution to provident fund, pension, gratuity or similar other charges.

14. *Fuels consumed* represent the total purchase value of all items of fuels, lubricants, electricity, water, etc., consumed by the factory during the survey year and excludes that part of fuels which is produced and consumed by the factory.

15. *Materials consumed* represent the total value of all items of raw materials, chemicals, packing materials and stores actually consumed during the survey year for manufacture including capital assets for factory's own use. It excludes the intermediate products, i. e. goods produced within the factory and consumed for further manufacture.

16. *Total input* comprises all manufacturing cost of the factory. Included in it are the costs of fuels and materials consumed (as defined above) for manufacture as well as for repair and maintenance of factory's fixed assets, office supplies, stationery, technical magazines and periodicals, etc., purchase value of goods sold in the same condition as purchased, purchase value of products reported for sale in the previous year but consumed during the survey year for further manufacture and the costs of services purchased.

17. *Products:* The term 'product' represents the ex factory value (that is exclusive of taxes, duties, etc. on sales) of all finished products and by-products manufactured during the survey year. It excludes the value of intermediate products, i.e those produced and consumed in further manufacture in a factory but includes the value of assets produced for factory's own use.

18. *Net value of semi finished goods:* It represents the excess of value of goods in process at the end of accounting year over that the beginning of the year. It includes the value of semi-finished goods of last year sold in the current year.

19. *Gross output* is the ex factory value of products (as defined above) and the value of services rendered by the factory for others during the survey year. It includes the net value of semi-finished goods (as defined above) and sale value of goods sold in the same condition as purchased.

20. *Depreciation* is the consumption of fixed capital by the factory during the survey year and is taken as provided for by the factory and is estimated on the basis of cost of installation and working life of the fixed assets calculated in terms of the number of years.

21. *Value added by manufacture* provides a measure of the contribution made by resources of labour and capital in producing the output of an activity and is obtained by deducting the total value of input and depreciation from the total value of output.

22. *Factor payments to others* represent the share in value added of income from capital other than land and is the same total of 'rent' (excluding rent on land) and interest. This aggregate, is exclusive of land rent.

23. *Net income* represents the factor shares of employees and entrepreneur in the value added and is obtained by deducting the factor payments to others from the value added.

24. *Operating surplus* is the excess of the value added (as defined above) over the cost of employee compensation (i.e. emoluments).

Limitation of the Survey

The data presented in this report relate only to the factories responded to the survey. The factories which did not respond constituted about 13%. Though some of the units are found to be non-existent at the time of survey the margin of error is substantial. Hence the data published in this report have this limitation.

Summary Results of the Survey

The principal aggregates of the survey are presented in Table 1.1 below along with the all India figures for the purpose of comparison.

TABLE 1.1
Principal Aggregates, 1976-77

Sl. No.	Major characteristics	Unit	India	Kerala	
				Actuals	% to all India
1.	Factories	Responded No.	81227	2222	2.74
2.	Fixed capital	Rs. crores	17171	543	3.16
3.	Productive capital	"	24241	723	2.98
4.	Invested capital	"	26604	767	2.88
5.	Total inputs	"	25676	781	3.04
6.	Gross output	"	34030	1009	2.97
7.	Value added	"	7285	195	2.68
8.	Total employees	('000)	6686	256	3.83
9.	Emoluments	Rs. crores	3637	99	2.72

Altogether 2,222 factories have responded to the Survey during 1976-77. These factories had a fixed capital of Rs. 543 crores and a productive capital of Rs. 723 crores. They produced output worth Rs. 1,009 crores by utilising an input worth Rs. 781 crores and contributed Rs. 195 crores towards State Income by way of value added. These factories together employed 256 thousands of people and disbursed Rs. 99 crores by way of emoluments.

Though the number of factories in the State constituted only 2.74% of the total for all India the percentage of fixed capital utilised by these factories was slightly higher with 3.16%. But in the percentage utilisation of productive and invested capitals these units compares fairly well to the proportion of the units. The incidence of a higher percentage of inputs than output in the factory sector of the State, is indicative of a higher input output ratio than the same for the country as a whole. Though total factory employment of the State constituted 3.83% of the all India employment employees compensation (emoluments) constituted only 2.72% of total amount spent by way of emoluments by the factory sector of the country as a whole. This shows a relatively less average annual wages per worker of the factory employees of the State when compared to their counterparts in the country as a whole. This was so because about 42% of the employment in the factory sector was in the cashewnut processing industry which being seasonal in nature pay only comparatively lesser average annual wages per employee.

A table showing the summary results of the survey is given in appendix.

SECTION II

MAJOR INDUSTRIAL CHARACTERISTICS—ALL FACTORIES

No. of Registered Units:—The growth of registered units since the inception of the survey is given below.

TABLE 2.0

Growth of Registered Units in the Factory Sector

Year	No. of units	Percentage increase or decrease over the previous year	Percentage increase over 1962
1962	1779
1963	1853	4.16	4.16
1964	1906	2.86	7.14
1965	2010	5.79	12.98
1966	2079	3.43	16.86
1967	2132	2.55	19.84
1968	2211	3.17	24.28
1969	2287	3.43	28.56
1970	2342	2.40	31.65
1971	2352	0.40	32.60
1973-74	2608	10.90	46.60
1974-75	2727	4.56	53.29
1975-76	2443	(-) 10.41	37.32
1976-77	2552	4.46	43.45

The above table shows increase in the number of units up to the year 1974-75 and a decline during 1975-76. The reason for the sharp decline in 1975-76 was due to the removal of defunct units accumulated in the frame over the years when the frame was revised for 1975-76 survey.

In terms of the number of units saw mills, cashewnut processing, structural clay products, repair of motor vehicles, tea processing, weaving and finishing of textiles on handlooms are the most important industries of the State. Of the total of 2,222 units responded to the survey, large units (census sector) consisted only about 39%. The industries with 20 or more units in the State are arranged in Table 2.1. There are only 18 such groups as against 21 during the previous year. In this table the details of the units responded to the survey alone are given.

TABLE 2.1 *Large Units*

Sl. No.	Code	Name of industry	Total units	No. of units	
				Census sector units	% of census sector units
1	203	Canning and processing of fish	48	28	58.33
2	204	Rice milling	47
3	211	Manufacture of edible oils and fats	41	2	4.26
4	212	Tea processing	97	45	46.39
5	214	Cashewnut processing	253	205	81.03
6	231	Cotton spinning and weaving in mills	21	21	100.00
7	235	Weaving and finishing of textiles on handlooms	95	84	88.42
8	268	Manufacture of coir and coir products	61	12	19.67
9	270	Manufacture of veneer, plywood and other products	41	20	48.78
10	271	Sawing and planing of wood	383	31	8.09
11	285	Printing and publishing of books and journals	64	7	10.94
12	286	Printing and publishing of allied activities	30	3	10.00
13	302-9	Manufacture of other rubber products	90	21	23.33
14	310-1	Manufacture of heavy chemicals	20	8	40.00
15	320-4	Manufacture of tiles and bricks	206	64	31.07
16	340-3	Manufacture of drums, tanks and metal containers not elsewhere classified	27	4	14.82
17	341	Manufacture of structural metal products	22
18	973	Repair of motor vehicles	79	26	32.91

Fixed CapitalII *NOTES*

The total fixed capital in the factories responded to the survey is reported as Rs. 543 crores. In terms of fixed capital investment the industries group generation and transmission of electric energy occupied the first place with 47% of the total fixed capital in the factory sector. Ship building industry occupied the second place pushing down to the third place the fertilizers and pesticides industry which had the first place during the previous year. Five industries viz. generation and transmission of electric energy, ship building and repairing, fertilizers and pesticides, cotton spinning and weaving in mills and heavy chemicals, together commanded more than 75% of total fixed capital investment in the factory sector of the State. The average fixed capital per unit has been worked out as Rs. 24.44 lakhs. The fixed capital per unit was lowest in respect of saw mills, just below cashew processing industry. The industries having a fixed capital of Rs. 1 crore or more have been arranged in descending order and presented in Table 2.2.

01-4	5781	1001
02-3	5091	1001
03-7	9108	1001
04-1	5785	1001
05-2	5715	1001
06-3	1122	1001
07-4	5855	1001
08-5	5482	1001
09-0	5785	1001
10-01	8045	41.1001
11-4	5775	1001
12-01 ()	5785	1001
04-4	5785	1001

TABLE 2.2
Ranking of Industries according to Fixed Capital

Industry group/1	Sl. No.	Code	Name of industry	Number of units	Fixed capital (Rs. in lakhs)	
					Total	Per unit
20	384	11 0008	Generation and transmissions of electricity	7	25,507.60	3,643.94
21	370	10 0021	Ship building and repairing	22	6,057.83	275.36
22	311	01 001	Manufacture of fertilizers and pesticides	18	5,742.07	319.00
23	310	02 001	Manufacture of organic and inorganic chemicals	20	2,484.27	124.21
24	231	03 001	Cotton spinning and weaving in mills	21	1,035.00	49.29
25	360	04 001	Manufacture of transformers and electricals	8	603.98	75.50
26	300	05 001	Tyre and tube industries	15	442.40	29.49
27	330	01 100	Iron and steel industries	9	432.48	48.05
28	212	02 001	Tea processing	97	425.38	4.39
29	302	03 001	Manufacture of other rubber products	94	378.57	4.03
30	247	04 001	Spinning, weaving and finishing of other textiles	3	368.99	123.00
31	270	05 001	Manufacture of veneer and plywood	49	356.20	7.27
32	203	11 001	Canning, preserving and processing of fish and similar foods	48	351.71	7.33
33	314	10 001	Manufacture of perfumes and lotions	8	337.91	42.24
34	335	01 001	Aluminium manufacturing	2	293.80	146.90
35	320	02 001	Manufacture of structural clay products	213	269.73	1.27
36	214	03 001	Cashewnut processing	253	204.59	0.81
37	206	04 001	Manufacture and refining of sugar	3	189.68	63.23
38	285	05 001	Printing and publishing of books and journals	64	189.64	2.96
39	321	06 001	Manufacture of glass and glass products	2	183.55	91.78
40	361	07 001	Manufacture of insulated wires and cables	4	174.71	43.68
41	271	08 001	Saw mills	383	171.72	0.45
42	313	09 001	Manufacture of drugs and medicines	31	158.33	5.11
43	284	10 001	Printing and publishing of newspaper	15	149.37	9.96
44	331	01 001	Casting and forging of iron and steel	13	140.73	10.83
45	973	02 001	Repair of motor vehicles	79	134.08	1.70
46	222	03 001	Distilling of malt liquors and malt	2	125.56	62.78
47	268	04 001	Manufacture of coir and coir products	61	123.47	2.02
48	289	05 001	Printing of picture and post cards	30	115.74	3.86
49	All Industries			2222	54,297.26	24,44
Working Capital						

The total working capital utilised by the responded factories was estimated at Rs. 180 crores. Out of this 18% was utilised by generation and transmission of electric energy industry alone. The average working capital per unit was Rs. 8.12 lakhs. There were 25 industry groups which utilised a working capital of Rs. 1 crore or more. Cashewnut processing industry which took the first place in the utilisation of working capital last year find only fifth place this year with a lesser amount. Working capital per unit was highest in respect of generation and transmission of electric energy followed by spinning, weaving and finishing of other textiles.

Table 2.2 shows the industries with a working capital of Rs. 1 crore or above arranged in descending order. From the table it may be seen that the first 7 industry groups commanded about 50% of total working capital of the factory sector. As in the case of fixed capital, the working capital per unit was lowest in saw mills.

TABLE 2.3
Industries according to Working Capital

Sl. No.	Code	Name of industry	No. of units	Working capital	
				Total	Per unit
(1)	(2)	(3)	(4)	(5)	(6)
1	40	Generation and Transmission of electrical energy	7	3269.17	467.02
2	370	Shipbuilding and repairing	22	1443.11	65.60
3	311	Manufacture of fertilizers and pesticides	18	1200.75	66.71
4	310	Manufacture of organic and inorganic chemicals	20	862.70	4.31
5	214	Cashewnut processing	253	737.95	2.92

Productive Capital

Productive capital is the sum of fixed capital and working capital. The total productive capital in the factory sector during 1976-77 was estimated at Rs. 723 crores. There were altogether 28 industry groups with a productive capital of Rs. 2 crores or more during the year under study. Generation and transmission of electric energy commanded 40% of the total productive capital. The productive capital per unit was highest in 'generation and transmission of electric energy' and was lowest in "saw mills". The average productive capital per unit works out to Rs. 32.6 lakhs.

The industries having a productive capital of Rs. 2 crores or more are arranged in Table 2.4 in descending order.

Invested Capital

Invested capital is the total of fixed capital and physical working capital. The total invested capital utilised by the sector during 1976-77 is estimated at Rs. 767 crores. Generation and transmission of electric energy had the highest invested capital. The average invested capital per unit is worked out as Rs. 34.5 lakhs. There were 31 industry groups with invested capital of Rs. 2 crores or more during the year under report. These industries are arranged in descending order in Table 2.5.

TABLE 2.5
Industries according to Invested Capital

Sl. No.	Code	Name of industry	No. of units	Invested capital (Rs. in lakhs)	
				Total	Per unit
1	40	Generation and transmission of electrical energy	7	27,762.97	3,966.14

31	211	Manufacture of other edible oils	41	203.14	4.95
All industries			2222	76,718.35	34.53

Outstanding Loans

The amount of loans outstanding against the reported factories is estimated at Rs. 505 crores. This works out to about 70% of the total productive capital utilised by the factory sector during 1976-77. 54% of the total loans was outstanding against generation and transmission of electric energy industry alone. 95% of the total productive capital of this industry constituted loans. About 75% of the total loans was outstanding against 5 major industries, viz., generation and transmission of electric energy, ship building and repairing, organic and inorganic chemicals, cotton spinning and weaving in mills and canning, processing and preserving of fish and other sea foods. There were 29 industries against which loans worth Rs. 1 crore or more were outstanding. These industries are arranged in descending order and presented in Table 2.6.

TABLE 2.6

Industries according to Outstanding Loans

Sl. No.	Code	Name of industry	No. of units	Outstanding loans (Rs. in lakhs)	
				Total	Per Unit
1	2	3	4	5	6

All industries			2,222	50,460.03	22.71

Workers

The total number of workers in the factory sector was reported at 212,231. While cashewnut processing was the industry which employed the largest number of workers (47% of the total workers) K. S. E. Board was the single largest employer. About 69% of the total workers were employed in cashew processing, generation and transmission of electrical energy, structural clay products, cotton spinning and weaving in mills and saw mills during the year. The average number of workers per unit was highest in respect of generation and transmission of electrical energy and the lowest was in respect of saw mills with 19 as against a State average of 96. There were 20 industry groups with an employment of 1,000 or more in them. These industries are arranged in descending order and placed in Table 2.7.

TABLE 2.7
Industries according to number of workers

Sl. No.	Code	Name of industry	No. of units	Workers		
				Total	No. per unit	unit
1	214	Cashewnut processing	253	99,970	395

All industries			2,222	21,2231	96	

Employees

The total employment in the factory sector during the survey year 1976-77 was reported as Rs. 2.6 lakhs as against 2.2 lakhs during previous year. Total employment was highest in cashewnut processing industry with 41.8 % of total employment while K. S. E. Board was the single largest employer. The average number of employees per unit was highest in generation and transmission of electric energy industry with 4,262 and was lowest in respect of saw mills with 22 as against a State average of 115. The employment in cashewnut processing, generation and transmission of electric energy, structural clay products, cotton spinning and weaving in mills, saw mills and tea processing together formed about 67 % of the factory employment in the State. These six industries employ more than 5,000 persons each. There were 27 industries with an employment of 1,000 persons or more and they are arranged in descending order in Table 2.8.

TABLE 2.8
Industries according to number of employees

Sl. No.	Code	Name of industry	No. of units	Employees		
				Total	No. per unit	
1	214	Cashewnut processing	253	1,07,192	424

All industries			2,222	2,55,995	115	

Wages to Workers

In the units responded to the survey an amount of Rs. 61.5 crores was paid as wages to workers during the year. The highest amount paid by way of wages was in cashewnut processing. Cashewnut processing, generation and transmission of electric energy, cotton spinning and weaving in mills, manufacture of structural clay products, fertilisers and pesticides and organic and inorganic chemicals together paid 51% of the total wages in the factory sector as a whole. There were 13 industry groups which paid wages above one crore. There were altogether 30 industry groups which paid wages to the tune of Rs. 28 lakhs or more and they are arranged in descending order in Table 2.9.

From the above table it may be seen that the average annual wages per worker was highest in aluminium manufacturing with Rs. 11,372 and the same was lowest in cashewnut processing industry. The average annual wages per worker in saw mills, tea processing, handlooms, sugar and canning and processing of fish were less than the State average. Cashew and sugar industries are seasonal in nature and hence number of days of work available in these industries are comparatively low. Consequently average annual earnings per worker will be less in these industries.

TABEL 2.9
Industries according to Wages to Workers

Sl. No.	Code	Name of industry	Wages to workers	
			Total Rs. in lakhs	Average wages per worker (Rs.)
1	214	Cashewnut processing	1,050.71	1,051.02
2	40	Generation and transmission of electrical energy	786.37	3,891.78
3	231	Cotton spinning and weaving in mills	451.81	5,336.73
4	320	Manufacture of structural clay products	300.82	2,979.33
5	311	Manufacture of fertilizers and pesticides	299.77	9,397.17
6	310	Manufacture of organic and inorganic chemicals	228.14	10,670.72
7	973	Repair of motor vehicles	189.95	6,602.40
8	247	Spinning, weaving and finishing of other textiles	137.27	8,229.49
9	271	Saw mills	130.02	2,571.58
10	285	Printing and publishing of books and journals	122.51	5,230.93
11	235	Weaving and finishing of cotton textiles in handlooms	115.85	2,741.39
12	270	Manufacture of veneer and plywood	110.50	3,961.91
13	212	Tea processing	101.43	2,246.47
14	302	Manufacture of other rubber products	98.46	3,085.64
15	300	Tyre and tube industries	94.69	11,127.72
16	360	Manufacture of transformers and electicals	93.07	7,762.31
17	335	Aluminium manufacturing	92.46	11,372.61
18	370	Shipbuilding and repairing	87.83	6,824.23
19	314	Manufacture of perfumes and lotions	82.93	8,594.16
20	268	Manufacture of coir and coir products	73.86	3,235.25
21	284	Printing and publishing of newspapers	67.00	6,157.65
22	313	Manufacture of drugs and medicines	49.46	4,825.81
23	203	Canning, preserving and processing of fish and similar foods	41.53	2,798.37
24	206	Manufacture and refining of sugar	38.20	2,054.65
25	331	Casting and forging of iron and steel	34.47	6,515.72
26	343	Manufacture of hand tools and hardware	32.73	3,873.26
27	289	Printing of picture and post cards	32.38	3,818.53
28	361	Manufacture of insulated wires and cables	32.27	7,646.75
29	380	Manufacture of surgical and medical instruments	32.15	7,390.07
30	276	Manufacture of wooden furniture and fixtures	28.34	4,268.37
All industries			6,152.39	2,898.91

Emoluments

Wages, salaries, bonus and imputed value of benefits in kind together form emoluments. The total amount thus paid by the factory sector during the year under report is reported as Rs. 99 crores. The highest amount of emoluments paid to employees was in generation and transmission of electric energy industry. This industry and cashew processing together spent 30% of the total amount spent on this account by the factory sector as a whole. The average annual emoluments per employee was highest in aluminium manufacturing industry.

IN tyre and tube industries also the annual average emoluments per employee was just below that of aluminium industry. The average emoluments per employee was lowest in cashewnut processing with Rs. 1,256 as against a State average of Rs. 3,861. The average annual earnings per employee in aluminium industry was $12\frac{1}{2}$ times higher than those in the cashew processing industry and about 8 times higher than what an employee in saw mills got by way of wages. Though average annual earnings were lower in cashewnut processing industry the daily earnings were lowest in saw mills. Though either of these two industries is in no way comparable with capital intensive industries like aluminium or tyre and tube ie. the imbalances existing in the average emoluments per employee between these industries are phenomenal.

There were 22 groups of industries which spent Rs. 1 crore or more on wages and salaries. Altogether 30 industries are arranged in descending order of their expenditure towards employees compensation in Table 2.10.

TABLE 2.10
Industries according to Total Emoluments to Employees

Sl. No.	Code	Name of industry	Emoluments	
			Total (Rs. in lakhs)	Average emolument to an employee (Rs.)
1	40	Generation and transmission of electrical energy	1,659.89	5,564.33
2	214	Cashewnut processing	1,346.00	1,255.69
3	231	Cotton spinning and weaving in mills	546.08	5,849.81
4	311	Manufacture of fertilizers and pesticides	517.86	11,984.66
5	310	Manufacture of organic and inorganic chemicals	405.54	13,149.95
6	320	Manufacture of structural clay products	382.60	3,393.67
7	973	Repair of motor vehicles	241.95	7,213.85
8	370	Shipbuilding and repairing	211.46	9,201.84

26	331	Casting and forging of iron and steel	69.68	8,956.18
27	380	Manufacture of surgical and medical instruments	54.08	8,938.11
28	281	Printing of picture and post cards	47.78	4,576.20
29	340	Manufacture of metal cans and tin plates	47.50	4,478.48
30	276	Manufacture of wooden furniture and fixtures	42.42	5,056.47
All industries			9,884.63	3,861.26

Input

The total input utilised by the factory sector during 1976-77 was estimated at Rs. 781 crores. Out of this 83% was in materials, 5% in fuels and 12% was in other items of input. The highest value of input utilisation was noticed in cashewnut processing industry. There were 10 industries with total input utilisation of Rs. 10 crores or more and in 30 industries it was 3 crores or more. The value of input required to produce Rs. 1,000 worth of output was worked out to be Rs. 774 for all industries while it was lowest in generation and transmission of electric energy with only Rs. 154 and highest in respect of edible oils with Rs. 966.

The industries are arranged in descending order of their expenditure towards input in Table 2.11

TABLE 2.11
Industries according to Total Input

Sl. No.	Code	Name of industry	Total input (Rs. in lakhs)	Value of input required to produce Rs. 1,000 worth of output
1	214	Cashewnut processing	5,724.76	738
2	311	Manufacture of fertilizers and pesticides	4,336.23	662

Output

The gross value of goods and services produced in the factory sector of the State during 1976-'77 is estimated at Rs. 1,009 crores. The value of output was highest in cashewnut processing industry with Rs. 78 crores or 7.7% of the total output in the factory sector. Fertilizers and pesticides occupied the second place with Rs. 66 crores. Cashew processing, fertilizers and pesticides, cotton spinning and weaving in mills and generation and transmission of electric energy together commanded 27% of the total output in the factory sector.

There were 36 industrial groups with a total output of Rs. 2 crores or more. These industries are arranged in descending order and presented in the Table 2.12.

TABLE 2.12
Industries according to Total Output

Sl. No.	Code	Name of industry	Total output (Rs. in lakhs)	Output per employee (Rs. in 1000)
1	214	Cashewnut processing	7,757.05	7.24
2	311	Manufacture of fertilizers and pesticides	6,553.54	92.60
3	212	Tea processing	4,709.03	93.21
4	231	Cotton spinning and weaving in mills	4,279.53	45.84
5	40	Generation and transmission of electrical energy	4,174.75	13.99
6	310	Manufacture of organic and inorganic chemicals	3,158.90	102.43
7	302	Manufacture of rubber products	3,145.07	77.01
8	203	Canning, preserving and processing of fish and similar foods	2,964.59	125.94
9	370	Shipbuilding and repairing	2,637.19	114.76
10	314	Manufacture of perfumes and lotions	2,594.06	190.60
11	211	Manufacture of other edible oils	2,489.48	299.22
12	300	Tyre and tube industries	2,059.03	164.33
13	335	Aluminium manufacturing	1,610.39	151.92
14	235	Weaving and finishing of cotton textiles in powerlooms	1,519.76	30.96
15	268	Manufacture of coir and coir products	1,519.71	45.58
16	360	Manufacture of transformers and electricals	1,497.62	86.27
17	247	Spinning, weaving and finishing of other textiles	1,414.88	67.47
18	361	Manufacture of insulated wires and cables	1,361.36	170.38
19	973	Repair of motor vehicles	1,173.32	34.98
20	271	Saw mills	1,100.71	12.79

22	284	Printing and publishing of newspapers	1,035.97	55.16
23	320	Manufacture of structural clay products	1,033.80	9.17
24	313	Manufacture of drugs and medicines	849.21	56.50
25	204	Manufacture of grain mill products	705.82	28.67
26	331	Casting and forging of iron and steel	607.85	78.13
27	340	Manufacture of metal cans and tin plates	575.69	69.03
28	219	Manufacture of food products—others	471.33	223.38
29	217	Manufacture of starch	455.27	80.29
30	330	Manufacture of iron and steel	451.27	45.40
31	285	Printing and publishing of books and journals	357.16	12.66
32	289	Printing of picture and post cards	254.27	24.36
33	206	Manufacture and refining of sugar	231.53	7.15
34	343	Manufacture of hand tools and hardware	230.41	22.37
35	341	Manufacture of structural metal products	204.82	48.19
36	202	Canning and preservation of fruits and vegetables	204.12	37.87
All industries			1,00,942.56	39.43

Value added

Value added by manufacture or net output provides a measure of the contribution made by resources of labour and capital in producing the output of an activity and is obtained by deducting the total value of input and depreciation from the total value of output.

The value added by manufacture in the factory sector during 1976-77 is estimated at Rs. 195 crores as against 149 crores during the previous year. The maximum contribution towards value added by manufacture comes from generation and transmission of electric energy industry with Rs. 30 crores, though this industry has only the fifth place in terms of gross value of output. This is because of the high value added output ratio associated with this industry. Cashewnut processing took the second place. Generation and transmission of electric energy, cashewnut processing, tea processing and fertilizers and pesticides together contributed 42% of the total value added in the factory sector.

There were 26 industry groups with a value added by manufacture worth Rs. 1 crore or more and they are arranged in descending order of magnitude in Table 2.13.

TABLE 2.13
Industries according to Value Added by Manufacture

Sl. No.	Code	Name of industry	Value added by manufacture (Rs. in lakhs)	Value added per employee (Rs.)
1	40	Generation and transmission of electrical energy	2,980.28	9,991
2	214	Cashewnut processing	2,008.23	1,873
3	212	Tea processing	1,709.85	33,845
4	311	Manufacture of fertilizers and pesticides	1,522.04	21,507
5	310	Manufacture of organic and inorganic chemicals	720.91	23,376
6	231	Cotton spinning and weaving in mills	663.88	7,112
7	314	Manufacture of perfumes and lotions	642.94	47,240
8	320	Manufacture of structural clay products	556.05	4,932
9	302	Manufacture of rubber products	522.21	12,787
10	360	Manufacture of transformers and electicals	512.77	29,538
11	300	Tyre and tube industries	456.85	36,460
12	973	Repair of motor vehicles	441.19	13,154
13	335	Aluminium manufacturing	406.12	38,313
14	268	Manufacture of coir and coir products	339.47	10,182
15	203	Canning, preserving and processing of fish and similar foods	321.08	13,640
16	235	Weaving and finishing of cotton textiles in powerlooms	316.45	6,446
17	313	Manufacture of drugs and medicines	298.45	19,857
18	270	Manufacture of veneer and plywood	293.26	8,513
19	247	Spinning, weaving and finishing of other textiles	270.29	12,889
20	271	Saw mills	258.14	2,999
21	284	Printing and publishing of newspapers	217.39	11,576
22	370	Ship building and repairing	216.58	9,425
23	361	Manufacture of insulated wires and cables	210.21	26,309
24	285	Printing and publishing of books and journals	201.98	7,157
25	330	Manufacture of iron and steel	126.26	12,702
26	331	Casting and forging of iron and steel	119.94	15,416
All industries			19,489.39	7,613

Net Income

Net income represents the share of employees and entrepreneur in the value added and is obtained by deducting the factor payments to others from the value added.

The total net income generated in the factory sector during the year 1976-77 was estimated at Rs. 164 crores. The net income earned was highest in generation and transmission of electric energy industry followed by cashewnut processing and tea processing. The net income generated in tea industry shows a record growth of 242% over the previous year as a result of increased output and price per unit of output.

There were 19 industry groups with a net income of Rs. 2 crores or more. These industries are arranged in descending order of magnitude and given in Table 2.14.

TABLE 2.14
Industries according to Net Income

Sl. No.	Code	Name of industry	Net income (Rs. in lakhs)
1	40	Generation and transmission of electrical energy	2,814.96
2	214	Cashewnut processing	1,865.70
3	212	Tea processing	1,705.74
4	311	Manufacture of fertilizers and pesticides	958.25
5	314	Manufacture of perfumes and lotions	545.46
6	320	Manufacture of structural clay products	521.81
7	231	Cotton spinning and weaving in mills	506.54
8	310	Manufacture of organic and inorganic chemicals	482.25
9	302	Manufacture of rubber products	472.03
10	973	Repair of motor vehicles	435.64
11	360	Manufacture of transformers and electicals	427.32
12	335	Aluminium manufacturing	404.91
13	300	Tyre and tube industries	388.92
14	268	Manufacture of coir and coir products	308.57
15	235	Weaving and finishing of cotton textiles in powerlooms	297.62
16	313	Manufacture of drugs and medicines	270.87
17	270	Manufacture of veneer and plywood	238.76
18	271	Saw mills	238.02
19	203	Canning, preserving and processing of fish and similar foods	236.73
20	285	Printing and publishing of books and journals	196.08
21	247	Spinning, weaving and finishing of other textiles	195.48
22	284	Printing and publishing of newspapers	173.37
23	361	Manufacture of insulated wires and cables	164.39
All industries			16,386.95

Structural ratios in Selected Industries

Some important structural ratios in respect of 27 industries have been worked out and presented in Table 2.15.

The table reveals that on an average, a factory utilised a fixed capital of Rs. 24 lakhs and a productive capital of Rs. 33 lakhs, employed 115 persons and produce goods and services worth Rs. 45 lakhs.

To provide employment for one person on an average, a factory utilised Rs. 21,210. Fixed capital per employee was highest in respect of chemical fertilizers and pesticides with Rs. 1,32,887 and lowest in cashewnut processing with only Rs. 190.

The output per employee in the factory sector as a whole was estimated at Rs. 39,430. The output per employee was highest in the manufacture of soaps and glycerine and it was lowest in sugar just below cashewnut processing. The latter two are seasonal industries and hence this need not be taken as an index of productivity of labour in those industries.

The value added per employee was a negative figure in sugar while it was highest in soaps and glycerine with Rs. 47,240 as against a State average of Rs. 7,613. The high increase in value-added per employee in tea industry was due to very high price per unit of output fetched by tea during the year under report.

The capital output ratio of units in the factory sector worked out to 0.53 while this ratio was highest in generation and transmission of electric energy industry with 6.1 ; it was the lowest in cashew and tea with 0.02 each. These two industries required only very little capital for producing a unit of output.

The factory sector had to pay 9 paise on an average as emoluments for each rupee of goods and services produced. This amount was highest in respect of generation and transmission of electric energy industry.

Ratio of fixed capital to value added was 12.29 in sugar and 8.55 in generation and transmission of electric energy industry as against a State average of 2.78.

Emoluments constituted 50% of the total value added in the factory sector. This was lowest in tea processing with only 9%.

The ratio of operating surplus to output was 0.09 for the sector as a whole while it was highest in respect of tea with 32% and was lowest in respect of sugar with a negative figure. In fact the sugar industry was losing 37 paise per every rupee of output produced by this industry. So also medical, surgical and scientific equipments was losing to the tune of 11 paise per output worth Re. 1.

The ratio of operating surplus to productive capital for the sector as a whole was 13% while it was highest in respect of tea with 207% and was lowest in respect of sugar with -50%. The sugar industry was losing 50 paise out of every rupee of productive capital so also medical, surgical and scientific equipments industry was losing 22 paise out of every rupee of productive capital utilised by that industry. In sharp contrast to the above tea industry was earning an operating surplus of Rs. 2.07 per every rupee of productive capital utilised by it.

SECTION III

DISTRICTWISE ANALYSIS OF SELECTED INDUSTRIAL CHARACTERISTICS— ALL INDUSTRIES

The districtwise distribution of major industrial characteristics and their respective percentages are presented in Tables 3.1 and 3.2. Industrywise details of major industrial characteristics in each district are given in Tables 3.3 to 3.13. With the aid of these Tables an analysis of industrial growth of the districts is presented in the following pages.

Trivandrum

There were 90 industrial units in this district during the year 1976-77. These units (4%) together have utilised 49% of the total fixed capital and 43% of the total productive capital in the factory sector of the State. 16% of the total employment, 7% of the total output and 20% of the total value added by manufacture in the factory sector was from this district. Though the generation and transmission of electric energy by the Kerala State Electricity Board are stretched to the length and breadth of the State, the data in respect of this industrial giant is included in this district by virtue of the location of its headquarters at Trivandrum. The high percentage share of industrial characteristics in the Trivandrum district was due to the direct result of this phenomenon. Hence a rational criterion has to be evolved for the apportioning of the characteristics of this industry between the districts for any meaningful analysis of districtwise industrial growth. Consumption of power could be one such criterian.

Cashewnut processing, handlooms and repair of motor vehicles are the major industries in the district. Though employment and the value of output were higher in cashewnut processing industry, value added was highest in handlooms.

Quilon

There were 385 units in Quilon district during the year under report. This formed 17.3% of the total units in the State. But the fixed capital utilised by these units formed only 2.7% of the total fixed capital, but provided employment to as much as 45.5% of the total employment in the factory sector of the State. 12% of the total output and 14% of the total value added by manufacture were from this district.

Out of a total of 385 units 221 units belonged to the cashewnut processing industry alone. As a matter of fact there was a concentration of cashewnut processing industry in this district. Structural clay products is the other important industry in the district.

Alleppey

There were 135 industrial units in this district during the year under survey. The district shared 6% of total units, 2.2% of total fixed capital, 2% of the total employees and 4% of the total value added by manufacture. Coir manufacturing is the predominant industry in the district. In fact there was a concentration of this industry in this district. Oil milling and canning, curing and preserving of fish and other seafoods are the other important industries in the district.

Kottayam

Though 5% of the total units in the factory sector is located in this district the share of fixed capital was only 1% and of factory employment was 2%. The value added by manufacture formed 3.6% of total value added.

Out of a total of 116 units 43 units belonged to the other rubber products industry. Hence it may be seen that there was a fairly good concentration of this industry in the district. Wood industry is another important industry in the district.

Idukki

There were only 92 factories in this district during the year under study. Though this formed 4% of the total units, they commanded only 0.7% of the total fixed capital. But the contribution of these units towards value added is estimated to be 7% of the total value added by manufacture in the State.

Out of the 92 units as many as 70 were tea processing units. Saw mills and other rubber products had nine units each in the district. There was a high degree of concentration of tea industry in this district.

A sizable investment had been made in this district on the generation and transmission of electric energy industry by virtue of the centre of location of major hydro-electric projects in the district. But the data in respect of these projects are not separately available at present. If this factor is also taken into account the mistaken notion about the industrial backwardness of this district will be uncovered.

Ernakulam

The share of Ernakulam district in the factory sector is substantial when compared to other districts. 14% of the units, 35% of the fixed capital, 48% of the total output and 30% of the total value added by manufacture is shared by this district. There is no concentration of any single industry in this district, perhaps with the exception of chemical industries. Saw mills is the industry with the highest number of units. Canning, curing and preserving of fish and similar foods, printing and publishing, heavy chemicals, structural clay products, metal containers, ship building and repairing and repair of motor vehicles each have 10 or more units in the district. Hence it may be seen that there is good dispersal of several industries in the district.

Trichur

319 factories were located in this district during the year under study. These units together utilised 2% of the total fixed capital and produced 4% of the total of output with a 3.6% contribution towards value added by manufacture.

The highest number of factories belonged to the structural clay products with 123 units. Saw mills are other important industry in this district. In fact the influence of structural clay products industry in the economy of the district is significant.

Palghat

There were 192 units in the district during the survey year 1976-77. The share of these units in the total fixed capital was only 1.8%. The share of this district towards value added was estimated to be 2.8% of the total value added by manufacture in the State. Saw mills and grain mill products are most important industries of the district. In terms of capital investment cotton textiles had a lead over all other industries. The district being a granary of the State there is a concentration of grain mill products industries in this district.

Malappuram

Malappuram district is the most backward district of the State. There were only 42 industrial units in the district. They shared only 0.3% of the total fixed capital investment of the factory sector of the State. Though saw mills (with 9 units) have the largest number of units, the highest fixed capital investment was in edible oil industry. The total employment in the factory sector was only 3,101 in this district.

Kozhikode

There were 292 units in the district during the year 1976-77 with 3.8% share of total fixed capital, 6% share in total employment, 6% share each in total output and total value added by manufacture in the factory sector. Out of the total units 105 units were saw mills. Handloom, structural clay products, tea processing, plywood, other rubber products and repair of motor vehicles industries have 10 or more units in each of them. Though fixed capital investment was highest in saw mills, employment opportunities were higher in structural clay products. Concentration of any particular industry was not visible in this district. There were 21 industry groups with 3 or more units in them in this district as against 25 in Ernakulam district and 19 in Trichur district.

Cannanore

There were 244 industrial units in this district. These units together commanded only 1% of the total fixed capital, 5% of the total employment and 4% each of the total output and value added for the sector as a whole. Out of the total of 244 units 79 were handlooms and 69 were saw mills. Employment in weaving and finishing of cotton textiles on handlooms show a decline of about 109% over the last year. There was a concentration of handloom units in this district.

The above discussion reveals that the major industries in the traditional sector like cashew, coir, tea and handloom are concentrated in certain districts, while industries like structural clay products and wood industry, play crucial roles in the economy of several districts. Since Ernakulam, Kozhikode and Trichur districts have a fairly large variety of industries without much concentration of any particular industry, these districts have a comparatively higher potential for industrial growth.

Relative importance of Districts (All Industries)

The above discussion reveals that some of the districts are comparatively advanced in the industrial sector while others are lagging behind. In order to assess the relative importance of the districts in the industrial development of the State, districts are arranged in descending order of their contribution towards value added by manufacture. As mentioned earlier that since the activities of the Kerala State Electricity Board are spread throughout the State, inclusion of data on Kerala State Electricity Board in Trivandrum District just because the headquarters of the KSEB happened to be at Trivandrum will distort the indicators of development in the factory sector of the district, the data in respect of generation and transmission of electric energy industry have been excluded for this purpose.

TABLE 3.0

Arrangement of Districts according to their Contributions towards Value added by Manufacture (excluding Electricity)

Sl. No.	Name of the district	Value added (Rs. in lakhs)	Percentage to the total
1	Ernakulam	5,757	34.9
2	Quilon	2,766	16.8
3	Idukki	1,396	8.5
4	Trichur	1,294	7.8
5	Kozhikode	1,222	7.3
6	Trivandrum	976	5.9
7	Cannanore	846	5.2
8	Alleppey	790	4.8
9	Kottayam	701	4.2
10	Palghat	547	3.3
11	Malappuram	215	1.3
State		16,509	100

As in the previous years Ernakulam took the first place with 34.4% share in the contribution of districts towards value added by manufacture. Quilon district was second in this respect with 16.8% of the total value added. Malappuram as usual occupied only the lowest rung of the ladder. While Ernakulam and Quilon contributed about 52% of the total value added by manufacture all the other nine districts accounted 42% only. Hence it may be seen that while these two districts are fairly industrialised, the remaining districts lag very behind in this respect. Besides Ernakulam and Quilon, the potential for industrial development in Kozhikode and Trichur Districts are comparatively higher than other districts while the third place of Idukki is only due to its prominence in Plantation Industry.

In order to assess the relative level of development between the districts from various angles, a few economic indicators relating to the factory sector are presented in Table 3.14. The data relating to generation and transmission of electric energy industry has been excluded for working out these economic indicators for reasons stated earlier in this report.

TABLE 1—(Contd.)

Code No.	Sl. No.	Name of industry	No. of units		Productive capital	Invested capital	Working capital	Total loans outstanding
			(1)	(2)				
38	310.1	Manufacture of heavy organic chemicals	No.	Rs.	Rs.	Rs.	Rs.	Rs.
39	311.3	Do. mixed fertilizers	20	3346.97	3504.83	2484.27	862.70	2283.53
40	311.5	Do. pesticides formulations	11	64.22	64.24	7.46	56.76	5.98
41	313.1	Do. allopathic medicine	3	4.87	7.87	3.09	1.78	4.63
42	313.2	Do. ayurvedic medicine	14	204.15	207.46	89.05	115.10	189.46
43	314.8	Do. soaps, soap powder, glycerine and detergents synthetic resin	17	191.42	200.12	69.28	122.14	42.50
44	316.2	Do. matches	6	806.29	1023.62	330.44	475.85	664.22
45	317	Do. tiles and bricks	4	77.39	73.78	25.20	52.19	52.45
46	320.4	Do. other structural clay products	8	2.51	3.41	0.82	1.69	0.29
47	320.9	Do. chinaware	206	465.84	484.81	243.30	222.54	210.88
48	323.1	Do. home pipes	3	4.87	4.86	3.66	1.22	0.14
49	329.1	Do. iron and steel	5	75.97	50.25	19.80	56.17	28.19
50	330.1	Do. steel castings and forgings	9	285.59	533.68	432.48	(-) 146.89	517.33
51	331.1	Do. materials by casting and forging of iron and steel drums, tanks and metal containers not elsewhere classified	9	24.61	23.63	12.21	12.40	12.22
52	331.9	Do. other fabricated products	4	298.13	322.42	128.52	169.61	251.70
53	340.3	Do. structural metal products	27	255.81	239.71	95.12	160.69	59.07
54	340.9	Do. furniture and fixtures primarily by metal hand tools and implements	3	16.38	15.36	3.66	12.72	8.80
55	341	Do. general hardware etc.	22	70.62	59.78	32.61	38.01	49.17
56	342	Do. metal products except machinery and transport equipments not elsewhere classified	6	42.17	50.42	18.64	23.53	47.45
57	343.5	Do. other industrial machinery	3	10.84	12.79	6.72	4.12	5.08
58	343.9	Do. machine tools, parts and accessories	14	42.31	34.59	23.02	19.29	36.46
59	345	Do. weighing machines	19	110.01	107.30	27.82	82.19	76.53
60	349	Do. other accessories including general jobbing engineering	3	5.15	7.77	6.21	(-) 1.06	6.41
61	354.9	Do. parts, accessories and others	10	24.60	28.08	13.01	11.59	20.44
62	357	Do. insulated wires and cables	7	41.37	34.71	15.13	26.24	29.74
63	358.6	Do. other accessories including general jobbing engineering	4	4.94	2.93	1.37	3.57	3.36
64	359.9	Do. weighing machines	11	53.79	59.85	475.91	659.11	435.81
65	360.2	Do. transformers	3	1135.02	1148.12	4.02	4.55	3.15
66	360.9	Do. parts, accessories and others	3	4.94	4.02	480.94	450.43	174.71
67	361	Do. insulated wires and cables	4	4.94	4.02	7452.11	7501.96	6032.88
68	370.1	Making of ships and other vessels drawn by power	9	4.94	4.02	135.45	135.45	24.95
69	370.2	Boat building	13	48.83	48.83	28.04	14.76	13.60
70	376	Manufacture of bicycle, cycle-rickshaws and parts	4	28.36	5.21	5.94	2.42	2.79
71	387.2	Do. pencils	3	4.94	2.00	1.86	0.78	0.73
72	389.6	Do. hair brushes, dusters, scather articles and wigs	4	7.54	7.54	6.85	5.42	2.12
73	972	Electrical repair shops	5	164.11	168.89	134.08	30.03	1.11
74	973	Repair of motor vehicles and motor cycles	5	17284.69	21048.82	12806.40	4448.28	16.72
75		Other industries	196	17284.69	21048.82	12806.40	4448.28	4804.65
