PREFACE

Considering the demand for statistical information for decentralised planning, the State Planning Board and the Department of Economics and Statistics have designed many schemes to collect and publish data at Panchayat and Nagarapalika level. The most important scheme is a Socio-Economic Census under which a wealth of information regarding the Socio-Economic conditions of all households of Kerala numbering about 60 lakhs will be collected. The scheme for the collection of Agricultural Statistics in the State is also redesigned to generate data at Panchayat and Municipality level. The results of these exercises will be available only after one year.

Meanwhile the Government of Kerala conducted the Panchayat and Municipal elections and the newly elected local committees assumed power. To enable the newly elected functionaries to study the local resources and to start planning process backed by statistical information it was decided to document the available data from various sources in a single publication at District level. This report for Pathanamthitta district is the fifth in the series.

This report was prepared by Sri P.P. Sajeevan, Taluk Statistical Officer, District Office Economics and Statistics Pathanamthitta under the guidance of Sri. D. Rajan, Deputy Director. I hereby acknowledge the valuable services of Sri. M. Madhavan Namboodiri, Assistant Director and Smt. S. Leelamony, Research Officer and staff in the publication division of the Directorate for finalising the tables.

It is hoped that this publication would be of considerable use to the planners at panchayat/municipality, block and district levels and others interested in decentralised planning.

DISTRICT PROFILE

PATHANNAMTHITTA

Introduction

Pathanamthitta District was formed on 1st July 1983 by adjoining the portions of Alappuzha and Kollam Districts. It is bounded by Alappuzha in the west, Tamil Nadu State in the east, Idukki and Kottayam in the north and Kollam in the south.

Physical Features

The total area of the district is 2642 Sq. Kms and having three natural divisions namely, the low level, the, mid land and the high land. A large portion of the high land comprises of Revenue forests. This region is at an altitude ranging from 500 to 1000 meters above mean sea level. In the whole District moderate climate prevails with temperature ranging from 20 ° C to 39 ° C. The district gets 75 percent of rain from the south-West Monsoon. The district is a land-locked district with no coast line or back waters.

Demographic features

According to 1991 Census total population of the district is 1186561. The density of population is 450. The density of population is low because of the large area is under forest. The sex ratio of population is 1062. The total literacy rate is 94.86 percent.

Development features

The district has very fertile soil rich in all plant nutrients. The soil can be classified into Kari, Alluvial and Laterite. The Kari Soil is seen in the three blocks of Pulikeezhu, Pandalam and Kulanada. Alluvial Soil occurs on the banks of the three major rivers viz. Pampa, Achancovil and Manimala. The economic and agroclimatic features of the district also favour broiler Poultry, Piggery, Rabbit rearing etc. More than 75 percent of the population are meat eaters which offers good scope for their activities.

Inland fishery development offers good scope in the district. There are two fish breeding centers at Punnivelichira and Polachira under the Fisheries Department. The major crops grown in the district are Rubber, Coconut, Tapioca, Paddy and Pepper. There is good net work of banks and the C.D. Ratio is decreasing every year due to large foreign remittance. The district is industrially backward.
