Population Studies No.110

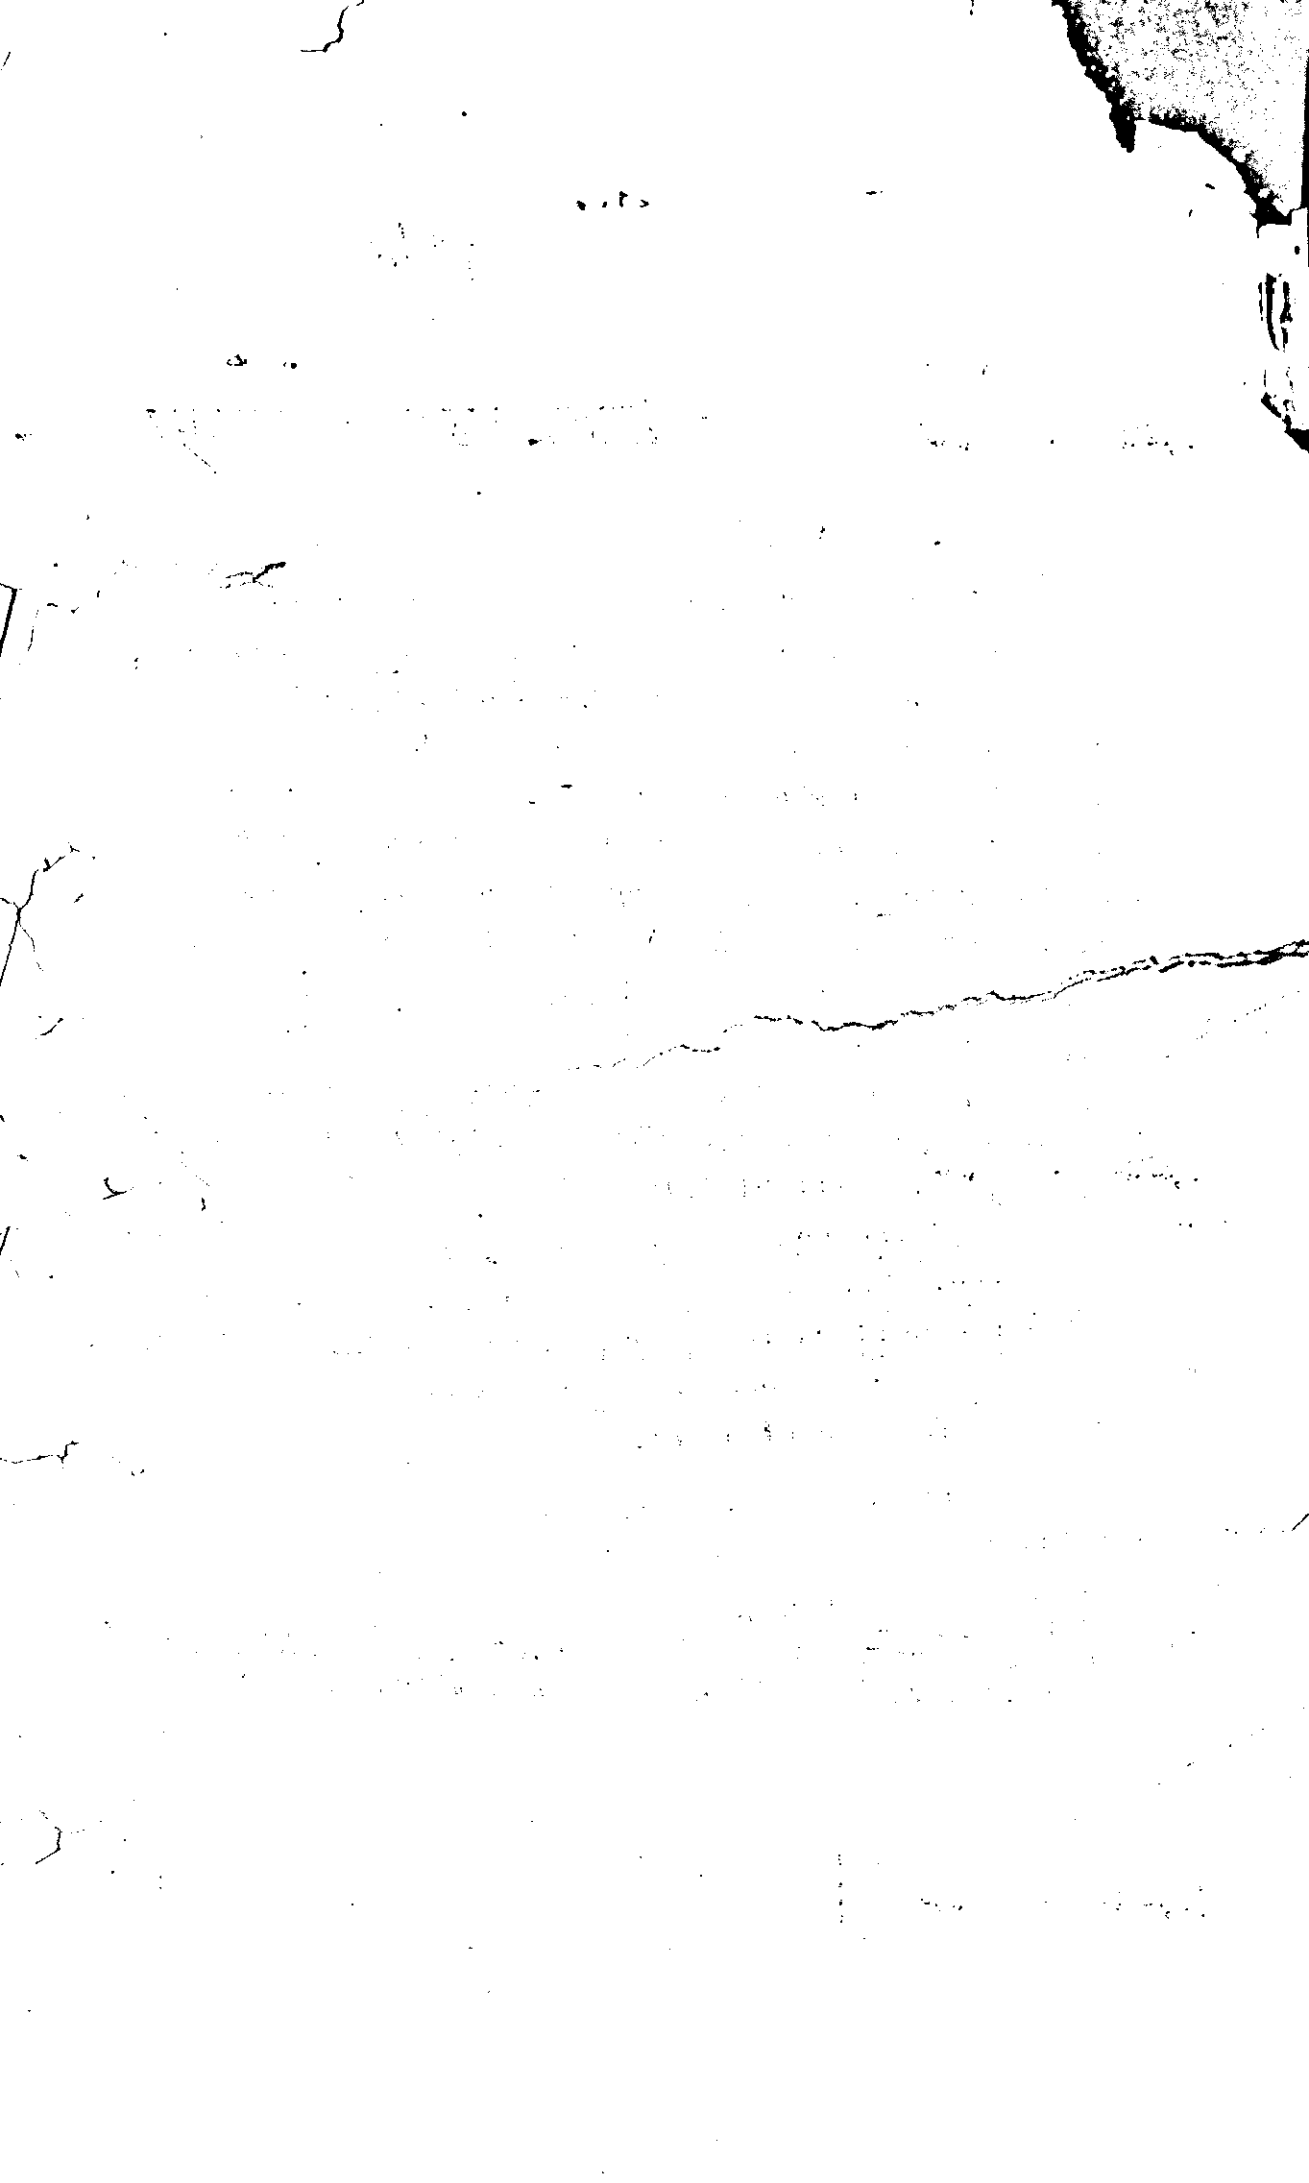

PREFACE

This report gives the registered rates of vital events for the State for the year 1968 based on the data obtained through normal registration. The different vital rates given in the report show that the vital statistics registration system in the State is far from complete as only about 50% of the vital events are registered. In the case of infant deaths, still births and maternal deaths the coverage and the completeness of registration are still worse. The report is an indication of the fact that considerable efforts have to be taken to stimulate and encourage compliance with the compulsory registration law.

The report was prepared by Sri N.Vikraman Nair, Research Officer assisted by Sri C.G.Netto, Research Assistant under the guidance of Sri S.Bhagavatheswara Iyer, Deputy Director of this Bureau.

Bureau of Economics
and Statistics,

VITAL STATISTICS BULLETIN - 1968

1. Introduction:-

The Vital Statistics of the State for the calendar year 1968 are presented in this issue of Bulletin.

2. Collection of data from the primary agencies:-

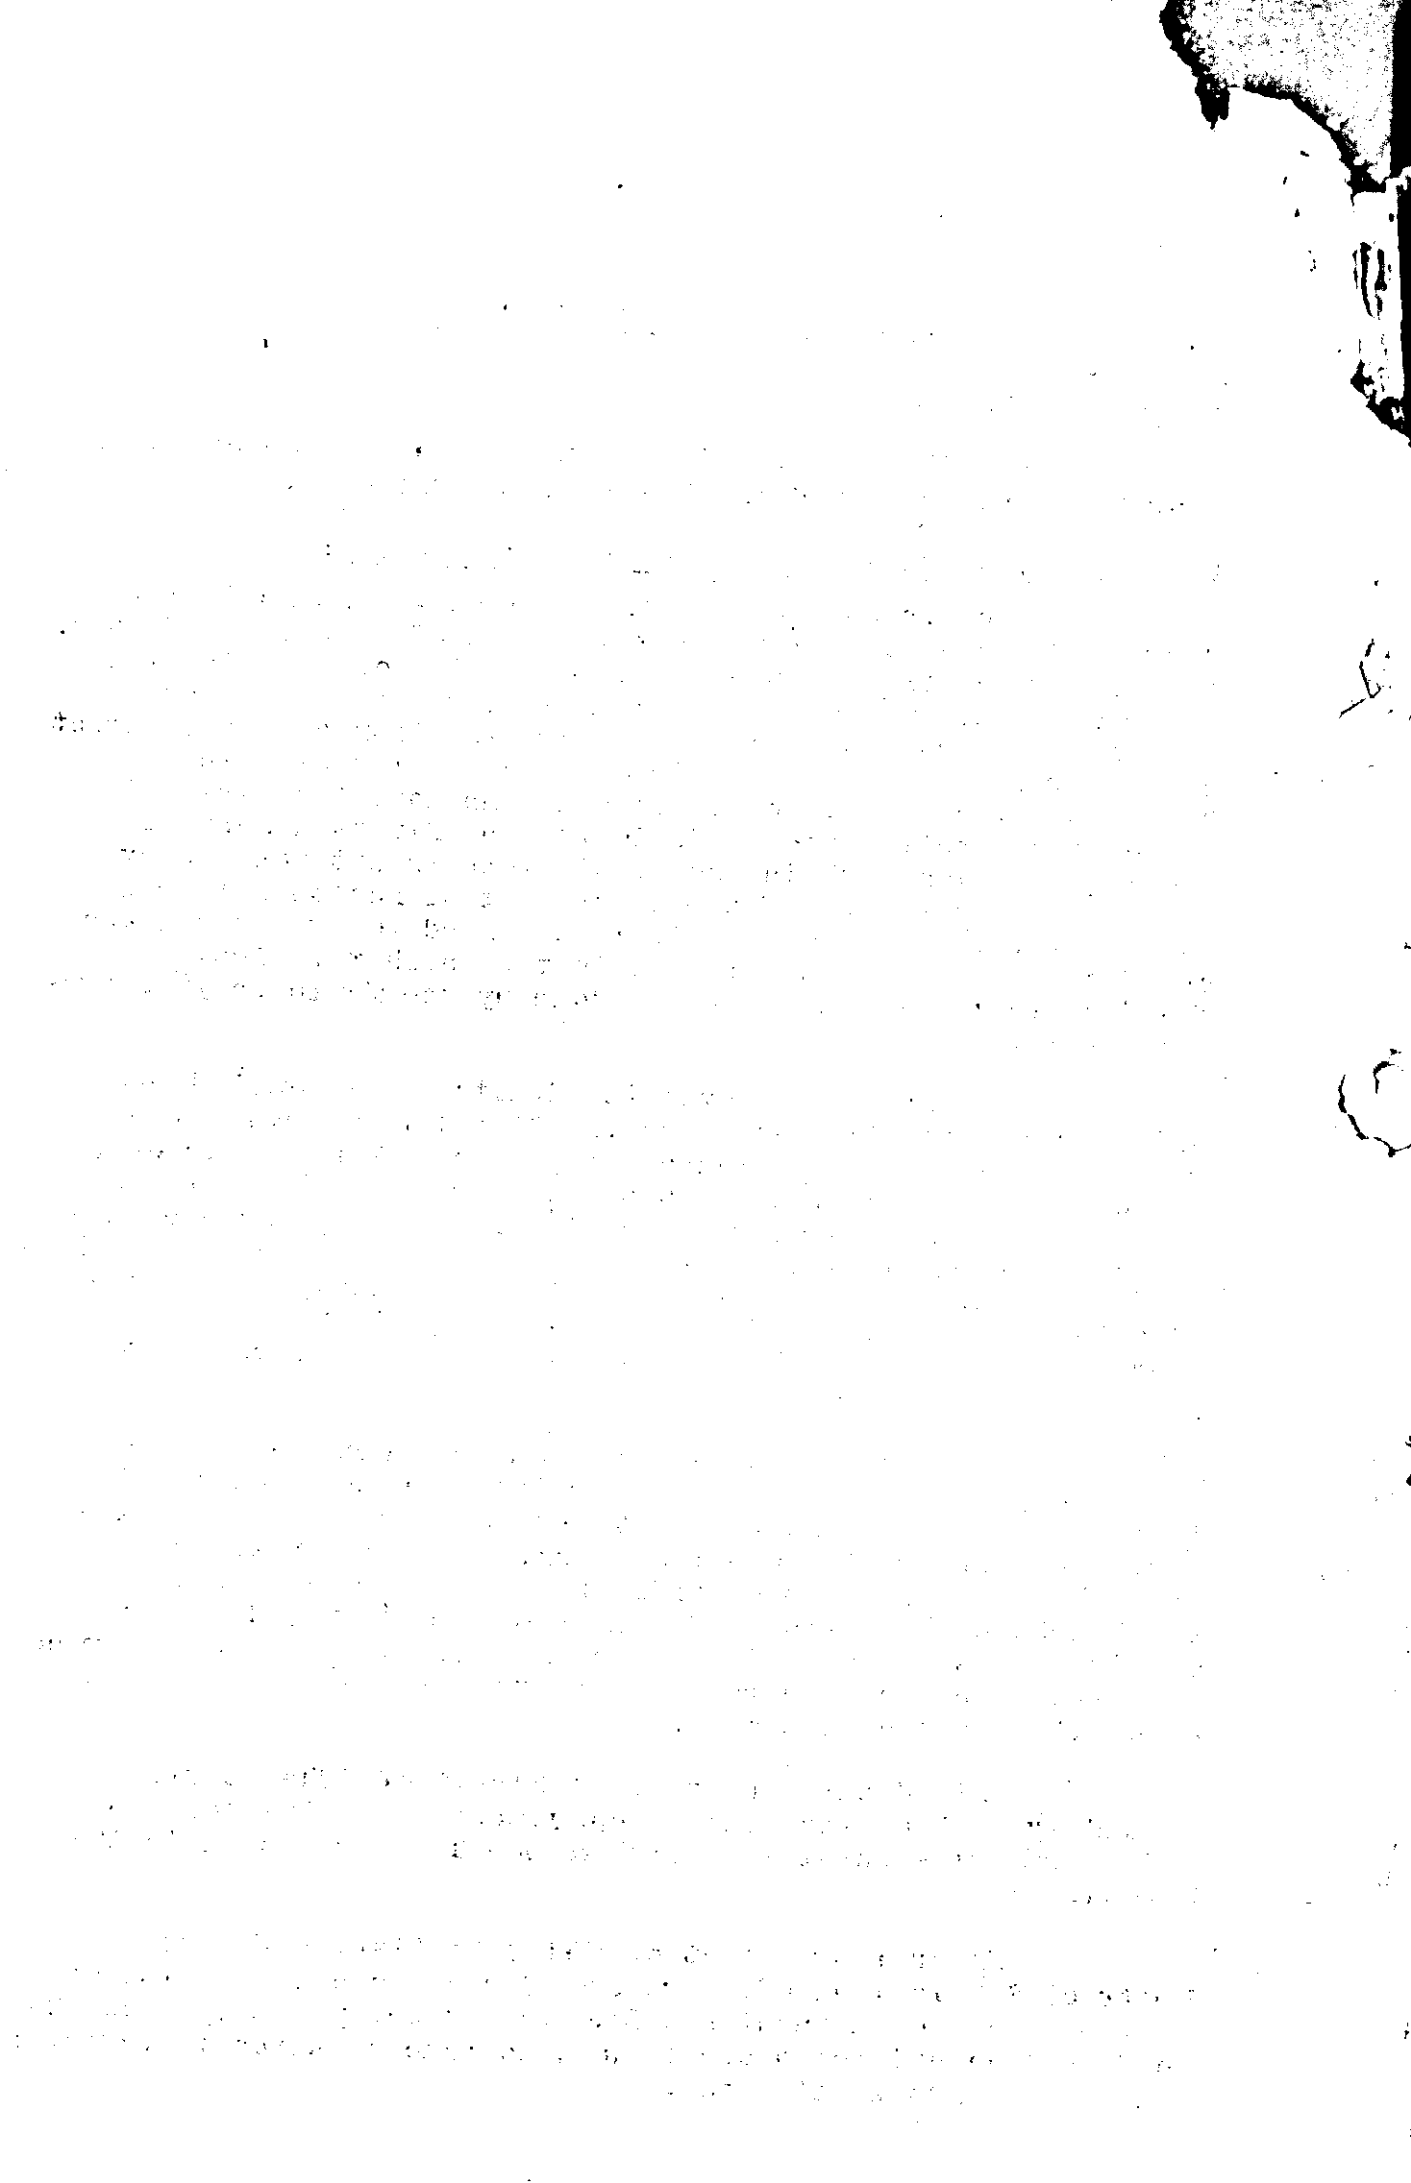

The Director of Health Services is the Registrar General of the State for the registration of births and deaths. In the T.C. portion of the State consisting of six Districts of Trivandrum, Quilon, Kottayam, Alleppey, Ernakulam and Trichur the District Medical Officers function as the District Registrars; and in the Malabar area consisting of three Districts of Palghat, Kozhikode and Cannanore the District Collectors function as the Registrars of Births & Deaths. The Registration work in the rural areas is attended to by the Health Assistants of the Department of Health Services in the T.C. region where as it is attended to by the village staff of the Revenue Department in the Malabar region. In the Municipal towns the work is done by the Municipal/Corporation staff.

At the lowest level the Health Assistant/Village Officers who are designated as the "Local Registrars" are responsible for the maintenance of Birth & Death Registers. The details of the vital events are transferred to Birth and Death report cards prescribed by the Bureau of Economics and Statistics, the cards are forwarded periodically to the Taluk Registrars in the Rural areas and to the Municipal/Corporation Commissioners in the Municipal areas who in turn forward them to the Bureau of Economics & Statistics for compilation, consolidation and reporting.

The Birth & Death report cards in respect of towns having a population of 30000 and above are received weekly in the Bureau of Economics & Statistics from the respective Municipal/Corporation Commissioners. From other towns and from the rural areas the cards are received every month in the Bureau of Economics & Statistics through the Municipal Commissioners or Taluk Registrars as the case may be. Returns relating to a week are received in the office within 7 days after the close of the week.

This department availed itself of "The Service Unpaid system" of the postal department from 1964 for the quick transmission of the Birth & Death report cards to the Bureau.

Under improvement of Vital Statistics Scheme the District Statistical Officers and Senior Research Assistants of the Bureau of Economics & Statistics carry out spot checks to detect unregistered events and to take measures to register the events thus spotted out.

3296

In all the Corporations and Municipalities of the State separate statistical Cells are functioning for improving the registration of vital events. The Statistical staff conducts spot checks in the randomly selected wards in the respective Corporations/Municipalities and detect the unregistered events to get them registered and to assess the extent of under-registration. The results of the spot check are used to estimate the residential rates of the vital events in the respective municipal towns.

3. Control of receipt of returns:-

A two fold control is exercised to ensure the smooth flow of returns one by the Dist.Statistical Officers and the other by the V.S. Section at the Headquarters. The Municipal Commissioners have to intimate the Dist.Statistical Officers whether the returns due to the department have been despatched in time. Whenever the Dist.Statistical Officer has not received intimation he will depute one of his staff for spot enquiry. From the headquarters a list of defaulting Taluk Registrars will be furnished to Dist.Statistical Officers to pursue further action. / office.

The Tahsildars and Medical Officers of the Primary Health Centres also keep a control register regarding the receipt of returns from the Registrars.

4. Registration areas:-

There are 1219 registration areas in the State. 1158 rural and 61 urban. The average number of defaulting units is 59 per month. The highest (72) being in April and the lowest(34) in March. No attempt is made to adjust the rates for the respective months because of the non-receipt of returns as the events might have been registered in later months by relaxation of relevent rules.

5. Training in Vital Statistics:-

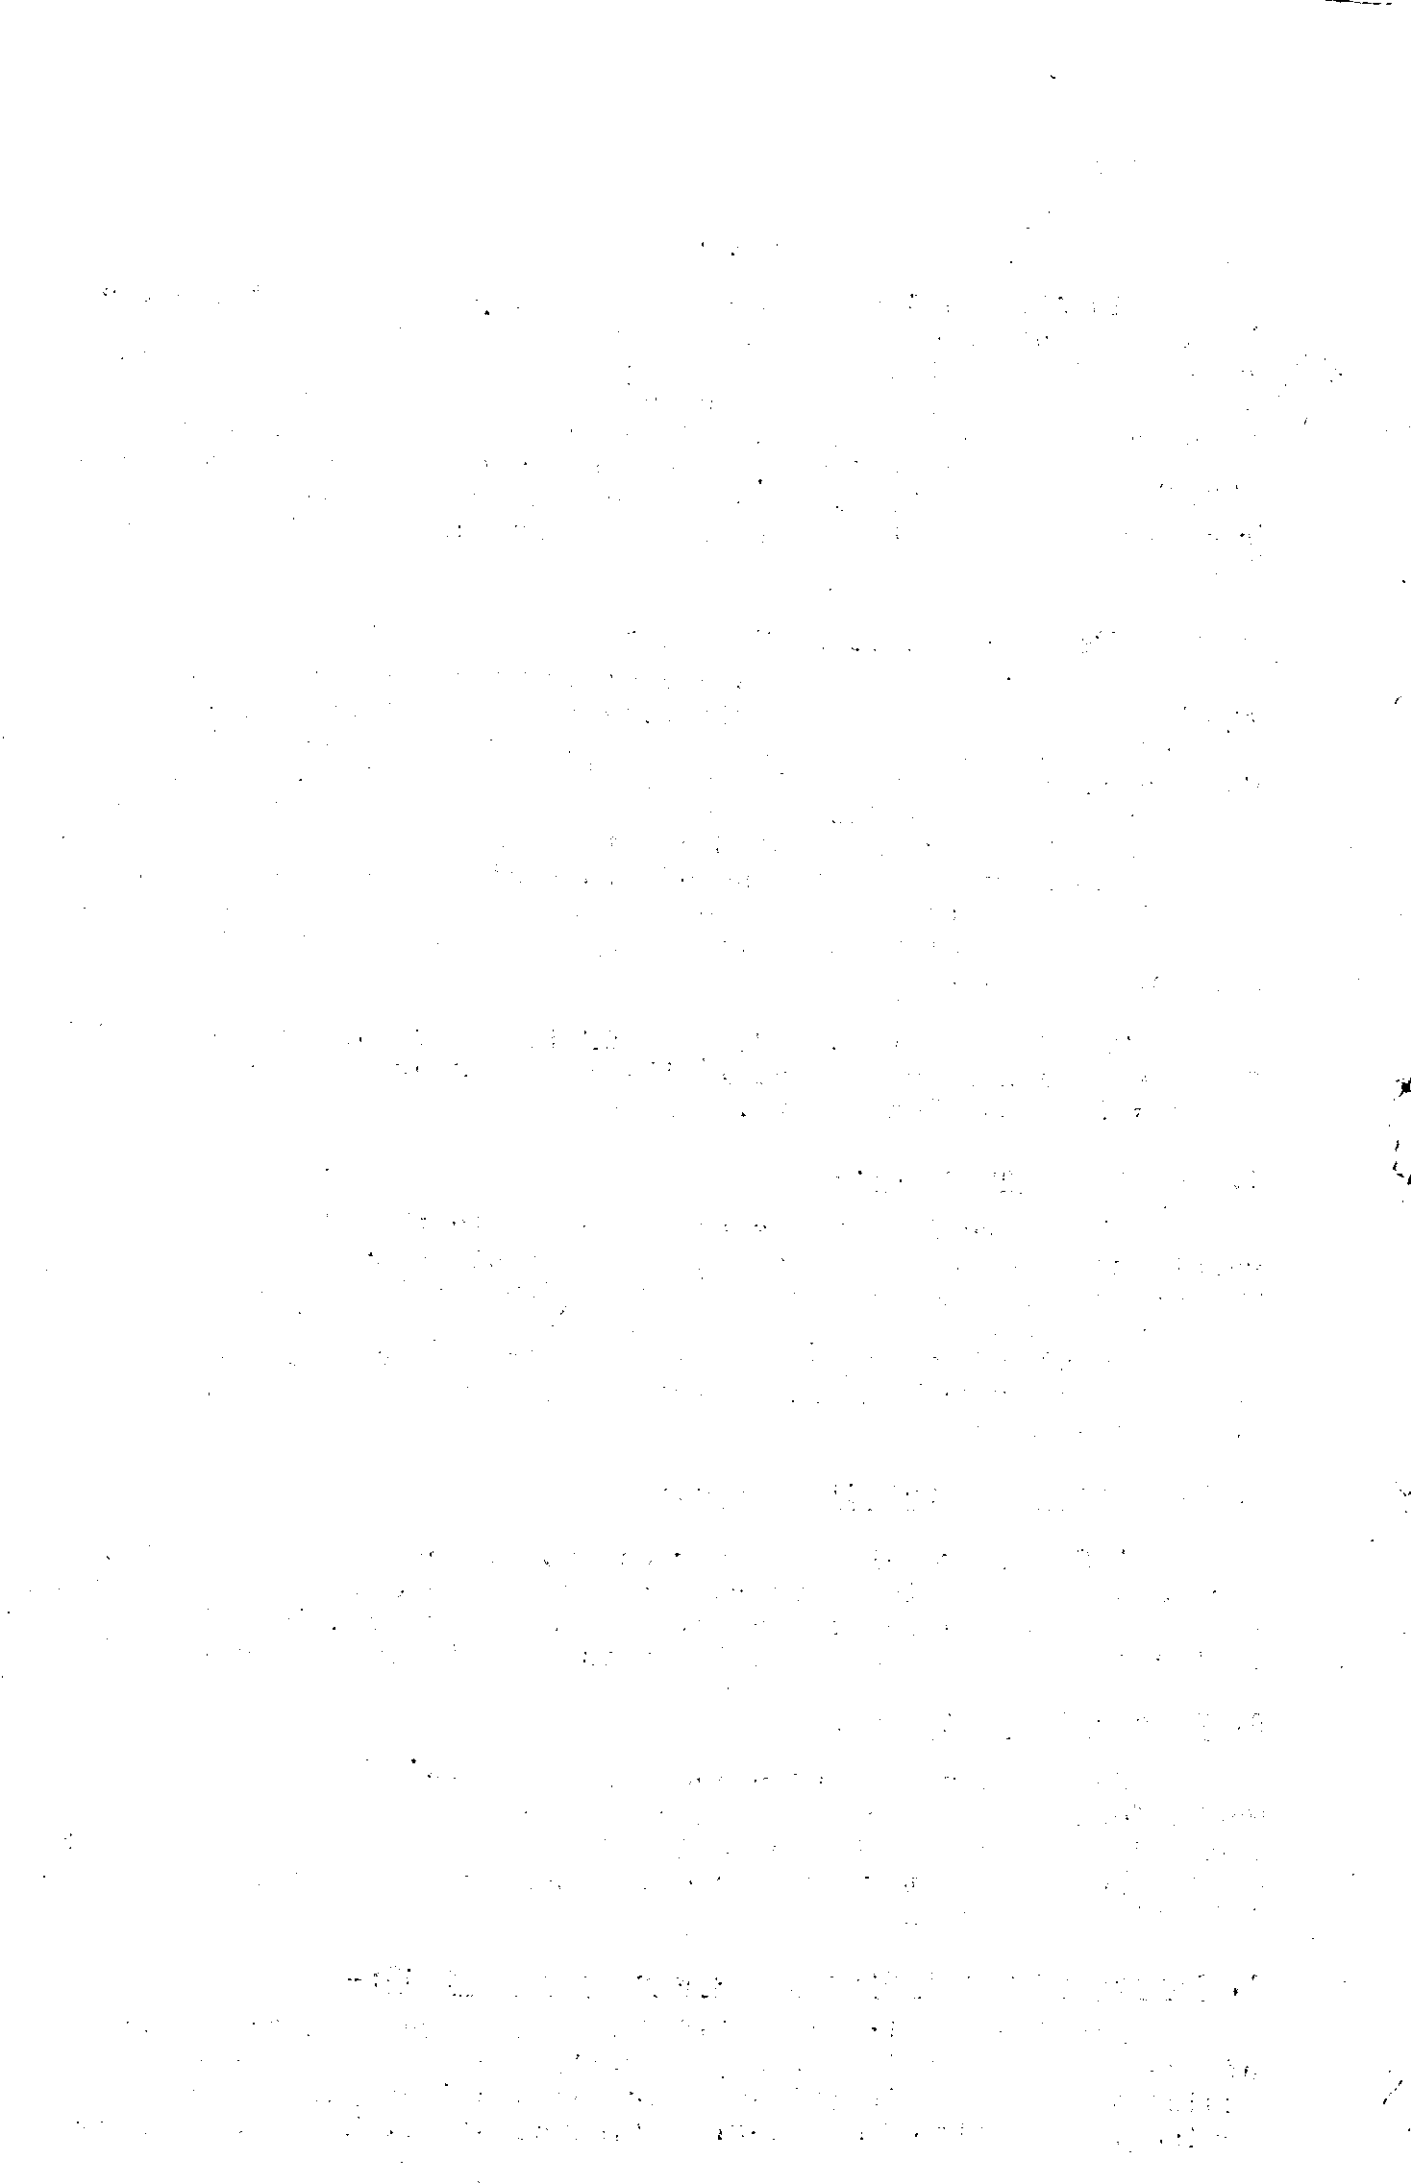

A State Training Officer was appointed from August 1966. His main function is to improve registration and vital statistics through education and training. He conducts training classes to the personnel engaged in the vital statistics registration.

6. Processing of data:-

Upto the year 1965 processing of data was done manually. Mechanical tabulation of vital statistics data was introduced from 1965 onwards. The Mechanical tabulation equipment consists of a 40 Column sorter, Tabulator, 3 punches, 2 verifiers and one Automatic Key Punch.

7. Review of vital Statistics work during 1968:-

Inspite of all the publicity measures and the ardent effort of V.S. staff in the year under review the improvement achieved in the registration over the previous year is only nominal. A study of month-wise figures of Birth & Death shows

DE 31

: 3 :

that for certain months registration had actually shown a decline when compared with the 1967 level.

8. Under Registration in Municipal towns:-

The extent of under registration of vital data in the Municipal towns during the year 1968 is assessed through the spot checks conducted by the statistical staff working in the Corporations and Municipalities. Among 14602 Births and 3417 Deaths enumerated during the year it was found that 2630 Births and 749 Deaths were not registered. This works out the overall percentage of under registration in the Municipal towns as 18% in the case of Births and 22% in the case of Deaths.

The figures furnished above suffer from the limitations that the data for the calendar year could be available from 18 Municipalities only as against 29 Municipalities (including Trivandrum Corporation) functioning in the State.

9. Under registration in Rural areas:-

The extent of under registration in the Rural areas including the non-municipal towns during the years 1967 and 1968 can be roughly understood by a comparison of the registered vital rates with those obtained from the Sample Registration Survey conducted by the Bureau in 150 villages.

Vital rates for the Rural Areas

Year	Sample Registration		Normal Registration	
	Birth rate	Death rate	Birth rate	Death rate
1967	36.30	10.13	17.60	4.12
1968	34.33*	10.38*	17.09	3.86

*figures provisional.

The extent of under registration in the non-municipal urban areas could not be assessed separately for want of comparable data.

10. Births & Birth rates:-

During the year 1968 a total of 4.15 lakhs of live births are registered. Of this 3.07 lakhs of events took place in Rural areas and 1.08 lakhs in urban areas. The registered birth rate for the State for the year works out to 20.89 per thousand population, the rural-urban break up of the rate being 17.09 and 56.75 respectively. The State birth rate for the year 1968 has registered a very slight increase compared to the previous year rate of 20.09. The increase in the rate is more marked in the urban areas as may be seen from the fact that the urban birth rate is 56.75 for the year 1968 against the rate of 49.79 for 1967. The results for the years 1967 & 1968 are given below:

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy verification of the data. The text also mentions that regular audits are necessary to identify any discrepancies or errors in the accounting process.

In addition, the document highlights the need for a clear and concise reporting structure. Management should be provided with timely and accurate financial statements that clearly show the company's performance over a specific period. This helps in making informed decisions and planning for the future.

Furthermore, it is stressed that the accounting system should be robust and secure. All financial data should be stored in a secure environment to prevent unauthorized access or data loss. Regular backups and updates to the software are also recommended to ensure the system's reliability and security.

The document also touches upon the importance of staying up-to-date with the latest accounting standards and regulations. Compliance is a key aspect of financial reporting, and any changes in the regulatory environment should be promptly addressed to avoid legal issues.

Overall, the document provides a comprehensive overview of the key principles and practices of effective financial accounting. It serves as a guide for anyone involved in the financial management of an organization, ensuring that all financial activities are properly recorded, reported, and audited.

The final section of the document discusses the role of the accounting department in providing valuable insights into the company's financial health. By analyzing the data and identifying trends, the department can help management understand the strengths and weaknesses of the business and take corrective actions where necessary.

In conclusion, the document underscores the critical role of financial accounting in the success of any organization. It is a discipline that requires attention to detail, accuracy, and a strong understanding of the underlying business operations. By following the guidelines outlined in this document, organizations can ensure that their financial records are reliable and that they are in full compliance with all applicable laws and regulations.

<u>Birth rate</u>	<u>Year</u>	
	<u>1967</u>	<u>1968</u>
Rural	17.60	17.09
Urban	49.79	56.75
STATE:	20.69	20.89

A district-wise comparison of the registered birth rate shows that Cannanore district has the highest birth rate (23.08) followed by Kottayam district (22.57). The lowest birth rate is recorded in Palghat district (16.93) followed by Trichur district (16.96). When the rural birth rates are considered, Cannanore is again the district reporting the highest rate (23.08) followed by Quilon District (18.84). The lowest rural birth rate is recorded in Trivandrum district (11.52). In the case of the urban birth rates, Trivandrum district reports the highest rate (76.17) followed by Quilon district (73.83). In general, the rural birth rates are very much lower than the urban rates.

11. Sex ratio at birth:

Table 13 appended gives the sex rate at birth. The sex ratio at birth for the State as per the registered events is 94.32 females for 100 males. The sex ratio is slightly higher for the rural area than for the urban area, the corresponding figures being 94.37 and 94.18 respectively. The highest sex ratio is recorded in Alleppey district (97.57).

12. Average number of children:-

Table No.23 appended reports the number of children born to mothers of different age groups during the year 1968. It is seen that mothers below 15 years of age have one child born, while mothers of age 20-24 years have two children born. In the age group 30-34 years, the mothers have 5 children born. In 45 and above age group, the number of children born is about 8. Thus completed fertility in Kerala can be taken as 8 children taking only mothers who have had one delivery in 1968. The average number of children born to all mothers is nearly 4.

13. Deaths and Death rates:-

A total of 92669 deaths are registered during the year 1968. The death rate for the State works out to 4.66 per 1000 population. The rate for the rural area is 3.86 and that for the urban area 12.27.

When the rates are compared with those of the previous years 1967 it is seen that there is an increase in the urban death rate while there is a decrease in the rural as well as the State death rates. The figures are presented below:

<u>Death rate</u>	<u>Year</u>	
	<u>1967</u>	<u>1968</u>
Rur al	4.12	3.86
Urban	11.80	12.27
STATE:	4.86	4.66

The highest registered death rate for the year 1968 is reported from Kozhikode district (5.70) followed by Cannanore district (5.53). The lowest rate is reported from Trichur district (2.91). As in the previous year, the death rates of the three districts in Malabar area are higher than those of the six districts in T.C. area.

14. Infant deaths and Infant death rates:-

Total number of infant deaths registered during the year 1968 is 8690, out of which 5928 events are reported from the rural area and 2762 events from the urban areas. Infant death rate for the State works out 20.93 per 1000 live births for the year 1968 against the rate of 24.08 for the year 1967. The urban-rural differential in the registered Infant death rates for the year 1967 & 1968 are presented below:

<u>Infant Death rate</u>	<u>Year</u>	
	<u>1967</u>	<u>1968</u>
Rural	23.27	19.30
Urban	26.77	25.57
STATE:	24.08	20.93

The highest infant death rate is reported from the Palghat district. (29.06) followed by Kottayam district (26.27). When the rural area is considered, the above position is reversed, Kottayam district recording a rate of 26.74 and Palghat district recording a rate of 25.93. The highest infant death rate for urban area is reported from Palghat district (46.34) followed by Kozhikode district (42.20)

15. Maternal deaths and their rates:-

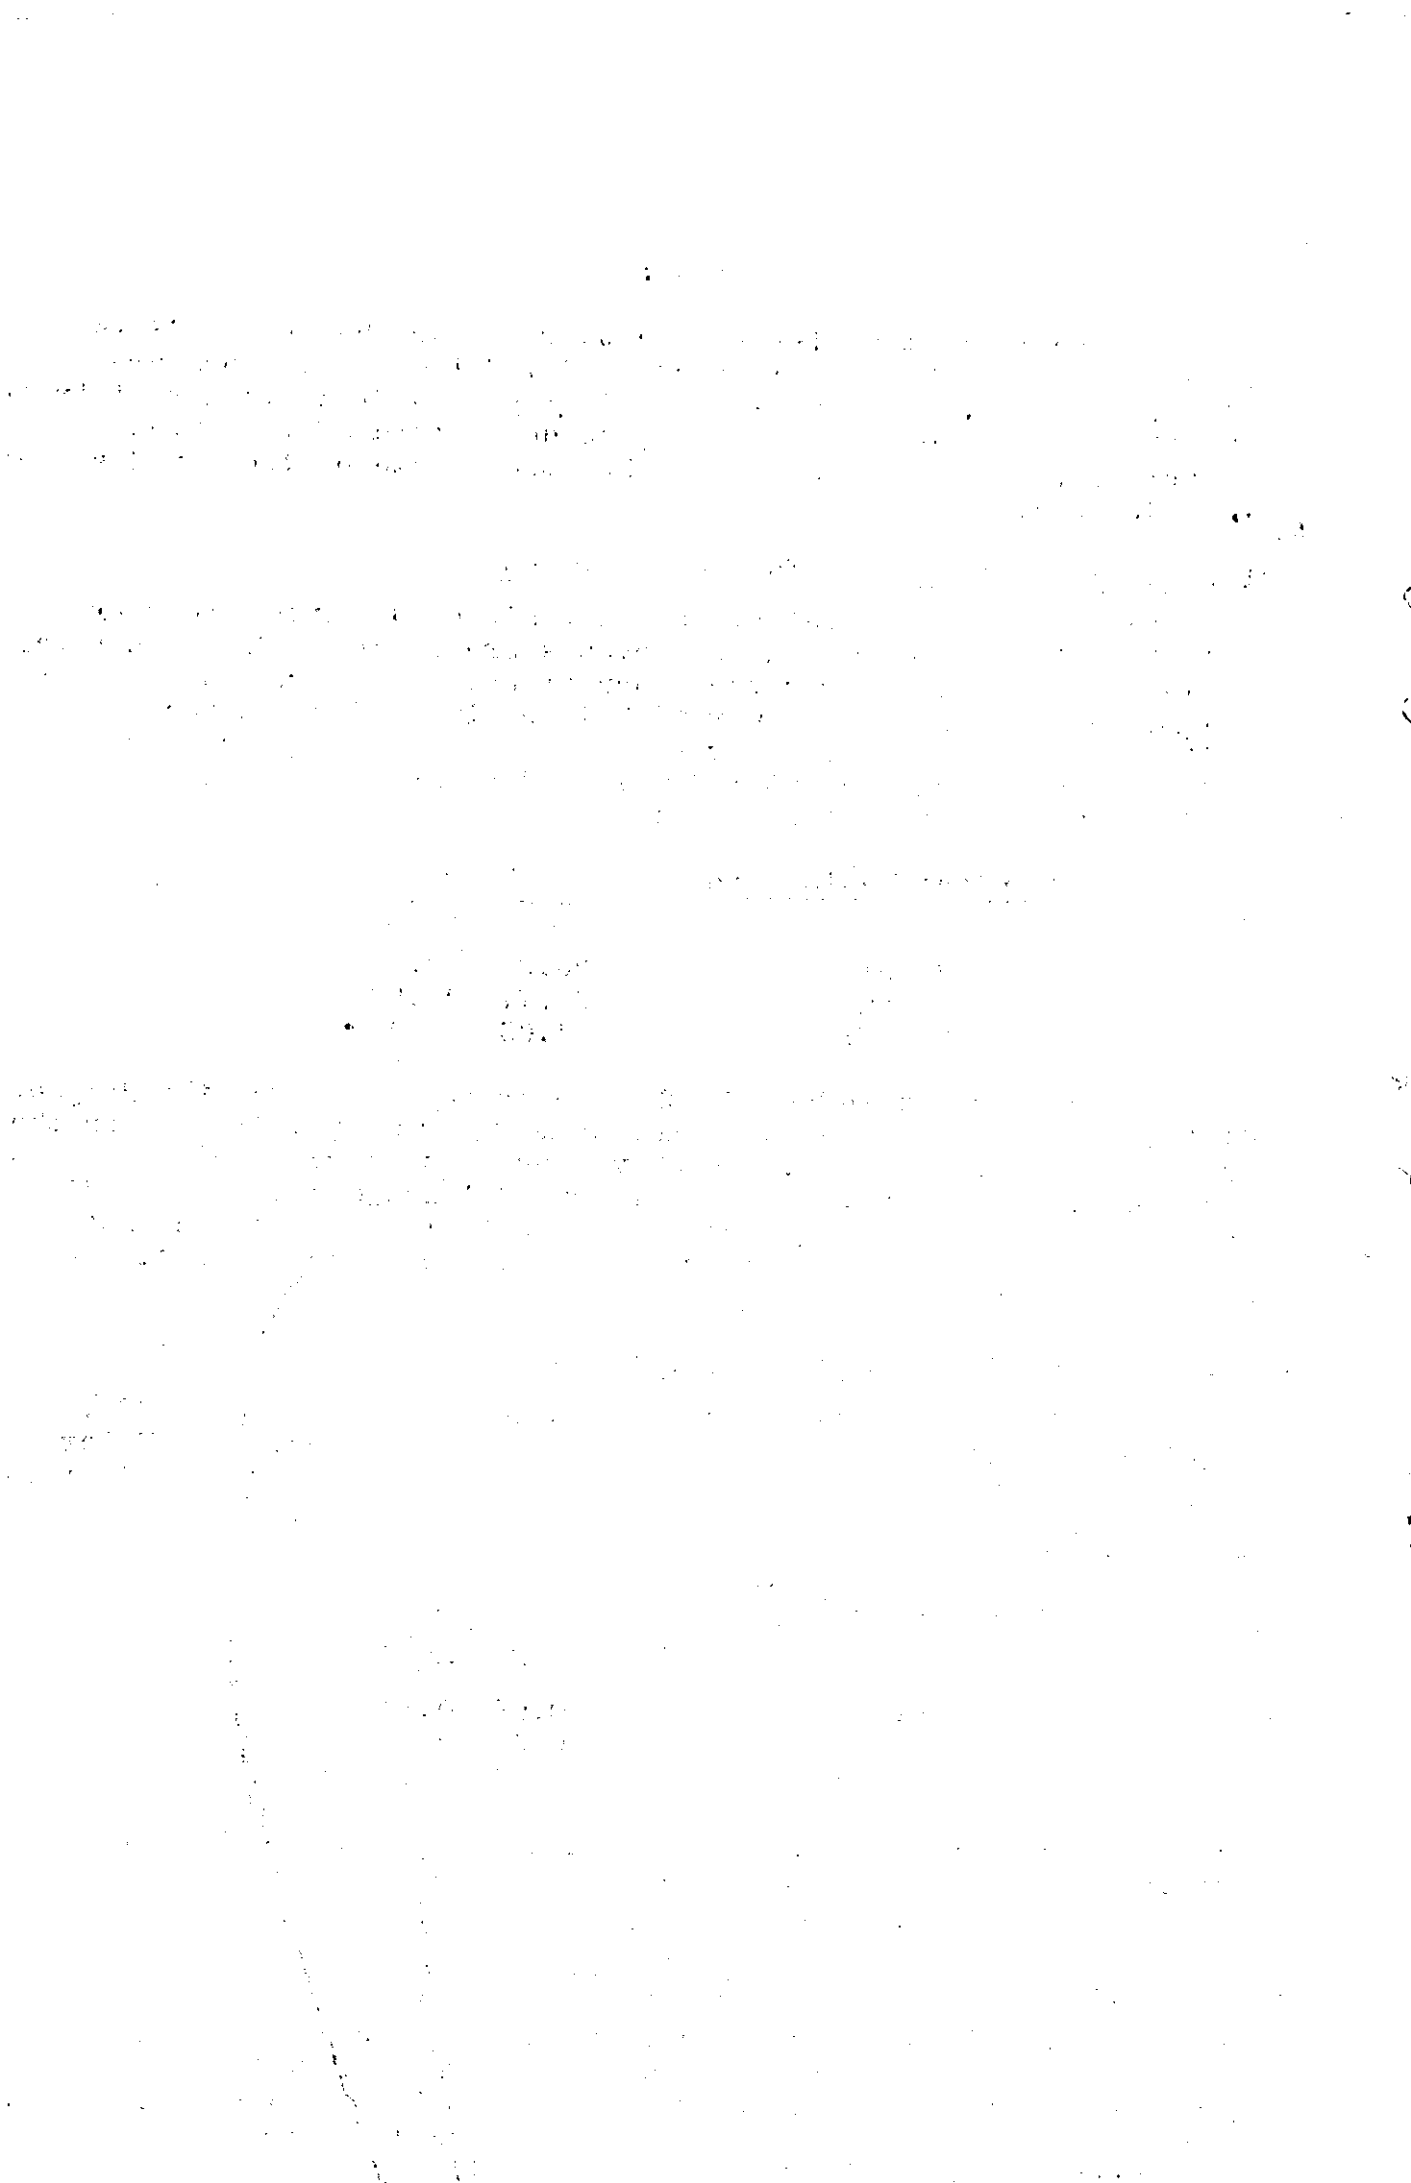

294 Maternal deaths are registered during the year 1968. Of which 260 are in rural area and 34 in urban area. The Maternal death rate for the year 1968 works out to 0.70 per 1000 deliveries. The urban and rural rates for the year and the previous year are given below:-

<u>Maternal death rate</u>	<u>Year</u>	
	<u>1967</u>	<u>1968</u>
Rural	0.98	0.84
Urban	0.38	0.31
STATE:	0.84	0.70

The highest rate of maternal death is reported from Palghat district (1.66) and the lowest rate from Trivandrum district (0.24).

16. Still births and still birth rates:-

The data on this are presented in table 11 appended. Total No. of still births registered during the year 1968 is 2833. Of these 605 occurred in rural areas and 2228 in urban areas. Still birth rate during the year is 6.78 per 1000 deliveries (Live births and Still births). The urban rate of still birth is 20.21 and the

rural rate is 1.97 for the year 1968. The rates for this year and the previous year are presented below:

<u>Still birth rate</u>	<u>Year</u>	
	<u>1967</u>	<u>1968</u>
Rural	3.13	1.97
Urban	20.75	20.21
STATE	7.25	6.78

The highest still birth rate is recorded in Ernakulam district (10.88) followed by Quilon district (10.74). The lowest rate is recorded in Cannanore district (2.42).

17. The following table giving the various vital rates for the State for the year from 1958 to 1968 will be helpful for a comparative study.

Vital rates for the years 1958-68

<u>Rate/Year</u>	1958	1959	1960	1961	1962	1963	1964	1965	1966	1967	1968
Birth	24.58	26.23	23.92	25.00	22.73	22.38	23.32	22.32	22.52	20.69	20.89
Death	7.57	7.80	6.94	7.25	6.35	5.99	5.85	5.25	5.38	4.86	4.66
Infant death	49.31	49.77	39.79	41.82	34.62	32.02	28.36	27.28	26.01	24.01	20.93
Still birth	N.A	N.A	N.A	9.06	7.60	7.93	8.08	8.53	7.63	7.25	6.78
Maternal death	N.A.	N.A.	N.A	2.38	1.78	1.86	1.42	1.21	1.31	0.84	0.70

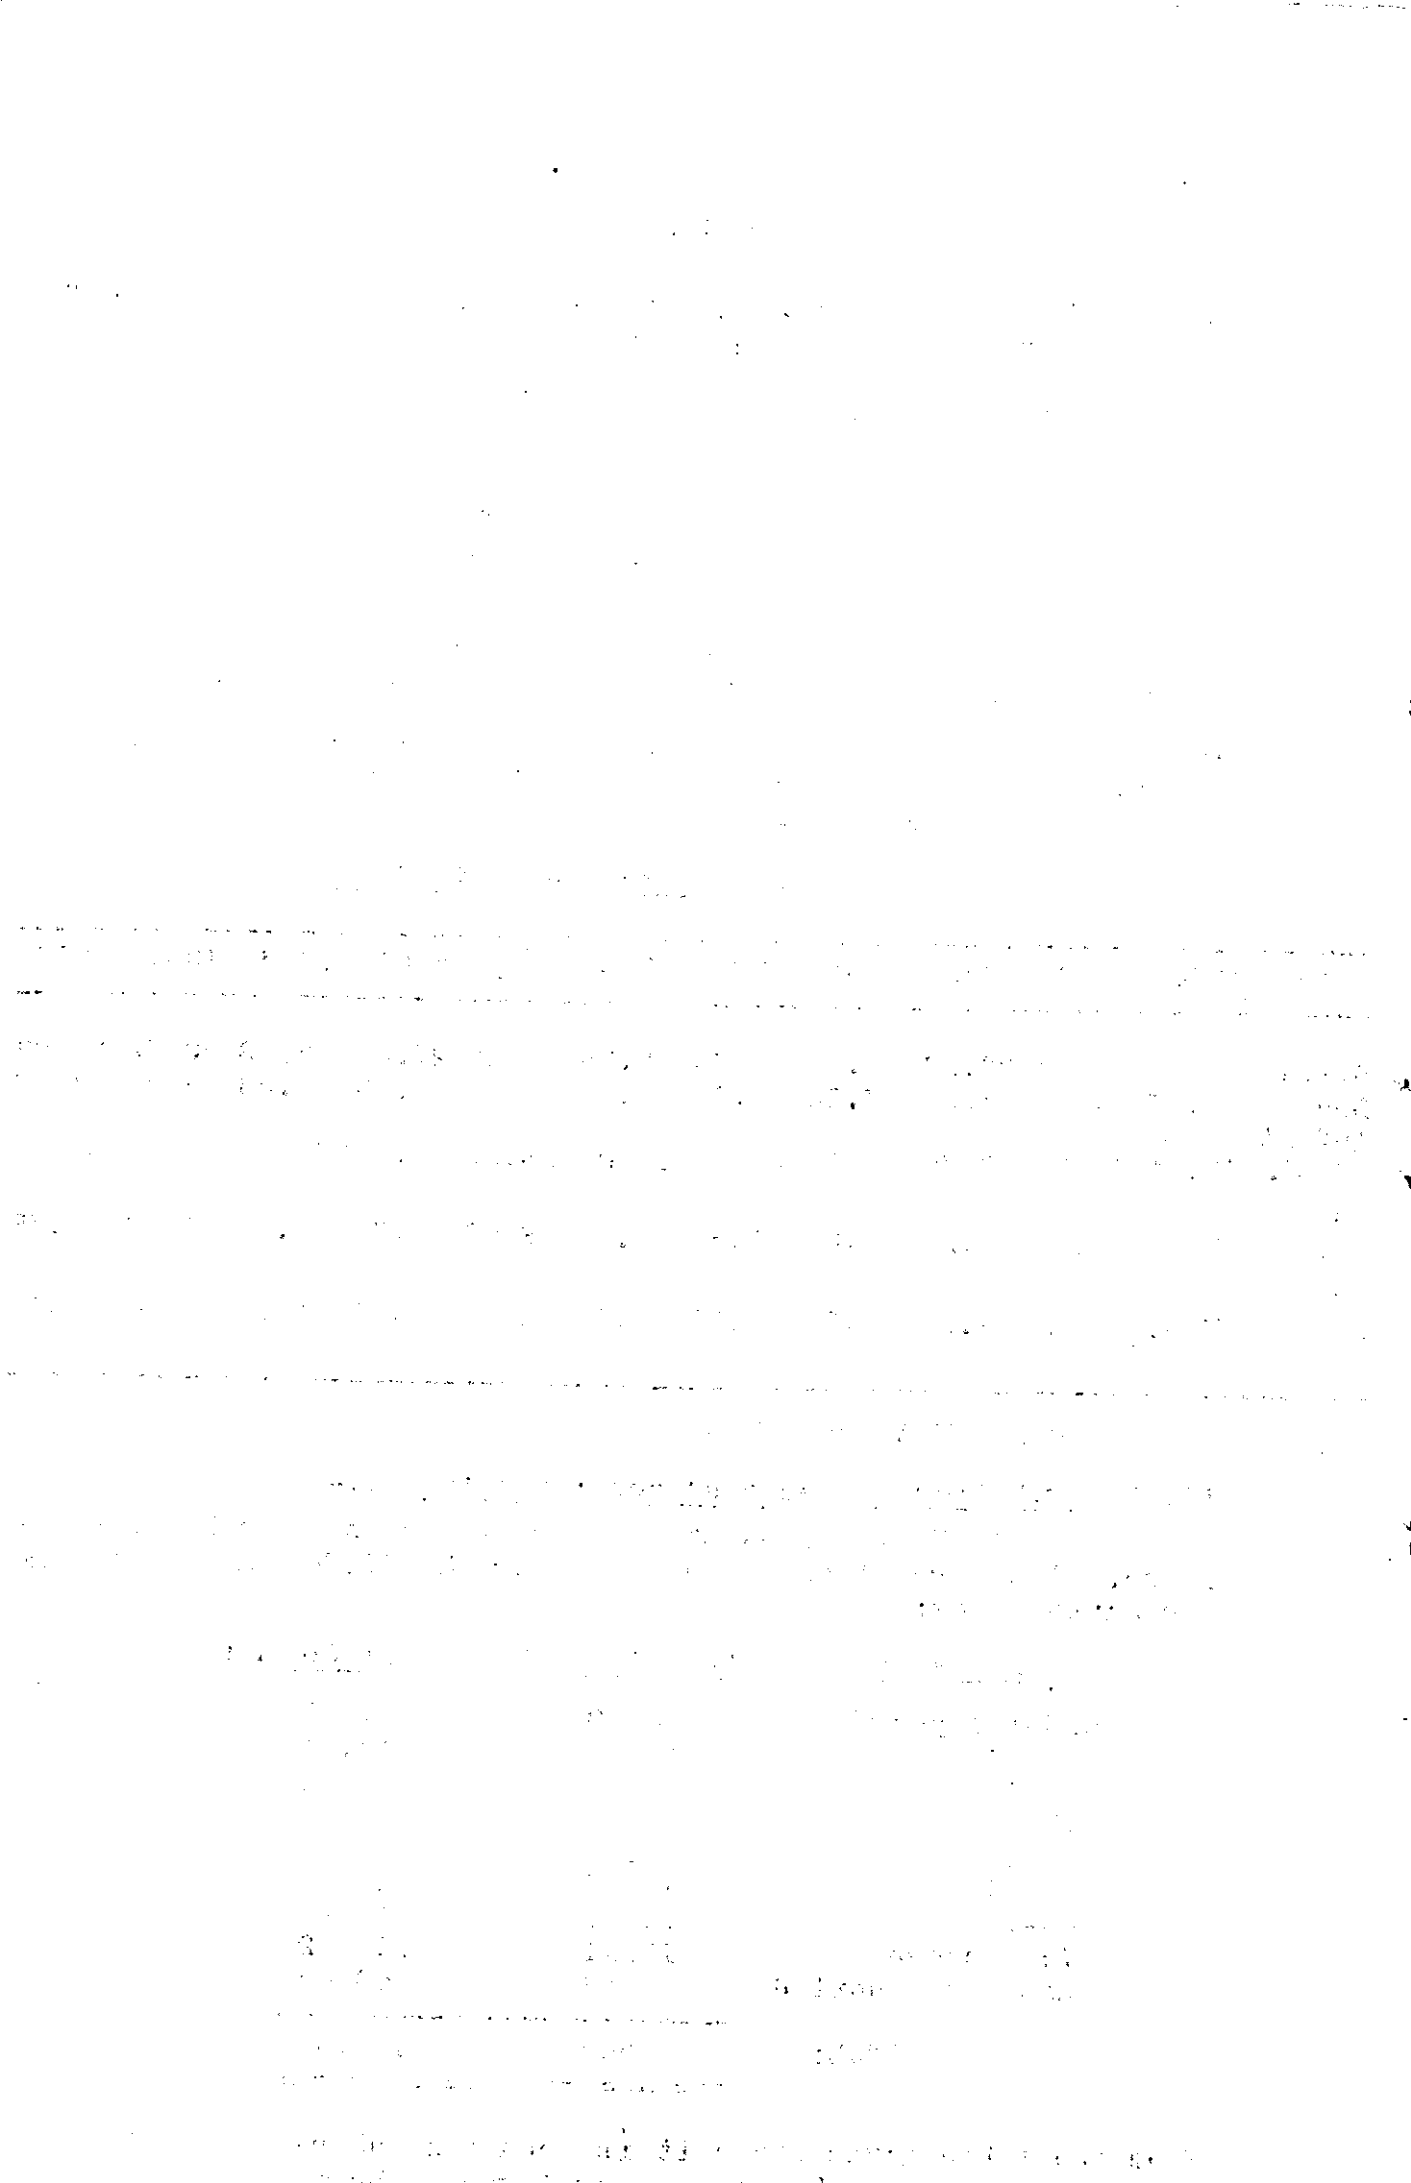

N.A = Not available

18. Distribution of deceased according to age:-

Table No.14 gives the number of deaths according to age group. The percentage of deaths under the different age groups are given below:-

<u>Age group</u>	<u>No. of deaths</u>	<u>% of deaths</u>
Under 1 year	8690	9.38
1-4	12518	13.51
5-14	5755	6.21
15-24	3826	4.13
25-44	9593	10.35
45-64	17883	19.30
65-74	15051	16.24
75 & above	19294	20.82
Age not reported	59	00.06
TOTAL:	92669	100.00

From the table given above it is seen that about 9% of the deaths occurred to children below 1 year. During the year 1967 it was nearly 10%. The lowest percentage of death is recorded under the age group 15-24 and the highest % of death is recorded in the age group of 75 & above.

19. Deaths according to cause:

Table No.12 in the appendix gives the number of deaths under different causes. The percentage of deaths under the various cause groups with the rural-urban break ups is given in the following table.

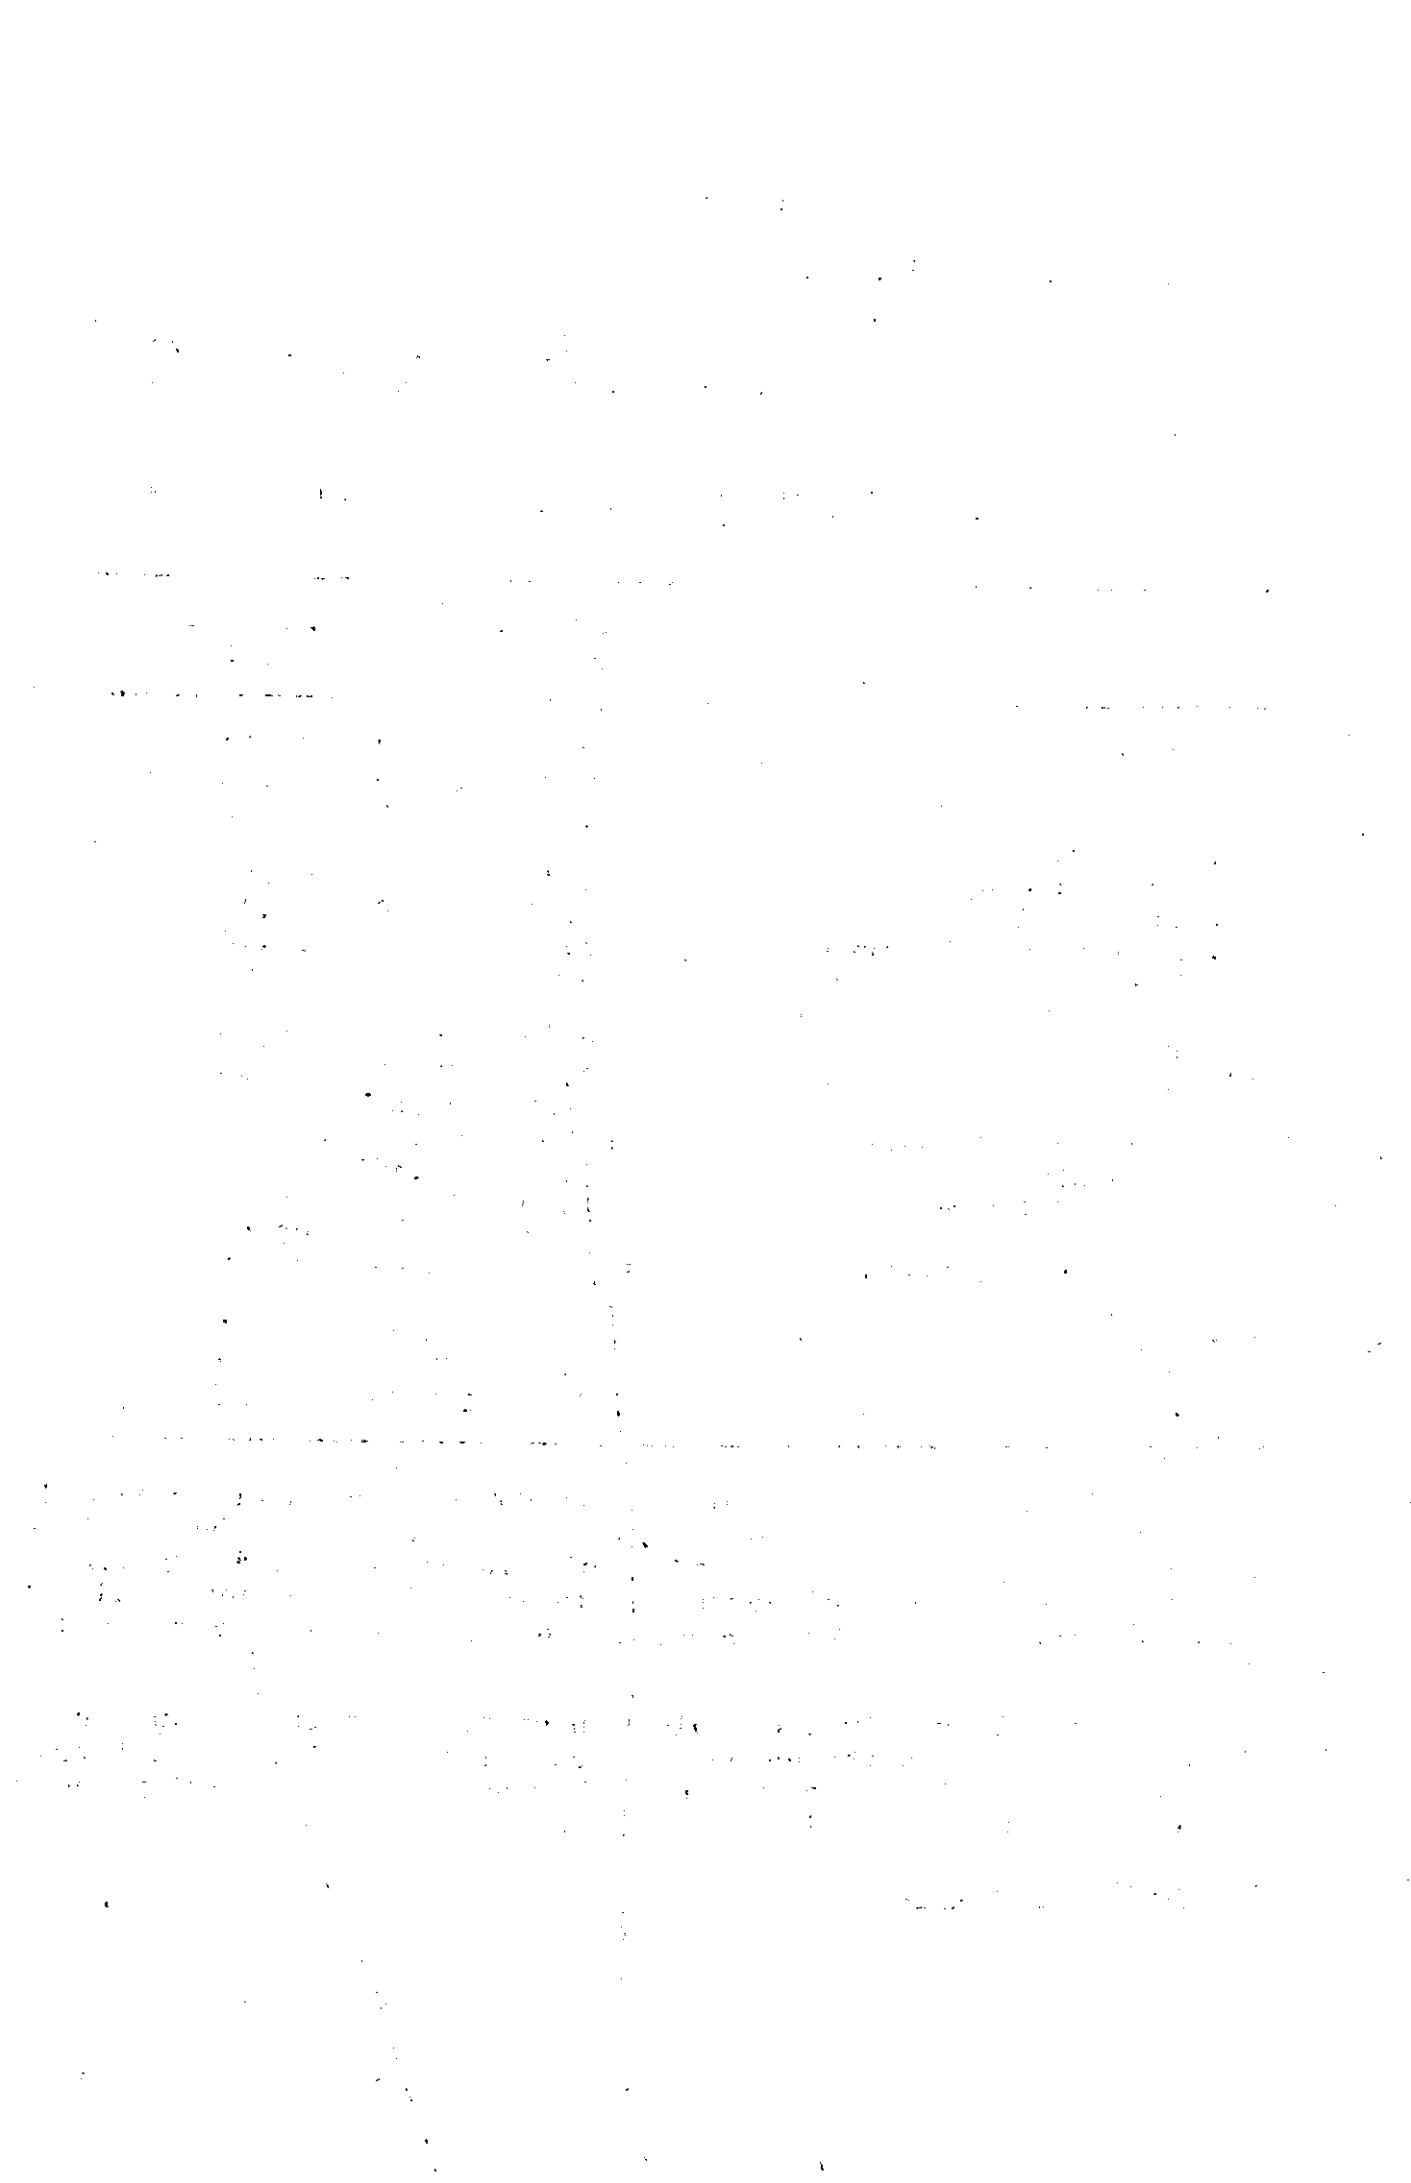

Percentage distribution of deaths according to cause of death

	% of Death		
	Rural	Urban	State
1. Plague	00.00	00.00	00.00
2. Malaria	00.01	00.00	00.01
3. Small-pox	00.02	00.03	00.02
4. Cholera	00.03	00.01	00.02
5. Whooping cough	00.14	00.25	00.16
6. Diphtheria	00.07	00.50	00.17
7. Accidents & Injuries	01.44	02.64	01.74
8. Dysentery & Diarrhoea	03.64	05.07	04.00
9. Pulmonary T.B. & other respiratory diseases	10.26	09.52	10.09
10. All kinds of fevers	05.75	03.10	05.09
11. Anaemia	01.33	02.63	01.66
12. Diseases of heart	03.55	04.64	03.82
13. Pneumonia	00.72	02.19	01.09
14. Typhoid fever	01.60	00.27	01.26
15. Measels	00.01	00.03	00.01
16. Diabetics mellitus	01.13	00.98	01.09
17. Appendicitis	00.00	00.01	00.00
18. Infection of new born	00.50	02.40	00.97
19. Others	69.80	65.73	68.80
TOTAL:	100.00	100.00	100.00

It may be seen that more than 65% of deaths are recorded under the unspecified cause, namely "Others". Among the specific causes listed, the highest % of deaths is due to Pulmonary T.B. and other respiratory diseases. This is so for the rural and urban areas. Next to this comes the deaths due to "fevers" and "disease of heart".

The figures in the table cannot be fully relied upon for firm conclusions as the causes of death recorded in the registration are not medically certified. The Registrars generally record the cause of death as given by the informants.

20. List of tables:

20. List of tables in the appendix

1. Statements of Births, Deaths, Still Births, Infant deaths, Maternal deaths and their rates.
2. Infant death in Kerala by age & sex.
3. Live births, all deaths, still births, Infant deaths & Maternal deaths for Corporation and Municipalities having a population of 30000 and over.
4. Live births, Deaths, Still Births, Infant deaths and Maternal deaths relating to towns and cities having a population of 30000 and above (District-wise).
5. Live births, Deaths, still births, infant deaths, maternal deaths and their rates in the Corporations and Municipalities.
6. Month wise distribution of live births
7. Births, month wise in Corporations & Municipalities.
8. Month wise distribution of deaths
9. Infant death - Month wise
10. Age wise distribution of death according to sex
11. Death from specified diseases
12. Death by cause group
13. Sex Ratio of birth - District wise
14. Deaths classified according to age group - district wise
15. Birth by Religion & Sex - District wise
16. Death by Religion & Sex - District wise
17. Birth by Religion in the Corporation & Municipalities
18. Death by religion in the Corporation & Municipalities
19. Death in the Corporation & Municipalities - Month-wise
20. Infant death in the Corporation & Municipalities - month wise
21. Deaths by age & sex in the Corporations & Municipalities
22. Order of birth by age group of mother - State
23. Order of birth by age group of mother - Rural
24. Order of birth by age group of mother - Urban
25. Average number of children born to mother of different age groups
26. Order of birth by age group of mother for the Municipalities and Corporations
27. Average number of children born to mother of different age group in the Corporations and Municipalities
28. Births according to age group of mother in the Municipalities and Corporation
29. Taluk wise figures of births, deaths, infant deaths, still births, maternal deaths and their rates - Rural

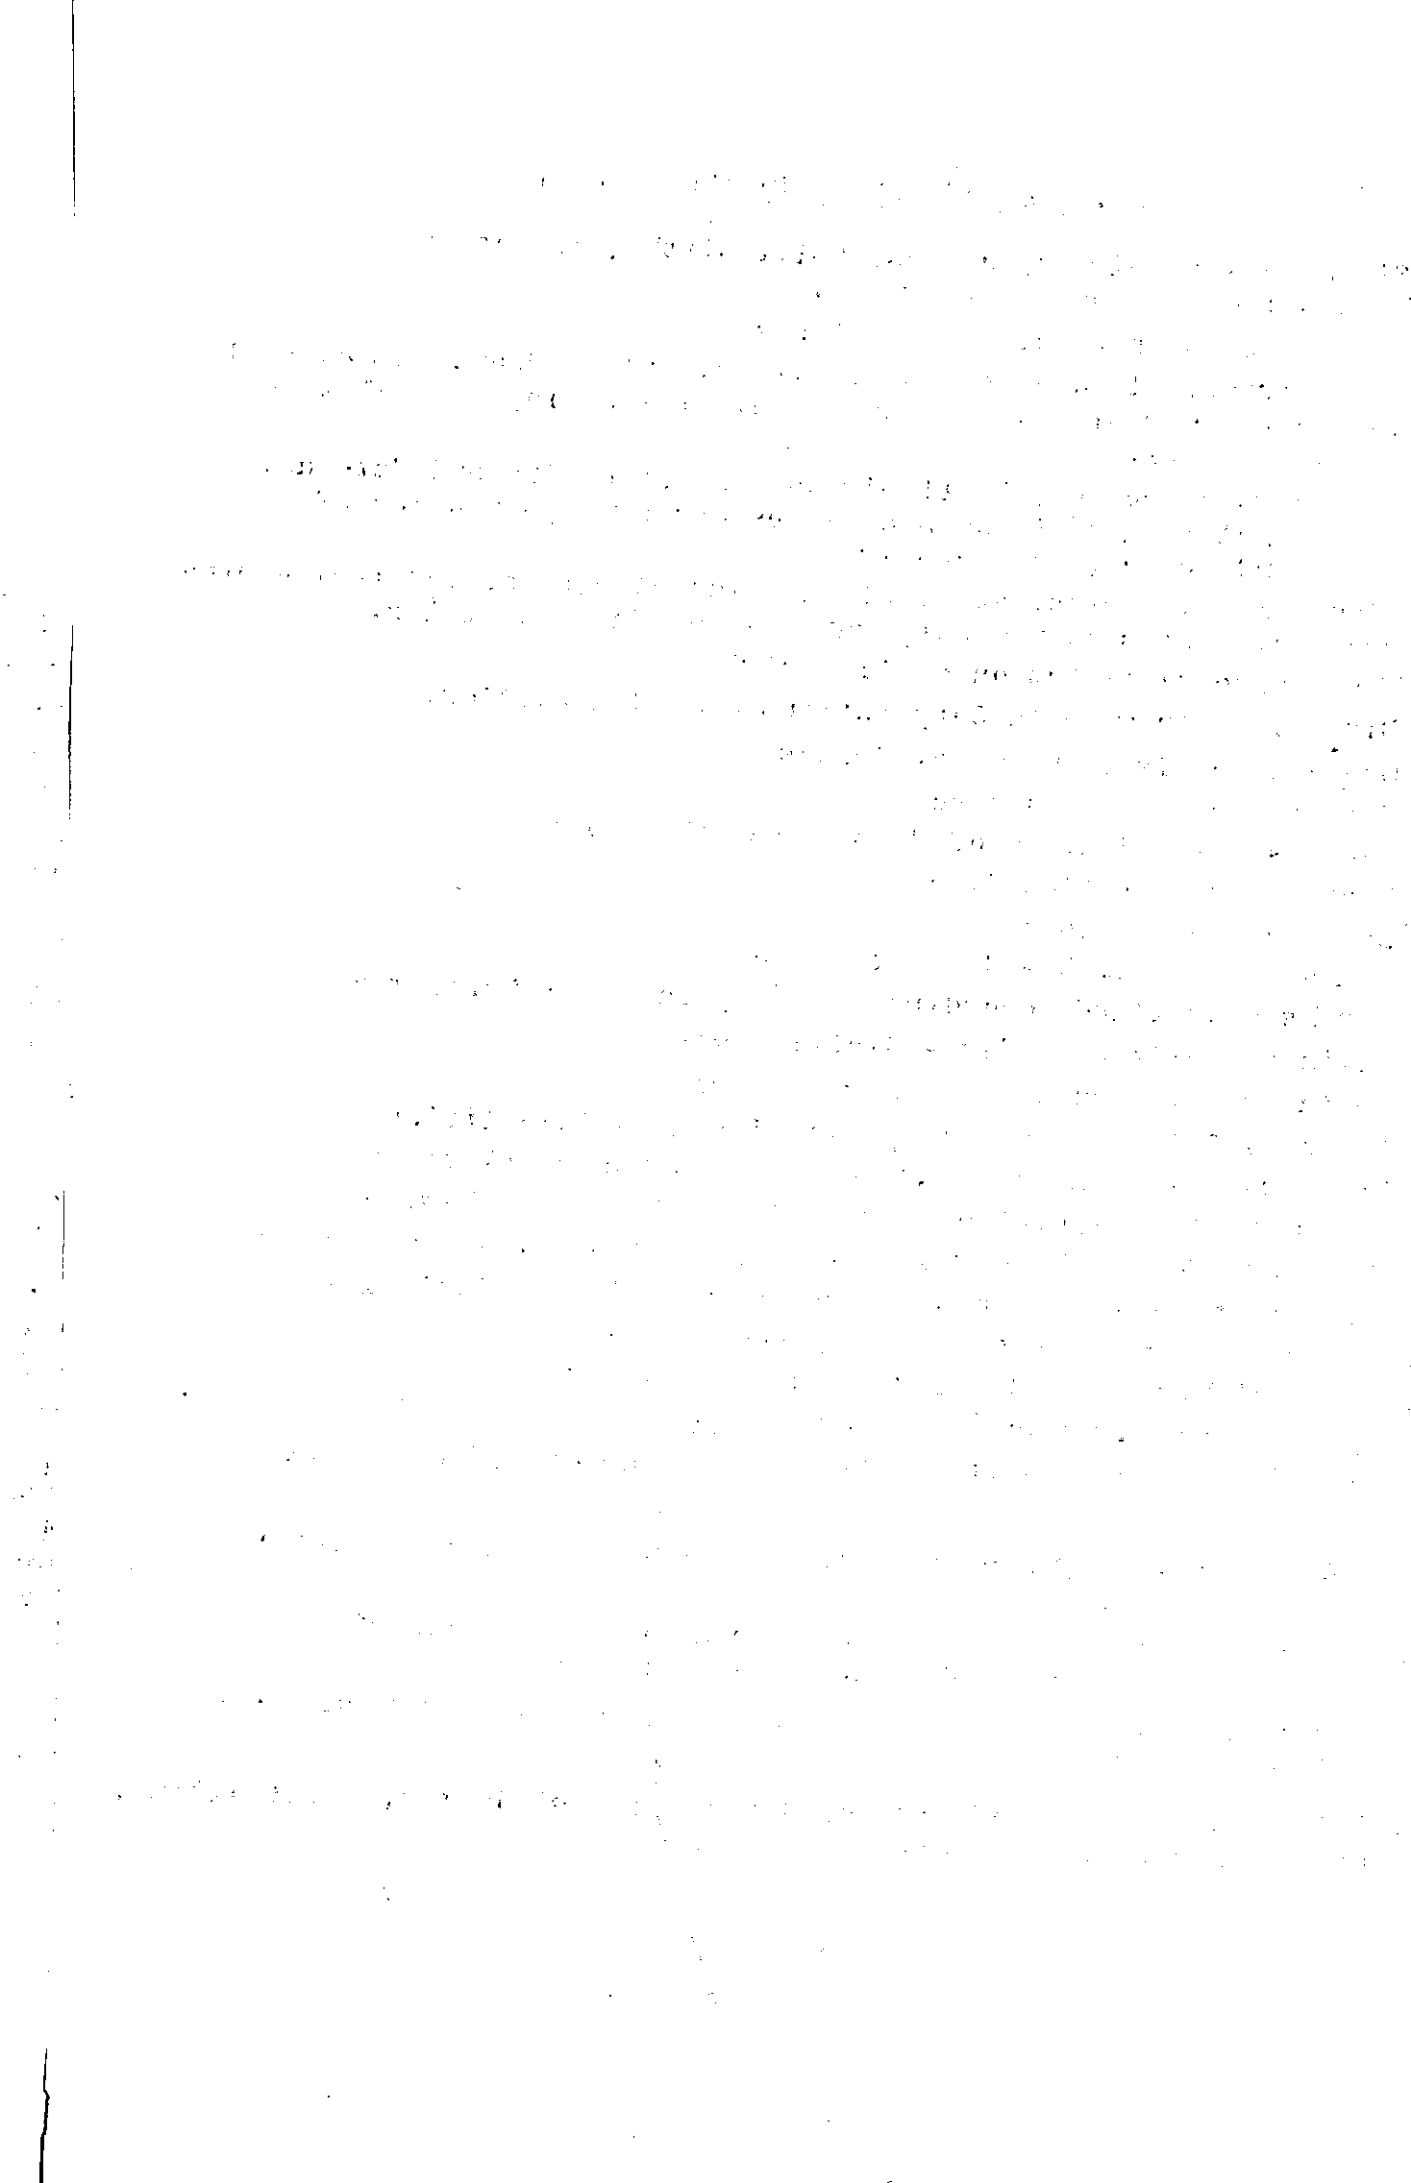

TABLE NO. 1

contd.....

The first part of the report deals with the general situation of the country and the progress of the war. It is followed by a detailed account of the military operations in the West, including the Battle of Arras and the Battle of Cambrai. The report also discusses the situation in the East, particularly in the Balkans and the Middle East.

The second part of the report is devoted to a detailed analysis of the military operations in the West. It begins with a description of the German offensive in the West, which was launched in the spring of 1918. The report then discusses the Allied response to this offensive, and the subsequent military operations in the West, including the Battle of Amiens and the Battle of the Hundred Days.

The third part of the report deals with the situation in the East. It begins with a description of the German offensive in the East, which was launched in the spring of 1918. The report then discusses the Allied response to this offensive, and the subsequent military operations in the East, including the Battle of the Marne and the Battle of the Aisne.

The fourth part of the report is devoted to a detailed analysis of the military operations in the East. It begins with a description of the German offensive in the East, which was launched in the spring of 1918. The report then discusses the Allied response to this offensive, and the subsequent military operations in the East, including the Battle of the Marne and the Battle of the Aisne.

The fifth part of the report deals with the situation in the Middle East. It begins with a description of the German offensive in the Middle East, which was launched in the spring of 1918. The report then discusses the Allied response to this offensive, and the subsequent military operations in the Middle East, including the Battle of the Jordan and the Battle of the Megiddo.

The sixth part of the report is devoted to a detailed analysis of the military operations in the Middle East. It begins with a description of the German offensive in the Middle East, which was launched in the spring of 1918. The report then discusses the Allied response to this offensive, and the subsequent military operations in the Middle East, including the Battle of the Jordan and the Battle of the Megiddo.

The seventh part of the report deals with the situation in the Balkans. It begins with a description of the German offensive in the Balkans, which was launched in the spring of 1918. The report then discusses the Allied response to this offensive, and the subsequent military operations in the Balkans, including the Battle of the Salonika and the Battle of the Dobruja.

The eighth part of the report is devoted to a detailed analysis of the military operations in the Balkans. It begins with a description of the German offensive in the Balkans, which was launched in the spring of 1918. The report then discusses the Allied response to this offensive, and the subsequent military operations in the Balkans, including the Battle of the Salonika and the Battle of the Dobruja.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes the need for transparency and accountability in financial reporting.

2. The second part of the document outlines the various methods and techniques used to collect and analyze data. It includes a detailed description of the experimental procedures and the statistical tools employed.

3. The third part of the document presents the results of the study, showing the trends and patterns observed in the data. It includes several tables and graphs to illustrate the findings.

4. The fourth part of the document discusses the implications of the results and the potential applications of the findings. It highlights the significance of the study and the need for further research in this area.

5. The fifth part of the document provides a conclusion and a summary of the key points discussed throughout the document. It also includes a list of references and a bibliography.

* Not reported

Handwritten text, likely bleed-through from the reverse side of the page. The text is extremely faint and illegible due to the quality of the scan. It appears to be organized into several columns and rows, possibly representing a list or a table of entries. Some faint characters and numbers are visible, but they cannot be accurately transcribed.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that this is essential for the proper management of the organization's finances and for ensuring compliance with relevant laws and regulations.

2. The second part of the document outlines the specific procedures that should be followed when recording transactions. This includes details on how to categorize expenses, how to handle receipts, and how to ensure that all entries are properly documented and supported by evidence.

3. The third part of the document addresses the issue of internal controls. It discusses how these controls can be implemented to prevent fraud and to ensure that the organization's assets are protected. It also highlights the importance of regular audits and reviews to identify any potential weaknesses in the system.

4. The fourth part of the document focuses on the role of management in ensuring the integrity of the financial reporting process. It stresses that management has a responsibility to ensure that the information provided to stakeholders is accurate and reliable, and that any potential conflicts of interest are properly disclosed.

5. The fifth part of the document discusses the importance of transparency and accountability in financial reporting. It argues that organizations should be open about their financial performance and should provide clear and concise information to their stakeholders. This helps to build trust and confidence in the organization's financial statements.

6. The sixth part of the document concludes by summarizing the key points discussed throughout the document. It reiterates the importance of accurate record-keeping, strong internal controls, and transparent reporting, and encourages organizations to take these principles seriously to ensure their long-term success and sustainability.
