BUILDING STATISTICS 2022-23

Directorate of Economics and Statistics Thiruvananthapuram- 695033

Preface

The state of Kerala, known for its rich cultural heritage and natural beauty is also witnessing significant urban and rural development driven by various socio-economic factors. The 'Building Statistics 2022-2023' report presents a comprehensive analysis of construction activities across Kerala, reflecting dynamic growth and trends within the State's housing and infrastructure sectors. This report on Building Statistics in Kerala provides a comprehensive overview of the construction trends across the State offering valuable insights into the growth patterns, regional disparities, diversification and the evolving landscape of infrastructure development. This annual report, meticulously compiled by the Department of Economics and Statistics, serves as a vital resource for stakeholders, including policymakers, urban planners, researchers and the general public. It encapsulates various dimensions of building activity, ranging from the types and purposes of newly constructed structures to district-wise comparisons and trends over time. By documenting key insights, the publication aims to foster informed decision-making that aligns with Kerala's developmental goals. As Kerala continues its journey of growth and development, this report serves as a guiding light in understanding the construction sector of the State.

I express my sincere gratitude to all contributors, including officers of District and Taluk Statistical Offices and local authorities, whose efforts and collaboration were instrumental in the preparation of this report. I am extending my sincere gratitude to the staff of Labour and Housing section headed by Sri.Sijith K.S, Assistant Director in bringing out this publication, under the guidance and supervision of Sri. Manoj M, Additional Director (State Income) and Smt. A.R Yamuna, Deputy Director (VS) and assisted by Sri. Sebin Mathew, Research Officer and Sri. Abhilash V.R ,Statistical Assistant Gr. I.

Introduction

The construction sector is a vital component of Kerala's economy, reflecting the state's rapid urbanization, population growth and evolving infrastructure needs. As Kerala progresses towards modernization, the demand for residential, commercial and public buildings has surged making it imperative to analyze the current trends in the construction industry. As per the recommendations of National Statistical Commission and direction from the Government of Kerala, Department of Economics and Statistics has been collecting, collating, compiling, validating, analyzing, disseminating and publishing panchayat level building statistics (rural sector) since 2001-02. The department has been doing the same from all local bodies of both rural and urban centers of Kerala since 2015-16.

This report delves into the building construction statistics of Kerala providing a comprehensive overview of construction activities across various sectors. It examines key metrics such as the number of new constructions, types of buildings and regional disparities in building construction activities by offering a detailed analysis of building statistics. Building statistics track the number and types of new buildings both residential and non-residential constructed over the specific period. This data helps to gauge the level of construction activity, investment trends and housing demands in an area. The availability of accurate and up-to-date building statistics is vital for evidence-based policymaking and effective urban development.

One of the central focuses of this report is the analysis of builing construction activity in Kerala during the period 2022-2023. In this period construction sector registered an annual growth of 11.13% in terms of the number of new buildings constructed. This report provides a detailed analysis of the number of buildings newly constructed each year from 2015-16 to 2022-23, also an analysis on the total number of habitable houses constructed and registered in the state at local body level. This report will provide a comprehensive overview of building construction trends in the state. The secondary data included in this report were collected from local body registers by the field level officers of Economics and Statistics Department.

Concepts and Definitions

The concepts and definitions of some of the important terms used in the building statistics report are given below.

- 1. Building is any independent or free standing structure comprising one or more rooms or other spaces covered by a roof and usually enclosed within external walls or dividing walls which extend from the foundation to the roof. Dividing walls refer to the walls of adjoining building which have been constructed so that they are contiguous. e.g. dividing walls of house in a row.
- 2. Buildings completed: A building on which work is completed and which is physically ready for occupation.
- 3. Residential building: A building which is primarily intended or used for dwelling purposes. Other buildings are non-residential.
- 4. Dwelling houses: It is a room or suit of rooms and with its accessories (viz kitchen, store, bath, latrine etc) if any, in permanent building or structurally separated part thereof which by the way it has been built, rebuilt or converted is intended for habitation by the household. It should have separate access to the street or to a common passage or stairways. Other type of residential buildings in case any dwelling unit have been constructed therein and residential buildings other than dwelling house. (e.g. out houses, guest houses, garden cottages, student hostels, housing units of convents and monks etc).
- 5. Non-residential buildings: A building which is primarily intended or used for non-residential purposes. Non-residential buildings are classified into four categories.
- a) Industrial buildings: All buildings intended for industrial activities: refinery, factories, workshops, textile mill, food processing plant, power plant and other plants etc.
- b) Commercial buildings: All buildings which are built for use primarily in the wholesale, retail and service trade including warehousing activities. e.g. shops, ware-houses, offices, cinema theatre, hotels, lodges, auditorium, convention center etc
- c) Institutional buildings: All buildings intended primarily for institutional activities such as schools, colleges, govt offices, hospitals, dispensaries, religious buildings, orphanages, libraries etc.
- d) Other non-residential buildings: All buildings elsewhere classified eg. passenger shelter, cattle shed attached to households, pump house located in residential premises and farms etc.

Summary of findings

1. Number of newly constructed and registered buildings

A total of 4,39,857 buildings were newly constructed and completed in 2022-2023, including 3,17,630 residential and 1,22,227 non-residential structures. This surge in construction reflects a strong economy and rising demand for both residential and commercial spaces in the state. The number of buildings constructed and completed in Kerala during this period increased by 11.13% compared to the previous year, reflecting strong economic activity and post pandemic recovery.

Malappuram district recorded the highest number of newly constructed buildings 62,576 followed by Trivandrum 56,709, while Idukki 10,598 and Wayanad 13,102 had the lowest figures. Except for Kollam, all 13 other districts in Kerala saw an increase in new building construction compared to the previous year indicating robust growth in the construction sector across the state.

Of the total 4,39,857 buildings constructed, 3,17,630 (72.21%) were for residential purpose while the remaining 1,22,227 (27.78%) were for non-residential purpose. Among residential buildings, 2,28,688 (72%) were built in rural areas and 88,942 (28.%) in urban areas. Amoung non-residential buildings 88,926 (72.75%) were constructed in rural areas, while 33,301 (27.24%) were in urban areas.

District	Total number of new building units constructed in 2022-23

Thiruvananthapuram	56709
Total	439857

Malappuram stands out as the district with the highest number of newly constructed buildings totaling 62,576. This impressive figure reflects strong construction activity likely driven by factors such as population growth, urbanization and economic development.

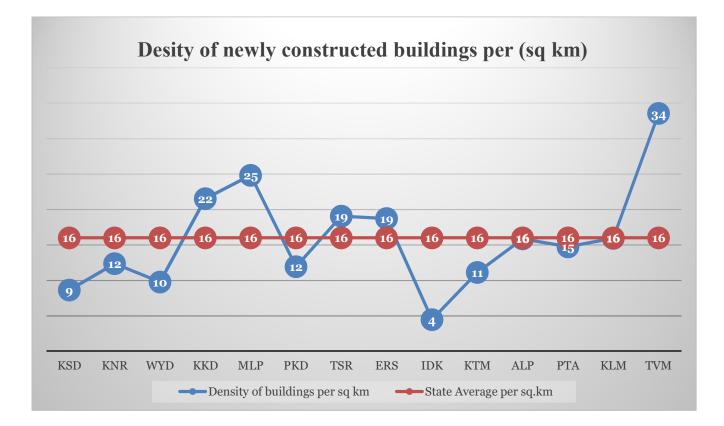

2. Density of buildings newly constructed

The density of newly constructed buildings during 2022-2023, calculated by comparing the number of buildings with the geographical area (excluding forest areas), shows that an average of 16 new structures were constructed per square kilometer in the state. Last year density per square kilometer in the State was 14.Thiruvananthapuram leads with the highest building density recording 34 buildings per square kilometer indicating concentrated construction activity likely driven by urbanization and economic growth. Malappuram follows with a density of 25 buildings per square kilometer highlighting strong construction, possibly due to population growth, economic expansion or infrastructure development. Idukki, with its hilly terrain has the lowest building density at 4 per square kilometer may be due to low population and the challenges with respect to construction in such regions. Five districts have building densities above the state average, while the remaining nine districts are at or below this level. Kozhikode, Thrissur and Ernakulam also show relatively high building densities pointing to active development and ongoing urbanization in these areas.

Density of Buildings newly constructed in 2022-2023

The density of newly constructed buildings in districts like Thiruvananthapuram, Thrissur, Malppuram, Kozhikode, and Ernakulam highlight the need for meticulous urban planning and addressing issues such as traffic management, waste disposal and green spaces becomes imperative to maintain a sustainable living environment.

3. Residential buildings

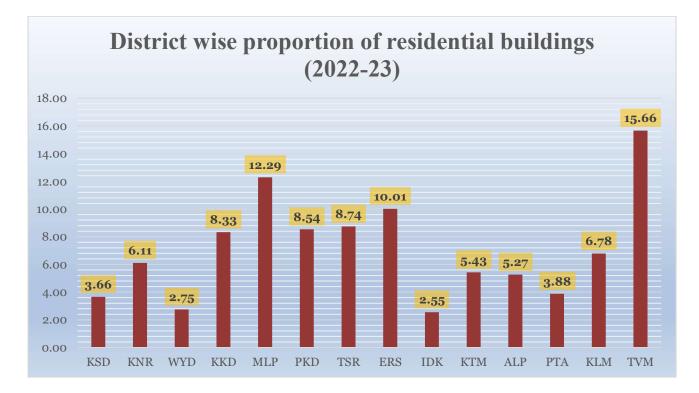

The dataset presented here provides a detailed overview of residential building construction across Kerala during the fiscal year 2022-2023. In this year a total of 3,17,630 residential buildings were constructed. Of these, 3,13,468 (98.69%) were dwelling houses, while the remaining 4,162 (1.31%) comprised of other types of residential units including out-houses and shelter homes. Residential buildings account for 72.21% of all newly constructed buildings in 2022-2023.

Thiruvananthapuram district tops the list in residential construction with 49,741 buildings followed by Malappuram with 39,037. Idukki and Wayanad have the fewest residential buildings with 8,102 and 8,740 respectively. The high number of residential buildings in district Thiruvananthapuram highlights the ongoing urbanization trend and the growing demand for housing in these areas. As this district form part of Kerala's administrative center there is a surge in housing demand due to migration induced by increased job opportunities.

The emphasis on residential construction across various districts reflects the success of initiatives aimed at promoting housing and homeownership. The high number of residential buildings in Thiruvananthapuram, Malappuram and Ernakulam highlights the growing demand for housing infrastructure in these areas, underscoring the need for parallel developments in transportation, healthcare and education.

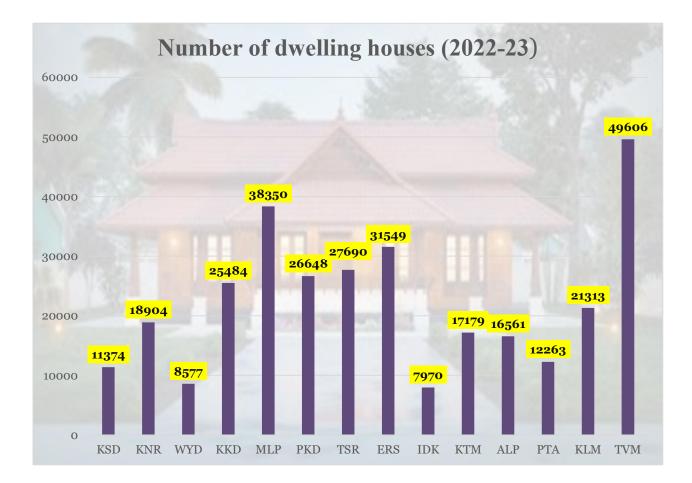

The data reveals the concentration of residential construction in districts like Thiruvananthapuram and Ernakulam reflecting the growing urbanization and housing demand in these areas. While Malappuram district being a semi rural district in character has a propotion of 12.29 % of residential buildings (second highest) newly constructed due to the prevalence of high population. At the same time, rural districts particularly Wayanad and Idukki exhibit lower residential construction due to geographic challenges and lower population density. The districtwise analysis emphasis the importance of tailored housing policies that address both urban and rural development needs in Kerala.

4. Dwelling houses

During 2022-2023, Kerala saw the construction of 3,13,468 dwelling houses which accounts for 71.27% of the total newly built structures. Of these 2,25,730 (72.01%) were constructed in rural areas while 87,738 (27.99%) were built in urban areas. Thiruvananthapuram recorded the highest number of dwelling houses at 49,606 followed by Malappuram with 38,350. In contrast, Idukki had the fewest at 7,970 with Wayanad slightly higher at 8,577.

Malappuram leads in non-residential building construction and second place in residential building construction, emphasizing robust construction in the Malappuram district. This robust growth in construction sector in Malappuram could be attributed to population growth, economic activities and infrastructural development due to foreign remmitence.

Proportion of residential & non- residential buildings (2022-23)

Thiruvananthapuram district has the highest number of residential buildings accounting for a total of 49,741 while Idukki district has the fewest with 8,102. For non-residential buildings, Malappuram district leads with 23,539 whereas Idukki district has the lowest count at 2,496.

Among the various types of non-residential structures, commercial buildings are the most prevalent constituting 85.86% of all non-residential buildings constructed. This emphasizes the significance of commercial activities and the state's commitment to foster a diverse and dynamic business landscape.

Commercial buildings make up the majority of non-residential structures, with Malappuram leading with 20,712 buildings accounting for about 20% of all commercial buildings registered in Kerala for the year 2022-23. This highlights the district's commercial vibrancy. Other districts like Kozhikode, Ernakulam, Thrissur and Kannur also showed strong performance in the construction of new commercial spaces during the same period.

For the fiscal year 2022-2023, Ernakulam district leads in the construction of new industrial buildings underscoring the district role as an industrial hub. With 1,099 industrial buildings, Ernakulam accounts for approximately 17% of all industrial buildings registered in Kerala during 2022-23 indicating a region of strong industrial base. Other districts like Malappuram (875), Kottayam (730) and Palakkad (682) also reported significant numbers reflecting diverse industrial activities across the state. Districts with higher concentrations of industrial buildings may need focused infrastructure development to support industrial activities including improvements in transportation and utilities. Kasargod, with the lowest number of new industrial buildings registered (107) presents relatively small industrial base in the region. The government needs to focus attention on districts which are lagging in industrial front.

In the case of ownership of private buildings for the year 2022-23 male ownership is more than female ownership. The gender ratio in building ownership remains consistent across rural and urban areas, reflecting a broader pattern of male dominance in property possession irrespective of the geographical context. On a statewide scale, the ratio between male and female ownership stands at 2.76:1, portraying a significant gender imbalance in private property possession across Kerala. The gender disparity in property ownership increased from a ratio of 2.71:1 in 2021-22 to 2.76:1 in 2022-23 implying male to female ownership is worseoff. Malappuram district amplifies this gender imbalance, reporting the highest ratio of 3.84:1. This trend signify the need for an examination of gender dynamics in property ownership. Kollam district fared better in terms of gender ownership of property with for every 1.76 builidngs owned by males 1 is owned by female.

8. Government / Local bodies owned buildings

Among the 4,39,857 buildings constructed in 2022-2023, only 3,244 are owned by government or local bodies, making up for just 0.74% of the total. This represents a 7.52% increase from the previous year. Palakkad district leads with 491 government-owned buildings, while Kollam district has the fewest with only 88.

The data shows varying percentages of government/local body owned buildings across districts, ranging from 0.33% to 1.41%. The overall percentage of government or local body owned buildings is quite low at 0.74%, reflecting a modest government involvement in the construction sector compared to private ownership.

9. Type of roofing

Roofing is a crucial element in construction, serving both as a protective cover and a defining feature of a building. It not only shields occupants but also enhances a structure's aesthetic appeal. The choice of roofing material reflects a blend of tradition, functionality and contemporary design trends. Roofing types can indicate the standard of living and may change

based on climate conditions and technological advancements. Recent innovations and the introduction of new materials have led to a significant shift in roofing patterns, with a preference for more durable options. Consequently, thatched and tiled roofs are increasingly being replaced by concrete roofs. In 2022-2023, 4,08,013 buildings (92.76%) were constructed with concrete roofs, while only 1,246 buildings (0.28%) used thatched roofs, 8,709 buildings (1.97%) used tiled roofs and 4.97% used other materials.

2021-22	279465	116338	395803	
2022-23	317614	122243	439857	

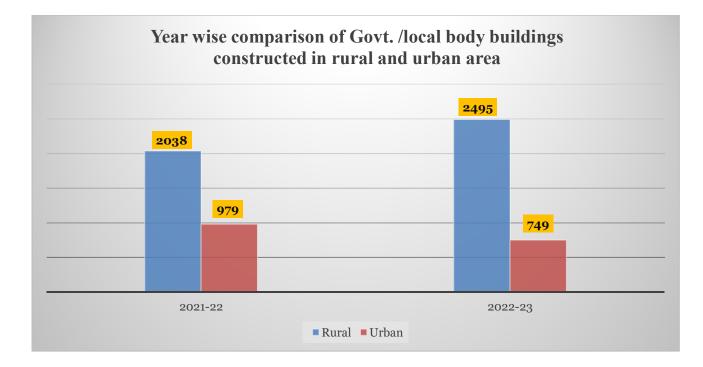

The total number of newly constructed buildings rose significantly from 3,95,803 in 2021-22 to 4,39,857 in 2022-23, reflecting an increase of 11.13%. Construction in rural areas also saw a substantial rise, with new buildings increasing from 2,79,465 in 2021-22 to 3,17,614 in 2022-23, marking a growth rate of approximately 13.65%. This indicates a robust growth in construction activity in rural area. In contrast, urban areas experienced a mere modest increase, with the number of newly constructed buildings rising from 1,16,338 in 2021-22 to 1,22,243 in 2022-23, representing a growth rate of 5.08%. Overall, the growth rate of construction in rural areas surpasses that of urban areas both in terms of numbers and growth rate over years.

2022-23	228688	317614	88942	122243	317630	439857

The total number of residential buildings increased significantly from 2,91,217 in 2021-22 to 3,17,630 in 2022-23, reflecting a growth of 9.07%. In rural areas, residential buildings grew from 2,06,651 in 2021-22 to 2,28,688 in 2022-23, representing a year over year growth of 10.66%. Urban areas on the other hand, saw a modest increase in residential construction with a growth rate of 5.17% from 2021-22.

2022-23	2495	317614	749	122243	3244	439857

In 2021-22, a total of 3,017 buildings were constructed by Government/local bodies comprising 2,038 in rural areas and 979 in urban areas. In 2022-23, 3,244 buildings are Govt. owned and which is 7.52% more than the previous year. In the fiscal year 2021-22, a total of 2,038 buildings were constructed by Government/local bodies in rural areas and increased to 2,495 in the current year, witnessing a growth of 22.42 % growth in construction. While in urban area the trend is quite opposite whereby the number of buildings constructed decreased from 979 in 2021-22 to 749 by 2022-23 accounting to a 23.49% decline in number of buildings constructed by Govt./ local bodies. The data for the fiscal years 2021-22 and 2022-23 suggests a growing focus on rural infrastructure development by Government/local bodies, reflected in the increased number of buildings constructed in these areas. Conversely, urban areas experienced a decline in construction activities during the same period. This trend may be due to Govt commitment to enhance rural infrastructure.

12. Analysis of building statistics in Kerala state since 2015-16

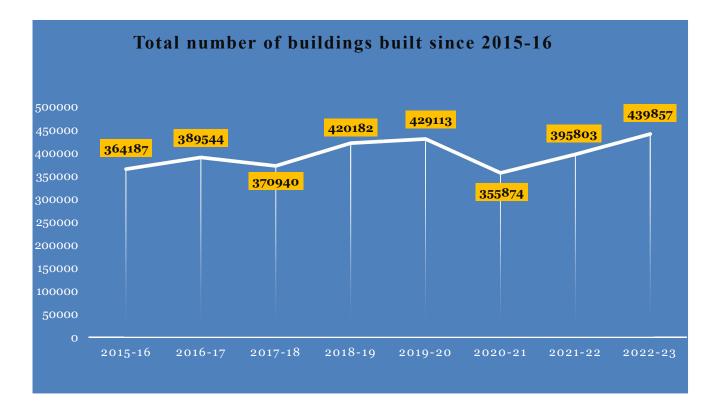

The table below offers a detailed overview of building construction activities in the state of Kerala from the financial years 2015-16 to 2022-23. This data meticulously tracks the number of newly constructed buildings each year, highlighting the evolving trends in both urban and

rural area. As Kerala progresses towards modernization, this analysis aims to illuminate key milestones emerging trends and potential factors impacting the building construction sector over this eight-year period.

Over the past eight years, a total of 31,65,500 buildings were completed in Kerala. Of these 24,02,304 (75.89%) are residential buildings and 7,63,196 (24.11%) are non-residential buildings. Among the residential buildings, 97.89% belong to dwelling houses, while 81.69% of the non-residential buildings are commercial buildings. The annual number of buildings completed has varied, with a notable decline in 2020-21 followed by a subsequent increase. Although residential buildings, including dwelling houses make up the most of building structures, there has been a growing focus on commercial buildings among non-residential structures in recent years, reflecting economic growth in Kerala.

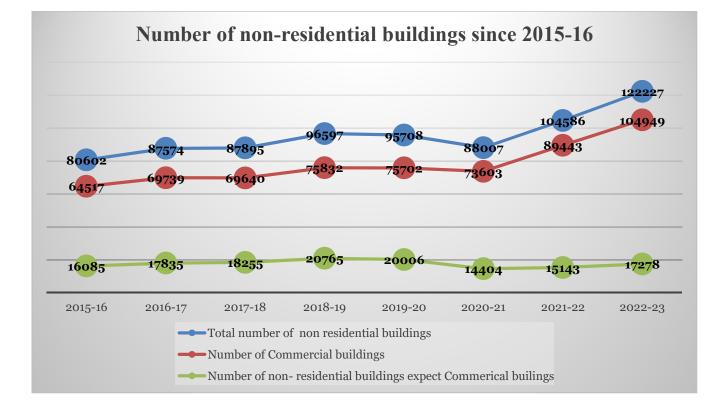

The total number of buildings completed in Kerala has generally exhibited an upward trend over the years with some fluctuations. The highest number of buildings were completed in 2022-23, reaching 4,39,857 marking a peak in the last eight-year period. Despite the overall upward trend, there were notable declines particularly in 2017-18 and a sharp drop in 2020-21 may be due to the effects demonetization of rupee and covid- 19 pandemic. However, the sector has shown a strong recovery and growth, especially in the last two years. Data for 2021-22 and 2022-23 indicates that not only has the construction sector in Kerala rebounded, but it has also surpassed previous records with a year over year growth rate of 11.13% in the latest year.

The number of residential buildings completed in Kerala has fluctuated over the eightyear period, with both increases and decreases observed. The highest number of residential buildings completed was in 2019-20 with 3,33,405 buildings and the lowest was in 2020-21 with 2,67,867 buildings. The notable surge in residential buildings from 2018 to 2020 may be primarily attributed to the iniative of "Rebuild Kerala" by Government of Kerala. This iniative aimed to reconstruct post-flood scenario contributing significantly to the increased building activities during this period. The sharp decline in 2020-21 coincides with the global Covid-19 pandemic, which likely caused delays or halts in construction projects and financial constraints among new home owners to afford construction. The last two financial years witnessed a significant recovery in the completion of residential buildings with numbers nearing prepandemic levels. This suggests a rebound in the construction sector driven by increased demand for residential spaces. The current year registered a year over year growth of 9.07 % more than the previous year.

The data on the number of dwelling houses completed in Kerala from 2015-2023 reflects a fluctuating trend with periods of growth and decline. The construction of dwelling houses peaked in 2019-20 may be due to the Rebuilt Kerla iniative undertaken by Govt of Kerala followed by a significant decline in 2020-21 due to the pandemic. However, the sector has shown resilience with a strong recovery in the following years particularly in 2022-23, which recorded one of the highest numbers of completed dwelling houses. This trend indicates ongoing demand for dwelling houses and suggests that the sector is on a path of steady growth following the challenges posed by the pandemic. The increasing trend in dwelling houses construction over the years may also be contributed due to socio- cultural condition such as prevalence of number of nuclear families increasing in the state. The current year witnessed a growth of 9.32% over 2021-22.

The total number of non-residential buildings including commercial, has generally shown an upward trend with some fluctuations. Commercial buildings have consistently been the largest segment contributing significantly to the overall count of non-residential buildings each year. Non-residential buildings excluding commercial ones have fluctuated over the years with periods of both increase and decrease.

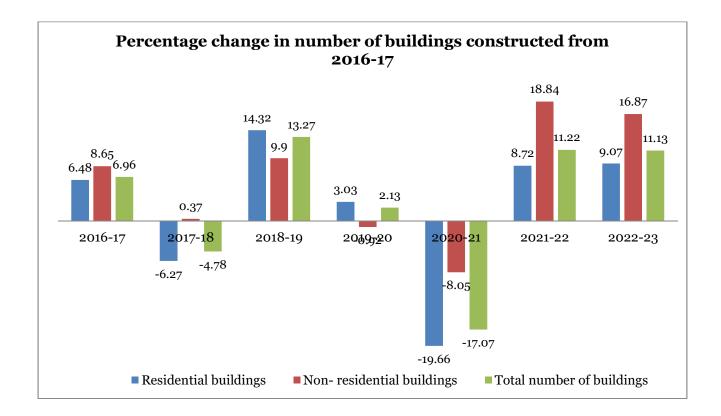

Commercial buildings dominate the non-residential sector, reflecting a strong emphasis on commercial construction in the state. The number of non-residential buildings excluding commercial ones has varied notably, with a significant decline in 2020-21 due to the pandemic followed by a recovery in the subsequent years. The decrease in 2020-21 for both non-residential and commercial buildings highlights the pandemic's impact on the construction sector.

The robust recovery observed in 2021-22 and 2022-23, particularly in commercial construction signifies resilience and renewed investment in the non-residential sector. The percentage increase in non-residential buildings is 16.87% compared to the previous year,

indicating a thriving construction industry and heightened demand for commercial spaces in the state.

Percentage change in number of buildings constructed from 2016-17

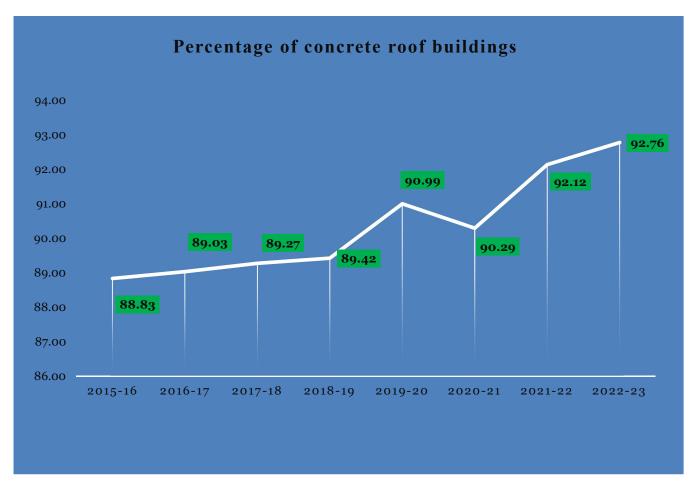

The percentage growth in number of new structures built since 2016-17 to 2022-23 shows volatility in the construction sector, may be due to demonstration of rupee and covid- 19 pandemic. Growth recovery phase could be witnessed since 2021-22 as there is a significant trend of recovery in both residential and non- residential buildings. The future outlook looks great, as the positive growth over the last two years suggests a strengthening construction market, which may indicate potential for further growth.

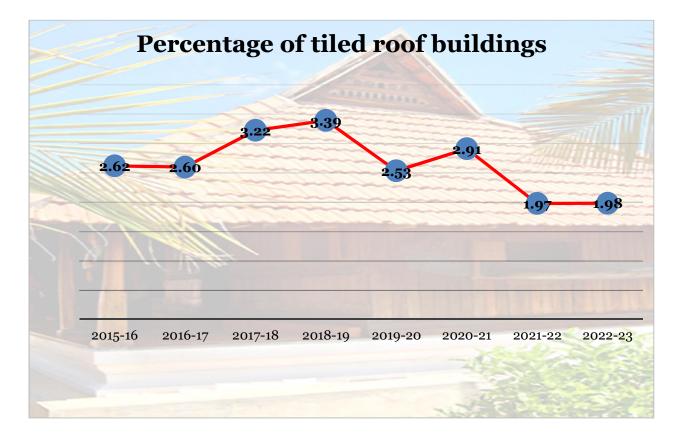

Roofing materials used in buildings since 2015-16

The cumulative figures in the following table provide an overarching view of the extensive construction activities reaching a total of 31,65,500 buildings over the eight-year period. Out of total number of buildings have been made since 2015-16, 19,875 (0.63%) are thatched buildings, 83,618 (2.64%) are tiled buildings, 28,61,564 (90.40%) are concrete buildings and 2,00,443 (6.33 %) are other roof type buildings.

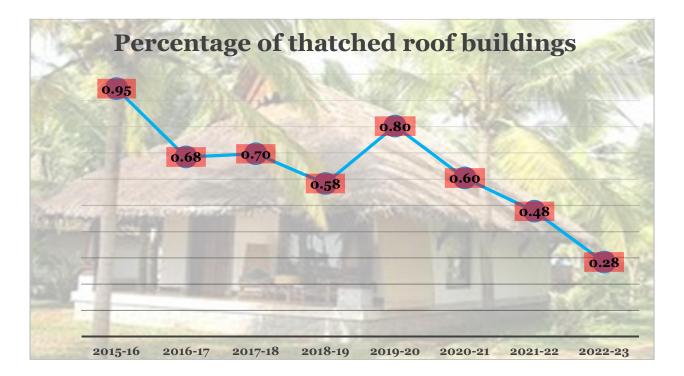

Sl.No.	Year	Thatched buildings	Tiled buildings	Concrete buildings	Other buildings	Total number of buildings

8	2022-23	1246	8709	408013	21889	439857
	Total	19875	83618	2861564	200443	3165500

There has been a clear and consistent increase in the percentage of buildings with concrete roof over the years. The proportion has grown from 88.83% in 2015-16 to 92.76% in 2022-23, indicating a rising preference for concrete roofing. The data shows a steady shift towards concrete roof with the percentage increasing each year except for a minor dip in 2020-21. This slight decline can likely be attributed to the economic and logistical challenges posed by the Covid-19 pandemic, which may have temporarily affected the choice of roofing materials. However, the strong rebound in 2021-22 suggests a swift recovery and potentially an even greater preference for concrete roofs underscoring a significant move away from traditional roofing materials and reflecting a strong preference for durability and modern construction techniques.

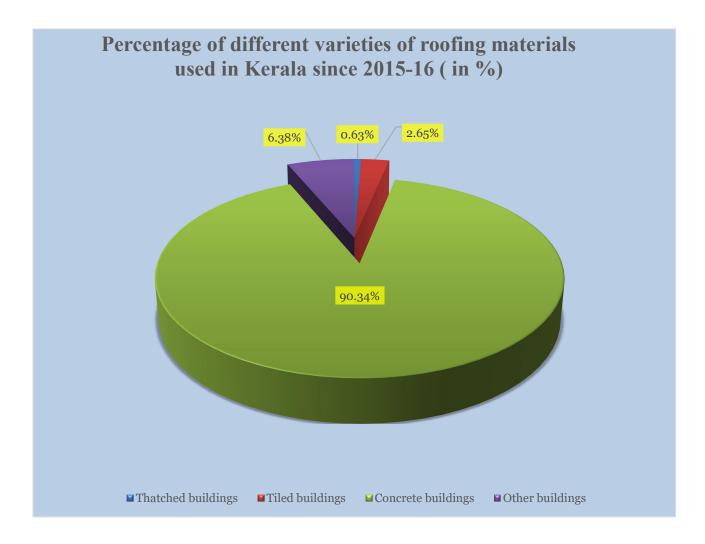

The percentage of buildings with tiled roofs fluctuates throughout the period, with a general decline from 2.62% in 2015-16 to 1.98% in 2022-23. This indicates a gradual decline in the popularity of tiled roofing in favor of other roofing materials particularly concrete. The percentage of tiled roof buildings fluctuated over the years with increases in 2017-18 and 2018-19, but overall the trend shows a decline in their popularity. However, the sharp decline in 2021-22 suggests that tiled roofs became less favored in the market. Despite brief periods of increase the overall trend is a decline in the use of tiled roofing, with the percentage nearly halving from its peak in 2017-18 to 2022-23. This could indicate a transition towards more modern, durable roofing materials particularly concrete, as noted in the previous analysis. Tiled roofing appears to be losing its appeal, settling into a smaller market.

The percentage of buildings with thatched roofs has steadily declined from 0.95% in 2015-16 to 0.28% in 2022-23. This downward trend indicates a significant decrease in the use of thatched roofs, reflecting a shift away from traditional roofing methods to more durable and modern roofing system in Kerala. The near elimination of thatched roofs by 2022-23 suggests that this once-common method of roofing is becoming increasingly rare likely due to changes in lifestyle, construction practices and preferences for more resilient and long-lasting building materials.

Over in the last eight years since 2015-16, the trend of roofing pattern in Kerala is dominated by concrete roof with 90.34%, followed by 2.65% tiled, 0.63% thatched and 6.38% other segment roofing material.

13. Male-Female ownership of private buildings

The data provided here sheds light on the ownership distribution of buildings in Kerala across the financial years from 2015-16 to 2022-23, with a specific focus on male and female ownership.

Year	Male ownership	Female ownership	Male: Female ratio	Absolute difference in Male- Female Ownership
2015-16	257813	95754	2.69 :1	162059
2016-17	279271	101696	2.75 :1	177575
2017-18	265620	97174	2.73 : 1	168446
2018-19	301075	109677	2.75 : 1	191398
2019-20	298468	122383	2.44 : 1	176085
2020-21	254453	93677	2.72 : 1	160776
2021-22	282698	104246	2.71 : 1	178452
2022-23	277485	100567	2.76 : 1	176918
Total	2216883	825174	2.69 : 1	1391709

Over the eight-year period, the total number of properties owned by males amounts to 22,16,883 compared to 8,25,174 owned by females. Female ownership has generally increased over time, with notable growth seen between 2015-16 and 2019-20 followed by a slight decline in subsequent years. The male-to-female ownership ratio has remained relatively stable at around 2.7:1, indicating a consistent gender disparity in property ownership except for 2019-20 were the female to male ratio improved to 2.44 : 1. This ratio means that for every 2.7 buildings owned by males, females own about 1 building. Despite some fluctuations, the ratio highlights a persistent trend where male ownership continues to significantly surpass female ownership.

Although the male-to-female ratio remained the same, in absolute terms the numbers depicts a gradual increase in female ownership over the years, which is a positive sign towards reducing the gender gap in property ownership. The absolute difference in property ownership between males and females in Kerala shows a persistent gender gap with the gap fluctuating over the years. Although there were periods where the gap narrowed, particularly in 2020-21 the overall trend suggests that male ownership continues to significantly outpace female ownership.

14. Building Construction Cost Index (BCCI)

The Building Construction Cost Index (BCCI) reflects the changes in the cost of construction materials, labor and other factors affecting construction costs over time. The BCCI is the statistical tool designed to measure the relative changes in the rate of construction cost of a building with respect to time and place. BCCI series can show the trends in the building construction costs at a specified center over a period of time. This index is an important tool for understanding inflationary trend in the construction sector. It is particularly useful for builders, contractors and government agencies in planning and budgeting construction projects. The BCCI of districts in Kerala from 2011-12 to 2022-23 is provided above. The base year fixed to determine BCCI is 2011-12.

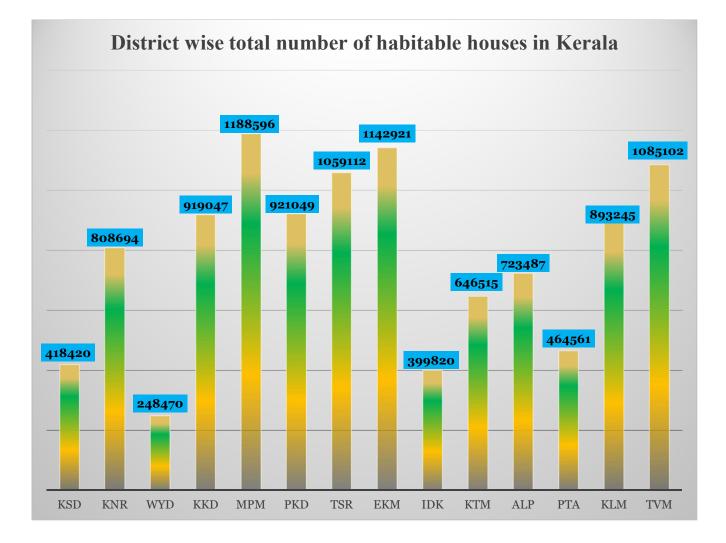

Across all distircts in Kerala, the Building Construction Cost Index (BCCI) shows a consistent upward trend from 2011-12 to 2022-23. This indicates an overall rise in construction costs due to factors like inflation, labor cost increase, building construction materials price hike. The highest increase in BCCI is observed in Idukki district and lowest in Thiruvananthapuram district.

District wise total number of habitable houses

Malappuram has the highest number of habitable houses, with a total of 11,88,596. This reflects the need for more housing spaces to accommodate the large population. Ernakulam and Thiruvananthapuram, being commercial and capital district has 11,42,921 and 10,85,102 habitable houses showing its significance as a major urban center in Kerala. While Thrissur with 10,59,112 habitable houses this district ranks high as well being an important cultural and economic hub. On the other hand geographically challenging regions like Wayanad and Idukki which are more rural and less densely populated have far fewer habitable houses.

Denisty of houses (Sq.km)

Kerala has a total of 10,919,039 habitable houses across its districts. The total area available (excluding forests) is 28,046 sq.km. The overall density of houses for Kerala is approximately 389.32 houses per sq.km. Thiruvananthapuram ranks the highest interms of house density at 642.45 houses/sq.km. Kollam and Thrissur follow with densities of 533.92 and 531.42 houses/sq.km respectively. Idukki and Wayanad district have one of the lowest house density at 168.06 and 185.15 houses/sq.km respectively, likely due to hilly terrain and low population. Palakkad district which has the largest area excluding forests 3113 sq.km, yet its house density is relatively moderate at 295.87 houses/sq.km. Malappuram which has the highest number of habitable houses and population among the districts in Kerala has house density at 471.67 houses / sq.km. Districts with high house density are likely to experience challenges related to urban planning, housing, infrastructure development and environmental degradation. Districts with low density, such as Idukki and Wayanad may focus more on preserving ecological balance, managing natural resources and ensuring sustainable development.

In Kerala, urban areas account for 21.58 % of the total habitable houses, while rural areas dominate with 78.42 % indicating a predominantly rural housing landscape in the state. Districts such as Thiruvananthapuram (32.60%), Ernakulam (30.09%), Kozhikode (27.73%), Kannur (26.74%) has relatively high proportion of habitable houses in urban area. While districts such as Idukki (90.07%), Kasargod (88.52%) has relatively high proportion of habitable houses in rural areas.

The rural area dominates the housing landscape in most districts especially in districts like Idukki, Kasaragod and Wayanad, which are largely rural due to their geography and economy likely relying more on agriculture and traditional livelihoods. Urban housing is concentrated in districts with key cities such as Thiruvananthapuram, Ernakulam, Kozhikode and Kannur which are more developed with better access to infrastructure, employment opportunities.

Average population per house comparison

* Population projection by Vital statistical division of DES.

Malappuram district tops the list in average population per house by 4.01, implies on an average 4 person live in a house, followed by Kozhikode at 3.66. Generally disricts with higher population tend to have higher ratio. Pathanamthitta district has the lowest ratio at 2.49 person / house. This may be due to presence of large number of NRI community in Pathamthitta district. The state average population per house stands at 3.25 person per house.

Conclusion

The 'Building Statistics 2022-2023' report provides a detailed analysis of Kerala's construction sector, capturing its dynamic growth and underlying trends. This fiscal year has seen substantial progress, with a total of 4,39,857 new constructions completed, marking 11.13% increase from the previous year. These numbers reflect Kerala's resilience and recovery, particularly in the post-pandemic era, where the construction sector has rebounded strongly, driven by demand in both residential and non-residential segments.

Residential buildings continue to dominate the construction landscape, accounting for 72.21% of the total constructions. This emphasizes the state's ongoing need for housing, fueled by population growth, urbanization and the increasing prevalence of nuclear families. Districts like Thiruvananthapuram, Malappuram and Ernakulam lead in residential constructions, showcasing the higher demand for housing in urbanized or economically vibrant regions. Conversely, districts like Idukki and Wayanad have recorded the lowest construction activities, highlighting geographic and demographic challenges in these areas.

The significant growth in non-residential constructions, which saw a 16.86% increase, underscores the state's focus on economic and infrastructure development. Among non-residential buildings, commercial properties make up a notable 85.86%, highlighting the state's progress in commercial activities for the financial year. The growth in commercial constructions has seen a 17.33% increase compared to the previous year. Malappuram stands out as a leader in commercial and overall non-residential construction, reflecting its emerging role as a hub for economic activities. Similarly, districts like Kozhikode and Ernakulam show robust construction trends, emphasizing their contribution to the state's commercial and industrial sectors.

Roofing patterns highlight a strong shift towards durability and modernization, with 92.76% of the buildings opting for concrete roofs. This trend indicates a departure from

traditional roofing methods like thatched and tiled roofs, which are now increasingly rare. The preference for concrete roofing reflects the state's adaptability to contemporary construction practices and the desire for sustainable and long-lasting structures. Conversely, the minimal use of thatched roofing at 0.28% points to the diminishing use of traditional architectural methods.

Ownership trends reveal a continued dominance of private entities, with 98.01% of the new constructions being privately owned. However, a persistent gender imbalance in property ownership remains evident, with a male-to-female ratio of 2.76:1. This disparity, though consistent with previous years, highlights the need for targeted interventions to address gender inequities in property ownership and encourage greater participation of women in asset ownership.

The report also draws attention to rural-urban divides, with rural areas accounting for 72.75% of non-residential and 71.99% of residential constructions. This trend highlights the enduring significance of rural areas in the state's development narrative, while also emphasizing the need for balanced urban planning. Thiruvananthapuram, with the highest building density of 34 structures per square kilometer, exemplifies the challenges of urban congestion and the importance of sustainable planning.

Analysis of historical data from 2015-16 to 2022-23 reveals a consistent upward trend in construction activities, interrupted only by significant external factors like the COVID-19 pandemic. The recovery witnessed in the past two years signals renewed investment and confidence in the construction sector, with a strong focus on meeting housing demands and expanding economic infrastructure.

The total number of habitable houses in Kerala up to 2022-23 reveals significant insights into the housing landscape across districts. Malappuram has the highest number of habitable houses due to its large population, while Idukki and Wayanad with challenging geographies and low population have the least habitable houses. The rural-urban split highlights that nearly 80% of habitable houses are in rural areas.

The analysis of building statistics in Kerala reveals significant trends with implications for urban planning and development. The steady increase in residential and commercial constructions, particularly in urban areas reflects rising demand for housing and commercial spaces. This growth indicates Kerala's economic development and population density, especially in cities like Thiruvananthapuram, Ernakulam and Kozhikode. Concentrated construction in specific regions highlights the need for balanced regional development to prevent overburdening urban centers.

In conclusion, the Building Statistics 2022-2023 report underscores Kerala's progress in construction, reflecting a resilient and evolving sector that caters to the state's socio-economic needs. The building statistics reveal positive economic trends, however, they also emphasize the need for strategic planning to ensure sustainable, equitable and long-term growth for the state. Future efforts should focus on improving construction quality, promoting eco-friendly practices and ensuring that development benefits are evenly distributed across all regions of Kerala. This report will serve as a valuable resource for assessing the state's progress and prosperity. While the growth in residential and non-residential constructions demonstrates robust demand and economic vitality, the report also highlights critical challenges such as regional disparities, gender inequities and urbanization pressures. Addressing these issues requires strategic interventions in urban planning, gender-inclusive policies and targeted development efforts for underperforming regions. By leveraging the insights from this report, policymakers and stakeholders can drive sustainable growth, ensuring that Kerala's construction sector continues to thrive while aligning with the state's broader developmental goals.
