GOVERNMENT OF KERALA

GROSS DOMESTIC PRODUCT OF KERALA AND INDIA

FROM 2011-12 TO 2017-18

(BASE YEAR 2011-12)

**DEPARTMENT OF ECONOMICS AND STATISTICS KERALA
2019**

PREFACE

The National accounts provide a comprehensive, conceptual and accounting frame work for analyzing and evaluating the performance of an economy. The State Domestic Product is estimated annually by the Department of Economics and Statistics (DES) based on the guidelines and methodology prescribed by the Central Statistics Office (CSO). The state domestic product thus prepared by the Department is invariably reconciled with the CSO before finalization.

This present publication reveals the estimates of Gross Domestic Product (GDP), Net Domestic Product (NDP) and Per capita Income of Kerala and India from 2011-12 to 2015-16 (final), 2016-17(Provisional) and 2017-18(Quick), both at Current and Constant (2011-12 base year) prices. This publication is structured in to five chapters. Introduction chapter describes the Genesis of National Accounts, State Level performance of the economy etc. Chapter 2 describes the National /State level GVA estimates and its comparison. Chapter 3 describes sector wise coverage, data source & estimation methods used in the national accounts. Chapter 4 includes detailed tables of National/State Domestic Product, District Domestic Product etc. Chapter 5 contains the abbreviations used.

I am thankful to the officials of National Accounts Division, CSO for timely providing requisite data and guidance. I extend my gratitude to various Heads of Departments of State Government, Departmental and Non-departmental Commercial Undertakings for their co-operation in providing available requisite data for preparing the SDP.

This report has been prepared by the staffs of the State Income Division under the leadership of Smt. Sheela P Sankar, Additional Director (State income) and Sri. V. Vijayakumar Assistant Director.

I hope that this publication would be useful for planners, administrators and other data users. Suggestions for the improvement of this publication are most welcome.

1. INTRODUCTION

The national accounts provide a comprehensive, conceptual and accounting framework for analyzing and evaluating the performance of an economy. As the national accounts are designed to account for all economic transactions, their compilation is a major exercise, which draws information from several diverse data sources. The sources consist of data generated as a byproduct of public administration system, such as land records, collection of direct and indirect taxes, as well as data collected directly through censuses and sample surveys conducted by official agencies of the Central and State Governments. While the underlying concepts and methodology of compilation has been mostly standardized under the System of National Accounts (SNA) of the international agencies, procedures and approximations are shaped by the country-specific data collection system. For making the estimates comparable internationally and over time, the Central Statistics Office (CSO) maintains detailed, well documented methods and procedures unchanged till the revision of the base year.

Genesis of National Accounts

The first set of estimates of national income for the entire Indian Union was compiled by the 'National Income Committee', a High Powered Expert Committee set up by the Government of India under the Chairmanship of Prof. P.C. Mahalanobis in 1949. The estimates of national income and details of methodology adopted by the Committee were published in the First and Final reports of the National Income Committee brought out in April 1951 and February 1954 respectively (available on MOSPI's website <http://mospi.gov.in>).

Following the methodology recommended by the National Income Committee, the Central Statistics Office, earlier called the Central Statistical Organisation (CSO) prepared the first official estimates of national income with base year 1948-49 at constant prices. The CSO published these estimates at constant (1948-49) prices along with the corresponding estimates at current prices and the accounts of the Public Authorities in the publication, " Estimates of National Income " in 1956. With the gradual improvement in the availability of basic data over the years, a comprehensive review of methodology for national accounts statistics has constantly been undertaken by the CSO with a view to updating the data base and shifting the base year to a more recent year. The base year of national accounts were revised in the following chronological order:

- i. From 1948-49 to 1960-61 in August 1967;
- ii. From 1960-61 to 1970-71 in January 1978;
- iii. From 1970-71 to 1980-81 in February 1988;
- iv. From 1980-81 to 1993-94 in February 1999;
- v. From 1993-94 to 1999-2000 in January 2006;
- vi. From 1999-2000 to 2004-05 in January 2010;
- vii. From 2004-05 to 2011-12 on January 30, 2015.

Along with the shifting of base years of national accounts series, the CSO also had been making improvements in the compilation of national accounts series, in terms of coverage of activities, incorporation of latest data sets and latest international guidelines.

State Level Estimates

State level performance of the economy is analysed by computing different macroeconomic state level indicators like Gross State Domestic Product, Net State Domestic Product, Per capita, Fiscal deficit etc. These estimates are prepared by using the concept & methodology adopted by CSO & SNA 2008. According to SNA 2008, the total economy is divided into Non-financial Corporations, Financial corporations, General NPISHs & Rest of the world. Based on the nature of economic activity, the institutional units are grouped into sectors & industries. The sectors are classified as Primary, Secondary & Tertiary. Primary sector includes Crops, Live Stock, Forestry & logging, Fishing & Aquaculture, Mining & Quarrying. Secondary Sector comprises Manufacturing, Electricity, Gas & Water Supply, and Construction. Tertiary sector includes Trade & repair services, Hotels & restaurants, Railways, Road transport, Water transport, Air transport, Services incidental to transport, Storage, Communication & services related to broadcasting, Financial services, Real estate, ownership of dwellings & professional services, Public administration and defence, & Other Services. The DES, Kerala is preparing the GSDP & NSDP (at Current & Constant Prices), Per capita income, District Domestic Product estimates annually.

Performance of the state economy

The GSDP estimates up to 2017-18(Q) with base year 2011-12 have been prepared. The GSDP at current prices recorded a growth of 11.42% in 2017-18(Q) as compared to the year 2016-17(P). The GSDP at constant prices recorded a growth of 7.18% in 2017-18(Q) as compared to the year 2016-17(P). The GSDP estimates at Current & Constant prices are depicted in the following tables.

Chapter 2: GDP of India & Kerala

The GSDP estimates at current prices showed a positive growth over the years, which have raised from Rs.36404788 lakhs during 2011-12 to Rs.68676443 lakhs during 2017-18 for Kerala and Rs. 873633072 lakhs to Rs.1709500424 lakhs for India. Table 2.1 shows the GVA / GSDP of Kerala & India, growth rate, per capita income etc. and the percentage contribution of Kerala to India for the years from 2011-12 to 2017-18(Q). The State economy at current prices, contributes to about 4.02 per cent to the National GDP during the year 2017-18(Q).

Growth rate of (GSDP) Kerala over previous years (%)		13.26	12.79	10.22	9.64	9.67	11.42
Growth rate of (GDP) All India over previous years (%)		13.82	12.97	10.99	10.46	11.55	11.28

P- Provisional Estimate Q - Quick Estimate

The GSDP estimate at constant prices also shows a positive growth over the years, which have raised from Rs.36404788 lakhs during 2011-12 to Rs.51369589 lakhs during 2017-18 for Kerala and Rs. 873633072 lakhs to Rs.1317985863 lakhs for India. The steady increase in the GSDP reflects an upward development of the economy over the years, and a healthy trend of the state economy. The figures in Table 2.2 describes the GVA / GSDP of Kerala & India, growth rate, per capita income etc. and the percentage contribution of GSDP of Kerala to GDP of India for the years from 2011-12 to 2017-18.

P- Provisional Estimate Q - Quick Estimate

2.2 Sectoral Decomposition of GVA of Kerala 2017-18 (Q)

2.3 Sectoral Decomposition of GVA of India 2017-18(Q)

2.4 Comparison of Growth rate of GVA of Kerala and India

The growth rate of both the GVA of India and Kerala, decreases in current prices from 2012-13 to 2015-16, but exists a slight increase in the growth rate from 2016-17. In the case of GDP of India at constant prices the growth rate is increasing from 2012-13 to 2016-17 and then slight decrease for 2017-18. In the case of Kerala, an increase in the growth rate for the year 2017-18 at constant price .

Chapter 3: Coverage, Data Source & Estimation Methods

According to the nature of economic activity, State Domestic Product estimates are prepared in sector wise & industry wise. This chapter describes the coverage of economic activities, major data source & estimation methods used in each sector. The estimates are prepared in sector wise namely (1) Primary sector, (2) Secondary sector and (3) Tertiary sector.

3.1 Primary Sector

It includes Agriculture & Allied sector and Mining & quarrying. The GSVA estimate, growth rate & percentage contribution of Primary sector of Kerala and its comparison to all India estimates are depicted in the following tables.

Sector wise data coverage, data source and estimation method of Primary sector as follows:-

3.1.1 Agriculture & Allied sector

Agriculture & Allied sector consist of Crops, Live Stock, Forestry & logging, Fishing & Aquaculture. The item wise details are described below.

3.1.1(a) Crops

The economic activities included in this sector are Growing of field crops, Fruits, Nuts, Seeds and Vegetables, Management of Tea, Coffee and Rubber plantations, Agricultural and Horticultural services on a fee or on contract basis such as harvesting, baling and thrashing, Preparation of tobacco for marketing, Pest control, Spraying, Pruning, Picking, Packing, Ancillary activities of cultivators such as gur making, Transportation of own produce to primary markets, Activities yielding rental income from farm buildings and farm machinery and interest on agricultural loans. Operation of irrigation system comprises supply of water through various Government channels to the agriculturists is also included in this sector. Major data source are EARAS, Farm Price from State DES, Rubber Board, Coffee Board, Cost of Cultivation Studies, Government Budget etc.

GVA estimates at current and constant prices are prepared by using the production approach.

3.1.1 (b) Livestock

The economic activities included in this sector are Breeding and Rearing of animals and poultry besides private veterinary services, Production of milk, slaughtering, Preparation and dressing of meat, Production of raw hides and skins, eggs, dung, raw wool, honey and silk worm cocoons etc Major data source are integrated sample survey results conducted by state Animal Husbandry department Central Silk Board, KVIC, ILC etc.

GVA estimates at current and constant prices are prepared by using the production approach.

3.1.1 (c) Forestry & logging

The economic activities covered under this sector include (i) forestry (e.g., planting and conservation of forests, gathering of forest products, charcoal burning carried out in the forests), (ii) logging (e.g., felling and rough cutting of trees, hewing or rough shaping of poles, blocks etc.) and transportation of forest products to the sale depots/assembly centers and, (iii) farmyard wood (industrial wood and fuel wood collected by the primary producers from trees outside regular forests). The forest products are classified into two broad groups viz., (a) major products comprising industrial wood (timber, Round wood, match and pulpwood) and fuel wood (firewood and charcoal wood) and (b) Non Timber forest products(NTFP) formerly known minor products comprising a large number of wild growing forest material such as bamboo, fodder, lac, sandalwood, honey, resin, gum, tender leaves, cork, balsams, vegetable hair, eelgrass, acorns, horse chestnuts, mosses, lichens etc. Major data sources are Production & price data from State Forest Department, NSS 68th Round, and Budget Documents etc.

GVA estimates at current and constant prices are prepared by using the production approach.

3.1.1(d) Fishing & Aquaculture

The economic activities covered under this sector include (i) commercial fishing in (a) ocean, coastal and offshore waters and (b) inland waters, that include catching, tackling and gathering of fish from rivers, irrigation and other canals, lakes, tanks, fields inundated tracts etc., (ii) subsistence fishing in inland waters and artificial ponds, (iii) gathering of sea weeds, sea shells, pearls, sponges and other ocean and coastal

water products and (iv) fish curing viz., salting and sun-drying of fish. In order to cover the production of goods for own consumption, subsistence fishing has been included in the coverage. Activities of salting and sun drying of fish are also included in this sector, since these are undertaken predominantly by the same households, which are engaged in commercial/subsistence fishing. Major data source is the production & price obtained from State Fisheries department.

GVA estimates at current and constant prices are prepared by using the production approach.

The GSVA estimate, growth rate & percentage contribution of Agriculture & Allied sector of Kerala and its comparison to all India estimates are depicted in the following tables.

3.1.2 Mining & Quarrying

The economic activities covered in this sector comprise extraction of minerals which occur in nature as solids, liquids or gases; underground and surface mines, quarries and oil wells, with all supplementary operations for dressing and beneficiating ores and other crude minerals such as crushing, screening, washing, cleaning, grading, milling, floatation, melting, palletizing, topping and other preparations needed to render the material marketable. All these activities are covered to the extent they are carried on at the mine site. The expenditure on preparing mining sites, prospecting and boring activities are not included as they are included under the 'Construction' sector. Salt production by solar evaporation of sea water is also included under mining sector. Major data sources are state Mining & Geology department, Annual report of Public & Private Sector Companies, WPI etc.

GVA estimates at current price are prepared by using the production approach. Constant Price estimates are prepared by deflating the Current price estimates.

The GSVA estimate, growth rate & percentage contribution of Mining & Quarrying sector of Kerala and its comparison to all India estimates are depicted in the following tables.

3.2.1 Manufacturing

The manufacturing sector covers all manufacturing, processing and repair & maintenance services units irrespective of their employment size, investment and location. The National Industrial Classification (NIC 2008) from 10 to 33 is generally included as economic activities of this sector. For the preparation of estimates, it is further classified into two namely organised and unorganised manufacturing. The organised manufacturing consists of Departmental Enterprises, Non Departmental Enterprises, Railway workshops,

Private Corporate Enterprises including quasi corporations. Unorganised manufacturing comprises small scale enterprises located in the state. Major data sources are Annual report of Public & Private Sector Companies, Budget documents for DEs, Railways, NSS 67th & 68th Round and WPI etc.

GVA estimates at current price are prepared by using production & income approach. Constant Price estimates are prepared by deflating the Current Price estimates.

The GSVA estimate, growth rate & percentage contribution of manufacturing sector of Kerala and its comparison to all India estimates are depicted in the following tables.

3.2.3 Electricity, Gas & Water Supply

The economic activities covered under this sector include generation, transmission and distribution of electric energy, the manufacture of gas in gas works including gobar gas and distribution through mains to household, industrial, commercial and other users and the activities associated with collection, purification and distribution of water excluding the operation of irrigation system. Major data sources are Annual reports of KSEB Limited, Kerala Water Authority, Annual report of Private Sector Companies, Budget documents DEs, NSS 67th & 68th Round and WPI etc.

GVA estimates at current price are prepared by using production & income approach. Constant Price estimates are prepared by deflating the Current price estimates. The GSVA estimate, growth rate & percentage contribution of Electricity, Gas & Water Supply sector of Kerala and its comparison to all India estimates are depicted in the following tables.

3.3 Construction

The activity under this sector include contract construction by general builders, civil engineering contractors and special trade contractors, own account construction carried out by independent units of enterprises or other organisations which are not part of the construction industry proper. But, owing to the problems of availability of data separately from units carrying out construction work, construction industry, in India, for the purpose of estimating domestic product, has been taken to include the whole of construction activity (contractual as well as own account). Construction work covers all activity connected with site

preparation, alteration, addition, repair and maintenance, construction and maintenance of roads, rail beds, bridges, tunnels, pipelines, rope-ways, ports, harbours, runways, construction/erection and maintenance of power, telecommunication, transmission lines, waterways & water reservoirs, power plants, hydro-electric projects, industrial plants and building installations, planting and cultivating of new forests, plantations and orchards. Under NIC 2008, Division 41, 42, 43 covers construction activity. Major data sources are Annual report of Public & Private Sector Companies, Budget documents for DEs, Railways, AIDIS survey results, Prices of building material & labour cost from state DES.

Commodity flow approach is used to obtain the GVA estimates. This approach envisages estimation of production of commodities used in construction after adjusting them for inputs in other industries, changes in stocks, imports and exports so as to obtain the net availability of commodities for construction purposes. The commodities available for construction are valued at prices paid by the builders at the site of construction. Information on retail prices, transport costs, dealers' margins and indirect taxes collected from various sources is used to estimate the prices of inputs at site. Major data sources are Annual report of Public & Private Sector Companies, Budget documents for DEs, Railways, Prices of building material & labour cost from DES, AIDIS report, NSS 67th & 68th Round, WPI etc.

GVA estimates at current price are prepared by using commodity flow method & income approach. Constant Price estimates are prepared by deflating the Current price estimates with proper indices. The GSVA estimate, growth rate & percentage contribution of Construction sector of Kerala and its comparison to all India estimates are depicted in the following tables.

3.3.1 Trade & repair services

Trade & repair service includes wholesale and retail trade in all commodities whether produced domestically, imported or exported. It covers activities of purchase and selling agents, brokers and auctioneers. Wholesale trade covers units, which resell without transformation, new and used goods generally to the retailer and industries, commercial establishments, institutional and professional users or to other wholesalers. Retail trade covers units, which mainly resell without transformation new and used goods for personal or household consumption. This sector also comprises of maintenance and repair of motor vehicles and repair of personal household goods. The economic activities covered under this sector are Maintenance and repair of motor vehicles, Sale of motor vehicles, Whole sale trade except of motor vehicles Auctioning activities, Repair of personal household goods and Retail trade (except motor vehicles) Major data sources are Annual report of Public & Private Sector Companies, Budget documents for DEs, NDEs, NSS 67th & 68th Round, CPI from MOSPI etc.

GVA estimates at current price are prepared by production approach in the case of NDEs & income approach in the case of DEs. Current Price estimates are deflated using CPI (General) to obtain the Constant Price estimates.

3.3.2 Hotels & Restaurants

This sector covers services rendered by hotels and other lodging places, restaurants, cafes and other eating and drinking places. The economic activities covered are Hotels, Camping sites etc, Restaurants, bars and canteens. Major data sources are Annual report of Public & Private Sector Companies, Budget documents for DEs, NDEs, NSS 67th & 68th Round, CPI from MOSPI etc.

GVA estimates at current price are prepared by production approach in the case of NDEs & income approach in the case of DEs. Constant Price estimates are prepared by deflating the Current price estimates using CPI (General).

The GSVA estimate, growth rate & percentage contribution of Trade & repair service, Hotels & restaurants sector of Kerala and its comparison to all India estimates are depicted in the following tables.

Chapter 5: ABBREVIATIONS

Assets	Assets are entities that must be owned by some unit, or units, and from which economic benefits are derived by their owner(s) by holding or using them over a period of time.
Base period	The period that provides the weights for an index is described as the base period.
Basic price	The basic price is the amount receivable by the producer from the purchaser for a unit of a good or service produced as output minus any tax payable, and plus any subsidy receivable, on that unit as a consequence of its production or sale; it excludes any transport charges invoiced separately by the producer.
Capital stock - gross	Gross capital stock is the value of all fixed assets still in use at the end of an accounting period, at the actual or estimated current purchasers' prices for new assets of the same type, irrespective of the age of the assets.
Capital stock - net	The sum of the written-down values of all the fixed assets still in use at the end of an accounting period is described as the net capital stock.
Changes in inventories (including work-in-progress)	Changes in inventories (including work-in-progress) are measured by the value of the entries into inventories less the value of withdrawals and the value of any recurrent losses of goods held in inventories.
Classification of individual consumption by purpose (COICOP)	The classification of individual consumption by purpose (COICOP) is a classification used to identify the objectives of both individual consumption expenditure and actual individual consumption.
Classification of the functions of government (COFOG)	The classification of the functions of government (COFOG) is a classification used to identify the socio-economic objectives of current transactions, capital outlays and acquisition of financial assets by general government and its sub-sectors.
Compensation of employees	Compensation of employees is the total remuneration, in cash or in kind, payable by enterprises to employees in return for work done by the latter during the accounting period.
Computer software	Computer software consists of computer programs, program descriptions and supporting materials for both systems and applications software.
Constant prices	Constant prices are obtained by directly factoring changes over time in the values of flows of goods and services into two components reflecting changes in the prices of the goods and services concerned and changes in their volumes (i.e. changes in "constant price terms").

Consumption	Consumption is an activity in which institutional units use up goods or services; consumption can be either intermediate or final.
Consumption of fixed capital	Consumption of fixed capital represents the reduction in the value of the fixed assets used in production during the accounting period resulting from physical deterioration, normal obsolescence or normal accidental damage.
Cultivated assets	Cultivated assets are livestock for breeding (including fish and poultry), dairy, draught, etc. and vineyards, orchards and other plantations of trees yielding repeat products that are under the direct control, responsibility and management of institutional units.
Defined benefit pension plans	Defined benefit pension plans are those in which the level of pension benefits promised to participating employees is guaranteed; benefits are related by some formula to participants' length of service and salary and are not totally dependent on either the participants' contributions or the assets in the fund.
Depletion of natural economic assets	The depletion of natural economic assets is the reduction in the value of deposits of subsoil assets, natural forests, fish stocks in the open seas and other non-cultivated biological resources as a result of the physical removal and using up of the assets.
Depreciation	Depreciation as usually calculated in business accounts is a method of allocating the costs of past expenditures on fixed assets over subsequent accounting periods; note that the depreciation methods favored in business accounting and those prescribed by tax authorities almost invariably deviate from the concept of consumption of fixed capital employed in the SNA and so the term "consumption of fixed capital" is used in the SNA to distinguish it from "depreciation" as typically measured in business accounts.
Disposable income	Disposable income is derived from the balance of primary incomes of an institutional unit or sector by adding all current transfers, except social transfers in kind, receivable by that unit or sector and subtracting all current transfers, except social transfers in kind, payable by that unit or sector.
Disposals	Disposals of assets (inventories, fixed assets or land or other non-produced assets) by institutional units occur when one of those units sells any of the assets to another institutional unit.
Domestic output	Domestic output is output produced by resident enterprises.
Double deflation	Double deflation is a method whereby gross value added is measured at constant prices by subtracting intermediate consumption at constant prices from output at constant prices; this method is feasible only for constant price estimates which are additive, such as those calculated using a Laspeyres' formula (either fixed-base or for estimates expressed in the previous year's prices).

Durable good	A durable good is one which may be used repeatedly or continuously over a period of more than a year, assuming a normal or average rate of physical usage.
Dwellings	Dwellings are buildings that are used entirely or primarily as residences, including any associated structures, such as garages, and all permanent fixtures customarily installed in residences; movable structures, such as caravans, used as principal residences of households are included.
Entertainment, literary or artistic originals	Entertainment, literary or artistic originals are the original films, sound recordings, manuscripts, tapes, models, etc, on which drama performances, radio and television programming, musical performances, sporting events, literary and artistic output, etc, are recorded or embodied.
Establishment	An establishment is an enterprise or part of an enterprise that is situated in a single location and in which only a single (non-ancillary) productive activity is carried out or in which the principal productive activity accounts for most of the value added.
Expenditures	Expenditures are the values of the amounts that buyers pay, or agree to pay, to sellers in exchange for goods or services that sellers provide to them or to other institutional units designated by the buyers.
Exports of goods	Exports of goods consist of exports of the following items from residents to non-residents, generally with a change of ownership being involved: general merchandise, goods for processing, goods procured in domestic ports by non-resident carriers, and non-monetary gold.
Exports of services	Exports of services consist of the following services provided by residents to non-residents: transportation; travel; communications; construction; insurance; financial; computer and information; royalties and licence fees; other business services; personal, cultural, and recreational services; and government services n.i.e.
Factor cost	Gross value added at factor cost is not a concept used explicitly in the System but it can easily be derived by subtracting the value of any taxes, less subsidies, on production payable out of gross value added.
Final consumption	Final consumption consists of goods and services used up by individual households or the community to satisfy their individual or collective needs or wants.
Final consumption expenditure of government	Government final consumption expenditure consists of expenditure, including imputed expenditure, incurred by general government on both individual consumption goods and services and collective consumption services.

Final consumption expenditure of households	Household final consumption expenditure consists of the expenditure, including imputed expenditure, incurred by resident households on individual consumption goods and services, including those sold at prices that are not economically significant.
Final consumption expenditure of NPISHs	Final consumption expenditure of NPISHs consists of the expenditure, including imputed expenditure, incurred by resident NPISHs on individual consumption goods and services.
Financial auxiliaries	The financial auxiliaries sub-sector consists of all resident corporations and quasi-corporations engaged primarily in activities closely related to financial intermediation but which do not themselves perform an intermediation role.
Financial corporations	The financial corporations sector consists of all resident corporations or quasi-corporations principally engaged in financial intermediation or in auxiliary financial activities which are closely related to financial intermediation.
Financial enterprises	Financial enterprises are enterprises that are principally engaged in financial intermediation or in auxiliary financial activities which are closely related to financial intermediation.
Financial intermediaries	Financial intermediaries are units which incur liabilities on their own account on financial markets by borrowing funds which they lend on different terms and conditions to other institutional units.
Financial intermediation	Financial intermediation is a productive activity in which an institutional unit incurs liabilities on its own account for the purpose of acquiring financial assets by engaging in financial transactions on the market.
Financial intermediation services indirectly measured (FISIM)	Financial intermediation services indirectly measured (FISIM) is an indirect measure of the value of financial intermediation services provided but for which financial institutions do not charge explicitly.
Fixed assets	Fixed assets are tangible or intangible assets produced as outputs from processes of production that are themselves used repeatedly or continuously in other processes of production for more than one year.
Foreign direct investment	Foreign direct investment is the category of international investment that reflects the objective of a resident entity in one economy to obtain a lasting interest in an enterprise resident in another economy; foreign direct investment is defined as ownership of 10 per cent or more of the ordinary shares or voting power (for an incorporated enterprise) or the equivalent (for an unincorporated enterprise).
Functional classifications	Functional classifications provide a means of classifying, by purpose or socio-economic objective, certain transactions of producers and of three institutional sectors - namely households, general government and non-profit institutions serving households (NPISH)s.

GDP - expenditure based	Expenditure-based GDP is total final expenditures at purchasers' prices (including the f.o.b. value of exports of goods and services), less the f.o.b. value of imports of goods and services.
GDP - income based	Income-based GDP is compensation of employees, plus taxes less subsidies on production and imports, plus gross mixed income, plus gross operating surplus.
GDP - output based	Output-based GDP is the sum of the gross values added of all resident producers at producers' prices, plus taxes less subsidies on imports, plus all non-deductible VAT (or similar taxes).
GDP at market prices	GDP at market prices is the sum of the gross values added of all resident producers at producers' prices, plus taxes less subsidies on imports, plus all non-deductible VAT (or similar taxes).
GNI (gross national income)	GNI (gross national income) is GDP less net taxes on production and imports, less compensation of employees less property income payable to the rest of the world plus the corresponding items receivable from the rest of the world (in other words, GDP less primary incomes payable to non-resident units plus primary incomes receivable from non-resident units); an alternative approach to measuring GNI at market prices is as the aggregate value of the balances of gross primary incomes for all sectors; (note that GNI is identical to gross national product (GNP) as previously used in national accounts generally).
Goods	Goods are physical objects for which a demand exists, over which ownership rights can be established and whose ownership can be transferred from one institutional unit to another by engaging in transactions on markets.
Goods and services account	The goods and services account shows for the economy as a whole and for groups of products, the total resources in terms of output and imports, and the uses of goods and services in terms of intermediate consumption, final consumption, gross capital formation and exports.
Government final consumption expenditure	Government final consumption expenditure consists of expenditure, including imputed expenditure, incurred by general government on both individual consumption goods and services and collective consumption services.
Gross	The term "gross" is a common means of referring to values before deducting consumption of fixed capital (generally used as in "gross capital stock" or "gross domestic product").
Gross capital formation	Gross capital formation is measured by the total value of the gross fixed capital formation, changes in inventories and acquisitions less disposals of valuables for a unit or sector.

Gross fixed capital formation	Gross fixed capital formation is measured by the total value of a producer's acquisitions, less disposals, of fixed assets during the accounting period plus certain additions to the value of non-produced assets (such as subsoil assets or major improvements in the quantity, quality or productivity of land) realised by the productive activity of institutional units.
Gross national disposable income	Gross national disposable income may be derived from gross national income by adding all current transfers in cash or in kind receivable by resident institutional units from non-resident units and subtracting all current transfers in cash or in kind payable by resident institutional units to non-resident units.
Gross saving	Gross saving is gross disposable income less final consumption expenditure.
Gross value added	Gross value added is the value of output less the value of intermediate consumption; it is a measure of the contribution to GDP made by an individual producer, industry or sector.
Gross value added at basic prices	Gross value added at basic prices is output valued at basic prices less intermediate consumption valued at purchasers' prices.
Gross value added at producers' prices	Gross value added at producers' prices is output valued at producers' prices less intermediate consumption valued at purchasers' prices.
Historic cost accounting	Historic cost accounting is a valuation method which requires goods or assets used in production to be valued by the expenditures actually incurred to acquire those goods or assets, however far back in the past those expenditures took place.
Holding gains	Positive or negative holding gains may accrue during the accounting period to the owners of financial and non-financial assets and liabilities as a result of a change in their prices (holding gains are sometimes referred to as "capital gains").
Household final consumption expenditure	Household final consumption expenditure consists of the expenditure, including imputed expenditure, incurred by resident households on individual consumption goods and services, including those sold at prices that are not economically significant.
Illegal production	Illegal production is the production of goods or services whose sale, distribution or possession is forbidden by law; and production activities which are usually legal but which become illegal when carried out by unauthorised producers; the scope of illegal production varies depending on the laws in place in individual countries (eg, prostitution is legal in some countries but illegal in others).
Income	Income is the maximum amount that a household, or other unit, can consume without reducing its real net worth.

Income from abroad - net	Net income from abroad is the difference between the total values of the primary incomes receivable from, and payable to, non-residents.
Industry	An industry consists of a group of establishments engaged on the same, or similar, kinds of production activity; the classification of productive activities used in the System is ISIC (Rev.3).
Institutional sectors	Institutional units are grouped together to form institutional sectors, on the basis of their principal functions, behaviour, and objectives.
Institutional unit	An institutional unit is an economic entity that is capable, in its own right, of owning assets, incurring liabilities and engaging in economic activities and in transactions with other entities.
Insurance	The activity of insurance is intended to provide individual institutional units exposed to certain risks with financial protection against the consequences of the occurrence of specified events; it is also a form of financial intermediation in which funds are collected from policyholders and invested in financial or other assets which are held as technical reserves to meet future claims arising from the occurrence of the events specified in the insurance policies.
Insurance corporations	Insurance corporations consist of incorporated, mutual and other entities whose principal function is to provide life, accident, sickness, fire or other forms of insurance to individual institutional units or groups of units.
Insurance technical reserves	The technical reserves held by insurance enterprises consist of the actuarial reserves against outstanding risks in respect of life insurance policies, including reserves for with-profit policies which add to the value on maturity of with-profit endowments or similar policies, prepayments of premiums and reserves against outstanding claims.
Intangible fixed assets	Intangible fixed assets are non-financial produced fixed assets that mainly consist of mineral exploration, computer software, entertainment, literary or artistic originals intended to be used for more than one year.
Intangible non-produced assets	Intangible non-produced assets are assets that entitle their owners to engage in certain specific activities or to produce certain specific goods or services and to exclude other institutional units from doing so except with the permission of the owner (eg, patented entities or purchased goodwill).
Integrated economic accounts	The integrated economic accounts comprise the full set of accounts of institutional sectors and the rest of the world, together with the accounts for transactions (and other flows) and the accounts for assets and liabilities.

Interest	Interest is the amount that the debtor becomes liable to pay to the creditor over a given period of time without reducing the amount of principal outstanding, under the terms of the financial instrument agreed between them.
Intermediate consumption	Intermediate consumption consists of the value of the goods and services consumed as inputs by a process of production, excluding fixed assets whose consumption is recorded as consumption of fixed capital; the goods or services may be either transformed or used up by the production process.
Inventories	Inventories consist of stocks of outputs that are still held by the units that produced them prior to their being further processed, sold, delivered to other units or used in other ways and stocks of products acquired from other units that are intended to be used for intermediate consumption or for resale without further processing.
Inventories - changes in (including work-in-progress)	Changes in inventories (including work-in-progress) are measured by the value of the entries into inventories less the value of withdrawals and the value of any recurrent losses of goods held in inventories.
Inventories of work-in-progress on cultivated assets	Inventories of work-in-progress on cultivated assets consist of livestock raised for products yielded only on slaughter, such as fowl and fish raised commercially, trees and other vegetation yielding once-only products on destruction and immature cultivated assets yielding repeat products.
ISIC	ISIC is the United Nations International Standard Industrial Classification of All Economic Activities; the third revision of ISIC is used in the 1993 SNA.
Kind-of-activity unit	A kind-of-activity unit is an enterprise, or a part of an enterprise, which engages in only one kind of (non-ancillary) productive activity or in which the principal productive activity accounts for most of the value added.
Land	Land is the ground, including the soil covering and any associated surface waters, over which ownership rights are enforced.
Machinery and equipment (assets)	Machinery and equipment (assets) consist of transport equipment and other machinery and equipment other than that acquired by households for final consumption.
Maintenance and repairs (of fixed assets)	Ordinary maintenance and repairs of fixed assets are activities that owners or users of fixed assets are obliged to undertake periodically in order to be able to utilise assets over their expected service lives (they are current costs that cannot be avoided if the fixed assets are to continue to be used); maintenance and repairs do not change the fixed asset or its performance, but simply maintain it in good working order or restore it to its previous condition in the event of a breakdown (note the contrast between this item and “major renovations or enlargements”).

Major renovations or enlargements (of fixed assets)	Major renovations or enlargements of fixed assets are activities which increase the performance or capacity of existing fixed assets or significantly extend their previously expected service lives; the decision to renovate, reconstruct or enlarge a fixed asset is a deliberate investment decision which may be undertaken at any time and is not dictated by the condition of the asset (note the contrast between this item and “maintenance and repairs”).
Margin (trade)	A trade margin is the difference between the actual or imputed price realised on a good purchased for resale (either wholesale or retail) and the price that would have to be paid by the distributor to replace the good at the time it is sold or otherwise disposed of.
Margin (transport)	A transport margin consists of those transport charges paid separately by the purchaser in taking delivery of the goods at the required time and place.
Market output	Market output is output that is sold at prices that are economically significant or otherwise disposed of on the market or intended for sale or disposal on the market.
Market prices	Market prices for transactions are the amounts of money willing buyers pay to acquire something from willing sellers.
Mineral exploration	Mineral exploration consists of the value of expenditures on exploration for petroleum and natural gas and for non-petroleum deposits.
Mixed income	Mixed income is the surplus or deficit accruing from production by unincorporated enterprises owned by households; it implicitly contains an element of remuneration for work done by the owner, or other members of the household, that cannot be separately identified from the return to the owner as entrepreneur but it excludes the operating surplus coming from owner-occupied dwellings.
Monetary gold	Monetary gold is gold owned by the monetary authorities or others subject to their effective control that is held as a financial asset and as a component of foreign reserves.
National income	National income is the total value of the primary incomes receivable within an economy less the total of the primary incomes payable by resident units.
Net	The term “net” is a common means of referring to values after deducting consumption of fixed capital (generally used as in “net capital stock” or “net domestic product”); it should be noted, however, that the term “net” can be used in different contexts in the national accounts, such as “net income from abroad” which is the difference between two income flows.
Net domestic product (NDP)	Net domestic product (NDP) is obtained by deducting the consumption of fixed capital from gross domestic product.

Net fixed capital formation.	Net fixed capital formation consists of gross fixed capital formation less consumption of fixed capital.
Net income from abroad	The difference between the total values of the primary incomes receivable from, and payable to, non-residents is often described as net income from abroad.
Net national income	The aggregate value of the balances of net primary incomes summed over all sectors is described as net national income.
Net saving	Net saving is net disposable income less final consumption expenditure.
Net value added	Net value added is the value of output less the values of both intermediate consumption and consumption of fixed capital.
Net worth	Net worth is the value of all the non-financial and financial assets owned by an institutional unit or sector less the value of all its outstanding liabilities; it is a measure of the wealth of a unit or sector at a point in time.
Non-financial assets	Non-financial assets are entities, over which ownership rights are enforced by institutional units, individually or collectively, and from which economic benefits may be derived by their owners by holding them, or using them over a period of time, that consist of tangible assets, both produced and non-produced, and most intangible assets for which no corresponding liabilities are recorded.
Non-financial corporations	Non-financial corporations are corporations whose principal activity is the production of market goods or non-financial services.
Non-financial quasi-corporations	Non-financial quasi-corporations are quasi-corporations whose principal activity is the production of market goods or non-financial services.
Non-life insurance premiums	Non-life insurance premiums comprise both the actual premiums payable by policyholders to obtain insurance cover during the accounting period (premiums earned) and the premium supplements payable out of the property income attributed to insurance policyholders, but excluding social contributions.
Non-market producers	Non-market producers are producers that provide most of their output to others free or at prices which are not economically significant.
Non-profit institutions (NPIs)	Non-profit institutions (NPIs) are legal or social entities created for the purpose of producing goods and services whose status does not permit them to be a source of income, profit or other financial gain for the units that establish, control or finance them.

Non-profit institutions controlled and mainly financed by government	Non-profit institutions controlled and mainly financed by government are properly constituted legal entities which exist separately from government but which are financed mainly by government and over which government exercises control.
Non-profit institutions engaged in market production	Non-profit institutions engaged in market production consist of those NPIs which charge fees determined by their costs of production and which are sufficiently high to have a significant influence on the demand for their services, but any surpluses such institutions make must be retained within those institutions as their status as “Non-profit institutions (NPIs)” prevents them from distributing them to others
Non-profit institutions engaged in non-market production	Non-profit institutions engaged in non-market production are NPIs that are incapable of providing financial gain to the units which control or manage them, and which must rely principally on funds other than receipts from sales to cover their costs of production or other activities.
Non-profit institutions serving households (NPISHs)	Non-profit institutions serving households (NPISHs) consist of NPIs which are not financed and controlled by government and which provide goods or services to households free or at prices that are not economically significant.
Non-residential buildings	Non-residential buildings are buildings other than dwellings, including fixtures, facilities and equipment that are integral parts of the structures and costs of site clearance and preparation.
Operating surplus	The operating surplus measures the surplus or deficit accruing from production before taking account of any interest, rent or similar charges payable on financial or tangible non-produced assets borrowed or rented by the enterprise, or any interest, rent or similar receipts receivable on financial or tangible non-produced assets owned by the enterprise; (note: for unincorporated enterprises owned by households, this component is called “mixed income”).
Output	Output consists of those goods or services that are produced within an establishment that become available for use outside that establishment, plus any goods and services produced for own final use.
Perpetual inventory method (PIM)	The perpetual inventory method (PIM) is a method of constructing estimates of capital stock and consumption of fixed capital from time series of gross fixed capital formation; it allows an estimate to be made of the stock of fixed assets in existence and in the hands of producers which is generally based on estimating how many of the fixed assets installed as a result of gross fixed capital formation undertaken in previous years have survived to the current period.

PPP (purchasing power parity)	A PPP (purchasing power parity) is a price relative which measures the number of units of country B's currency that are needed in country B to purchase the same quantity of an individual good or service as 1 unit of country A's currency will purchase in country A.
Primary incomes	Primary incomes are incomes that accrue to institutional units as a consequence of their involvement in processes of production or ownership of assets that may be needed for purposes of production.
Produced assets	Produced assets are non-financial assets that have come into existence as outputs from processes that fall within the production boundary of the SNA.
Producer's price	The producer's price is the amount receivable by the producer from the purchaser for a unit of a good or service produced as output minus any VAT, or similar deductible tax, invoiced to the purchaser; it excludes any transport charges invoiced separately by the producer.
Production	roduction is an activity, carried out under the responsibility, control and management of an institutional unit, that uses inputs of labour, capital and goods and services to produce outputs of other goods and services.
Production account	The production account records the activity of producing goods and services as defined within the SNA; its balancing item, gross value added, is a measure of the contribution to GDP made by an individual producer, industry or sector.
Production boundary	The production boundary includes all production actually destined for the market, whether for sale or barter, all goods or services provided free to individual households or collectively to the community by government units or NPISHs, all goods produced for own final use, own-account production of housing services by owner occupiers and services produced by employing paid domestic staff.
Property income	Property income is the income receivable by the owner of a financial asset or a tangible non-produced asset in return for providing funds to or putting the tangible non-produced asset at the disposal of, another institutional unit; it consists of interest, the distributed income of corporations (ie, dividends and withdrawals from income of quasi-corporations), reinvested earnings on direct foreign investment, property income attributed to insurance policy holders, and rent.
Property income attributed to insurance policyholders	The property income attributed to insurance policyholders is the investment income receivable by insurance enterprises on insurance technical reserves; it is shown in the accounts as being paid by the insurance enterprises to the insurance policyholders because the technical reserves are assets of the policyholders.

Purchaser's price	The purchaser's price is the amount paid by the purchaser, excluding any deductible VAT or similar deductible tax, in order to take delivery of a unit of a good or service at the time and place required by the purchaser; the purchaser's price of a good includes any transport charges paid separately by the purchaser to take delivery at the required time and place.
Quasi-corporations	Quasi-corporations are unincorporated enterprises that function as if they were corporations, and which have complete sets of accounts, including balance sheets.
Reference rate (of interest)	The reference rate (of interest) is the pure cost of borrowing funds (i.e. a rate from which the risk premium has been eliminated to the greatest extent possible and which does not include any intermediation services).
Reinvested earnings on direct foreign investment	Reinvested earnings on direct foreign investment consist of the retained earnings of a direct foreign investment enterprise and which are treated as if they were distributed and remitted to foreign direct investors in proportion to their ownership of the equity of the enterprise and then reinvested by them in the enterprise.
Rent	Rent is the sum of rents on land and rents on subsoil assets.
Research and development	Research and development by a market producer is an activity undertaken for the purpose of discovering or developing new products, including improved versions or qualities of existing products, or discovering or developing new or more efficient processes of production.
SAM (social accounting matrix)	A SAM (social accounting matrix) is a means of presenting the SNA accounts in a matrix which elaborates the linkages between a supply and use table and institutional sector accounts; a typical focus of a SAM on the role of people in the economy may be reflected by, among other things, extra breakdowns of the household sector and a disaggregated representation of labour markets (i.e., distinguishing various categories of employed persons).
Satellite accounts	Satellite accounts provide a framework linked to the central accounts and which enables attention to be focussed on a certain field or aspect of economic and social life in the context of national accounts; common examples are satellite accounts for the environment, or tourism, or unpaid household work.
Saving	Saving is disposable income less final consumption expenditure (or adjusted disposable income less actual final consumption, after taking account of an adjustment for pension funds); saving is an important aggregate which can be calculated for each institutional sector.

Services	Services are outputs produced to order and typically consist of changes in the conditions of the consuming units realised by the activities of producers at the demand of the consumers; by the time their production is completed they must have been provided to the consumers.
Single indicator method of deflation	A single indicator method of deflation is a means of estimating the volume movements of value added directly using only one time series instead of double deflation.
SNA (System of National Accounts)	The System of National Accounts (SNA) consists of a coherent, consistent and integrated set of macroeconomic accounts, balance sheets and tables based on a set of internationally agreed concepts, definitions, classifications and accounting rules.
Stocks	Stocks are a position in, or holdings of, assets and liabilities at a point in time and the System records stocks in accounts, usually referred to as balance sheets, and tables at the beginning and end of the accounting period; stocks result from the accumulation of prior transactions and other flows, and they are changed by transactions and other flows in the period (note that stocks of goods are referred to as “inventories” in the System).
Straight-line depreciation	Straight-line depreciation is a depreciation profile based on a constant annual amount of capital consumption over the life of the asset.
Subsidies	Subsidies are current unrequited payments that government units, including non-resident government units, make to enterprises on the basis of the levels of their production activities or the quantities or values of the goods or services which they produce, sell or import.
Subsidies on losses of government trading organisations	Subsidies on losses of government trading organisations consist of the losses incurred by government trading organisations whose function is to buy and sell the products of resident enterprises; when such organisations incur losses as a matter of deliberate government economic or social policy by selling at lower prices than those at which they purchased the goods, the difference between the purchase and the selling prices should be treated as a subsidy.
Tangible fixed assets	Tangible fixed assets are non-financial produced assets that consist of dwellings; other buildings and structures; machinery and equipment and cultivated assets.
Tangible non-produced assets	Tangible non-produced assets are natural assets - land, subsoil assets, non-cultivated biological resources and water resources - over which ownership may be established and transferred
Total economy	The total economy consists of all the institutional units which are resident in the economic territory of a country.

Trade margin	A trade margin is the difference between the actual or imputed price realised on a good purchased for resale (either wholesale or retail) and the price that would have to be paid by the distributor to replace the good at the time it is sold or otherwise disposed of.
Unit value index	A unit value index is a “price” index which measures the change in the average value of units that are not homogeneous and which may therefore be affected by changes in the mix of items as well as by changes in their prices.
Valuables	Valuables are produced assets that are not used primarily for production or consumption, that are expected to appreciate or at least not to decline in real value, that do not deteriorate over time under normal conditions and that are acquired and held primarily as stores of value.
Volume index	A volume index (also called a “quantity index”) is most commonly presented as an average of the proportionate changes in the quantities of a specified set of goods or services between two periods of time; volume indices may also compare the relative levels of activity in different countries (eg, those calculated using PPPs).
Wages and salaries	Wages and salaries consist of the sum of wages and salaries in cash and wages and salaries in kind.
Wages and salaries in cash	Wages and salaries in cash consist of wages or salaries payable at regular weekly, monthly or other intervals, including payments by results and piecework payments; plus allowances such as those for working overtime; plus amounts paid to employees away from work for on holiday; plus ad hoc bonuses and similar payments; plus commissions, gratuities and tips received by employees.
Wages and salaries in kind	Wages and salaries in kind consist of remuneration in the form of goods and/or services that are not necessary for work and can be used by employees in their own time, and at their own discretion, for the satisfaction of their own needs or wants or those of other members of their households.
Work-in-progress - inventories	Inventories of work-in-progress consist of goods and services that are partially completed but that are not usually turned over to other units without further processing or that are not mature and whose production process will be continued in a subsequent period by the same producer.
Work-in-progress on cultivated assets - inventories	Inventories of work-in-progress on cultivated assets consist of livestock raised for products yielded only on slaughter, including fowl and fish raised commercially, trees and other vegetation yielding once-only products on destruction and immature cultivated assets yielding repeat products.

GLOSSARY OF TERMS

AIDIS	All India Debt and Investment Survey
ASI	Annual Survey of Industries
CBRI	Central Building Research Institute
CCS	Cost of Cultivation Studies
CFC	Consumption of Fixed Capital
CIS	Change in Stocks
CPI	Consumer Price Index
CPI (AL)	CPI (Agricultural Labourers)
CPI (IW)	CPI (Industrial Workers)
CPI (UNME)	CPI (Urban Non-Manual Employees)
CSO	Central Statistics Office
DCU/DE	Departmental Commercial Undertaking/Departmental Enterprises
EUS	Employment and Unemployment Survey
FISIM	Financial Intermediation Services Indirectly Measured
GCF	Gross Capital Formation
GDP	Gross Domestic Product
GFCE	Government Final Consumption Expenditure
GFCF	Gross Fixed Capital Formation
GG	General Government
GVO	Gross Value of Output
HS	Harmonised System of Classification of Commodities and Codes
ICFRE	Indian Council for Forest Research Education
IMF	International Monetary Fund
IOT	Input Output Tables
LI	Labour Input
MCA	Ministry of Corporate Affairs
MF	Mutual Funds
NABARD	National Bank for Agriculture and Rural Development
NAS	National Accounts Statistics
NASSCOM	National Association of Software and Service Companies
NDCU/NDE	Non-Departmental Commercial Undertaking/Non-Departmental Enterprise

NDP	Net Domestic Product
NFCS	Net Fixed Capital Stock
NGNBFC	Non-Government Non-Banking Financial Companies
NIC	National Industrial Classification
NNI	Net National Income
NPCMS	National Product Classification for Manufacturing Sector
NPI	Non-Profit Institutions
NRCM	National Research Centre on Meat
NSS	National Sample Survey
NSSO	National Sample Survey Office
NVA	Net Value Added
OECD	Organisation for Economic Cooperation and Development
PFCE	Private Final Consumption Expenditure
PIM	Perpetual Inventory Method
RBI	Reserve Bank of India
NRB & OCW	Non-Residential Buildings and Other Construction Works
ROW	Rest of the World
RRB	Rural Residential Buildings
SNA	System of National Accounts
TTM	Trade and Transport Margins
UTI	Unit Trust of India
VAPW	Value Added Per Worker
VAPEW	Value Added Per Effective Worker
WPI	Wholesale Price Index
