PREFACE

Market Intelligence (MI) encompasses the systematic collection, analysis, and dissemination of information related to agriculture commodities. This includes data on prices, estimated production, marketable surplus, arrivals, dispatches, stocks, losses in storage, government purchases, issues, demands and market sentiments. Together, these elements provide a comprehensive understanding of market behaviour, enabling stakeholders to make informed decisions.

In our state, MI data is collected from 46 centres, adhering to recognized statistical standards. This information is disseminated daily through All India Radio, ensuring that cultivators are kept informed about prevailing market conditions. Price statistics play a vital role in economics planning, decision making and analysis. They are crucial for individuals, business, and government alike as they provide insights into the behaviour of markets and the overall health of an economy.

The objective of this report titled **“An Analytical report on Market Intelligence Price Statistics 2023”** is to track fluctuations in the prices of key agricultural commodities, understand the underlying factors affecting these prices, and offer insights for farmers, traders, policymakers and consumers. The rapidly processed and analysed MI data enables the government to monitor changing price situations and assist producers in securing fair prices for their produce, thereby aiding in effective planning and operations.

Coconut With Husk (1000 Nos)

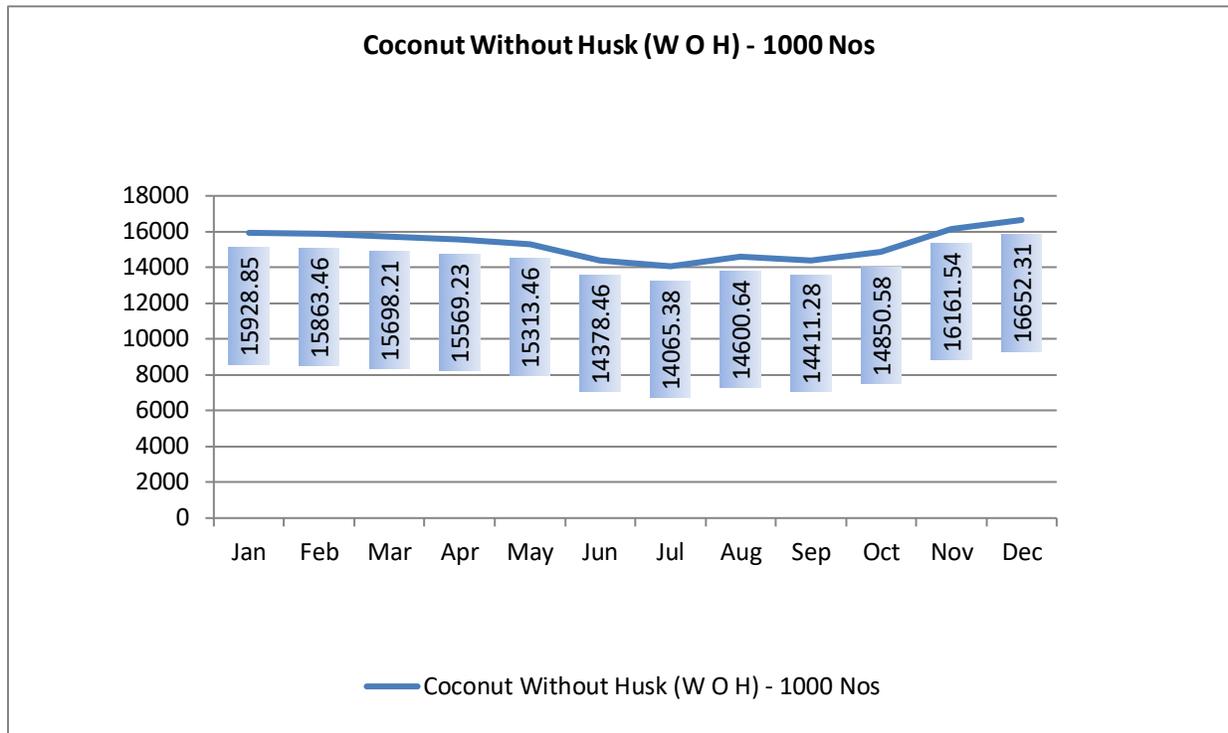

Month	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Average	15296	15130	14967.6	14797.5	14615	14059	13905	14435	14276.67	14744.5	15577.5	15829

The price behaviour of coconut with husk (per 1,000 nuts) shows a clear seasonal and regional pattern across the markets. On an overall average basis prices gradually decline from January to July reaching the lowest level during the mid-year period and then start firming up from August with a pronounced increase during November and December. Nedumangad and Adoor (Parakkode) consistently register the highest prices throughout the year indicating stronger demand or premium market conditions, while Kozhikode and Ponnani remain at the lower end especially during the monsoon months. Thiruvananthapuram and Neyyattinkara maintain relatively stable and moderate price levels with limited volatility, whereas Kollam, Kayamkulam, and Kuttanad show sharper price movements and notable year-end gains. The annual average price of about 14,803 per 1,000 nuts reflects a balanced market structure, where temporary mid-year supply pressure gives way to improved prices in the final quarter likely supported by seasonal demand and reduced availability.

Coconut without Husk (W.O.H)

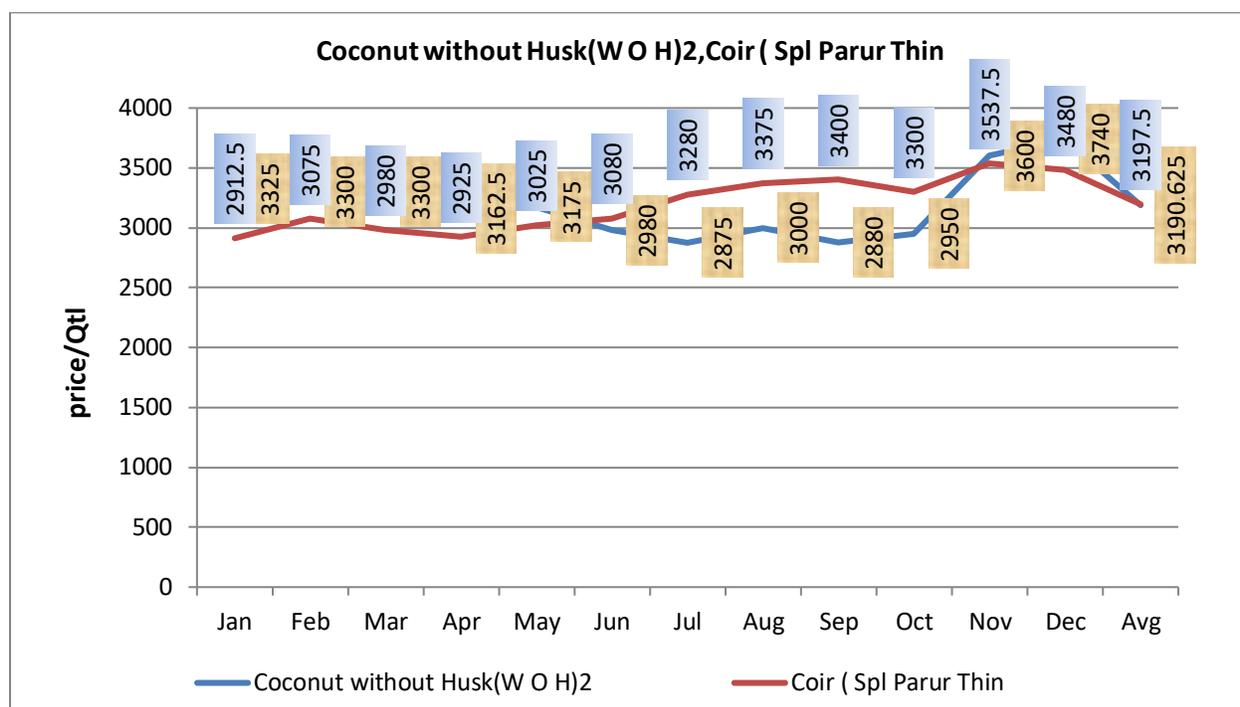

Month	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Average	15928.8	15863.4	15698.2	15569.2	15313.4	14378.4	14065.3	14600.6	14411.2	14850.5	16161.5	16652.3

The current market trend for Coconut Without Husk (W.O.H) across Kerala shows a general pattern of decline in prices during the mid-year months followed by a recovery toward the end of the year. In the early months average prices remain relatively stable starting at ₹15,928 in January and dipping to a yearly low of ₹14,065 in July. However from August onward prices begin to recover steadily reaching ₹16,652 by December. Adoor (Parakkode), Kollam, and Kottarakkara consistently record higher prices throughout the year indicating strong demand or premium-quality produce. On the other hand coastal markets like Ponnani and Kozhikode reflect the lowest prices staying well below the state average likely due to higher availability or lower transportation costs.

The current market trends for Bengal Gram Bold and Bengal Gram (White) across key centres in Kerala show distinct seasonal and regional price variations. Bengal Gram Bold experiences a gradual price increase from January (₹8,250 per quintal) to December (₹10,700) with a noticeable surge starting in April. Ernakulam and Kozhikode consistently report stable and rising prices while Kochi shows limited data with prices only available in March and July at a lower ₹7,000 possibly indicating supply gaps or less market activity. Meanwhile, Bengal Gram (White) starts the year at a significantly higher average price of ₹14,587.50 and dips to its lowest in May at ₹12,900, before climbing steadily to reach ₹18,043.33 in December. Among the centres Thiruvananthapuram and Kollam consistently report higher prices than Alappuzha, highlighting regional demand differences. Overall, both varieties show strong price recovery in the latter half indicating seasonal buying patterns and supply-demand dynamics influencing the market.

Gram Dal (Bengal Gram)

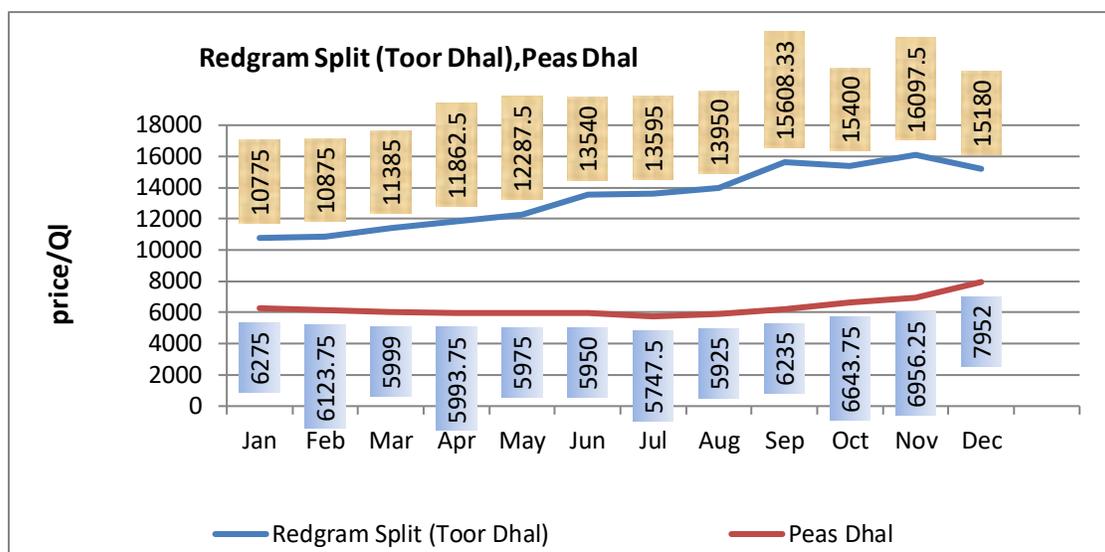

Month	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Average	11433.3	11491.7	11949	12416.7	12833.3	14133.33	14516.67	14841.67	16605.56	16516.67	17071.7	16300

The current price trends for Gram Dal (Bengal Gram), Tur Dal, and Toor Dal (FATKA) in Kerala reveal steady increases across all varieties especially in the second half of the year. Gram Dal maintains a relatively stable price from January to June averaging ₹6,800–₹7,000 per quintal and then gradually rises to ₹8,525 by November indicating a mild upward trend likely influenced by seasonal demand. Tur Dal available only from June onwards in Thiruvananthapuram shows a sharp price increase from ₹11,350 in June to ₹16,952 by December reflecting strong demand and possibly reduced supply during the latter half of the year. Toor Dal (FATKA) experiences a more pronounced and consistent rise across centres like Ernakulam, Kochi, and Kozhikode. The average price increases from ₹11,433.33 in January to a peak of ₹17,071.67 in November before a slight dip in December. Kochi records some of the highest monthly prices touching ₹17,325 in November. These trends suggest heightened market activity and rising consumption in the later months driven by festivals and end-of-year stockpiling with Toor Dal (FATKA) showing the most volatility and sharpest price gains among the three.

Orange Nagpur recorded only at Kunnamkulam (Chavakkad), sees its highest output in August (7750 quintals) and lowest in October (4850 quintals). The price slightly recovers in November and December, but remains below earlier levels. In contrast, Sesamum price remains consistently high throughout the year in both Aluva and Kozhikode. Aluva shows a steady upward trend, starting at 18,375 quintals in January and reaching a peak of 20,000 quintals in December. Kozhikode displays more fluctuation, with a dip in June (15,100 quintals) and a consistent output of 17,500 quintals from August to December. The overall average for Sesamum reflects a gradual increase, peaking in December at 18,750 quintals. This indicates that Sesamum price is more stable and increases over the year, while Orange Nagpur price is seasonal and limited in availability.

Gingelly Oil

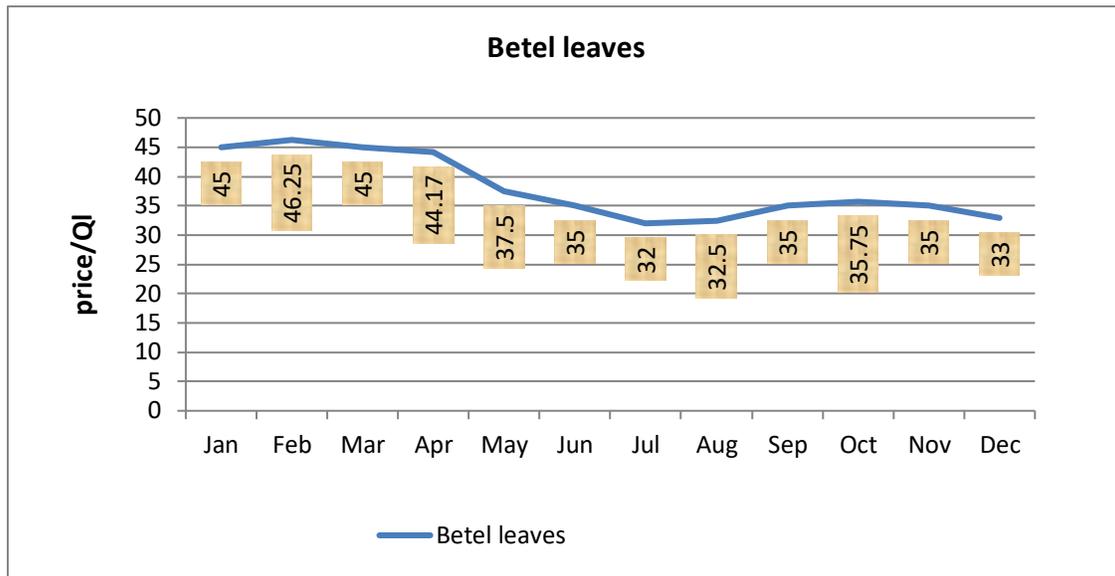

Month	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Average	35750	38100	39020	39867	40000	40700	41000	41000	41000	41500	42000	43500

The price data of Gingelly Oil in Aluva shows a consistent upward trend throughout the year. Starting at 35,750 quintals in January, the output steadily increases each month, reaching 40,000 quintals by May and continuing to rise thereafter. From July to September, price stabilizes at 41,000 quintals before climbing again in the final quarter. October records 41,500 quintals followed by 42,000 in November and peaks at 43,500 quintals in December. This steady growth indicates a stable and gradually expanding price cycle for Gingelly Oil in Aluva, with no dips or irregular fluctuations observed over the twelve-month period.

Betel leaves

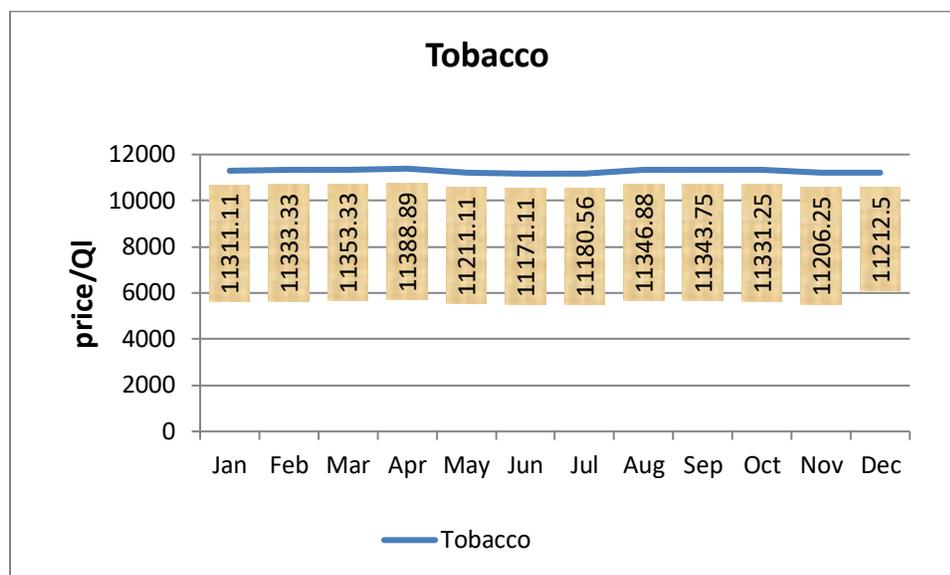

Month	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Average	45	46.25	45	44.17	37.5	35	32	32.5	35	35.75	35	33

The price trend of betel leaves in Tirur shows a gradual decline over the year. Starting at 45 per 100 leaves in January, the price peaks slightly in February at 46.25 before steadily decreasing through the subsequent months. By May, the price drops to 37.5 and continues its downward trend reaching the lowest point of 32 in July. Although there is a slight recovery in August and September, the price remains below earlier levels. The price stabilizes around 35 from September to November and ends the year at 33 in December. This data indicates a consistent drop in prices during the mid-year, likely due to seasonal supply variations followed by a minor recovery towards the year's end.

Average	6766.7	6900	7750	7762.5	7750	7750	7033.3	7750	7750	7937.5	8000	8000

The price trend of Tobacco Meenampalayam across Kochi, Aluva, and Muvattupuzha shows a generally stable pattern with minor fluctuations. Aluva maintains a consistent high price of ₹10,000 per quintal throughout the year contributing significantly to the overall average. Muvattupuzha also displays steady pricing starting at ₹5,500 and slightly increasing to ₹6,000 by November and December. Kochi provides limited data with prices available only in January, February, and August, ranging from ₹4,800 to ₹5,600. The overall average rises gradually from ₹6,766.67 in January to ₹8,000 by the year-end indicating a slow but steady increase in prices. The lowest average occurs in July at ₹7,033.33 due to a temporary drop in Kochi and consistent mid-range pricing in Muvattupuzha. The data reflects a strong stability in Aluva, mild growth in Muvattupuzha and limited but slightly increasing values in Kochi.

Tobacco Vadakkan

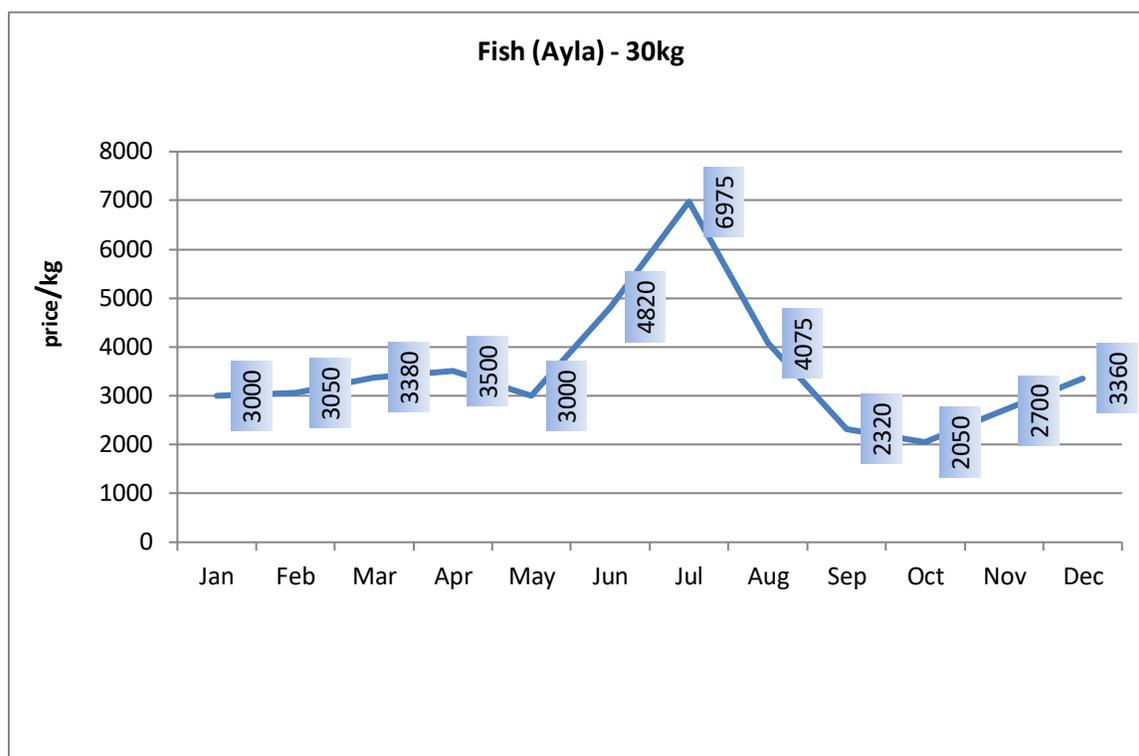

Month	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Average	6500	6500	6500	6500	-	-	-	-	6500	-	-	-

The analysis shows that the price of Tobacco Vadakkan in Idukki remains completely stable at 6500 per quintal across all available periods indicating no fluctuations in the market rate. In contrast Tobacco Nettikette in Kothamangalam experiences noticeable variation starting at 4525 per quintal and gradually declining to a low of 3500 before recovering slightly to 3823.7 on average. The price trends for Nettikette display frequent small shifts, suggesting a more sensitive market influenced by demand and supply changes whereas Vadakkan maintains consistent pricing, reflecting steady market conditions or fixed rate agreements.

Fish (Ayla) - 30kg

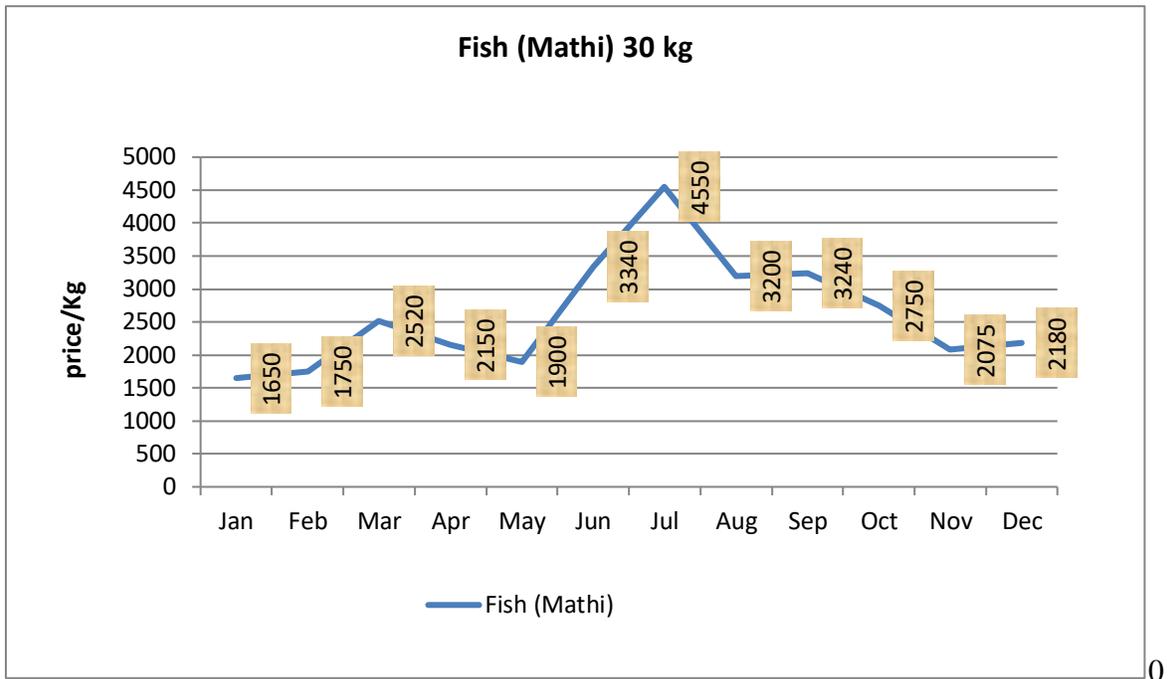

Month	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Average	3000	3050	3380	3500	3000	4820	6975	4075	2320	2050	2700	3360

The price trend of Fish (Ayla) in Ernakulam shows sharp fluctuations throughout the year. It starts at ₹3,000 for 30 kg in January and rises gradually to ₹3,500 by April. In May, the price drops back to ₹3,000, followed by a steep increase to ₹4,820 in June and peaking at ₹6,975 in July, indicating a surge in demand or reduced supply during this period. The price then declines to ₹4,075 in August and drops sharply to ₹2,320 in September and ₹2,050 in October—the lowest point of the year. A slight recovery is observed in November at ₹2,700 with the year ending at ₹3,360 in December. This pattern suggests strong seasonal variation with the highest prices in mid-year and the lowest during early autumn likely influenced by fishing conditions and market demand.

Fish (Mathi)
