INTRODUCTION

The Department of Economics & Statistics collects various types of prices. The price data are generally classified into three, viz., Farm price, Wholesale price, and Retail price. These data are utilized in the computation of various economic indicators. In order to have a picture of the price movements in the economy, various indices are being computed. This includes (1) Consumer Price Index, (2) Wholesale Price Index, (3) Parity Index between prices received and paid by farmers and (4) Agricultural Wage Index. After scrutiny and compilation the price data is forwarded to the Central and State Governments and various agencies like the Coconut Development Board, Coir Board, State Agricultural Prices Board, Reserve Bank of India, Spices Board, Coconut and Arecanut Development Board and a host lot of other agencies, for Policy decisions and day-to-day needs.

The Prices Division of the Department of Economics & Statistics under the Additional Director (Prices) exercises the technical control over the collection of various types of prices and uses the data for the computation of various indices and for transmission to the various data users. This includes the following items.

This book includes a detailed analysis of farm prices for some important crops during 2024. The analysis primarily focuses on the state average prices of selected crops and their variations throughout the year. It examines the maximum and minimum prices for each crop, seasonal fluctuations, and prevailing market trends. To enhance understanding, the analysis is supplemented with graphical representations and tables showing the monthly state average prices.

FARM PRICES

The Department of Economics and Statistics has been collecting the Farm Price of major agricultural commodities cultivated by the farmers of the State since 1954. Farm Price is usually classified into Farm Wholesale price and Farm Retail Price.

Farm Wholesale Prices

The Farm Wholesale Price of a commodity is defined as the average wholesale price, which the farmer gets at the village or farm site. In the case of certain crops farmer may sell it while it is in the tree itself. The Farm Wholesale Price data are being collected by Taluk Statistical officer, from 77 Revenue Taluks in the State on a fortnightly basis. For this purpose, 81 items wholesale commodities which have the marketable surplus are selected.

Farm Retail Prices

The department is also collecting farm retail prices, which the farmer gets when the farm products are sold in smaller quantity. Farm retail prices of 63 items are being collected by Taluk Statistical officer from 77 revenue Taluks on the last working day of every month.

MARKET WHOLE SALE PRICE.

Wholesale prices of agricultural commodities are being collected under the Market Intelligence Scheme. The wholesale price is the rate at which a relatively large transaction of purchase regularly for further sale is affected. The wholesale price is neither the maximum or minimum nor the average price of a commodity on a particular day, but should relate to the modal price, the price at which most of the transactions take place during the peak marketing period of the day.

RETAIL PRICES

The “retail price” of a commodity is defined as the price, which the ultimate consumer pays for relatively small transactions of the commodity. The following are the different types of retail prices being collected by the Department:

1. Weekly and monthly Retail prices of goods and services consumed by the working class family (Agricultural and Industrial workers) in Schedules III (a) & III (b) respectively for the construction of Consumer Price Index.
2. Retail prices of additional items collected from District Headquarters as an appendix to III (a) being catered to the data users as and when needed.

Retail Prices of Essential Commodities

Variation in the retail prices of essential commodities have an immediate effect on the income of individuals and consequently on the economy as a whole. While a rise in prices imposes considerable pressure on the consumers, a fall below a certain level, and affect the real income of the subsistence farmers, with serious consequence on the economy. Thus a close study of the absolute prices of various commodities and their movements is highly essential for taking appropriate measures for achieving the desired stability in prices.

Retail prices of 50 + 28 essential items are collected daily from the district headquarters in the schedule particularly designed for it and reports sent to the office of the Chief Minister on every working day. Along with this, the prices of 20 + 9 selected items are also collected on a weekly basis. We are also collecting weekly retail and wholesale prices of Fruits.

Price Index Numbers

Index Numbers are the devices to measure the relative movements in variables. They are used to compare the level of certain phenomenon between different times or between different places or between categories such as persons or objects. It is a technique of estimating general trends in prices, production and other economic and social variables and have been rightly called the “Economic Barometers”. Most of the current indices are indicators of changes over time in respect of economic characteristics like prices, output, wages etc. These are termed as price indices, production indices, wage indices etc. Index numbers play a vital role in business planning and drafting of executive policies. The different types of indices being included in this book are the following.

1. Consumer Price Index (CPI) Numbers for IW & AL with base 2011-12 = 100
2. Whole Sale Price Index (WPI) Numbers with base 2015-16=100 (Agri. year)
3. Parity Index Numbers with base 1952-53 = 100 (Agri. Year) for January 2020 to June 2020 and base 2019-20 = 100 (Agri. Year) for July 2020–December 2020.
4. Wage Index Numbers with base 2019-20 = 100 (Agri. Year)

Consumer Price Index Numbers

Consumer Price Index (CPI) is designed to measure the changes over time in the level of retail prices of a fixed set of goods and services (Consumption basket) consumed by an average family of a defined population group at a particular place. The retail price of a commodity is defined as the price which the ultimate consumer pays for relatively small transactions of the commodity. The consumption pattern and the prices paid by the consumer will normally vary from family to family. Hence the section or segment for which Index number is referred is to be clearly defined. (Eg. For Industrial workers (IW), for Rural Labourers (RL) etc).

Wage Index

The data on daily wages of various categories of agricultural labourers are being collected from 28 centers in the State. The wage index is prepared to measure the relative changes in the wage rate of different types of skilled and unskilled labourers with respective time.

The wage indices are being prepared for the following categories.

- 1) Skilled labour
 - a) Carpenter
 - b) Mason
- 2) Paddy field labour

It indicates the state of affairs of the farmers receiving value for their products and expending money for cultivation of the crops and for their own living. It is the ratio of the index of prices received by the farmers and the index of prices paid by the farmers, expressed as a percentage.

Wholesale Price Index (WPI)

The wholesale prices being collected under the Market Intelligence Scheme is utilized for computing WPI for agricultural commodities. In the calculation of the index 24 important agricultural commodities are included. Commodity wise, Group/sub group wise wholesale price indices are being prepared by this.
