

Report on
Activity Status of Migrants
And
Returnees

Department of Economics & Statistics

Chapter – I

INTRODUCTION

An Overview

- 1.1 The number of persons going abroad for employment and in search of better opportunities has shown an ever-increasing trend since Independence. The effect of this migration is felt in every aspect of the economy and the society in the State. In other words the prosperity and economic growth of the state have a correlation with the remittance from Non-Resident Keralities. During the last quarter of the 20th century, the cash remittances received by Kerala households from emigrants to gulf countries, popularly known as “Gulf Money”, has emerged as the most dynamic single factor that contributed to the economic substance of the State. In the context of continued failure on the agricultural front, stagnation in industrial growth and shortfall in employment opportunities resulting in gruesome unemployment among the educated youth, migration from Kerala has contributed more to poverty alleviation in the State than any other factor. The Statistics appeared in media about migrants and their remittances give an indication of the important role played in the economy of the state by the remittances received from emigrants abroad.

- 1.2 A disturbing factor in this context, which has gained considerable attention in the administrative and political circles in recent years, is the increase in the number of emigrants who return to the State after employment abroad for several years. Their return to the Home State is prompted by various factors including the emerging situation in, and the policies adopted by, the destination countries. There is an apprehension that the number of return emigrants might increase rapidly in the coming years. In 1998 the number of return emigrants in the State was estimated as 5.43 lakhs. In appreciation of the enormous contribution to the State’s economy made by these persons and to instill a sense of confidence in those who are still working abroad, the State has to take up measures and provide

necessary mechanism to rehabilitate them in the best possible way and to utilize to the maximum extent the expertise they have gained abroad.

- 1.3 For a proper understanding of the determinants and consequences of the migration and the demographic transition in the State in the last quarter of the century, a historical overview of the subject matter is considered necessary. Though Kerala has a long tradition of trade contacts with the West and the Middle East, dating back to the period before Christ, migration of workers from Kerala is a relatively recent phenomenon. Undaunted by threats from external enemies and enjoying internal peace ensured by local Kings, the Keralaites lived a contented and happy life and seldom thought of venturing beyond the natural boundaries of the State, for earning a livelihood. Journeys beyond the Western Ghats were undertaken only by a few Keralaites, mostly scholars and Pilgrims on religious pilgrimage to holy places in the northern parts of India. Even when the British permitted indenture emigration of Indian labour to countries like Ceylon, Burma, Malaya, Mauritius, and Fiji etc. in the 19th century, Tamilians constituted the bulk of the emigrants. Keralaites generally kept away from the large-scale emigration to these countries. Even the few Keralaites who migrated to Malaya, Singapore, and Ceylon were mostly educated persons, professional traders and “non-labour” employees, whereas the emigrated Tamilians were mostly of the labour class.

Migration to Other States

- 1.4 Till the beginning of World War II Kerala was a net-in-migration State, as it attracted labour force and traders in large numbers from the neighboring area, mainly the Madras Presidency. In earlier years migration of Keralaites to other parts of India was mostly confined to persons from Malabar area, which was the part of Madras presidency and where living conditions were less favorable than in the princely States of Travancore and Cochin. Kerala's transition to a net out – migration state came about during World War II, when a large number of youth from the State were recruited for war related jobs and sent to other parts of India and even to foreign countries like Burma Malaya and Singapore. This gave them an opportunity to see life in other places. The freedom struggle, Indian Independence of 1947 and integration of the princely States with the rest of India

opened up to the educated Keralite job opportunities in other parts of the Country, like Bombay and Delhi. Expansion in the field of education compared to other Indian States and demographic explosion within the State, resulting in pressure on land and mounting unemployment among the educated youth, were other factors that gave a fillip to the migration of Keralite to other States, especially the metropolitan cities like Madras, Bombay, Delhi and Calcutta. Since 1947 Kerala is a net out-migration State. .

Emigration to Foreign Countries

- 1.5 Prior to Independence, emigration of Keralite to foreign countries was mainly confined to Ceylon, Malaya, Burma and Singapore and these emigrants were either Malabar Muslims or those hailed from a few places like Chirayinkil, Varkala, Chengannur and Pathanamthitta in Travancore. Their number was not significant but the upward social mobility of their families as reflected in their lifestyle had a demonstration effect. These positive gains contributed to acceleration of emigration from the State to other regions of the world when opportunities emerged. Since Independence Keralite have migrated to almost all Countries, even though in small numbers. Their presence is conspicuous in the United States and Western Europe. However, large-scale emigration to the Gulf countries began in the 1970s consequent on the oil boom in these countries and today the largest number of emigrants from Kerala is working in the Gulf Countries. According to the Housing and Employment Survey conducted during 1980, 5.1 lakhs persons from Kerala were migrated outside the state for employment and out of this 2.1 lakhs were in foreign countries.

Migration Survey 1992-93

- 1.6 Migration to foreign countries, particularly to Gulf countries, considerably influenced the Socio-economic development of the State. Hence the Department of Economics and Statistics conducted a Survey in 1992-93, with the twin objectives of estimating the number of out-migrants to foreign countries and to other States and Union Territories and the number of returnees from foreign countries. The survey, which covered 42,367 households in 14 districts, was

carried out along with the house listing operation of the 49th round of National Sample Survey. The number of Keralaite migrants to Gulf Countries was estimated to be 6,41,387 and those to other foreign countries to 27,480. The survey also estimated that 1.17 lakhs persons had returned from the Gulf till the end of December 1992. The major reasons for the reverse flow were completion of the construction projects, availability of cheap labour from other countries and curtailment of wages and perquisites, apart from the Gulf war of 1990.

Present Study

- 1.7 The Survey of 92-93 was conducted covering less than 1% of the households in the State and with limited objectives. As the number of migrants from Kerala to abroad increases rapidly, the Socio-economic conditions of the people in the State is also changing. During the last ten-fifteen years on the one hand the number of migrants is increasing and on the other hand the number of returnees is also increasing. The problems faced by the migrants in the migrant country, rehabilitation of returnees etc. have also become State's responsibility. For the formulation of proper and meaningful schemes to solve these problems, reliable and timely information is necessary. Considering these, State Government accorded sanction for conduct of the present Survey as per GO (Rt.) 382/98/plg. Dated 5-10-1998.

Objectives of the Survey

- 1.8 The main objectives of the Survey are –
1. To get an estimate of the demographic particulars and family status of the migrants.
 2. To get a picture about the number of persons migrated and returned mainly from Gulf and other foreign countries.
 3. To study the returnees' problems.
 4. To assess the volume of remittances and their utilisation.

5. To compare the socio-economic condition of migrants' families with other families.
6. To study the impact of the foreign influence on the States' economy and the Standard of living of the people as a whole.

1.9 The following methodology was adopted for the study.

The Survey covered all the 14 districts in the State. A multistage sampling technique was adopted for the survey. The first stage unit (stratum) was block panchayaths in rural areas and Municipalities / Corporations in urban areas. In the first Stage 10% of Panchayat/Municipal/corporation wards were selected through circular systematic sampling. From each selected ward 20% households (primary unit) were selected for detailed Survey. Households were selected as clusters of 20 houses, starting from a house selected using systematic sampling.

Organisation of the field work

1.10 In order to carry out the fieldwork 600 enumerators were recruited for 30 days from the unemployed graduates and post-graduates. In each district a committee was constituted comprising of the Deputy Director (Economics & Statistics), Employment Officer and a representative from the Directorate of Economics and Statistics. The committee made the selection of enumerators by giving publicity through local newspaper media utilising the services of District Information Center.

Training

1.11 Two levels of training were arranged. In the first stage district level officers were given centralized training at Thiruvananthapuram. The field enumerators were given training in each district-by-district level officers. Senior officers of the Directorate were given overall charge of 2 or 3 districts for training, field inspection etc.

Supervision

1.12 The departmental officers in various cadres were entrusted with the supervision in addition to their normal duty.

Schedules

- 1.13 A schedule with 4 parts was designed for listing, detailed enquiry etc. of all families in the selected cluster of households.
- 1.14 First part of the schedule dealt with general features of families of selected cluster of households, details of family members, educational status, employment status, and residential status, along with means of livelihood.
- 1.15 Second part of the schedule dealt with the overall details of employed migrants along with the family members who were staying with them abroad.
- 1.16 Third part of the schedule dealt with overall details of returnees from abroad.
Forth part of the schedule dealt with the details of persons died abroad during the period of employment.

Field work

- The field work was carried out during 1999 and a quick report released in 2000.
- 1.17 The Survey results were processed in the computer division of the Department in the Districts and the Directorate. The results were presented in the following chapters.

Chapter	– 2	–	Characteristics of population and households.
Chapter	– 3	–	Dimensions of migration
Chapter	– 4	–	Return emigrants and their problems
Chapter	– 5	–	Details of Death Abroad.
Chapter	– 6	–	Summary of conclusions and views

Chapter – II

GENERAL CHARACTERISTICS OF POPULATION AND HOUSEHOLDS

- 2.1 The Survey covered 1.29 lakhs households in the State, which is more than 2 percent of the total households. The sample size is considered quite sufficient for reliable estimates. The number of sample households surveyed in each districts are given in table 1.1.
- 2.2 The percentage of households in the sample from each religion shows that the sample covered more or less proportionate representation of all religions. The number and percentage of households from each religion in the sample is also given in table 1.1. The Social group wise distribution of samples is given in table 1.2, which also shows that there is proportionate representation for all the categories viz. SC, ST, OBC & Others in the survey. Thus the sample, on the whole, represents a proper cross section of the population of the State.
- 2.3 The total number of households in the state is estimated as 65.70 lakhs. Among the districts, Trivandrum district has maximum number of households i.e. 7.85 lakhs households followed by Eranakulam district with 6.49 lakhs households. Wayanad district has the least number of households with 1.57 lakhs followed by Kasargod district with 2.13 lakhs households.
- 2.4 Population (usual resident) in the State is estimated as 314.67 lakhs. Malappuram district stood first with 34.70 lakh people and Wayanad district has the last position with 7.34 lakhs.

2.5 The survey results shows that the average family size is 4.79 for the state. Among the Districts the average family size is maximum in Malappuram with 5.85 followed by Kannur (5.40). The average size is least in Thiruvananthapuram with 4.28. The District-wise no of households, population and average size are given in table below.

COMPARISON OF HOUSEHOLDS, FAMILY MEMBERS AND AVERAGE SIZE

<i>District</i>	<i>No. Of households (in lakhs)</i>	<i>Total family members (in lakhs)</i>	<i>Average Size</i>
Thiruvananthapuram	7.85	33.60	4.28
Kollam	5.81	25.80	4.44
Pathanamthitta	2.95	13.05	4.42
Alappuzha	4.65	21.33	4.59
Kottayam	4.22	19.48	4.62
Idukki	2.86	12.64	4.42
Eranakulam	6.49	29.49	4.54
Thrissur	6.20	29.86	4.82
Palakkad	5.32	26.16	4.92
Malappuram	5.93	34.70	5.85
Kozhikode	5.27	26.62	5.05
Wayanad	1.57	7.34	4.68
Kannur	4.45	24.02	5.40
Kasaragod	2.13	10.60	4.98
Total	65.70	314.67	4.79

2.6 It is already stated that one of the objectives is to have an idea about the comparative picture on the socio-economic condition of migrant families with other families. As the survey was conducted in the house holds then in the state, the households are classified in four groups namely households with migrant, households with returnees, households with both migrant and returnees, other households. It is stated that there are 65.70 lakhs households in the state with a population of 314.67 lakhs persons. There are considerable number of Keralites residing out side the state but with in the country. The number of Keralites staying out side India (migrants) is 13.84 lakhs. Out of this 13.84 lakhs migrants 11.40 lakhs are employed in different countries and the remaining 2.44 lakhs are their dependents(job seekers and dependents) in the migrant countries. These 13.84 lakhs migrants are not included in the category of usual resident i.e.

the population of the state (314.67) given above. Among the population of 314.67 lakhs there are 5.43 lakhs returnees i.e., those who were abroad and at present staying in homeland. Table 2.3 and table 2.4 given in Appendix show the district wise number of migrants and residents and the % of migrants to resident, etc. The details of migrants & its dimensions are given in chapter 3 and that of Returnees in Chapter 4.

- 2.7** The survey result shows that the average family size is 4.79 in the State. Table 2.1 gives the number of households according to the family size and its % given in Table 2.5. It shows that there are single member families as well as families with above 10 members in all the Districts. The maximum % of single member family is in Palakkad with 3.32. The maximum % of families with more than 10 members is in Malappuram with 6.42.
- 2.8** The survey result shows that there are 314.67 lakhs person in the state. The age wise sex wise number of persons in each District is given in table 2.2 and its % in table 2.6. The age wise distribution shows that 34.24% of the population in the age group less than 15 or more than 60. It means that about 2/3rd are in the labour force and 1/3rd are dependents. As regards the sex ratio it is seen that up to the age 14 the males out numbered females and all the age group 15 and above the females is more than that of males. The sex ratio in the age group of 60 and above is 1148 as against 1054 for all ages.
- 2.9** It is generally accepted that the literacy level of Kerala is high. An estimate was made about the literacy level of the population excluding the kids below 6 years. It is seen that 6.87% are illiterate and more than 5% are graduates including postgraduates. The District wise % of persons according to Education status is given in table 2.7. The % of illiterate is maximum in Wayanad with 12.76 followed by Palakkad with 12.16. The % of illiterate is minimum in Kottayam with 2.12 followed by Pathanamthitta (2.43). As regards graduation and above Thiruvananthapuram stood 1st followed by Kottayam.

2.10 The unemployment in Kerala is grave problem especially educated unemployment. An attempt was made to have an idea about the employment status of the persons.

Employment Status

Employment Status	No. (lakhs)	%
Permanent Employment	40.90	13.00
Temporary Employment	58.69	18.65
Unemployed	215.08	68.35
Total	314.67	100.00
Employed abroad	11.40	3.51

2.11 Out of the total population 40.90 lakhs (13%) are employed permanently i.e. employed more or less in regular basis and with certain contractual conditions. Out of the 40.90 lakhs, 10.37 lakhs are employed in Government or quasi government sector. There are 11.40 lakhs persons employed abroad and the details are given in Chapter 3. The district wise sector wise number of persons permanently employed and their % age are given in table 2.8 and 2.9.

Permanent employment

Sector	No. (lakhs)	%
Government or quasi government	10.37	25.35
Co-operative	0.84	2.05
Private	9.47	23.16
Self	9.95	24.33
Others	10.27	25.11
Total	40.90	100.00

2.12 The survey results shows that 58.69 lakhs (18.65%) people are engaged in various types of temporary employment. They are employed in Government/Quasi Government Sector, Co-operative, private, self-employment and other sectors. The persons engaged in various sectors and not having preferential sector are included as engaged in other sectors. The table 2.10 and 2.11 gives the number and percentage of people engaged in each sector.

2.13 It is seen that 68.35% of the population in the State are unemployed. The unemployed persons are classified in 8 groups as below. Out of the unemployed youth only 12.67% are job seekers while 13.78% did not need any job. The

number and percentage distribution of unemployed persons in each District is given in table 2.12 & 2.13.

Status of Unemployed persons

	Status	No. Of persons (lakhs)	%
1	Job seekers	27.25	12.67
2	Students	70.19	32.64
3	Service Pensioners	2.96	1.38
4	Other Pensioners	1.87	0.87
5	Job not needed	29.64	13.78
6	Disabled	6.85	3.18
7	Age < 15 and > 60	49.24	22.89
8	Others	27.07	12.59
	Total	215.07	100.00

- 2.14. The household in the state is classified as households with migrants, returnees, returnees & migrants and other type of households. In the other type of households there is no migrants or returnees. In the State 11.99% of households have migrants, 6.07% have returnees, 1.57% with both migrant and returnees leaving 80.37% without migrants or returnees. The district wise percentage of households in each group is given in table 2.14. The results shows that the percentage of households in migrants, returnees, and migrants and returnees groups were maximum in Malappuram and minimum in Idukki district.
- 2.15. The different group of households (households with both migrant and Returnees, Migrants, Returnees, other house holds) were analysed separately about the extent of land possessed, age of the house owned, domestic facilities, monthly per capita expenditure, capital investment made during the last 5 years, etc.
- 2.16. The result shows that 4.71% of the households in the state are land less and 5.82% without own house. As regards the extent of land owned by the households it is seen that 69.95% of the households have land less than 50 cents. Only 1.40% of households possess land 5 acres and above. It is also seen that the extent of land possessed by households with migrant and returnees is slightly more than all other type. As regards the ownership of land, it is seen that the households with migrant or Returnees or both were in a better level than that of other type of households. In earlier days, persons belonging to households with middle class or upper middle class were migrated. Hence the above phenomena cannot be an impact of

migration alone. But migration also contributed to the increase in extent of land possessed. The percentage of extent of land owned by each type of house holds is given in table 2.15.

- 2.17. In the State 94.18% of households are having own house. As regards the age of house, it is seen that 26.84% of the house are constructed long back i.e. above 20 years and 9.08% with in last 2 years. On examining the house constructed with in the 2 years it is seen that the migrant families constructed 9.24% as against the state percentage of 9.08. Other type of households (house holds without migrant or returnees) the percentage of house holds constructed houses with in two years is 9.19 which means that every stratum of people are constructing new houses more or less in the same rate. The hose owned by families with migrant and returnees are having comparatively more aged houses than houses owned by other type of families. The age wise percentage of houses owned by each type of families is given in table 2.16. There is no specific inference that the migrants and returnees families have constructed large number of houses compared with other stratum of households.
- 2.18. The table 2.17 & 2.18 gives an idea about the domestic facilities used by the households in general and also according to the household's status. The house holds with migrants and returnees together had more house hold amenities, except cycle, compared to other type of households. Iron box tape recorder etc were used by more then 50% of the households. 461 households out of 1000 house holds are subscribers of news paper. On examination of different type of families, the other type of families are more in the usage of black and white TV & Cycle. It is seen that household' amenities are used more by the migrant or migrant and returnees families in all most all the District and it is an impact of migration.
- 2.19. An attempt was made to estimate the district wise per capita expenditure and per capita expenditure by various types of households. It is seen that the per capita expenditure is Rs.519.12. Among districts the per capita expenditure is maximum in Kottayam with Rs.619.8 followed by Thiruvananthapuram with Rs.594.42. The lowest per capita expenditure is reported in Malappuram with Rs.431.01 followed by Idukki with Rs. 437.82. The district wise per capita expenditure on food, clothing, etc. are given in table 2.19.
- 2.20. The survey results shows that the average family size (residents) is 4.79 for the state. It is seen that the average family size of households with migrants and

returnees is 7.01, which is very high compared to other groups. As regards the per capita expenditure of various types of households the expenditure is maximum for the households with migrants followed by with migrant and returnees. The per capita expenditure for migrant family is Rs.650.44 while the other type of family is Rs.496.65. It is very clear that the expenditure on house holds having present earning from abroad is more than all other households. The expenditure on various items according to different type of households is given in table 2.20.

- 2.21. An attempt was made to estimate the number of households that made various capital investments during the past five years. The survey focused the capital investment made by different type of household during the past five years. The capital investment made by utilizing savings from different source cannot be separated due to the lack of full-fledged information. It is seen that most of households made various type of investment like land, buildings, commercial vehicles, business, etc. As regards the quantum of money invested by households it is seen that 78.4% invested Rs.25000/- or less and only 11% invested more than 5 lakhs. As regards the capital investment, proportion of persons invested in the range 25001 to 50000, the families with migrants or returnees or both are significantly high. The distribution of households invested in various range are given in a table 2.21.

Chapter – III

Dimensions of Migration

- 3.1 The survey revealed that 13.84 lakhs Keralites are staying outside India. It is more than 4.4% of the people permanently residing in the state. Out of the total 13.84 lakhs persons residing abroad . 11.40 lakhs are employed and the remaining 2.44 lakhs are their dependents. The country -wise migrants, employed migrants, Dist. wise employed migrants, sex-wise distribution of migrants etc are presented in tables 3.1a,3.1b,3.1c and 3.1d..
- 3.2 The numbers of migrant employees is the highest in U A E with 4.09 lakhs followed by Saudi Arabia with 4.08 lakhs. UAE and Saudi Arabia together constituted more than 75% of the migrants. The number of migrant employees are least in Australia with 957 followed by U.K with 2619. The country-wise Dist-wise no of migrants are given table 3.2.
- 3.3 As regards the marital status of migrants more than 70% are married and 28% are unmarried leaving the remaining to the categories of widower/ widow, divorced or separated. The age-wise sex-wise marital status of migrants are presented in table 3.3 a,b,&c.

Marital Status of migrants

Marital Status	Employed			Dependents			Total		
	Male	Female	Total	Male	Female	Total	Male	Female	Total
Married	820333	58978	879311	23785	71598	95383	844118	130576	974694
Un-married	239723	13062	252785	75886	63610	139496	315609	76672	392281
Widower	1628	0	1628	497	0	497	2125	0	2125
Widow	0	1724	1724	0	3273	3273	0	4997	4997
Divorced	2088	1074	3162	1085	2528	3613	3173	3602	6775
Separated	561	963	1524	474	728	1202	1035	1691	2726
Total	1064333	75801	1140134	101727	141737	243464	1166060	217538	1383598

- 3.4 Out of the total migrants 15.72% i.e. 2.18 lakhs are females. The percentage of females to the total persons in the age group less than 20 years and above 60 years is respectively 47.6 and 39.33. It shows that the representation of females in the workforce is very low compared to the dependent group.

- 3.5 The country wise distribution of employed migrant shows that the maximum is in UAE followed by Saudi Arabia but the percentage distribution of females shows that the maximum is in Soudi Arabia..
- 3.6 Out of 13.84 lakhs migrants' 11.40 lakhs are employed. The education (general and technical) status, nature of Job, sector in which employed, and type of employer, are classified and analyzed the tables 3.4 to 3.8.b. It is seen that 80.83% of the employed migrants have no technical qualification.

Qualification of Employed Migrants

Qualification	No	Percentage
Non Technical	921559	80.83
Certificate	124226	10.90
Diploma/Equivalent	56634	4.97
Engineering	19985	1.74
Medical	6278	0.55
Other Technician	6921	0.61
Others (not specified)	4531	0.40
Total	1140134	100.00

- 3.7 There are 11.40 lakhs employed migrants of whom 4.09 lakhs are in U.A.E and 4.08 lakhs are in Saudi Arabia. The numbers of persons employed in various categories are as follows. About two lakhs persons have not specified the type of job. In various categories of job about 20% are in the worker category followed by salesmen with 15%. The non-teaching staff and teaching staff in educational institutions are the least with 3302 and 6746 respectively. It is also seen that all the migrants to Australia are in professional or executive category. The country wise job wise number of migrants are given in table 3.6 a&b.

Analysis of migrants according to job categories

<i>Sl.No.</i>	<i>Profession/Job categories</i>	<i>No of persons</i>	Percentage
1	<i>Doctor</i>	12527	1.10
2	<i>Nurse</i>	55939	4.91
3	<i>Pharmacist</i>	32373	2.84
4	<i>Paramedical</i>	7535	0.66
5	<i>Engineer</i>	20554	1.80
6	<i>Technical expert</i>	70687	6.20
7	<i>Manager</i>	14340	1.26

8	<i>Supervisor</i>	28839	2.53
9	<i>Technicians in refinery oil</i>	12499	1.10
10	<i>Worker</i>	226642	19.88
11	<i>Proprietor</i>	16941	1.48
12	<i>Salesman</i>	172597	15.14
13	<i>Teacher</i>	6746	0.59
14	<i>Non teaching staff</i>	3302	0.29
15	<i>Office works</i>	76494	6.71
16	<i>Cook/Chef</i>	22957	2.01
17	<i>Hotel Boy</i>	26932	2.36
18	<i>Gardener</i>	15247	1.34
19	<i>Driver</i>	88036	7.72
20	<i>Domestic Servant</i>	28205	2.47
21	<i>Others</i>	200742	17.61
	<i>Total</i>	1140134	100.00

3.8 The migrants are employed in various institutions under different sectors like Agriculture, Education, Industry, Trade and Commerce, Health, Construction, Hotel & Restaurant, Service Sector, Mining & Oil refinery & others. The number of persons employed in each category and their percentage are given below. Out of the total employees 28.57% are reported in the category "others". This is mainly due to lack of proper information of the informants. As regards specified categories, the maximum number is in the field of Industry followed by Trade and Commerce with 21.05% and 18.11% respectively. The number of migrants employed in agriculture Sector is only 2.25%. The district wise number of migrants employed in each type of institution and their percentage are given in table 3.7a&b

Analysis according to sectors of employment.

Category	No of Employees	Percentage
Agriculture	25670	2.25
Education	19022	1.67
Industry	239978	21.05
Commerce	206473	18.11
Health	49306	4.32
Construction	117235	10.28
Hotel & Restaurant	68937	6.05
Service	75119	6.59
Oil Mining	12609	1.11

Others	325786	28.57
Total	1140134	100.00

3.9 As regards the status of employer i.e. Government, Semi-Government and Private it is seen that 91.34% are employed in private sector. The number of employees in each sector is as follows. The country wise, gender wise details of employees under different type of employer are presented in table 3.8 a & b.

Sector-wise analysis of employed migrants.

Sector	<i>No. Of Employees</i>			<i>Percentage</i>		
	Male	Female	<i>Total</i>	Male	Female	<i>Total</i>
Government	54931	15784	70715	5.16	20.70	6.20
Semi-Govt.	25160	2889	28049	2.36	3.79	2.46
Private	983778	57592	1041370	92.48	75.51	91.34
<i>Total</i>	1063869	76265	1140134	100.00	100.00	100.00

3.10 An attempt was also made to analyse the reasons for migration. The migrants left the country for various reasons like employment, better employment seeking for employment, educational purpose, to join family etc. The reason for migration at the time of leaving the country is taken as the criterion. 75.18% of them have migrated for employment i.e. they have gone with employment visa. Only 0.67% has gone to join family and had got employed subsequently. 20.93% were already employed in the homeland before migration. 0.22% of the migrants left the country initially for educational purpose and then joined employment there. The district wise number of employees migrated due to various reasons and their percentage are given in table 3.9 a&b

Percentage distribution according to reason for migration.

Reason	No. Of migrants	Percentage
Employment	856947	75.16
Better Employment	238592	20.93
Seeking Employment	6758	0.59
Education	2536	0.22
Join Family	7637	0.67
Others	27664	2.43
Total	1140134	100.00

3.11 The period of stay of migrant employees varies vastly. There are migrants who were employed abroad for more than 20 years and also those of period less than one year. More than two thirds of the migrants are staying in the present country for periods ranging from one to five years. The district wise migrants according to the period of stay (No and Percentage) are given in table 3.10 a&b.

Number of employed migrants according to period of stay in the present country.

Period of stay	No	Percentage
Up to 1 Year	143091	12.84
1 to 5 Years	480981	42.12
5 to 10 Years	285007	24.96
10 to 20 Years	185836	16.31
Above 20 Years	45220	3.97
Total	1140134	100.00

3.12 In some cases it is seen that the migrants have shifted from country to country by renewing the visa. It is seen that out of the 143,091 employed migrants working in the present country for less than one year, 56,253 persons have worked or stayed abroad for more than one year. The table below gives the total period stayed abroad by the migrants (total stay in various countries). . The district wise migrants according to the period of stay abroad (No and Percentage) are given in table 3.11 a&b.

Number of migrants according to period of stay abroad

Period stayed	No	Percentage
Up to 1 Year	86838	7.62
1 to 5 Year	485296	42.56
5 to 10 Years	307965	27.01
10 to 20 Years	208245	18.26
Above 20 Years	51790	4.55
Total	1140144	100.00

3.13 An enquiry was made about the utilization of income earned through employment in migrant country. As the data was collected mostly from the family members at home, there is some under estimation as there was some reluctance to reveal full information. However it is seen that about 90% of the persons reported about the utilization. The different purposes are purchase of land, construction of buildings, purchase of land and building, purchase of commercial vehicles, investment in share market, expenses for marriage, expenses on treatment, etc. About 1/3rd of the income was utilized for unspecified purposes and among the specified purposes the maximum investment is in for construction/purchase of residential building followed by purchase of land. There are persons who utilized the money for more than one purpose. The persons who have not reported included persons who have not informed the details of utilization to the household or who have not invested at all. It is also seen that a considerable amount was utilized for treatment, marriage, education etc. On the whole, the major portion of the earnings was invested in land and buildings. Another sizeable portion of earning was spent on routine household expenditure. The distribution of utilization of money for different purposes is given in table 3.12. As regards the investment in land it is seen that 17.87% of employed migrants purchased land. The extent of land purchased by the migrants, it is seen that more than 75% have purchased less than 50 cents. Only 1.75% have purchased above 5 acres. The percentage of households who have purchased 5 acres and above is maximum in Kottayam District with 6.02 and minimum in Kozhikode with 0.53. The district wise distribution of land purchased according to the extent is presented in table 3.13.

The District wise percentage of migrants purchased land

District	Purchased land
Kasargod	11.94
Kannur	14.47
Wayanad	28.33
Kozhikode	17.43
Malappuram	16.18
Palakkad	17.99
Thrissur	16.31
Ernakulam	17.46
Idukki	14.80
Kottayam	14.92
Alappuzha	18.65
Pathanamthitta	22.33

Kollam	20.43
Thiruvananthapuram	23.89
Total	17.87

3.14 The migrants send the money (earnings) to the home through bank, friends, or as gold etc. It is seen that about 3/4th of the amount received in the homeland is through bank. On examining the district wise distribution of the receipt of earnings by different ways it is seen that 894 persons out of 1000 are utilizing the bank facility in Thrissur while in Malappuram only 561 out of 1000 is sending money through bank. In Kasaragod District 265 persons out of 1000 are forwarded their money through friends. In Malappuram 127 persons out 1000 are sending the earnings through other ways. The distribution of persons who sends money to homeland by different modes is given in tables 3.14 & 3.15.

3.15 The percentage of literacy in the State is very high and most of our youth prefer to have permanent and secured employment. It is generally seen that in our State there is shortage in manpower in manual labour in agriculture, construction, etc. It is a usual practice that workers from outside the state are doing manual labour. But from the data available it is seen that there are Keralites outside India as worker. It is clear that though the Keralite is hesitate to do manual labour in the homeland they are prepared to do such type of work abroad. It may be due to the higher pay or some other reasons. Considering the higher demand for employment abroad, there are a number of agencies in the state for assisting in getting visa, job etc. An attempt was made to collect details about expense for getting visa, agency provided visa, benefits offered and received etc. As regards this information there are situations in which the household members in the homeland is not fully aware of all the facts. The analysis is made based on the details furnished by the household members available in the homeland. It is seen that 36.97% of the migrants received their job through agents. The number of migrants received their job through various sources are given below.

analysis of sources provided assistance in getting visa.

Source	No of migrants received jobs	Percentage
Self	373728	32.78
Agency	421552	36.97
Government	21477	1.88
Others	323377	28.37
Total	1140134	100

- 3.16 The district wise number of persons received job through different agencies, with the percentage are given in table.3.16a&b. There are citations were the persons are taken more than one visa. In the state 769 Persons out of 1000 employed migrants have taken one visa. On the other hand 11 out of 1000 persons have taken more than 5 visas. The country wise distribution shows that 31 out 1000 persons working in Singapore/Malaysia have taken more than 5 visas while in U.K. and Australia there is none in the category. The country wise details are given in table.3.17.
- 3.17 It is an accepted fact that there is an expense for securing visa and for the completion of other formalities. . The amount paid to get visa to different countries and for different job is varying. An attempt was made to have an idea about the amount paid by the employed migrants for getting the present visa. It is seen that 23.34% of the persons have given only 10,000 or less for visa and 21.48% paid above Rs.50000. The percentage in all other range is less. Hence it is clear that there is vast difference between the amounts paid by persons. The country wise distribution of amount paid for visa is presented in table3.18 a .

Distribution of persons according to amount paid for visa.

Range of Amount Paid for Visa	No of persons	Percentage
Up to 10000	266066	23.34
10001-20000	103349	9.06
20001-30000	156735	13.75
30001-40000	157968	13.85
40001-50000	211138	18.52
Above 50000	244878	21.48
Total	1140134	100.00

- 3.18 There is a general view that it will take a long time to get visa. But in the survey it is seen that in more than half of the cases they obtained the visa with in one month. Only 1.5% of the cases took more than one year to get the visa. The country wise distribution of time taken to get present visa and their percentage are given in tables.3.19a&b.

Distribution of time taken to obtain visa.

Time taken	No	Percentage
Below 1 month	592383	51.96
1 to 3 months	334415	29.33
3 to 6 months	136731	11.99
6 to 12 months	59170	5.19

Above one year	17435	1.53
Total	1140134	100.00

3.19 An attempt was made to get an idea about the specific problems faced in getting the visa. It is seen that 3.16% of the cases reported that there is no delay in getting visa and 34.28% reported that they are not aware whether there is delay or not. More than 60% of the household informed that there is delay but they are not aware to specify the reason for the delay. . The country wise distribution of the persons faced various problems in getting the visa, and their percentage distribution is given in tables.3.20 a&b.

3.20 It is generally heard that the job, salary and other benefits offered in the visa are not received after entering into the job. An attempt was made to collect details on the number of cases that received the job, salary etc as per the visa. The country wise, qualification wise and job wise number of persons received the benefits are presented in table 3.21a,b&c.

The number of persons received the benefits as per the agreement in visa

Benefits	No of persons	Percentage
Job as per Visa	973686	85.39
Salary as per Visa	802566	70.38
Other benefits	305920	26.83
Provision for family Accommodation	136009	11.93

3.21 The Government had initiated various steps for the benefit of migrant employees and foreign returnees .An insurance scheme has started by the state government for the migrant. An attempt was made to understand the awareness of the scheme and the number of persons joined in various schemes introduced by Government. It is seen that only 4.84% of the migrants joined in various Insurance Schemes. As regards the opinion about the scheme 5% informed that the scheme is not attractive and 2.7% reported that the premium rate is very high. Majority i.e. 84.2% reported that they have not joined due to various reasons. It is clear that there is no specific awareness about the scheme to majority of the migrant households. On enquiry about the sources from which the migrants who joined the Government insurance scheme received the application and other details, it is reported that 11.46% received the application through NORKA Department. It is also seen that 28.64% of applications were received from various Kerala Associations in migrant

countries 19.12% through New India Insurance and 40.79% from other source. On analyzing the opinion given by the migrants there is a strong demand for proper publicity and to create awareness of the scheme, minimize the premium amount and to include the dependents also in the scheme etc. Tables 3.22 a, b, c, d & e in appendix gives the district wise details of above items.

3.22 As regards the medical care given by the employers it is seen that the employers provide medical help for disease and for accidents to certain extent. It is seen that 37.46% of the persons who suffered from diseases received help from the employer and in 52.96% of the cases of accident the employer provided medical help. It is seen that about 25 out of 1000 persons were affected from diseases and 15 out of 1000 met with various accidents during the time of the foreign stay. (Table 3.23).

Chapter – IV

RETURN EMIGRANTS AND THEIR PROBLEMS

- 4.1 Before independence, the Indians especially Keralites migrated abroad mainly for better job and most of them are educated. Later the number of persons migrated increased and also engaged abroad for various types of jobs including manual job. The rate of migration increased after 1970 and majority are in gulf countries. The job opportunities in those countries are attractive to Keralite considering wage rate at that time. Apart from India people from many countries migrated to gulf countries and as a result there was also competition for certain type of job to certain extent.
- 4.2 In earlier period the persons gone to different foreign countries are stayed there for long. But for the last two-decade it is seen that the people are going abroad for employment and also a sizable number of persons in abroad are returning to homeland. It is seen that there are 5.43 lakhs returnees in the homeland during 1999. The maximum number of returnees i.e. 90688 is in Malappuram followed by Kollam. On analysis about the reason for return to homeland 16.8% are sent back. It is seen that about 45% of the persons return to homeland due to the reasons like no security to life, retrenchment or sent back. That is they returned not for seeking any better avenue. The reasons may be the war, lack of employment opportunity or termination of contract etc. The district wise and country wise distribution of number of persons returned from abroad are given in tables 4.1 & 4.2.

No. Of returnees with reason for return.

Reason of Return to Homeland	<i>No</i>	Percentage
Retirement	23517	4.33
No life Security	72011	13.25
Retrenchment	81208	14.94
Sent back	91240	16.80

Ill health	88577	16.31
Education of Children	10934	2.01
Re migration for better job	38425	7.07
Bad climate	11331	2.08
To join duty in homeland	11190	2.06
Other reason	114809	21.15
Total	543242	100.00

- 4.3 The country wise number of returnees shows that Saudi Arabia stood first followed by U.A.E. As regards the age group of returnees (including dependent in migrant country) About two third of the returnees are in the age group less than 49. The country wise and district wise number of returnees in each Age group is presented in table 4.3 and 4.4 respectively.

Age wise distribution of returnees

Age group	<i>No</i>	Percentage
0-19	1321	00.24
20-29	75727	13.94
30-39	197396	36.34
40-49	167888	30.91
50-59	70854	13.04
60-69	24282	04.47
70-79	4844	00.89
80-	930	00.17
Total	543242	100.00

- 4.4 As vast majority of the returnees are in the age group less than 49, it is seen that they are in need of some employment or economic activity. As a result majority of the returnees added to the unemployed group of the population with in the state. The problems faced by the returnees are more crucial than the problems faced by the unemployed youth or under employed person in the state. On examination of the present activity statues of returnees it is seen that 65.03% are employed after return to the homeland and 34.97% are not engaged in any economic activity. The district wise percentage of employed returnees is given in table.4.5.
- 4.5 Analysis of the sector wise present employment of returnees it is seen that the maximum percentage are engaged in self-employment in Agricultural and other sector. The various sectors are Government/Quasi Government, Co-operative,

Other organized, Self-employed, Political and social organization, Agriculture and other sectors. The District wise per1000 distribution of sector wise present employment statues are given in table.4.6.

The sector wise percentage of employment

Sector	Percentage
Government /Semi Government	03.10
Co-Operation	00.90
Other organized	17.90
Self employed in Non Agriculture	31.20
Political and social Activity	00.50
Other Activities	46.40
Total	100.00

4.6 It is seen that only very few have returned with proper retirement benefits. On analysis of the benefit received at the time of retirement or retrenchment it is seen that only 19.96% got the benefits and 80.04% reported that they did not get any benefit. The dist-wise percentage are given in table 4.7

4.7 As regards the period taken to get the benefit the survey result shows that majority ie 54.02% received the benefit with in one month and only 3.46% after one year. The district wise percentage distribution of period taken to get benefits are given in table.4.8

Percentage Distribution of period taken to get benefits

Period taken	Percentage
Up to one month	54.02
1-2	9.76
2-3	8.35
3-6	14.33
6-12	10.08
Above 12 months	3.46
Total	100.00

4.8 With regards to other benefits like TR, it is seen that 32.26% got the benefit. The district wise percentage is presented in table.4.9.

4.9 There is a usual feeling that there is much difficulty at the time of customs clearance. But the survey results show that 91.13% of the returnees reported that they have not faced much difficulty in customs clearance at the time of return. 8.77% reported that they have faced difficulty. Out of which also more than 50% has not stated the type of difficulty. The district wise distribution of percentage of item wise difficulty reported by persons who faced difficulty is given in table 4.10.

Difficulties faced at the time of customs clearance.

Type	Percentage
1. Imposed high Excise Duty	16.48
2. Delayed	3.26
3. Loss and damage made	4.27
4. Bros paid	10.89
5. Toughen from customs	3.56
6. Un specified	61.54
Total	100.00

4.10 There is a view that the Kerala Economy is controlled or depends upon Gulf money .An attempt was made in the survey to get an idea about the earnings made by the returned migrants while they were abroad. It is seen that 88.20% of them send money to homeland while abroad. As regards the district wise analysis of no of persons sent money, Pathanamthitta stood first with 95.14% and Kasargode the lowest percentage i.e. 69.69. The district wise percentage of returnees sends money to homeland while abroad is given in table.4.11

4.11 The earnings were sent to homeland by way of money through bank, as gold, through friends and others as other items etc. The survey result shows that more than 80% have sent their earnings through bank and only 1.89% forward as Gold. The District wise Percentage given in table 4.12.

The District wise method of transfer of way/money sent to homeland.

Method	Percentage
Bank	80.43
Friends	13.36
Gold	1.89
Other items/method	4.33
Total	100.00

- 4.12 It is seen that the services of bank is used maximum by the migrants from Alappuzha District (94.29%) and minimum by Kasargode District (63.92%). The money was send through friends by the migrants of all the districts but the maximum i.e. 30.02% were from Kasaragod district. Kottayam utilized this facility the least (2.53%). In Kannur 4.37% of people sent Gold while from Idukki there was no case reported in the category. In Malappuram District it is seen that 12.90% send their earning as items other than Gold and the corresponding percentage is lowest in Alappuzha with 0.59%
- 4.13 As regards savings at the period of stay abroad, 68.75% reported that they have savings. The country wise percentage of persons having earnings was presented in table 4.13.
- 4.14 On enquiry about the investment of the earnings it is seen that purchase of land, purchase or constitution of residential buildings, commercial buildings, industry and commerce, etc are prominent. There was considerable expenditure also on marriage, education, employment, medical treatment etc.

Analysis of item wise investment

Item	Percentage of Investment
1. Purchase of land	24.7
2. Construction and Purchase of Residential buildings	29.1
3. Commercial Vehicle/ Bldgs	4.9
4. Trade and Commerce	4.4
5. Other Deposit	9.1
6. Marriage	17.2
7. Education	8.5
8. Treatment	14.3
9. Other Expense	60.8

The district wise break up is given in table 4.14

- 4.15 It is seen that 24.7% of the investment, made by the migrants are for purchase of land. As regards the extend of land purchased by these people about $\frac{3}{4}$ th have purchased 50 cents or less. The district distribution of migrants purchased land according to the extent is given in table 4.15.

The percentage of persons purchased land in each extent is given below.

Extent of land	Percentage
<10 Cents	24.97
10 to 50 Cents	48.51
50 to 100 Cents	12.85
100 to 200 Cents	8.02
200 to 500 Cents	4.18
500 and above	1.47

4.16 It is presumed that since the extent is less most of the land purchased is for residential purpose and not for agricultural purpose.

4.17 It is true that these persons migrated for getting better earnings. But on enquiry about the help or assistance expected from Government, % of the returnees reported that they are expecting financial help for starting some business. The district wise break up is given in table 4.16. Appended

The percentage of returnees expecting various types of helps is given below.

Type of help or assistance	Percentage
Financial	62.7
Technical	7.6
Information/ Training	7.5
Marketing/ Export/ import license	2.2
Electricity	3.0
Others	10.9

Chapter – V

DETAILS OF DEATH ABROAD

5.1 Attempt was made to estimate the number of persons died while abroad. The information was gathered from the households of homeland from the parents/wife/husband or near relation of deceased. It is seen that 7333 persons were died while in foreign country. The district wise figures are as follows.

No of persons died while abroad

District	No	%
Kasaragod	249	3.40
Kannur	624	8.51
Kozhikode	542	7.39
Malappuram	972	13.25
Palakkad	198	2.70
Thrissur	1099	14.99
Eranakulam	263	3.59
Idukki	98	1.34
Kottayam	411	5.60
Alappuzha	505	6.89
Pathanamthitta	337	4.60
Kollam	729	9.94
Thiruvananthapuram	1306	17.8
Total	7333	100.00

5.2 Out of the 7333 deaths it is seen that 6834 are males and 499 are females. As regards the age wise distribution it is seen that maximum casualties are in the age group 30 to 39.

The number of deaths according to each age group is as follows

Age group	No	%
0-19	102	1.43
20-29	1423	19.41
30-39	2807	38.28
40-49	1929	26.31
50-59	866	11.81
60 and above	203	2.76
Total	7333	100.00

The occupation of the deceased persons is as follows.

Occupation	No	%
Doctor, Nurse, Pharmasyist ,Para Medical Staff	461	6.29
Engineer and other Technical Persons	1423	19.41
Manager, Supervisor, Other Executives	710	9.68
Cook, Hotel Boy etc	301	4.10
Driver	1067	14.55
Sales man, worker, Gardner etc	1478	20.16
Other	1893	25.81
Total	7333	100.00

- 5.3 With respect to the cause of death, it is seen that about 50% are died due to illness and about 42% by accident.

The number of person died due to various reasons is given below.

Reason	No	percentage
Illness	3613	44.27
Accident	3062	41.75
Suicide	192	2.62
Other reason	466	11.36
Total	7333	100.00

- 5.4 Out of 7333 persons died abroad the dead body of 4747 (64.73%) persons were brought to the State and 2586 were buried in foreign country itself.

The period taken to bring the body to homeland is given below.

Period	No.	Percentage
Below 1 month	2499	52.64
1 to 2 months	1235	26.02
3 to 4 months	356	7.50
5 to 6 months	151	3.18
Above 6 months	506	10.66
Total	4747	100.00

- 5.5 As regards the reason for dead body not brought to homeland, it is seen that 33.33% are due to financial difficulty and 41.23% are due to legal and other unspecified reasons. In 7.82% of the cases there was nobody to accept the body, in 9.91% the body was not in a position to be brought to homeland because of its condition. In 7.74% of the case there was reluctance from the part of the sponsor.
- 5.6 Various agencies like employer, Embassy, friends and relatives, etc. had provided help to bring the body to homeland. The different agencies provided assistance and the number of case assisted by each agency is detailed below:

The various agencies or institutes provided help to bring the body to homeland

Institution/Agency	No of cases	Percentage
Employer/Institution	3061	64.48
Embassy	204	4.30
Relatives and friends	818	17.23
Associations	150	3.15
(Not known and others)	514	10.83
Total	4747	100.00

- 5.7 Considering the benefits due to the deceased employee, it is seen that in 2769 cases (37.76%) the total benefits were received from their employer. As regards the period taken to receive the benefits 18.34% took 2 to 3 months time, 31.83% took 4 to 6 months, 2.24% took 7 to 12 months and 9.19% took more than one year. In 82.61% of the case, the families were fully dependent of the deceased.

Chapter –VI

SUMMARY, CONCLUSION AND VIEWS

Kerala located in the southern end of the country is generally quoted as a consumer state. More over there is a public opinion that the Kerala Economy depend on foreign earnings especially Gulf money. The present study was targeted to assess the dimensions of migration, its impact, etc. the study covered 1.29 lakhs of the household in the state with proportionate representation from all parts . The sample size is sufficient enough to have a proper estimate of the over all indications. The study reveals that 13.84 Keralites are residing out side India out of which 11.40 lakhs are employed and 2.44 lakhs are their dependent in the migrant country. The permanent employees in the state constituted 40.91 lakhs of which 10.37 lakhs are in Government or Quasi Government Sector. It shows that the employed migrants are more than the number of employees in the state in Government Sector. As the wage rate of migrants are more than the wage rate of Government Sector in the State, the total earnings of the migrants are very much higher than that of employees in Government/Quasi Government sector. Any of the sector like Agriculture, Industry, Trade & Commerce, etc. is not contributing to the states economy to a notable extent as a single factor. Thus the single factor that contributed maximum to the Kerala Economy is the service sector. The following indicators are obtained from the study.

AN EPITOME OF FINDINGS

- There are 65.70 lakhs house holds in the State in 1999.
- The states population (usual residents) during 1999 is 314.67 lakhs
- There are 13.84 lakhs migrants out of which 11.40 are employed and 2.44 are there dependents.(including job seekers
- 3.62% of the usual resident is an employed migrant.

- There are only 10.37 lakhs persons permanently employed in the state Government/Quasi Government Sector. The employed migrants are more than that
- 13.56% of the house holds were having at least one migrant.
- 7.63% of the households were having at least one returnee.
- The families of the migrants were having more domestic facilities in their houses
- The family size of families with both migrants and returnees are high.
- The per capita expenditure of migrants families are 50% more than that of State average.
- The investment made during last time by the migrant families are more than that of other families.
- The maximum number of employed migrants are in UAE with 4.09 lakhs.
- The maximum number of migrants are from Malappuram.
- More than 80% of the migrants have no technical qualification.
- More than 50% of the employees are in the category of worker or Driver of Salesman. About 2 lakhs have not specified the job.
- The migrants in Australia are in Professional and Executive category.
- About 90% of the migrants are employed in private sector/self-employed.
- 75% of the employed migrants have migrated on job visa.
- 17.87% of the migrants purchased land utilizing the money earned from abroad.
- 36.97% of the migrants secured job through agency.
- 21.48% of migrants secured visa by paying upto Rs.50000/-
- In more than 50% of the case, the visa was obtained with in a period of one month.
- Only 8.03% of the migrants joined in the insurance scheme.
- 31.74% of the returnees were send back or retrenched from foreign countries.

LIMITATIONS

The survey was conducted by household enquiry in the state and information about the migrants is collected from their family members. The migrated country, qualification of the migrants, etc. are properly reported by all the house holds. But with regards to the expenditure incurred in connection with the visa, i.e. amount paid to agencies, etc.the details are not properly given.. Above all, the problems faced by migrants, the actual job, salary paid by the employer, other benefits provided at the migrant countries, etc. are not known to the house holds. There are cases of hesitation to report the actual income earned by the migrant, money received from the migrants to the family and expenditure of the household. However the details on bank deposits by the NRIs are collected fom secondary sources and appended in the report

CONCLUSION

There requires further bench mark surveys on the matter periodically .The help of travel agencies, Airport Authorities, Banks, Indian Embassies are to be utilized for collecting the details on some important parameters like no. of migrants, no. of returnees qualification ,job abroad, inflow of money etc.. Internet, E-mail facilities may be used for collecting information.
