RARE CROP SURVEY 2012-13

DEPARTMENT OF ECONOMICS & STATISTICS
KERALA

GOVERNMENT OF KERALA

RARE CROP SURVEY

2012-13

Department of Economics & Statistics
Thiruvananthapuram

PREFACE

Economics and Statistics Department is the nodal agency for the collection and dissemination Agricultural Statistics in Kerala. The Department conducts surveys on various fields and publishes the data accordingly. The cultivation of crops viz Jowar, Ragi, Cholan, Maize etc are very important at National level. However these crops are rarely cultivated in Kerala and there is no adequate data available about the cultivation of these crops.

This report presents the results of the Rare Crop Survey conducted by the department in the year 2012-13 with reference period year 2011-12. It contains area, production, productivity, farm price use of pesticides, irrigation details and number of cultivators engaged in rare crop cultivation in Kerala.

This report was prepared in the EARAS division of the Directorate of Economics and Statistics. I hope this report will be much useful to those engaged and interested in Agricultural sector.

Suggestions, if any, are most welcome.

Thiruvananthapuram

*V. Ramachandran
Director General*

Introduction

Economics and Statistics Department is the nodal agency for collecting and reporting on Agricultural Statistics in Kerala. Report on Agricultural Statistics is an annual publication of the department. As per Government of India, the cultivation of crops namely Jowar, Ragi, Chola, Maize etc are very important. Cultivation of these crops is rare in Kerala, but plays a vital role in the calculation of state income. The actual picture of their cultivation is not visualised through the regular crop estimation surveys conducted by the department under EARAS (Establishment of an Agency for Reporting Agricultural Statistics)

In this context the government of Kerala decided to conduct a survey on rare crops in Kerala under the finance support of 13th Finance Commission. The aim of the survey is to get a clear picture of crops which are rarely cultivated in Kerala. According to this survey, a crop is defined as rare crop for a District if there is a cultivation of minimum 10 cents to a maximum of 100 hectare throughout the district. Accordingly, Rambhutan is excluded from survey in Pathanamthitta district, Thuvara (Tur), Groundnut, Sugarcane and Tomato are excluded in Palakkad district. Sugarcane is excluded in Idukki district.

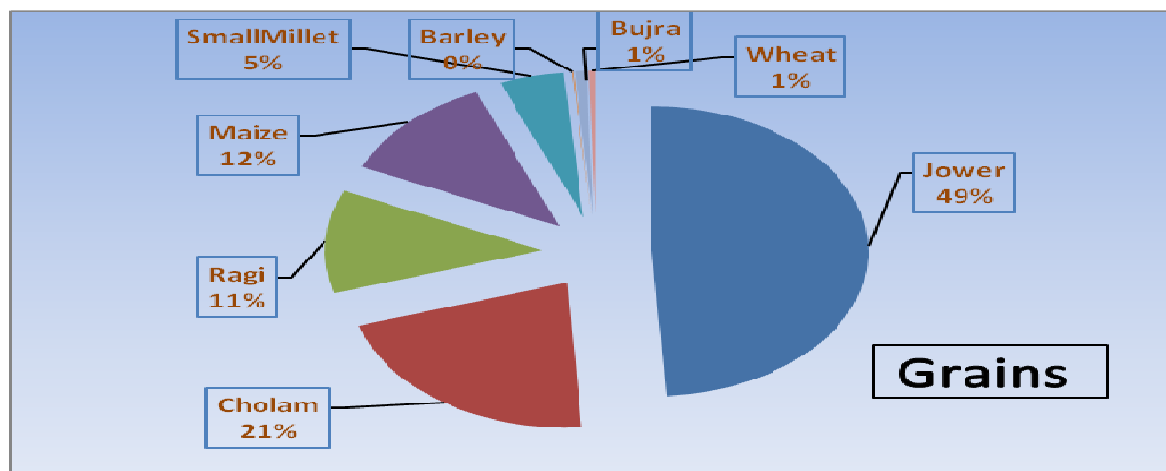

The survey reveals some valuable data about the area, production, productivity, farm price, irrigation and usage of pesticides in the case of the above defined crops. Reports on area and production are tabled in District and Block level whereas productivity, farm price, irrigation and usage of pesticides are tabled in District level.

Analysis of the data collected

For the Rare crop survey, crops are categorized into groups as Food grains, Pulses, Fruits, Oil seeds, Fibre drugs and narcotics and finally Others.

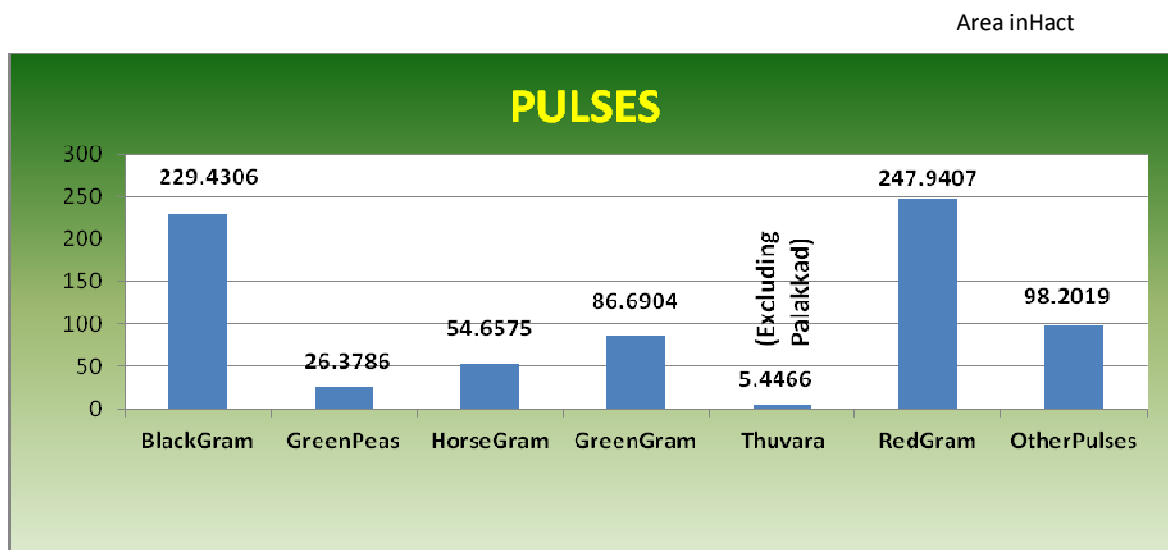

I Food Grains

Important food grains included in the survey are Jowar, Ragi, Chola, Maize, Small millet, Barley, Bajra and Wheat. Out of them Jowar takes maximum area (49%) and Barley occupies the minimum (0.09%). Food grains cultivation is more in Palakkad District (94%) followed by Idukki (2%)

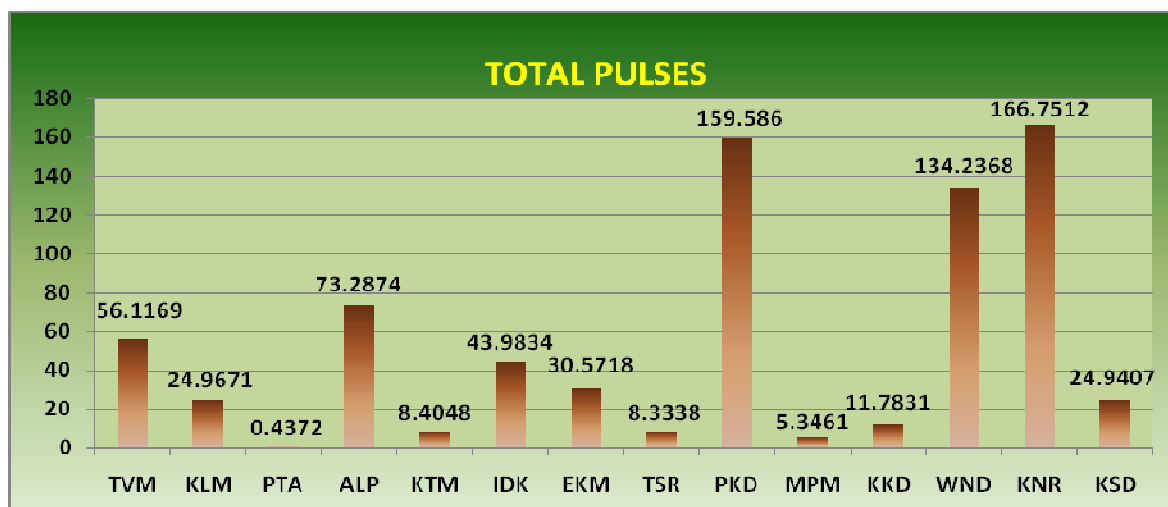

II Pulses

Among pulses, Black gram, Green peas, Horse gram, Green gram, Thuvra, Red gram are specified in the survey. Thuvra has been excluded from the survey in Palakkad district. All the other categories of pulses are included in Other Pulses.

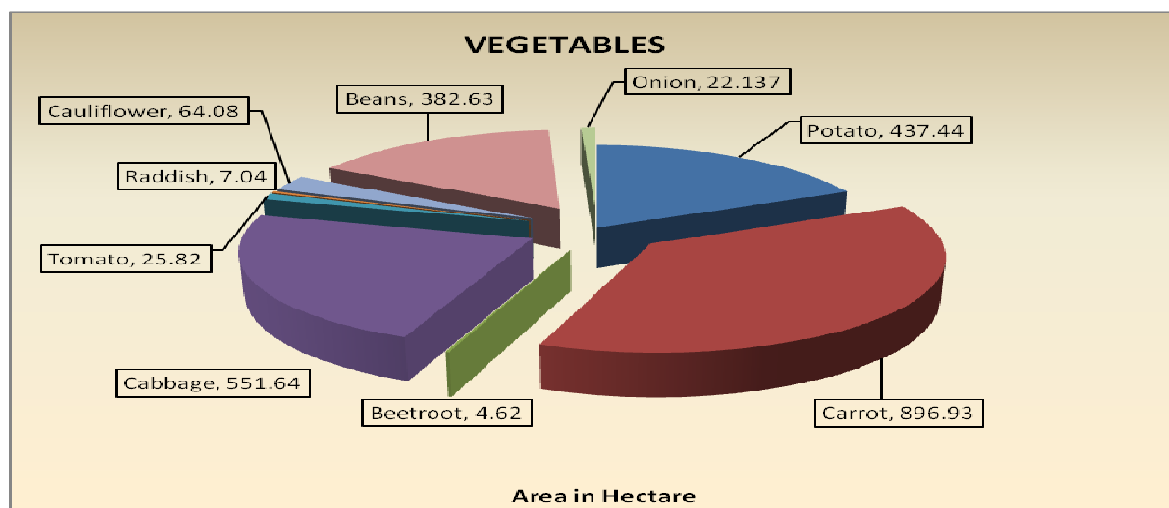

Red gram takes first position in pulses (33.1%) and Black gram in second position (30.6%)

Note: Thuvra (Tur) is excluded from the survey in Palakkad district

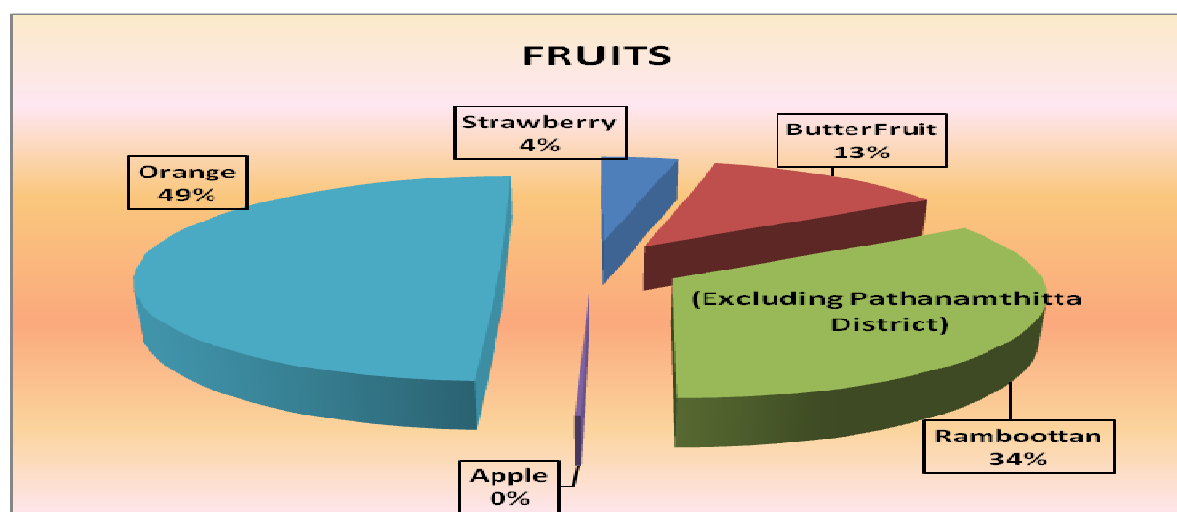

III Vegetables

Vegetables such as Carrot, Beetroot, Cabbage, Tomato, Raddish, Cauli flower, Beans and Onion are considered as rare crop for this survey. In Palakkad district there is more than 100 hectares of Tomato cultivation. So tomato is excluded from the survey in Palakkad. In the case of rare vegetable cultivation Idukki has major cultivation (92%)

IV Fruits

Strawberry, Butter fruit, Rambutan, Apple and Orange are the fruits included in the study. Rambutan is widely cultivated in Pathanamthitta, hence it is not a rare crop for the survey and is excluded from the survey in Pathanamthitta

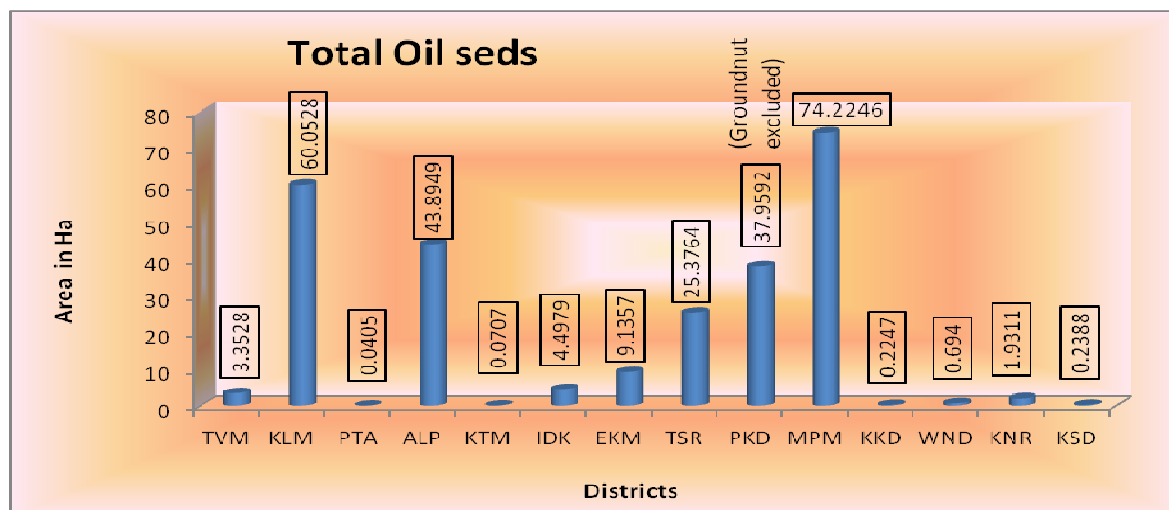

Orange cultivation covers an area of 36.87 Hectare which occupies 49% of the total rare fruits cultivation and Rambutan covers 25.2618 Hectare (excluding cultivation in Pathanamthitta district)

V Oil Seeds

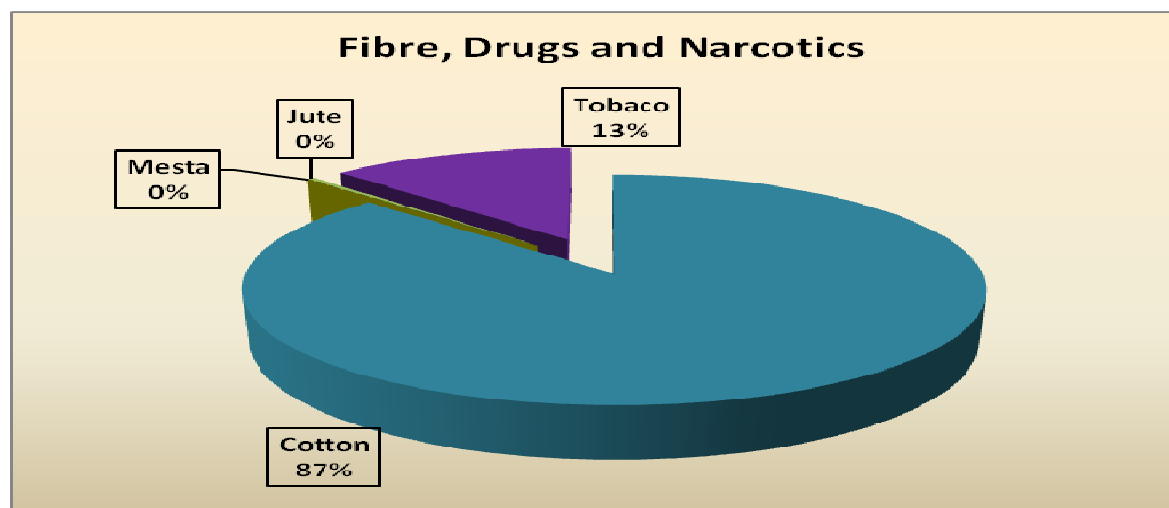

Ground nut, Sesamum, Soyabean, Linseed, Mustard, Safflower, Nigerseed, Rapseed, Sunflower and Casterseed are included in the category Oil seeds. In Palakkad district groundnut is not a rare crop as per definition for the survey, it is excluded from enumeration.

All districts except Pathanamthitta and Kottayam, have a participation in sesamum cultivation and sesamum covers 58% of oil seeds. Malappuram (30%), Kollam (24%) and Alappuzha (17%) are the leading districts in sesamum cultivation. Among oil seeds, Groundnut comes in the second position and Palakkad district is in the first position for groundnut cultivation (97%)

VI Fibre, drugs and narcotics

In this category, Cotton, Mesta, Jute and Tobacco are included in the Rare crop survey. Cotton cultivation is concentrated in Palakkad district. Mesta and Jute are very rare in Kerala and there is Tobacco cultivation in Kasaragod district.

VII Others

Sugarcane, Sweetpotato, Ramacham, Garlic and Vanilla are included as others in the Rare crop Survey. Sugarcane is a major crop in Idukki and Palakkad districts and as per definition, sugarcane is excluded from the survey in Idukki and Palakkad. Out of 106.83 hectare of Sweet potato, 47 hectare cultivation is in Palakkad district (44%). Ramacham cultivation is mostly in Thrissur district (90%). There are minor cultivation of

Ramacham in all districts except Pathanamthitta and Idukki, but production reported only from Thrissur, Malappuram and Thiruvananthapuram. Garlic cultivation is maximum in Idukki district (116.75 Ha).

Production and Productivity.

Production of rare crops has been estimated at district level and block level. As a first attempt on this study, a comparison is not possible with the previous data. District wise productivity is also included in this publication.

Price

District wise farm price of the crops under study has also been included. Most of the crops are very rare so that there is no wide marketing.

Availability of Seeds

Five types of seed availability are considered for the survey. They are

- 1) Self (produced by the cultivator himself)
- 2) Obtained from the Agriculture Department through Agriculture Office
- 3) Obtained from Seed Farm
- 4) Obtained from other farm (from other cultivators) and
- 5) Any other source (Other method).

On analyzing the data collected, Majority of cultivators collected seeds from the fifth category, other method followed by the first category, self. By viewing the facts in close, 44% of Lower cultivators got their seed from other farms. 48% of Ragi cultivators produced seed for themselves, 38% of Cholan cultivators got seed from other farmers. 61% of Maize cultivators, 74% of small millet cultivators, 67% of Barley cultivators and 68% of Bajra cultivators procured seed by themselves. Wheat cultivators got seed mainly by other methods. In the case of pulses, Black gram, Horse gram, Green gram, Thuvana and other pulses, cultivators mainly procured seeds by themselves. Green peas collected by other method and 27% Red gram seeds obtained from Agriculture Office and 27% by self production.

Vegetable cultivators procured seeds mainly by other methods except in the case of Tomato and Beans. 49% of tomato cultivators and 46% of beans cultivators procured seeds by themselves. Cultivation of fruits like Butter fruit (67%), Rambutan (42%) Apple (68%) Orange (59%) got seed by other methods where as 86% of strawberry cultivators obtained seeds from their own product.

48.3% Ground nut, 100% Safflower, 40% Rap seed and 88.6% Caster seed cultivators acquired seeds by other methods where as 40% of Sesamum, 100% of Line seed and 20% of Niger seed cultivators got seed from Agriculture Department. 44% Soyabean cultivators and 34% of Mustard cultivators got seed from other cultivators. Cotton (96%), Jute (78%), Garlic (63%) cultivators got seed mainly from other sources and 83% Tobacco, 54.3% Sugarcane 47.3% Sweet potato and 48.4% Ramacham cultivators obtained seed mainly from their own produce.
