REPORT ON

SOCIO-ECONOMIC SURVEY

NSS 67th ROUND

(JULY 2010 – JUNE 2011)

State Sample

Unincorporated Non agricultural Enterprises in Kerala

**Department of Economics and Statistics
Government of Kerala
Thiruvananthapuram**

Preface

The National Sample Survey Organization (NSSO) has been carrying out nationwide socio-economic surveys covering various subjects on regular basis. During 67th round (July 2010 to June 2011), NSSO carried out an all-India enterprise survey on economic and operational characteristics of unincorporated non-agricultural enterprises in manufacturing, trade and other service sector (excluding construction). State government also participated in the survey on matching sample size basis.

Enterprises account for a large part of the economic activities in the National Economy and operate in agricultural and non-agricultural segments of economy. They generate income and employment. The main aim of 67th round survey was to estimate value of key characteristics per enterprise like average number of workers, fixed assets, outstanding loans, total receipts, total operating expenses, gross value added and other operational and economic characteristics of unincorporated non-agricultural enterprises in Manufacturing, Trade and other service sector(excluding construction) separately for 'Own Account Enterprises (OAEs)' and 'Establishments'. This report is based on the State Sample data on unincorporated non agricultural enterprises collected by Department of Economics and Statistics as a part of the 67th round of National Sample Survey.

This report contains three chapters and four appendices. Chapter one of the report is introductory and Chapter Two explains the concepts and definitions used in the survey. Chapter Three gives the main findings of the survey. Detailed tables are given in Appendix A, while Appendix B explains the sample design and the estimation procedure used in this survey. A facsimile of the schedule used for data collection is given as Appendix C.

The technical assistance provided by National Sample Survey Office, Government of India and the co-operation extended by the sample enterprises is duly acknowledged. The NSS division in the Directorate of Economics and Statistics department undertook the implementation of the survey as well as drafting of the report. The field work was carried out by the district offices of Economics and Statistics department, while the data processing and tabulation work was handled by the NSS division in the Directorate. I place on record my appreciation of efforts made by Officers and Staffs of different divisions of Directorate of Economics and Statistics in preparation of the document.

I hope the report will be found useful by planners, policy makers, academicians and researchers. Suggestions for improvement of the content and coverage of the report will be highly appreciated.

HIGHLIGHTS

A statistical multi-stage design had been used in NSS 67th round socio-economic survey. The First Stage Units were Panchayat wards in rural areas and UFS blocks in urban areas. The ultimate units were enterprises in both the sectors.

The survey was conducted in 584 panchayath wards in rural areas and 376 urban blocks in urban area. Out of a total of 20903 enterprises surveyed, 12652 enterprises (61%) were located in rural areas and 8251 (39%) were in urban areas. Moreover, 29% of the total enterprises surveyed were manufacturing enterprises, 32% were trading and 39% were service enterprises. Of the total number of unincorporated non-agricultural enterprises surveyed, OAEs accounted for 68% in rural areas and 57% in urban areas.

I Unincorporated non-agricultural enterprises in Kerala

- A total of 15.87lakhs un-incorporated non-agricultural enterprises were estimated in Kerala during 2010-11. Out of them 65% was in rural area and 35 % was in urban area.
- Across the rural and urban areas, OAEs accounted for 78% of all estimated enterprises. The remaining 22 % was establishments.
- Of the total number of enterprises estimated, 407.33 lakh units (26%) were manufacturing enterprises, 500.63 lakh units (32%) were trading sector and 679.83 lakhs unit (43 %) were service sector enterprises.
- Out of 12.41 lakhs OAEs, 69% OAEs were in rural sector against 31% OAEs in urban area. However Establishments were higher in urban areas. Out of 3.5 lakh establishments under survey coverage, urban area has a share of 49% establishments against 51%in rural area.

II Workers engaged in unincorporated non-agricultural Enterprises

- A total of 33.33 lakhs Persons were estimated to be working in unincorporated non-agricultural enterprises in Kerala during 2010-11. Of the total number of workers engaged in the unincorporated non-agricultural enterprises 57% was in rural areas and 43% workers were in urban areas

- In rural areas, workers engaged in OAEs outnumber those engaged in establishments in all the three activity category viz, manufacturing (56%), Trade (56 %) and other service (78%).
- In urban sector, 60% workers were engaged in Establishments. Establishments outnumber OAEs in all the activity category except for Other service (44%)
- The sector 'Other Services' had the highest percentage of workers (49%) for combined sector. The share of workers for 'Trade' and 'Manufacturing' were respectively 30% and 21%.

III Operational Characteristics

- In term of organization, proprietary concern dominated. About 92% of all enterprises were proprietary. Out of which 21% of the owner proprietors were females and the rest were males. Only 3% of enterprises were operated on a partnership basis.
- Among OAEs, proprietary enterprises accounted for 91 % in rural areas and 93% in urban areas. The corresponding figures for establishments were 92% and 93% respectively.
- About 98% of the total unincorporated non-agricultural enterprises were perennial (enterprises worked more or less regularly throughout the year) while the seasonal and casual enterprises together constituted a little more than 1 percent of the total number of enterprises. The distribution of unincorporated non-agricultural enterprises in respect of nature of operation does not differ significantly between rural and urban areas, or between OAE and establishments.
- In Kerala, 82% of unincorporated non-agricultural enterprises run the business at fixed location either within the household premises or outside and about 18% operated their business without any fixed location. Around 2% of the enterprises under survey coverage operated without any structure but had a fixed location while 14.3% unincorporated non-agricultural enterprises were operated as street vendors and 4.2% were operated in mobile market.
- In terms of location, 33% of OAEs in rural areas and 32% of OAEs in urban areas operated within household premises. Of those OAEs that were operated outside household premises, 45% in rural and 44% in urban sectors had fixed location. In the case of establishment, 85% enterprises in rural and 90% enterprises in urban sector operated in fixed locations outside the household premises.

- 64% of all enterprises under survey coverage were registered under any Act or with any registration authority. The overall proportion of registered enterprises under survey coverage was higher in urban areas (66%) as compared to rural areas (63%). 'Manufacturing' sector (66%) had the highest percentage of unregistered enterprises and the percentage is same for 'Trade' and 'Other Services' (26%).

III Economic Characteristics

- Annual gross value added per enterprises in un-incorporated non-agricultural enterprises was Rs.181507. In rural areas it was Rs.138737. and the corresponding estimate for urban areas was Rs.261582. The contribution of Manufacturing, Trading and other services were respectively Rs.132574, Rs.258703 and Rs.153980
- The annual gross value added per worker in Kerala was estimated as Rs.86465. It was Rs. 75053 for rural areas and Rs.101841 for urban areas.
- Annual emoluments per hired worker were estimated as Rs.62544. The same for rural and urban sectors were Rs.59956 and Rs. 64085 respectively.
- Value of own fixed assets per enterprise in Kerala during 2010-11 was Rs.217632
- The outstanding loan and interest per enterprise in Kerala was 2.18 lakhs
- The annual value of operating expenses per enterprise was Rs.549095. in all sectors, Principal expenses accounted for 94% of the total operating expenses.

Chapter One

Introduction

1.1 General

National Sample Survey Office (NSSO), erstwhile known as National Sample Survey Organization, under Ministry of Statistics and Programme Implementation (MOSPI), Govt. of India is the largest organization in India conducting regular socio-economic surveys.. Since its inception in 1950, this organization is conducting regular socio-economic surveys nationwide. This large scale sample surveys encompasses design and implementation of scientific sampling methods, to generate data and analyze and estimate statistical indicators on diverse socio-economic aspects.

NSSO, as a part of its the 67th round National Sample Survey during July 2010 – June 2011 carried out an All-India survey on economic and operational characteristics of unincorporated non-agricultural enterprises in manufacturing, trade and other service sector (excluding construction) .

1.2 Participation of State

The socio-economic surveys conducted by National Sample Survey Office cover important subjects about which data are needed by government and are in forms of successive rounds extending a period of one year. Every round is earmarked for certain important subjects like consumer expenditure, employment and unemployment, health, education etc. The present round is earmarked for unincorporated non-agriculture enterprises in manufacturing, Trading and Other service sectors.

Kerala has been participating in the nation-wide sample survey planned by NSSO from the very beginning on matching sample size basis. From 62nd round onwards Kerala is participating with 50% additional sample with the objective of increasing the precision of estimates and obtaining estimates at district level. In the present round also Government of Kerala is participating in the survey with additional samples.

1.3 NSS Enterprise surveys

Unincorporated enterprises are those enterprises whose activities or collection of data is not regulated under any legal provision or do not maintain any regular accounts. In terms of the number of enterprises, the share in employment, and, to a lesser extent, in output, units that fall under 'unincorporated' or 'unorganised' sector have considerable importance in India's non-agricultural sector.

Keeping in view the importance of the unorganised non-agricultural sector in terms of its share in GDP as well as in total employment, NSS has taken up this subject in many of its rounds. Last surveys of enterprises on trade, unorganised manufacturing and service sectors (excluding trade and construction) were conducted during 53rd round (January – December 1997), 62nd round (July 2005 – June 2006) and 63rd round of NSS (July 2006 – June 2007) respectively. Other enterprise surveys carried out in between were 55th round (informal sector enterprises, 1999-2000), 56th round (unorganised manufacturing, 2000-2001) and 57th round (unorganised service sector excluding trade, finance and construction, 2001 –2002).

1.4 Objective of the survey

NSS 67th round survey on unincorporated non-agricultural enterprise aims at generating estimates of various economic and operational characteristics of unincorporated non-agricultural enterprises (excluding construction) in manufacturing, trade and other service sectors . Under the above sectoral coverage, enterprises were categorised into two types:

- Own Account Enterprises
- Establishments

Own Account Enterprises (OAE) are those enterprises that do not employ hired workers on a fairly regular basis in the reference year and Establishments employ at least one hired worker on a fairly regular basis in the reference year.

This integrated survey was designed to estimate value of key characteristics per enterprise like average no. of workers, fixed assets, outstanding loans, total receipts, total operating expenses and gross value added separately for ‘Own Account Enterprises (OAEs)’ and ‘establishments’. Information on various operational characteristics like ownership, nature of operation, location, status of registration etc. were also collected to have an insight into economic scenario of the unincorporated non-agricultural enterprises in the country.

1.5 Scope of the Survey

The NSS 67th round socio- economic survey covers the unincorporated non-agricultural enterprises (excluding construction) in manufacturing, trade and other service sectors. This is the first time NSSO conducted an integrated survey on enterprises during NSS 67th round. The last survey on ‘unorganized manufacturing’ was conducted during NSS 62nd round (2005-2006). In 62nd round survey, NSS covered all manufacturing enterprises, which were not under the coverage of

Annual Survey of Industries (ASI). All government and public sector undertakings were also outside the survey coverage. In the following round (NSS 63rd round, 2006-2007), the last survey on 'service sector enterprises' was conducted. The 63rd round covered broadly service sector enterprises engaged in the activities of hotels and restaurants (Section H of NIC 2004); transport, storage and communication (I); financial intermediation (J); real estate, renting and business activities (K); education (M); health and social work (N) and other community, social and personal service activities (O). The 'unorganized trade' sector was last covered during NSS 53rd round in which all non-directory establishments (NDTEs) and own-account trading enterprises (OAREs) except the public sector trading enterprises/ establishments were considered. A detailed schedule of enquiry was used to collect data from the sample enterprises on economic and operational characteristics.

1.6 Overview of the report layout

All the estimates in this report are presented based on the state sample data only. This report contains three Chapters (including the present introduction chapter) and four appendices. After the introduction chapter encompassing objective and scope of the survey, Chapter 2 deals with the conceptual frame work of the survey. Detailed tables forming the basis of this report are presented in Appendix A. Appendix B describes the concepts and definitions of various terms used in the survey that are necessary for proper understanding of the estimates. Appendix B explains in detail the sample design and estimation procedure used for the survey and Appendix C gives a facsimile of the schedule canvassed in the survey.

Chapter 2

Concepts and Definitions

Chapter 2

Concepts and Definitions

1 Important concepts and definitions of some important terms used in the survey and relevant to this report are explained in the following paragraphs.

1.1 **Population coverage:** The following rules regarding the population/households covered were followed while visiting households for the purpose of listing of enterprises:

1. Under-trial prisoners in jails and indoor patients of hospitals, nursing homes etc., were excluded, but residential staff therein was during listing. The persons of the first category were considered as normal members of their parent households. Convicted prisoners undergoing sentence were outside the coverage of the survey.
2. Floating population, i.e., persons without any normal residence were not considered. But households residing in open space, roadside shelter, under a bridge, etc., more or less regularly in the same place, were taken into account.
3. Foreign nationals were not considered, nor do their domestic servants, if by definition the latter belong to the foreign national's household. If, however, an enterprise was run by a member of such household located within the premises of the household or without any fixed premises, it was listed as an enterprise.
4. Persons residing in barracks of military and paramilitary forces (like police, BSF, etc.) was kept outside the survey coverage due to difficulty in conduct of survey therein. However, civilian population residing in their neighbourhood, including the family quarters of service personnel, were covered.
5. Orphanages, rescue homes, *ashrams* and vagrant houses were outside the survey coverage but enterprises run by them and located within the premises of those institutions were considered. However, persons staying in old age homes, students staying in *ashrams*/ hostels and the residential staff (other than monks/ nuns) of these ashrams were treated as forming households (as per the standing practice in NSS) for the purpose of identifying enterprises through such households. For orphanages, although orphans were not covered, the persons looking after them and staying there were considered as forming households.

1.2 **House:** Every structure, tent, shelter, etc. was considered as a house irrespective of its use. It might have been used for residential or non-residential purpose or both or even it might have been vacant.

1.3 Household: A group of persons who normally lived together and taking food from a common kitchen constituted a household. It included temporary stay-aways (those whose total period of absence from the household was expected to be less than 6 months) but excluded temporary visitors and guests (expected total period of stay less than 6 months). Even though the determination of the actual composition of a household was left to the judgment of the head of the household, the following procedures were adopted as guidelines.

(i) Each inmate (including residential staff) of a hostel, mess, hotel, boarding and lodging house, etc., constituted a single-member household. If, however, a group of persons among them normally pool their income for spending, they were together treated as forming a single household. For example, a family living in a hotel was treated as a single household.

(ii) In deciding the composition of a household, more emphasis was given on 'normally living together' than on 'ordinarily taking food from a common kitchen'. In case the place of residence of a person was different from the place of boarding, he or she was treated as a member of the household with whom he or she resided.

(iii) A resident employee, or domestic servant, or a paying guest (but not just a tenant in the household) was considered as a member of the household with whom he or she resided even though he or she was not a member of the same family.

(iv) When a person sleeps in one place (say, in a shop or in a room in another house because of space shortage) but usually took food with his or her family, he or she was treated not as a single member household but as a member of the household in which other members of his or her family stayed.

(v) If a member of a family (say, a son or a daughter of the head of the family) stayed elsewhere (say, in hostel for studies or for any other reason), he/ she was not considered as a member of his/ her parent's household. However, he/ she were considered as a single member household if the hostel is listed.

1.4 Public works: 'Public works' were those activities which were sponsored by Government or Local Bodies, and which covered local area development works like construction of roads, dams, bunds, digging of ponds, etc., as relief measures, or as an outcome of employment generation schemes under the poverty alleviation programme such as National Rural Employment Guarantee Act (NREG) programme, Sampoorna Grameen Rozgar Yojana (SGRY), National Food for Work Programme (NFFWP), etc.

1.5 National Rural Employment Guarantee Act (NREGA): The National Rural Employment Guarantee Act, 2005 (NREGA) is an important step towards the realization of the right to work and to enhance the livelihood security of the households in the rural areas of the country. The Scheme provides at least 100 days of guaranteed wage employment in every financial year to every household whose adult members volunteer to do unskilled manual work. Adult means a person who has completed his/ her eighteen years of age. Unskilled manual work means any

physical work which any adult person is capable of doing without any special skill/ training. The implementing agency of the scheme may be any Department of the Central Government or a State Government, a Zila Parishad, Panchayat/ Gram Panchayat or any local authority or Government undertaking or non-governmental organization authorized by the Central Government or the State Government. If an applicant for employment under the scheme is not provided employment within 15 days of receipt of his application seeking employment or from the date on which employment has been sought, the applicant will be entitled for getting daily unemployment allowances.

1.6 Enterprise: An enterprise is an undertaking which is engaged in the production and/ or distribution of some goods and/ or services meant mainly for the purpose of sale, whether fully or partly. An enterprise may be owned and operated by a single household or by several households jointly, or by an institutional body.

1.7 Non-agricultural enterprise: All enterprises covered under Sections 'C' to 'S' of NIC-2008 are "non-agricultural enterprises". All non-agricultural enterprises will be henceforth referred to as NAE for this survey.

1.8 Unincorporated non-agricultural enterprises: Non-agricultural enterprises which are not incorporated (i.e. registered under Companies Act, 1956) were covered in the survey. Further, the domain of 'unincorporated enterprises' excluded (a) enterprises registered under Sections 2m(i) and 2m(ii) of the Factories Act, 1948 or bidi and cigar manufacturing enterprises registered under bidi and cigar workers (condition of employment) Act, 1966, (b) government/public sector enterprises and (c) cooperatives. Thus the coverage was restricted primarily to all household proprietary and partnership enterprises. In addition, Self Help groups (SHGs), Private Non-Profit Institutions (NPIs) including Non-Profit Institutions Serving Households (NPISH) and Trusts were also covered.

1.9 Manufacturing Enterprise: A manufacturing enterprise was a unit engaged in the physical or chemical transformation of materials, substances or components into new products. It covers units working for other concerns on materials supplied by them. The units primarily engaged in maintenance and repair of industrial, commercial and similar machinery and equipment, which were, in general, classified in the same class of manufacturing as those specialising in manufacturing the goods were also included.

Thus all activities covered by NIC – 2008 divisions 10 to 33 of NIC- 2008 were considered as 'manufacturing' for the purpose of the survey. In addition, the activity of cotton ginning, cleaning and baling (NIC - 2008 code 01632) was covered in the present survey. However the production of goods for the sole purpose of domestic consumption was not considered as manufacturing.

1.10 Trading Enterprise: A trading enterprise is an undertaking engaged in trade. Trade is defined to be an act of purchase of goods and their disposal by way of sale without any intermediate physical transformation of the goods. Thus all the trading activities, both wholesale and retail (perennial, casual or seasonal) listed under NIC-08 divisions 45 to 47 was treated as trade in this survey. The activities of intermediaries who do not actually purchase or sell goods but only arrange their purchase and sale and earn remuneration by way of brokerage and commission was also treated as trade. The purchase and sale agents, brokers listed under NIC-08 division and auctioneers listed under NIC group were also covered in this survey.

1.11 Servicing Enterprise: A servicing enterprise or service sector enterprise is engaged in activities carried out for the benefit of a consuming unit and typically consists of changes in the condition of consuming units realized by the activities of servicing unit at the demand of the consuming unit. It is possible for a unit to produce a service for its own consumption provided that the type of activity is such that it could have been carried out by another unit. Some examples of changes that a producer of service brings about in the condition of consumers of service are:

- a) Changes in the condition of consumer's goods: the producer works directly on goods owned by the consumer by transporting, cleaning, repairing or otherwise transforming them;
- b) Changes in the physical condition of persons: the producer transports the persons, provides them with accommodation, provides them with medical or surgical treatments, improves their appearance etc;
- c) Changes in the mental condition of persons: the producer provides education, information, advice, entertainment or similar services;
- d) Changes in the general economic state of the institutional unit itself: the producer provides insurance, financial intermediation, protection, guarantees, etc.

All activities under NIC – 2008 Sections D – U except section G (trade) are considered as service activities other than trade. However, sections D (Electricity, gas, steam and air conditioning supply), F (Construction), O (Public administration and defence; compulsory social security), T (Activities of households as employer; undifferentiated goods and services producing activities of households for own use) and U (Activities of extraterritorial organisations and bodies) were excluded from coverage of this survey. Only unincorporated enterprises in the service sector under coverage were surveyed. Among these also, activities under certain NIC - 2008 codes, viz. 36 (water collection, treatment and supply), 491 (transport via railways), 49212 (urban or suburban tramways), 49213 (urban or suburban underground or elevated railways), 493 (transport via pipeline), 51 (air transport), 641 (monetary intermediation), 642 (activities of holding companies), 6611 (Administration of financial markets), 774 (Leasing of nonfinancial intangible assets), 942 (activities of trade unions), 9491 (activities of religious organisations [although activities of individuals are covered]), 9492 (activities of political organisations) were kept out of survey coverage.

1.12 Financial enterprise: A financial enterprise is a servicing enterprise that is principally engaged in financial intermediation or in auxiliary financial activities which are closely related to financial intermediation. Financial intermediation is a productive activity in which an institutional unit incurs liabilities on its own account for the purpose of acquiring financial assets by engaging in financial transactions on the market. The role of financial intermediaries is to channel funds from lenders to borrowers by intermediating between them.

1.13 Household Enterprise: A household enterprise is one which is run by one or more members of a household or run jointly by two or more households on partnership basis irrespective of whether the enterprise is located in the premises of the household(s) or not. In other words, all proprietary and partnership enterprises are household enterprises.

1.14 Non-household Enterprise: Non-household enterprises are those which are institutional i.e. owned and run by the public sector (Central or State Government, local self-governments, local bodies, government undertakings, etc.), corporate sector, co-operative societies, other type of societies, institutions, associations, trusts, etc. Non-household enterprises covered under public sector were not included in the current survey.

1.15 Own-account Enterprise: An enterprise, which is run without any hired worker employed on a fairly regular basis¹, is termed as an own account enterprise.

1.16 Establishment: An enterprise which is employing at least one hired worker on a fairly regular basis is termed as establishment. Paid or unpaid apprentices, paid household member/servant/resident worker in an enterprise are considered as hired workers.

1.17 Non-directory establishment (NDE): An establishment having one to five workers (household and hired taken together) is termed as a non-directory establishment.

1.18 Directory establishment (DE): A directory establishment is an establishment, which has got six or more workers (household and hired taken together).

1.19 Perennial enterprise: Enterprises that are run more or less regularly throughout the year are called perennial enterprises.

1.20 Seasonal enterprise: Seasonal enterprises are those, which are usually run in a particular season or fixed months of a year.

¹ "fairly regular basis" means the major part of the period when operation(s) of an enterprise are carried out during a reference period.

1.21 **Casual enterprise:** Enterprises that are run occasionally, for a total of at least 30 days in the last 365 days, are called ‘casual enterprises’.

1.22 **Classification of enterprises based on ownership:**

(i) *Proprietary:* When an individual is the sole owner of an enterprise it is a proprietary enterprise. Own account production of fixed assets for own use, when produced by a single member, was classified as proprietary enterprise.

(ii) *Partnership:* Partnership is defined as the ‘relation between persons who have agreed to share the profits of a business carried on by all or any one of them acting for all’. There may be two or more owners, belonging to the same or different households, on a partnership basis, with or without formal registration (where there is a tacit understanding about the distribution of profit among the so-called partners). Own account production of fixed assets, when produced by two or more members belonging to the same or different households will be classified as partnership enterprises. Thus, own account production of fixed assets by a group of households for community use was classified as partnership enterprise. The partnership enterprises registered under Limited Liability Partnership (LLP) Act, 2008 were excluded from coverage of the survey. Also, partnership enterprises registered under Factories Act, 1948 was outside the survey coverage.

(iii) *Government/public Sector Enterprise:* An enterprise, which is wholly owned/ run/managed by Central or State governments, quasi-government institutions, local bodies like Panchayat, Zilla Parisad, City Corporation, Municipal authorities, etc., autonomous bodies like Universities, Education boards, and institutions like schools, libraries etc. set up by the government, panchayat, etc., was considered as public sector enterprise. Enterprises owned/ managed by a single or a group of private persons with no participation of the Government, local body etc. in it, both in terms of management and shares, was considered as private sector enterprises. An enterprise was not considered as a public sector enterprise if it is run on a loan granted by government, local body, etc.

(iv) *Private Limited Company:* Private company means a company which by its articles:

- (a) restricts the right to transfer its shares, if any,
 - (b) limits the number of its members to fifty not including-
 - (i) persons who are in the employment of the company, and
 - (ii) persons who, having been formerly in the employment of the company, were members of the company while in that employment and have continued to be members after the employment ceased; and
 - (c) prohibits any initiation to the public to subscribe for any share in, or debentures of, the company.
-

Where two or more persons hold jointly one or more shares in a company, they were considered as a single member in this survey.

(v) *Public Limited Company*: A public limited company is defined as a company that is not a private company. As such public companies can have an unlimited number of members and can invite the public to subscribe to its shares and debentures. The minimum number of members required to form a public company is seven.

(vi) *Co-operative Societies*: Co-operative society is one that is formed through the co-operation of a number of persons, recognised as members of the society to benefit themselves. In the process, the funds are raised by members' contributions/investments and the profits generated out of the society's activities are shared by the members. A government agency itself can also be a member or shareholder of a registered co-operative society but this fact cannot render the society into a public sector enterprise for the purpose of this survey.

(vii) *Trust*: An arrangement through which one set of people, the trustees, are the legal owners of property which is administered in the interest of another set, the beneficiaries. Trusts may be set up to provide support for individuals or families, to provide pensions, to run charities, to liquidate the property of the bankrupts for the benefit of their creditors, or for the safe keeping of securities bought by trusts with their investor's money. The assets, which trusts hold are regulated by law, must be administered in the interests of the beneficiaries, and not for the profit of the trustees.

(viii) *Non-Profit Institutions (NPI)*: Non-profit institutions are legal or social entities created for the purpose of producing goods and services whose status does not permit them to be a source of income, profit or other financial gain for the units that establish, control or finance them. In practice, their productive activities are bound to generate either surpluses or deficits but the units that establish, control or finance them cannot appropriate surpluses. The articles of association by which they are established are drawn up in such a way that the institutional units which control or manage them are not entitled to a share in any profits or other income which the NPI's receive and for this reason, they are frequently exempted from various kinds of taxes.

NPIs are principally market producers but they may engage in non-market production also. It is important to distinguish between NPI's engaged in market and non-market production as this affects the sector of the economy to which an NPI is allocated. Most market NPIs serving businesses are created by associations of the businesses whose interests they are designed to promote. They consist of chambers of commerce, agricultural, manufacturing or trade associations, employers' organisations, research or testing laboratories or other organisations or institutes which engage in activities which are of mutual interest or benefit to the group of businesses that control and finance them.

1.23.1 Self-help Groups: A self-help group (SHG) is a financial intermediary usually composed of between 10-20 local persons. Members of a SHG make small regular savings contributions over a few months until there is enough capital in the group to begin lending. Funds may then be lent back to the members or to others in the locality for any purpose. Also many SHGs are 'linked' to banks for the delivery of microcredit. The characteristic features of self-help groups may be summarised as follows:

- SHG is a small group generally comprising of people who are poor or economically weak, who have voluntarily come forward to form a group for improvement of the social and economic status of the members.
- It can be formal (registered) or informal.
- The concept underlines the principle of Thrift, Credit and Self Help.
- Members of SHG agree to save regularly and contribute to a common fund.
- The members agree to use this common fund and such other funds (like grants and loans from banks), which they may receive as a group, to give small loans to needy members as per the decision of the group.
- The ideal size of an SHG is 10 to 20 members. Also, legally it is required that an informal group should not be of more than 20 people). However, in difficult areas like deserts, hills and areas with scattered and sparse populations and in case of disabled persons, this number may be 5-20.
- The group need not be registered.
- From one family, only one person can become a member of an SHG. (More families can join SHGs this way).
- The group normally consists of either only men or only women.
- Members should be between the age group of 21-60 years.
- Members should be poor people [the term poor is in relation to the economic and living conditions and this has no relation to poverty line. People living above poverty line (APL) can also form SHG like people living below poverty line (BPL)].

1.23.2 Activity of self-help groups

In most cases, self-help groups are engaged in financial intermediation only i.e. the activity of the SHG is confined to providing loans to the members and the members can utilise the loan for any purpose - personal or entrepreneurial. However, an SHG may be formed initially and later and it may be engaged in group-based enterprise. Examples of such group-based activities are given below:

- Collective organisation of marketing for the produce of individual enterprises established using micro-credit, particularly milk collection centres/ diary cooperatives at village level.
-

- Collective activities of SHGs using group credit to access larger natural assets for production e.g. leasing lands and ponds for cultivation and pisciculture.
- Other collective economic activities based on group credit that combines labour and management: stone-cutting, processing rice, managing a tent house etc.
- Management of government contracts such as running ration shops (as part of public distribution systems), cooking mid-day meal for school children, managing a subsidised fodder depot etc.

While listing the self-help groups engaged in financial intermediation and self-help groups running group based enterprises, the following three cases should be considered:-

- (a) The SHG was engaged in financial activities only. In that case, it was listed under financial intermediation.
- (b) An SHG was formed and later it was engaged only in some non-financial activity. In that case if that activity was under survey coverage, then it was listed under the corresponding non-financial activity. The enterprise would continue to be considered as SHG.
- (c) An SHG was engaged in financial as well as non-financial activity. In that case, the major activity was decided based on maximum value added / sales turnover/ employment in that order. The enterprise would continue to be considered as SHG.

1.23.3 Determination of eligibility of an SHG

An SHG was considered as eligible enterprise for the purpose of survey if the total number of days of operation of that SHG in last 365 days was at least 15. Working days would include-

- a) Days of meeting.
- b) Days of interaction with the bank for purpose of deposit/withdrawal/loan/repayment etc.
- c) Days of performing other jobs related to SHG like maintenance of register.

1.23.4 Determination of number of working owners of an SHG

Those members of SHG who are regularly attending meetings or taking part in decision making procedure like secretary, treasurer, active committee member etc. was considered as working owners.

1.24 Mixed Activity: There are enterprises that carry out a number of activities simultaneously. For example, a bakery may also sell cold drinks, a rice mill may sell sugar, a factory may run a hospital in its premises, etc. Each such activity was treated as a separate enterprise if information for them was separately available. If the accounts were not separable then the data pertaining to the enterprise as a whole was collected and the enterprise was classified as having mixed activities and the activities of such enterprises are generally a mixture of NIC's. The activities

may be mixed at any level of NIC, but for the present survey an enterprise was considered to have mixed activities if its activities are different at 2-digit level of NIC-2008. The appropriate NIC in such cases was determined on the basis of major activity. Major activity refers to the activity which yields maximum income/turnover/employment. The above criteria are applied in the given order, i.e., income first, then turnover and then employment, to determine the major activity.

1.25 Multiple Activity: Since many of the entrepreneurs belonging to the unorganised and informal sector operate at small or marginal levels, the phenomenon of carrying out more than one activity simultaneously or at different points of time is quite prevalent. If the activities were carried out at one point of time at the same location and the information was not separately available, then it was taken as “mixed activity”. Carrying out of more than one economic activity by the entrepreneur during the reference year was called multiple activities. It differs from mixed activities in the sense that former is with respect to the entrepreneur whereas the latter is with respect to the enterprise. However, an entrepreneur of a manufacturing enterprise manufacturing woollen garments before winter and cotton clothes before summer was not considered as carrying out multiple activities.

1.26 Reference Period: *Last 30 days preceding the date of survey* or *last month* had been used as the reference period to collect most of the data. Various items of receipts and expenses as well as data on employment, emoluments, rent, interest, net surplus and value added for the enterprises were collected for the above reference period only. However, for seasonal enterprises the reference period was the last 30 days (preceding the date of survey), if they have worked continuously for last 30 days or more (including scheduled holidays) in the current season. For seasonal enterprises which had worked for less than 30 days in the current season, last month would refer to an average month in the last working season.

1.26.1 If some enterprise was unable to give information for the last 30 days and was able to give information for the latest calendar month from their books, figures for the latest calendar month were taken. Month would refer to a period of 30 days. For some of the items like value of fixed assets, amount of loan outstanding etc., the reference period was ‘as on the date of survey’. For some other items like net additions to fixed assets, number of months operated, number of other economic activities taken up etc., the period of reference was the ‘last 365 days preceding the date of survey’. For enterprises maintaining accounts and giving information from their books of accounts, reference year, ‘last 30 days/ last month’ and ‘last date of the reference year’ would respectively relate to ‘last accounting year for which information is available’, ‘last month of the said accounting year’ and ‘last date of the accounting year’.

1.27 Subsidy: Subsidies are current unrequited payments that government units, including non-resident government units, make to enterprises on the basis of the levels of their production activities or the quantities or values of the goods and services which they produce, sell, import or

export. Subsidies can also be received by an enterprise for achieving a particular type of efficiency in production (e.g., getting ISO certification, implementing pollution control measures, repaying interests in time, etc.). Subsidies are equivalent to negative taxes on production in so far as the impact on the operating surplus is in the opposite direction to that of taxes on production. Subsidies can be on production or on interest. Various types of subsidies are back-end subsidies on interest, export subsidies, duty drawback, etc. Subsidies do not include grants that governments may make to enterprises in order to finance their capital formation, or compensate them for damage to their capital assets, such grant being treated as capital transfers.

1.28 Taxes on Products: Taxes are compulsory, unrequited payments, in cash or in kind, made by institutional units to government units. *A tax on a product is a tax that is payable per unit of some good or service.* Tax on product may be a specific amount of money per unit of quantity of a good or service, the quantity being measured either in terms of discrete units or continuous physical variables such as volume, weight, strength, distance, time, etc. or it may be calculated *ad valorem* as a specified percentage of the price per unit or value of the goods and services transacted. Some examples of taxes on products are VAT, excise duties, general sales tax, service tax, export duties, turnover tax, taxes on financial and capital transactions (mainly inheritances and gifts), etc.

1.29 Taxes on Production: *Taxes on production consist of all taxes that the enterprise incurs as a result of engaging in production.* It is payable irrespective of the profitability of the enterprise and consists of all taxes except those included under ‘Taxes on Products’. Some examples of taxes on production are recurrent taxes on land, buildings or other structures, business or professional licence fees, road tax and registration fee of vehicles, taxes on pollution, taxes on international transactions such as travel abroad, foreign remittances, etc. Stamp taxes on sale of specified products, which relate to per unit of product sold (e.g., per unit of alcoholic beverages) will be considered as taxes on products, but other stamp taxes (e.g., stamps on legal documents or cheques) will be considered as taxes on production.

1.30 Worker: For this survey, a worker was defined as all persons working within the premises of the enterprise who were in the payroll of the enterprise as also the working owners and unpaid family workers. The worker may serve the enterprise in any capacity - primary or supervisory. He/she may or may not receive wages/salaries in return to his/her work incidental to or connected with the entrepreneurial activity. Salespersons appointed by an enterprise for selling its services and apprentices, paid or unpaid were also treated as workers.

1.30.1 *Volunteers, who work without salary / honorarium, were not considered as workers.* Voluntary participation without remuneration in production of goods and services in philanthropic organisation/ institutions or in any other organisation/ institution or even in the individual capacity will not render one to be counted as worker/enterprise. Voluntary participation will mean that the person has performed these activities without coercion or

obligation but has participated in his/ her own volition. Moreover, the voluntary participation in the work should be without remuneration, which means that the person does not become entitled to receive, in respect of the work performed by him/ her, any compensation including honorarium from the institution/ organisation. For the purpose of the survey, minor contingencies/ honorarium received from the institution/ organization against the voluntary work done may not be considered as remuneration. To determine 'minor', average daily wage received by the lowest paid full-time/part-time worker of that enterprise may be used as a guiding tool.

1.30.2 Some enterprises do not hire individuals like porters, sweepers, accountants, etc., on a fairly regular basis. These individuals can **work in one or more enterprises** in a locality, has some autonomy to determine the charges receivable by him depending upon volume of job performed and usually receive service charges as and when they render such services to the enterprise. Such persons were not considered as workers of the enterprise using their services. Instead, they were considered as independent OAEs.

1.30.3 If an enterprise has some contract with some other agency (e.g. security, cleaning, nursing, midwife), or persons (like CA, lawyer, etc.), the employees of the agency (or persons) who were working within the premises of the enterprise under survey (e.g. sweeper, guard, nurse, etc.) were not counted as the employee of the enterprise. Rather they were considered as the worker of the agency (or separate OAE, for persons).

1.31 **Working owner.** In the case of proprietary enterprises, if the owner himself/ herself works in the enterprise on a fairly regular basis, the entry should be made against item 1. In fact, in most of the own-account enterprises the owner himself/ herself manages all activities of the enterprise without help of anybody else (on fairly regular basis). For all such enterprises essentially the value '1' shall be recorded in the appropriate column against item 1. In the case of partnership enterprises, if only one partner or some of the partners or all the partners work in the enterprise on a fairly regular basis then information for them shall be recorded against this item.

1.32 **Formal hired worker:** A formal hired worker is one having continuity of job and eligible for paid annual leave and also eligible for social security benefits like provident fund or insurance provided by the employer.

1.33 **Informal hired worker:** An informal hired worker is not having continuity of job and/or not eligible for paid annual leave and/or not eligible for social security benefits like provident fund or insurance provided by the employer.

1.34 **Other worker/ helper:** This includes all persons belonging to the household of the proprietor or households of the partners who are working in or for the enterprise without regular salary or wages. Persons working as exchange labourer in the enterprise without salary or wages

will also be covered in this category. All unpaid household workers / helpers who are associated with the activities of the enterprise during the reference month are considered in this category.

1.35 Working on Contract: The enterprises in the unorganised sector are mainly small units. In many cases, the enterprises are seen to be working as per orders from a bigger unit. In such cases, certain conditions are put on the servicing unit by the contractor or master unit. Conditions may pertain to sale of products, supply of raw materials, mode of payment etc. In many cases, the contractor specifies the design of the product to the servicing unit e.g. garment manufacturing, shoe manufacturing etc. If the surveyed enterprise had undertaken any work on contract during the reference year, it was considered as 'enterprises working on contract'.

1.36 Fixed Assets: Assets held for the purpose of producing or providing goods or services and not for resale in the normal course of entrepreneurial activities were classified as fixed assets. These cover all goods, new or used, that have a normal economic life of more than one year from the date of purchase.

1.37 Investments: An enterprise can purchase shares, debentures and other securities to earn interest and dividend. These shares, debentures and other securities are called investments. If securities are purchased and sold at regular intervals to make gains using market values of the securities, then these investments are called investments for trade. Otherwise, it is called investments (other than trade).

1.38 Financial liability: Financial liability is the total liability incurred by the enterprise as on a particular date (generally the last date of the accounting year). It includes capital deployed by the partners of an enterprise, share capital, reserve and surplus amount noted in the balance sheet, long-term loans and also all short-term commitments for payments like unpaid wages etc. With regard to loan, any borrowing in cash or kind to be repaid in cash or kind was treated as loan. Loans taken for the purpose of utilising the same in the entrepreneurial activities of an enterprise were considered even if such loans were used for other purposes. On the other hand, loans taken for other purposes but ultimately used in the enterprise were excluded.

1.39 Compensation of employees: Compensation of employees is the total remuneration, in cash or in kind, payable by an enterprise to an employee in return for work done by the employee during the accounting period. It is recorded on accrual basis, i.e. measured by the value of remuneration in cash or in kind which an employee becomes entitled to receive from an employer in respect of work done during the relevant period, whether paid in advance, simultaneously or in arrears. Self employed persons (like working owners or unpaid family workers) receive mixed income and not compensation of employees. However, the books of accounts of some enterprises show salary payment to one or two working owners. In such cases, these payments were recorded as compensation to employee. Compensation of employees has

two main components, i) wages and salaries payable in cash or in kind and ii) value of social contributions payable by the employer. Wages and salaries also included goods or services provided to employees as remuneration in kind instead of, or in addition to, remuneration in cash.

1.40 **Transfers:** A transfer is a transaction in which an institutional unit provides a good, service or asset to another unit without receiving from the latter any good, service or asset in return. A cash transfer consists of the payment of currency or transferable deposit by one unit to another without any counterpart (or return). A transfer in kind consists either of the transfer of ownership of a good or asset, other than cash, or provision of a service, again without any counterpart (or return).

1.41 **Operating Expenses:** The total value of services purchased and other expenses incurred during the reference period by an enterprise on raw materials, electricity, fuel, lubricants and auxiliary materials consumed; cost of maintenance, etc was considered as 'operating expenses'.

1.42 **Receipts:** The sale value of services produced together with the value of services rendered to other concerns and other receipts incidental to entrepreneurial activities including the value of products and by-products manufactured, if any, by an enterprise during the reference period was considered as 'total receipts'.

1.43 **Gross Value Added:** Gross value added is taken as additional value created by the process of production of an enterprise to the economy. Gross value added is calculated by deducting 'total operating expenses' and 'distributive expenses' from the value of 'total receipts' during the reference period. 'Distributive expenses' includes excise duties, sales tax, non-deductible vat, outward freight and transport charges, commission to selling agents etc.

Chapter Three

Summary of Findings

3.1. The 67th round of national sample survey is exclusively devoted to an integrated survey on economic and operational characteristics of all the unincorporated non-agricultural enterprises in manufacturing, trade and other service sector (excluding construction). The coverage excludes enterprises registered under Companies Act 1956, Government & Public Sector Services and Cooperatives. In the present survey, enterprises engaged in non-agricultural sector had been divided into three broad industry sectoral coverage viz., manufacturing, trade and other services sector. Under this sectoral coverage enterprises are categorised into two types, viz., Own Account Enterprises (OAE) and Establishments. In the current survey some enterprise particulars like number of workers, ownership, location, registration status, nature of operation were collected by Broad Activity Category. A summary of key estimates of some operational and economic characteristics of unincorporated non-agricultural enterprises like estimated number of enterprises, average number of workers, location of enterprises, nature of operation, fixed assets, outstanding loans, total receipts, total operating expenses and gross value added are also presented and discussed in this chapter. Detailed tables provide estimates separately for rural, urban and for both sectors combined and for 'Own Account Enterprises (OAEs)' and 'Establishments'. The marginal totals and the sum of the proportions presented in various detailed tables may, in some cases, differ slightly due to rounding off. The term 'enterprise' is used in general to represent OAEs and also establishments. In the statements, 'all' is used to denote all the enterprises taken together. The figure "0" appears in some levels of disaggregation when the estimated figure is very low and has become "0" due to rounding off.

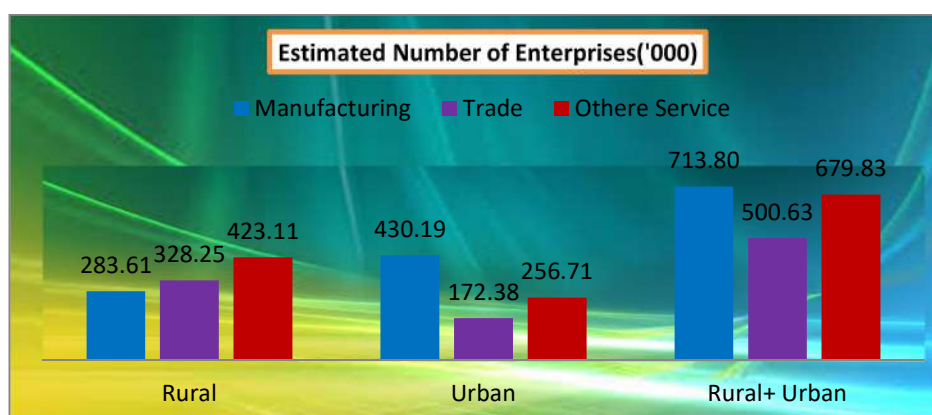

3.2. **Sample number of enterprises:** During the survey period, detailed information was collected from about 20903 enterprises engaged in the manufacturing, trade and other services activities throughout the State. About 61 per cent of these enterprises surveyed belonged to the rural sector.

3.3. **Estimated number of enterprises:** The unincorporated had considerable importance in the economy of Kerala because of the large number of enterprises and its contribution to GDP. Hence it is worthwhile to have picture on the number of enterprises in this sector before considering its various characteristics. The total estimated number of unincorporated non-agricultural enterprises excluding construction in Kerala during 2010-11 was 15.87 lakhs. Out of these, 26% enterprises were engaged in manufacturing, 31% enterprises were in trading and 43% enterprises were in service sector. While about 65 per cent of such enterprises were located in rural areas, 35 per cent were located in urban areas. In rural area, enterprise engaged in other service sector had the dominant share (41%) of enterprises under survey coverage followed by trade sector (32%) and manufacturing sector (27%) whereas in urban area, service sector had the dominant share (47%) followed by trade (32%) and manufacturing (22%) sectors. The break-up of these estimates is shown in **Statement 1**.

C1: Estimated number of enterprises by enterprise type and sector for each broad activity category

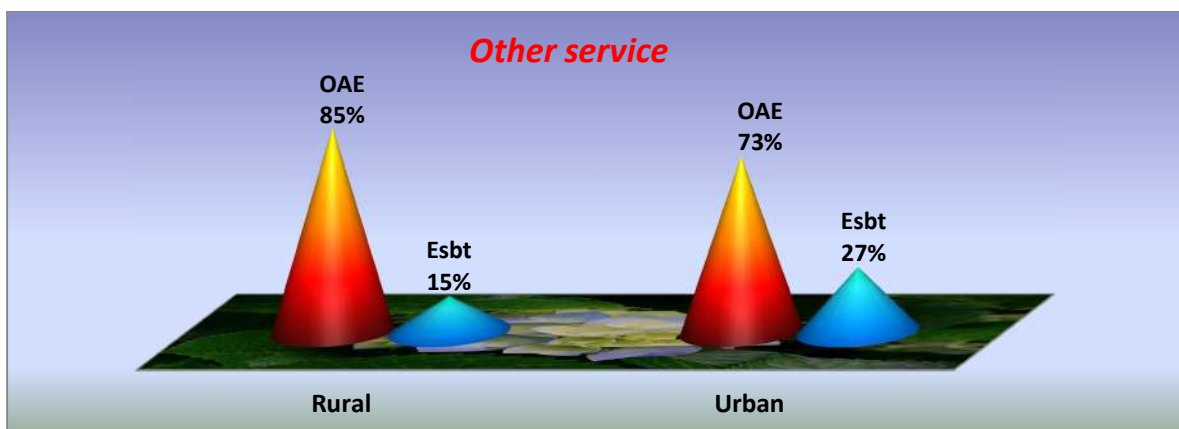

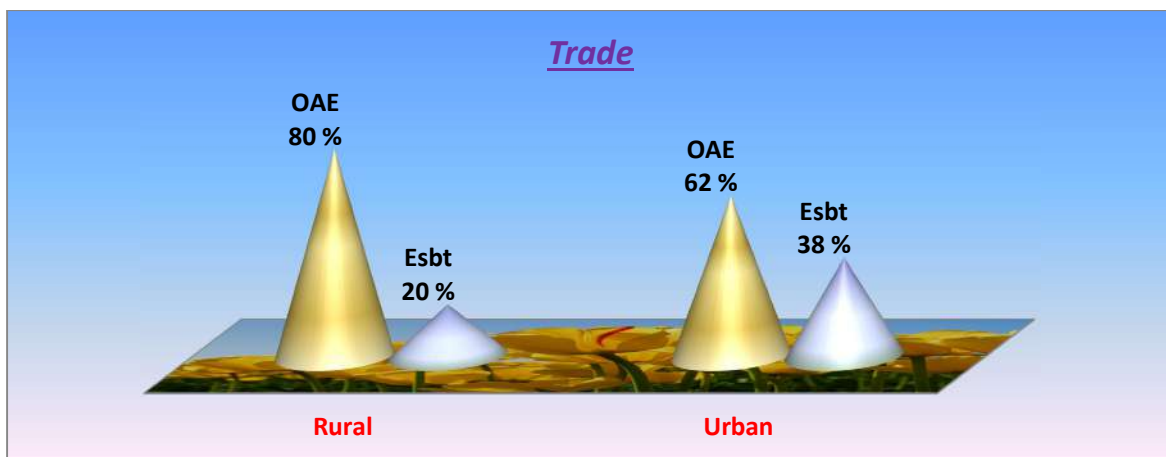

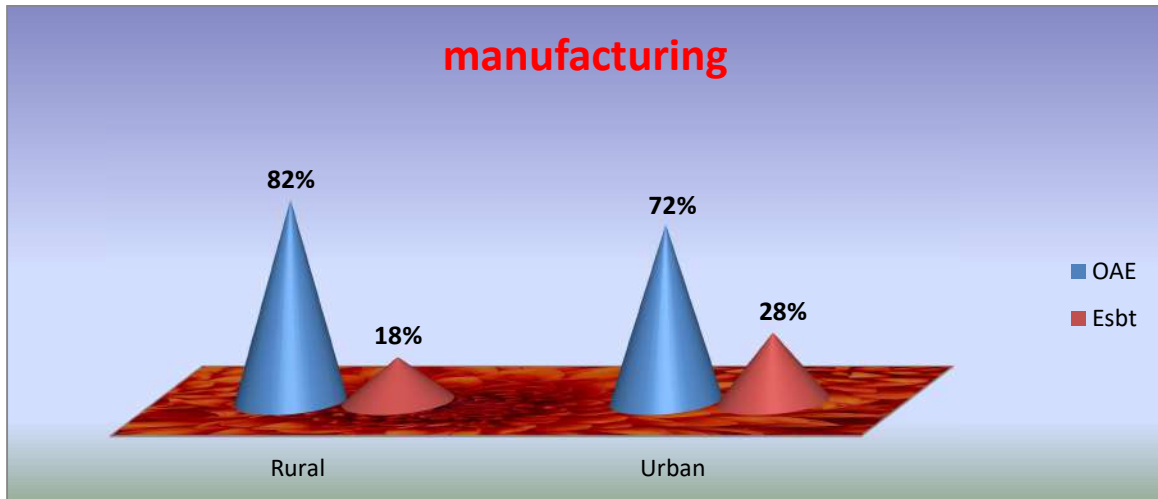

In rural and urban sectors of Kerala, OAE had a dominant share. In rural sector, about 83% enterprises and in urban sector 70% were OAEs. Most of the enterprises in trading and service sector were OAEs. Statement 2 gives the percentage distribution of enterprises in the unincorporated nonagricultural sector by broad activity category.

The percentage distribution of enterprises in the unincorporated nonagricultural sector by broad activity category is also shown in **Chart C2** for rural and urban areas.

C2: Percentage of enterprises by enterprise type and sector for each broad activity category

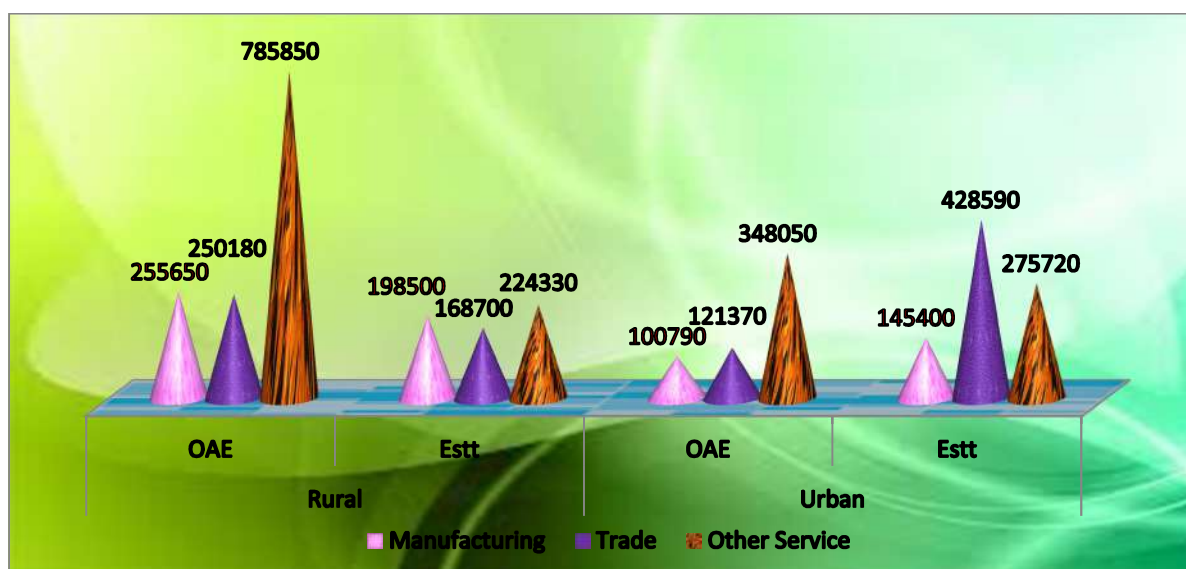

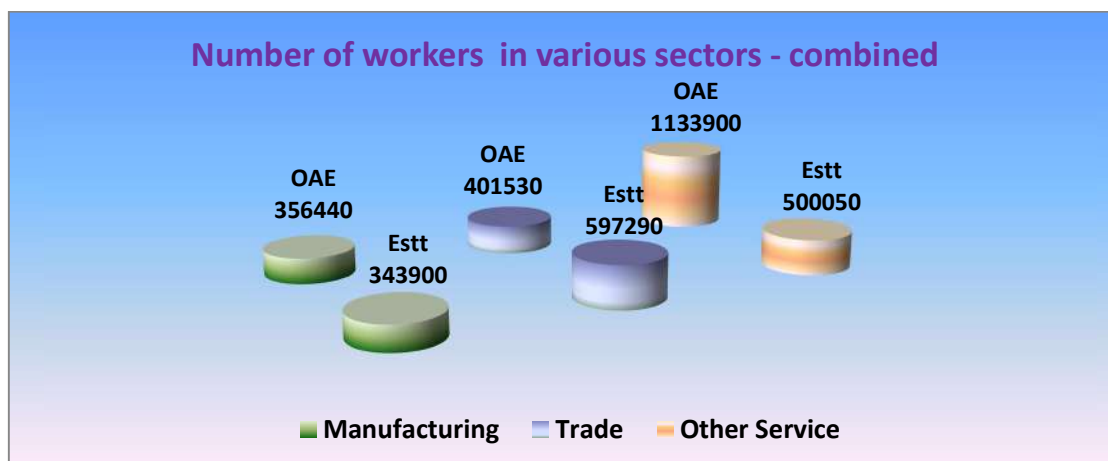

3.4. Estimated number of workers:The informal sector had an important role in Kerala economy as it generates large number of employment to unskilled and semi-skilled persons. In Kerala, about 33.33 lakhs workers were engaged in unincorporated non-agricultural enterprise activities excluding construction during 2010-11. While about 43 percent of workers were located in urban areas, 57 per cent were located in rural areas. The survey result revealed that OAEs had dominant share of workers under survey coverage in rural area whereas in urban area establishments had the dominant share. Workers engaged in OAEs outnumber those engaged in establishments in service sector and that in manufacturing sector had slightly higher share. But, in trading sector, workers engaged in establishments were higher than that in OAEs. Statement 3 gives estimated number of workers for each activity category. The distribution of workers for each activity category is shown in **Chart C2**.

Statement 4 presents the percentage distribution of workers by broad activity category. The sector ‘Other Services’ had the highest percentage of workers for rural (53%), urban (44%) and also for rural & urban combined (49%) areas. In rural Kerala, manufacturing (24%) and trading (23%) sector have almost equal share of workers. In urban Kerala, 17% of workers engaged in manufacturing sector and 39% engaged in trading sector.

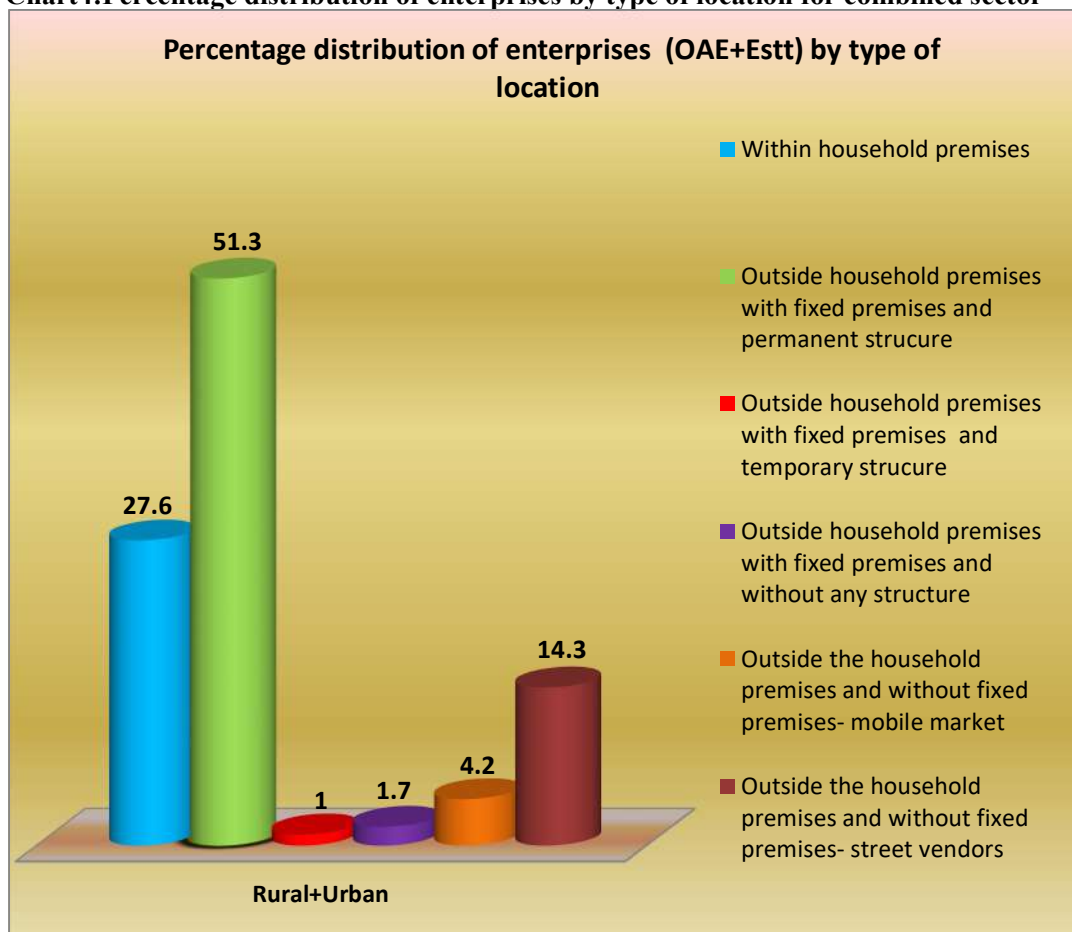

3.5. Nature of operation: Enterprises in the unorganised sector do not sometimes operate throughout the year. The number of months of operation of an enterprise largely depends on the type of activity it carries out. To capture the seasonality of enterprise, the data was collected on the nature of enterprise with duration of enterprise as guiding principle. Statement 5 shows that about 99% of the total enterprises were perennial (operated more or less regularly throughout the year) and the seasonal (operated only during particular seasons) and casual (carried out its activity only occasionally) enterprises together constituted less than 1 % of the total enterprises. The distribution of unincorporated non-agricultural enterprises in respect of nature of operation does not differ significantly between rural and urban areas.

3.7. Location of enterprises: One of the key characteristics of the unincorporated enterprises is that they do not have fixed location. They operate as street vendors or as mobile market. Hence it is useful to study the location of these enterprises. It can be seen from **Statement 11** that about 80% enterprises run the business at fixed location either within or outside the household premises. About 28% enterprises operated within the household premises of which majority of enterprises were OAEs and about 20% operated their business without any fixed location. About 87% of establishments operated outside household premises had fixed location where as this percentage for own account enterprises was 43%. Around 1.7% of the enterprises operated under the sky without any structure but had a fixed location. The enterprises operating outside household premises without fixed location had the characteristics of street vendors i.e. those who operate on the streets or mobile market. The percentage was less in the case of establishments (3%) as compared to OAEs (23%). About 97% of establishments had fixed location as compared to 75% in case of OAEs. **Chart4** gives the percentage distribution of enterprise by type of location. In Rural urban areas the percentage of enterprises had fixed location was almost same.

3.8. Status of registration: Statement 8 gives the distribution of unincorporated non-agriculture enterprises by status of registration. In Kerala, about 64% of all enterprises were registered under any Act or with any registration authority during 2010-11. The types of registration or authorities of registration included State Directorate of Industries, Khadi and Village Industries Commission/Board, Coir Board, Silk Board, Jute Commissioner, Pollution Control Board, Directorate of Education/AICTE/NCTE, Societies Registration Act, Indian Charitable Act, Cinematograph Act, Money Lender's Act, Public Trust Act and others. The percentage of unregistered enterprises in rural and urban sectors is almost same. 'Manufacturing' sector (66%) had the highest percentage of unregistered enterprises and that for 'Trade'(25.6%) and 'Other Services'(26%) are almost equal. In Kerala, 74% enterprises were registered under any act in trading and other service sector.

3.9. GVA per enterprise: Gross value added is taken as additional value created by the process of production of an enterprise to the economy. Gross value added is calculated by deducting 'total operating expenses' and 'distributive expenses' from the value of 'total receipts' during the reference period. **Statement 16** gives the estimated annual gross value added per enterprise (GVAPE) by type of enterprise separately for rural, urban and combined sector. During 2010-11 Annual GVAPE in the unincorporated non-agricultural sector was estimated at Rs.181507. GVAPE was substantially high for Establishments for all sectors. In the rural sector, annual GVAPE for OAEs and Establishments were estimated as Rs.84840 and Rs.398003 respectively. The corresponding estimates for urban areas were Rs.96718 and Rs.638008 respectively. In Both the sectors, enterprises engaged in Trading activity had the highest GVAPE followed by 'Other Services' and 'Manufacturing' .

3.10. GVA per worker (GVAPW) and Emoluments per hired worker (EPHW): Statement 10 gives the estimated annual gross value added per worker (GVAPW) and emoluments per hired worker (EPHW) separately for rural, urban and combined sector for each broad activity category. It is observed that, both GVAPW and EPHW were substantially high in urban areas for each broad activity category.

In Kerala, annual GVAPW in unincorporated non-agricultural sector was estimated at Rs. 86465. For rural sector, annual GVAPW was estimated as Rs. 75053 and the corresponding estimate for urban areas was Rs. 101841. Highest GVAPW was for enterprise engaged in 'Trading' which is estimated as Rs.129667 followed by 'Manufacturing' at Rs.77109 and 'Other Services' at Rs.64065 Similarly, the annual EPHW in unincorporated non-agricultural sector in Kerala during 2010-11 was estimated as Rs. 62,544 .The same for rural and urban areas are respectively Rs. 59,956 and Rs. 64,085. Enterprises engaged in 'Manufacturing' sector offered highest EPHW which was estimated as Rs. 68,472 followed by other service (Rs.65006) and Trade (Rs.57401)

3.11.Fixed Assets: Assets held for the purpose of producing or providing goods or services and not for resale in the normal course of entrepreneurial activities are classified as fixed assets. The net book value or market value of owned fixed assets (depending on whether the data were collected from balance sheet or through oral enquiry) was collected in the survey. These covered all old and new goods that had a normal economic life of more than one year from the date of purchase. **Statement 11** presents the estimated value of total fixed assets owned per enterprise by broad activity category for different enterprise types. The estimated market value of owned fixed assets per enterprise in Kerala was estimated as Rs. 2,17,632. The market value of owned fixed assets per enterprise in urban areas was about 2 times the corresponding value in rural areas. Also, estimated value of owned fixed assets for establishments was about four times that for OAEs. The activity 'Other Services' had the highest fixed assets owned per enterprise (Rs.2,69,018) followed by the activities 'Manufacturing' (1,86,146) and 'Trade'(1,73,470).

3.12. Outstanding loans per enterprise: Financial capital is necessary for asset creation and day to day activities of enterprises. For this purpose enterprises avail loan from different institutions. The data on outstanding loan of enterprises as on the last date of reference year had been collected to assert the financial liability of the enterprises. **Statement 12** shows the outstanding loan per enterprises by enterprise type and sector for each broad activity category. The survey revealed that, in the combined sector, outstanding loans and interests for all enterprises during 2010-11 was estimated at Rs. 26284/-. For establishment it was estimated at Rs. 74897/- in the combined sector which is about 6 times than the corresponding estimate of outstanding loans and interests per OAEs (Rs. 12713/-). In both rural and urban sectors, the outstanding loan per enterprise was higher for establishments than that for OAEs.

3.13. Annual value (Rs.) of receipts per enterprise: The sale value of services produced together with the value of services rendered to other concerns and other receipts incidental to entrepreneurial activities including the value of products and by-products manufactured, if any, by an enterprise during the reference period is defined as 'total receipts' of that enterprise. **Statement 13** shows the annual value of receipts per enterprises for different enterprise types and sectors. The annual value of total receipts per enterprise in Kerala was Rs.7,34,740. The highest value of Annual value of receipts per enterprise is for Trading sector (Rs.16,67,455) followed by Manufacturing (Rs.3,40,522) and Other service (Rs.2,84,091). The total value of receipts for establishments (Rs.22,40,182) is seven times higher than that for OAEs (Rs.3,14,503). For urban sector (Rs.10,55,807), the total value of receipts is twice than that for rural sector (Rs.5,63,249)

Statement 14 shows the annual value of operating expenses per enterprises by type of expenses for different enterprise types and sectors. It has been observed that principal operating expenses accounts for 94 percent of total expenses per enterprise in the combined sector. Also for both OAEs and establishments, the principal expenses accounts for 95% and 94% of total expenses. The trend is similar in both rural and urban areas. Among 'other than principal operating expenses', 'other expenses' accounts for maximum expenditure per enterprises(1.8%) in the combined sector considering all types of enterprise followed by 'Travelling expenses'(1.6%) and 'electricity charges' (1.1%)and it is true for both OAEs also for establishments in rural, urban and combined sector. Operating expenses for urban sector (Rs.7,90,441) is almost twice that for rural sector(Rs.4,20,183)

Appendix B

Sample Design

3.1 Outline of sample design: A stratified multi-stage design has been adopted for the 67th round survey. The first stage units (FSU) are the census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. The ultimate stage units (USU) are enterprises in both the sectors. In case of large FSUs, one intermediate stage of sampling is the selection of three hamlet-groups (hgs)/ sub-blocks (sbs) from each large rural/ urban FSU.

3.2 Sampling frame to be used for selection of first stage units

In Kerala, list of panchayat wards as per Census 2001 was used as frame since list of such wards is not available as per EC 2005 frame.

3.3 Stratification: Each district is a basic stratum in both rural and urban areas. However, in case of urban, each city with population of 1 million or more as per Census 2001 forms a separate stratum and all other cities/towns of a district are grouped to form another stratum.

3.4 Sub-stratification:

(i) Rural: There are three sub-strata in the rural sector:

- (1) Villages with at least 5 establishments (NDE/DE) under coverage in the manufacturing sector as per EC-2005 information;
- (2) Remaining villages having at least 5 NDE/DE under coverage in the services sector including trade as per EC-2005 information;
- (3) Remaining villages of the stratum.

For the State(s) where EC-2005 information cannot be used as auxiliary information for stratification/sub-stratification due to limitations of EC 2005 frame, each district is sub-stratified into 'r/4' sub-strata with a sample allocation of 4 per sub-stratum where 'r' is the sample allocation for the district/stratum. The sub-strata is formed by arranging the villages in terms of population so that total population of each sub-stratum is approximately the same.

(ii) Urban, Million plus cities (excluding Mumbai) :

For each stratum / million plus city, **20 sub-strata** are formed as under:

- Sub-stratum 1: Blocks with one or more establishment in insurance & pension funding;
- Sub-stratum 2: Remaining blocks with one or more establishment in storage & warehousing;
- Sub-stratum 3: Remaining blocks with one or more establishment in accommodation;
- Sub-strata 4-8: Remaining blocks with one or more establishment in broad activities of manufacturing (as per SSS formation discussed subsequently under para 3.9);
- Sub-strata 9-12: Remaining blocks with one or more establishment in broad activities of trade (as per SSS formation in para 3.9);
- Sub-strata 13-19: Remaining blocks with one or more establishment in broad activities of other services (as per SSS formation in para 3.9) excluding the activities covered under sub-strata 1-3.
- Sub-strata 20: All remaining blocks of the stratum.

(iii) Urban, Other cities and towns (including Mumbai): Two sub-strata are formed:

- Sub-stratum 1: UFS block types: Bazaar area (BA)/ Industrial area (IA)/ Hospital area/ (HA)/ Slum area (SA) which are likely to contain relatively higher number of enterprises;
- Sub-stratum 2: Remaining UFS blocks of the stratum.

If the number of FSUs in the frame of a rural or urban sub-stratum was found to be less than 8, then separate sub-stratum was not formed and it was merged with the adjacent sub-stratum.

There is only one town (Leh) in Leh district and one town (Kargil) in Kargil district of J & K. These two towns are out of UFS coverage. These are treated as sub-stratum 2 and the entire town is treated as one FSU.

3.5 Total Sample size (FSUs):

A sample of 16000 FSUs for central sample and 18248 FSUs for state sample have been allocated at all-India level. Allocations for the State/UTs and sectors for central and state samples are given in Table 1 of the Appendices.

3.6 Allocation of total sample FSUs:

(i) All-India allocation over States:

All-India sample size (FSUs) have been allocated to different State/UTs taking into account the minimum allocations required for a State/UT and the proportion of non-agricultural workers as per EC-2005 in the State/UT.

(ii) State/UT allocation over rural/urban sectors: State/UT sample sizes have been allocated to rural and urban sectors of the State/UT in proportion to number of non-agricultural workers as per EC-2005 with the constraint that urban allocation should not be too high compared to rural allocation and both rural and urban allocations were in multiples of 8.(iii) State × sector allocation over strata: Stratum allocations of State/UT sample sizes for each sector have been made in proportion to number of non-agricultural workers as per EC-2005. For the States/UTs where census 2001 frame was used in the rural sector, allocations to strata was made in proportion to population as per census.(iv) Stratum allocation over sub-strata: Allocations to sub-strata was made:

- (a) In proportion to number of non-agricultural workers under coverage as per EC-2005 in rural sector as well as in million plus cities (after assuming the number as 1 for those villages/blocks where number of non-agricultural workers is 0);
- (b) In proportion to number of blocks with a double weight to sub-stratum 1 for other than million plus cities.

Minimum allocation for a sub-stratum was 4.

3.7 Selection of FSUs:

(a) Rural & million plus cities: From each sub-stratum, required number of sample villages/blocks have been selected by probability proportional to size with replacement (PPSWR), size being the number of total non-agricultural workers under coverage in the village/block as per EC-2005.

For the State(s) where EC-2005 information cannot be used as auxiliary information for selection of FSUs due to limitations of EC 2005 frame, size for PPSWR selection have been the population of the village as per Census 2001.

(b) Urban (other than million plus cities): From each sub-stratum FSUs were selected by using Simple Random Sampling Without Replacement (SRSWOR). However, for Leh and Kargil towns, each town was selected 4 times, once in each sub-round.

Both rural and urban samples have been drawn in the form of two independent sub-samples and equal number of samples has been allocated among the four sub rounds.

3.8 Formation of segment 9 and selection of hamlet-groups/ sub-blocks

3.8.1 Formation of Segment 9: Having determined the boundaries of the sample FSU, all non-agricultural enterprises having 20 or more workers in the entire FSU and having operated at least one day during last 365 days preceding the day of survey (hereinafter to be called as ‘big enterprises’) are listed and all the *eligible units under coverage* are surveyed. All the listed big units (whether under coverage or not) constitute segment 9. All *eligible enterprises under coverage* are to be surveyed in segment 9.

3.8.2 Criterion for hamlet-group/ sub-block formation: Having constituted segment 9 as stated above, it is to be determined whether listing will be done in the whole sample FSU or not. For this, approximate present population (P) and approximate total number of non-agricultural enterprises (E) for the whole FSU is ascertained first from knowledgeable persons. Depending upon the values of ‘P’ and ‘E’, it will be divided into a suitable number (say, D) of ‘hamlet-groups’ in the rural sector and ‘sub-blocks’ in the urban sector as stated below. Final value of ‘D’ is the higher of the two values ‘P’ and ‘E’ based on the dual criteria.

Population/enterprise dual criteria			
population (P)	no. of hgs/ sbs to be formed	no. of non-agricultural enterprises (E)	no. of hgs/ sbs to be formed
less than 1200	1	less than 120	1
1200 - 1599	4	120 - 159	4
1600 - 1999	5	160 - 199	5
2000 - 2399	6	200 - 239	6
and so on	...	and so on	...

While considering enterprise criteria, segment 9 enterprises, if any, is excluded from the count of ‘E’, if possible.

For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except four districts Dehradun (P), Nainital (P), Hardwar and Udham Singh Nagar), Poonch, Rajouri, Udampur, Doda, Leh (Ladakh), Kargil districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups to be formed are as follows:

Population/enterprise dual criteria			
population (P)	no. of hgs/ sbs to be formed	no. of non-agricultural enterprises (E)	no. of hgs/ sbs to be formed
less than 600	1	less than 120	1
600 - 799	4	120 - 159	4
800 - 899	5	160 - 199	5
1000 - 1199	6	200 - 239	6
and so on	...	and so on	...

3.8.3 Formation and selection of hamlet-groups/ sub-blocks:

In case hamlet-groups/ sub-blocks are to be formed in the sample FSU, the same should be done either by more or less equalizing population or by equalising number of non-agricultural enterprises. If the criterion for deciding the value of 'D' is population, then hg/sb may be formed by equalising population. On the other hand, if enterprise criterion has been used for deciding 'D', then equalise the number of non-agricultural enterprises to form 'D' number of hg/sb. If the value of 'D' is same for both population and enterprise criteria, then hg/sb may be formed by equalising population.

3.8.4 Segments 1 & 2: Two segments (in addition to segment 9 already formed) are selected from a large FSU wherever hamlet-groups/ sub-blocks have been formed in the following manner – Segment 1 is the hg/sb having maximum number of establishments under the coverage Two more hg's/sb's are chosen by SRSWOR and combined to form Segment 2.

Listing and selection of the enterprises are done independently in the two selected segments. The FSUs without hg/ sb formation is treated as sample segment number 1.

3.9 Formation of Second Stage Strata and allocation of enterprises for schedule 2.34:

A maximum of nineteen (19) second-stage strata (SSS) are formed within each sample FSU. Composition of various SSS is as under:

- (i) 5 SSS considering various broad manufacturing groups are formed in each segment for **Manufacturing sector Establishments:** (1) **SSS 1** - Food products, Beverage and Tobacco Products, (2) **SSS 2** - Textiles, Leather, etc. and Cotton ginning, cleaning and baling, (3) **SSS 3** - Wood and wood products, paper and paper products, printing and publishing etc & Furniture, (4) **SSS 4** - Petroleum Products, chemicals, rubber, metals, metal products, machinery and equipments, etc., and (5) **SSS 5** – remaining manufacturing activities.

- (ii) 4 SSS are formed in each segment for **Trade sector Establishments**: **SSS 6** comprises the activities of commission agents. Excluding the activities of commission agents, three more SSS are formed. They are as follows: **SSS 7** - Trade and repair of motor vehicles and motor cycles; **SSS 8** – other wholesale trade and **SSS 9** – other retail trade.
- (iii) 7 SSS are formed in each segment for **Service sector Establishments (other than trade)** corresponding to the following broad activities: **SSS 10** – Accommodation & food service, **SSS 11** - Transport, storage, information & communication, **SSS 12** - Financial & insurance activities, **SSS 13** - Real Estate and Renting and Business Activities, **SSS 14** - Education, **SSS 15** – Human health & Social work, and **SSS 16** - Other services.
- (iv) 3 SSS are formed in each segment for own account enterprises (**OAEs**) as follows: **SSS 17** – OAEs in Manufacturing, **SSS 18** – OAEs in Trade, and **SSS 19** – OAEs in Other services.

NIC 2008 codes grouped under each SSS are listed in the following table:

3.10 Selection of enterprises

3.10.1 The **number of enterprises to be selected** for survey (excluding segment 9) from each FSU × segment × SSS is given below:

enterprise type	sector	SSS number	number of enterprises to be surveyed	
			without hg/ sb formation	with hg/ sb formation (for each segment)
establishments	manufacturing	1	2	1
		2	2	1
		3	2	1
		4	2	1
		5	2	1

		sub-total	14	7

OAEs	manufacturing	17	4	2
	trade	18	4	2
	services	19	4	2
	sub-total		12	6

It may be noted that from each segment \times SSS, at least one enterprise must be surveyed if there are some enterprises in the corresponding frame. In other words, as per the notations used in blocks 5a and 5b of schedule 0.0, $e > 0$ if $E > 0$ for each FSU \times segment \times SSS.

3.10.2 In addition to the above, **all the eligible enterprises of segment 9 will be surveyed.**

3.10.3 **Selection of Enterprises:** Sample enterprises from each SSS are selected by SRSWOR.

However, **all the establishments in the frame will be selected** for a broad category of establishments (manufacturing/trade/other services) in the following situations:

- (i) All the manufacturing establishments if total number of establishments in manufacturing SSSs is less than or equal to 10 considering both the segments 1 & 2
- (ii) All the trading establishments if total number of establishments in trading SSSs is less than or equal to 8 considering both the segments 1 & 2
- (iii) All the 'other service sector' establishments if total number of establishments in other services SSSs is less than or equal to 14 considering both the segments 1 & 2.

3.11 Brief descriptions of different types of service sector enterprises under the coverage of the survey are given below. NIC – 2008 book may be consulted for detailed list of all activities.

78	EMPLOYMENT ACTIVITIES	Activities of employment placement agencies; Temporary employment agency activities; Human resources provision and management of human resources functions;
79	TRAVEL AGENCY, TOUR OPERATOR AND OTHER RESERVATION SERVICE ACTIVITIES	Travel agency activities; Tour operator activities; activities of tourist guides; activities of marketing and promoting of services for visitors by providing information and assistance to organizations to locate accommodation, convention centers and entertainment venues and other travel-related reservation services (including for transportation, hotels, rest restaurants, car rentals, entertainment and sport).
80	SECURITY AND INVESTIGATION ACTIVITIES	Private security activities; Security systems service activities; Investigation activities
81	SERVICES TO BUILDINGS AND LANDSCAPE ACTIVITIES	Combined facilities support activities (this class includes the units that typically provide a combination of services, such as general interior cleaning, maintenance, trash disposal, laundry and related services. They provide operating staff to carry out these support activities); General cleaning of buildings; Cleaning of trains buses, planes etc.; Cleaning of industrial machinery; Other building and industrial cleaning activities; Landscape care and maintenance service activities.
82	OFFICE ADMINISTRATIVE, OFFICE SUPPORT AND OTHER BUSINESS SUPPORT ACTIVITIES	Combined office administrative service activities (this class includes the provision of a combination of day to day office administrative services, such as reception, financial planning, billing and record keeping, personnel and mail services etc. for others on a contract or fee basis); Photocopying, duplicating and blueprinting services; Document preparation, typing, word processing and desktop publishing services; Other specialised office support services activities; Activities of call centres; Organization of conventions and trade shows ; Activities of collection agencies and credit bureaus; Packaging activities, etc.
85	EDUCATION	Pre-Primary education, Primary education; General secondary education (includes Senior/Higher secondary education); Technical and vocational secondary education; Higher education; Sports and recreation education; Cultural education; Academic tutoring services;

90	CREATIVE, ARTS AND ENTERTAINMENT ACTIVITIES	Dramatic arts, music and other arts activities. This class includes Stage production and related activities; Operation of concert and theatre halls and other arts facilities; Activities of sculptors, painters, cartoonists, engravers, etchers etc.; Activities of individual writers for all subjects including fictional writing, technical writing etc.; Activities of independent journalists; Activities of restoring of works of art such as paintings etc.
91	LIBRARIES, ARCHIVES, MUSEUMS AND OTHER CULTURAL ACTIVITIES	Library and archives activities; Museums activities and operation of historical sites and buildings; Botanical and zoological gardens and nature reserves activities.
92	GAMBLING AND BETTING ACTIVITIES	Wholesale and retail sale of lottery tickets; Other gambling and betting activities. However, there may be certain gambling/ betting activities that are illegal and clandestine in nature. These activities are out of coverage for the present survey.
93	SPORTS ACTIVITIES AND AMUSEMENT AND RECREATION ACTIVITIES	Operation of sports facilities; Activities of sports clubs; Other sports activities; Activities of amusement parks and theme parks.
941	ACTIVITIES OF BUSINESS, EMPLOYERS AND PROFESSIONAL MEMBERSHIP ORGANIZATIONS	Activities of chambers of commerce, guilds and similar organisations, federations of such organizations ; activities of associations of writers, painters, lawyers, doctors, journalists and other similar organizations.
949	ACTIVITIES OF OTHER MEMBERSHIP ORGANISATIONS	Activities of other membership organizations, such as religious organizations, will be covered only if it relates to activities other than organizational activities. Thus, activities of religious organizations providing services directly to worshippers in churches, mosques,

<p>If any enterprise under coverage is run by religious/ political/other membership organizations with at least one worker hired for the services it provides then that enterprise is covered under respective NIC code of that activity.</p>		

4. Estimation Procedure

4.1 Notations:

s = subscript for s-th stratum

t = subscript for t-th sub-stratum

m = subscript for sub-sample (m = 1, 2)

i = subscript for i-th FSU [village (panchayat ward)/ block/ non-UFS town]

d = subscript for a segment (d = 1, 2, 9)

j = subscript for j-th second stage stratum in an FSU/ segment [j = 1, 2, 3, , 19]

k = subscript for k-th sample enterprise under a particular second stage stratum within an FSU/ segment

D = total number of hg's/ sb's formed in the sample FSU

D* = 0 if D = 1

= (D - 1)/2 for FSUs with D > 1

N = total number of FSUs in any urban sub-stratum

Z = total size of a sub-stratum (= sum of sizes for all the FSUs of a sub-stratum) belonging to either rural sector or urban million plus cities excluding Mumbai

z = size used for selection of sample FSU belonging to either rural sector or urban million plus cities excluding Mumbai

n = number of sample FSUs surveyed including 'zero cases' but excluding casualty for a particular sub-sample and sub-stratum.

E = total number of enterprises listed in a second-stage stratum of an FSU / segment of sample FSU

e = number of enterprises surveyed in a second-stage stratum of an FSU / segment of sample FSU

x, y = observed value of characteristics x, y under estimation

\hat{X} , \hat{Y} = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

$y_{stmidjk}$ = observed value of the characteristic y for the k-th enterprise in the j-th second stage stratum of the d-th segment (d = 1, 2, 9) of the i-th FSU belonging to the m-th sub-sample for the t-th sub-stratum of s-th stratum.

However, for ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

4.2 Formulae for Estimation of Aggregates for a particular sub-sample and stratum / sub-stratum:

4.2.1 Schedule 0.0:

4.2.1.1 Rural:

(i) For estimating the number of enterprises possessing a characteristic:

$$\hat{Y} = \frac{Z}{n} \sum_{i=1}^n \frac{1}{z_i} \left[y_{i9} + y_{i1} + D_i^* \times y_{i2} \right]$$

where y_{i9} , y_{i1} , y_{i2} are the total number of enterprises possessing the characteristic y in segments 9, 1 & 2 of the i -th FSU respectively.

(ii) For estimating the number of villages in a sub-stratum possessing a characteristic:

$$\hat{Y} = \frac{Z}{n} \sum_{i=1}^n \frac{1}{z_i} y_i$$

where y_i is taken as 1 for sample villages possessing the characteristic and 0 otherwise.

4.2.1.2 Urban:

(a) Estimation formula for a sub-stratum of million plus cities (excluding Mumbai):

(i) For estimating the number of enterprises possessing a characteristic:

$$\hat{Y} = \frac{Z}{n} \sum_{i=1}^n \frac{1}{z_i} \left[y_{i9} + y_{i1} + D_i^* \times y_{i2} \right]$$

where y_{i9} , y_{i1} , y_{i2} are the total number of enterprises possessing the characteristic y in segments 9, 1 & 2 of the i -th FSU respectively.

(b) Estimation formula for a sub-stratum of other strata:

(i) For estimating the number of enterprises possessing a characteristic:

$$\hat{Y} = \frac{N}{n} \sum_{i=1}^n \left[y_{i9} + y_{i1} + D_i^* \times y_{i2} \right]$$

where y_{i9} , y_{i1} , y_{i2} are the total number of enterprises possessing the characteristic y in segments 9, 1 & 2 of the i -th FSU respectively.

Note: There are only one FSU each in the districts Leh (Leh town) and Kargil (Kargil town) of J & K. Both of these have been selected and repeated in each of the sub-rounds. Thus, for these two stratum \times sub-stratum, $N = 1$ in the above formula and n will be the number of FSUs actually surveyed including repetitions ($n = 4$ for the whole round and $n = 2$ for a sub-sample of the whole round assuming no casualty) for each of the two districts.

4.2.2 Schedules 2.34:

4.2.2.1 Rural:

Estimation formula for a sub-stratum:

(i) For enterprises selected in j -th second stage stratum:

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left[\sum_{k=1}^{e_{i9j}} y_{i9jk} + \frac{E_{i1j}}{e_{i1j}} \sum_{k=1}^{e_{i1j}} y_{i1jk} + D_i^* \times \frac{E_{i2j}}{e_{i2j}} \sum_{k=1}^{e_{i2j}} y_{i2jk} \right]$$

(ii) For all selected enterprises:

$$\hat{Y} = \sum_j \hat{Y}_j$$

4.2.2.2 Urban:

(a) Estimation formula for a sub-stratum of million plus cities (except Mumbai):

(i) For enterprises selected in j -th second stage stratum:

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left[\sum_{k=1}^{e_{i9j}} y_{i9jk} + \frac{E_{i1j}}{e_{i1j}} \sum_{k=1}^{e_{i1j}} y_{i1jk} + D_i^* \times \frac{E_{i2j}}{e_{i2j}} \sum_{k=1}^{e_{i2j}} y_{i2jk} \right]$$

(ii) For all selected enterprises:

$$\hat{Y} = \sum_j \hat{Y}_j$$

(b) Estimation formula for a sub-stratum of other strata:

(i) For enterprises selected in j-th second stage stratum:

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} \left[\sum_{k=1}^{e_{i9j}} y_{i9jk} + \frac{E_{i1j}}{e_{i1j}} \sum_{k=1}^{e_{i1j}} y_{i1jk} + D_i^* \times \frac{E_{i2j}}{e_{i2j}} \sum_{k=1}^{e_{i2j}} y_{i2jk} \right]$$

(ii) For all selected enterprises:

$$\hat{Y} = \sum_j \hat{Y}_j$$

Note: For segment 9, an adjustment may be necessary if $E \neq e$ for a second-stage stratum due to casualty at the detailed enquiry stage. In that case, contribution of segment 9 (i.e. $\sum_{k=1}^{e_{i9j}} y_{i9jk}$) in the above formulae may be replaced by $\frac{E_{i9j}}{e_{i9j}} \sum_{k=1}^{e_{i9j}} y_{i9jk}$,

where E_{i9j} = (number of enterprises in the frame of of segment 9 for j-th SSS of i-th FSU as per column (4) block 6a of schedule 0.0) and e_{i9j} = (number of enterprises actually surveyed for segment 9 of j-th SSS of i-th FSU)

$E_{i9j} = e_{i9j}$ if there is no casualty.

Note: As mentioned earlier in section 4.2.1.2, $N = 1$ in the above formula in the case of Leh and Kargil districts of J & K.

4.2.3 Estimate for a stratum:

$$\hat{Y}_s = \sum_t \hat{Y}_{st}$$

4.3 Overall Estimate for Aggregates:

Overall estimate for aggregates for a stratum (\hat{Y}_s) based on two sub-samples is obtained as:

$$\hat{Y}_s = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{sm}$$

4.4 Overall Estimate of Aggregates at State/UT/all-India level:

The overall estimate \hat{Y} at the State/ UT/ all-India level is obtained by summing the stratum estimates \hat{Y}_s over all strata belonging to the State/ UT/ all-India.

4.5 Estimates of Ratios:

Let \hat{Y} and \hat{X} be the overall estimates of the aggregates Y and X for two characteristics y and x respectively at the State/ UT/ all-India level.

Then the combined ratio estimate (\hat{R}) of the ratio ($R = \frac{Y}{X}$) will be obtained as

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}.$$

4.6 Estimates of Error: The estimated variances of the above estimates will be as follows:

4.6.1 For aggregate \hat{Y} :

$V\hat{a}r(\hat{Y}) = \sum_s \sum_t V\hat{a}r(\hat{Y}_{st})$ where $V\hat{a}r(\hat{Y}_{st})$ is given by

$V\hat{a}r(\hat{Y}_{st}) = \frac{1}{4}(\hat{Y}_{st1} - \hat{Y}_{st2})^2$ where \hat{Y}_{st1} and \hat{Y}_{st2} are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

4.6.2 For ratio \hat{R} :

$$M\hat{S}E(\hat{R}) = \frac{1}{4\hat{X}^2} \sum_s \sum_t \left[(\hat{Y}_{st1} - \hat{Y}_{st2})^2 + \hat{R}^2 (\hat{X}_{st1} - \hat{X}_{st2})^2 - 2\hat{R}(\hat{Y}_{st1} - \hat{Y}_{st2})(\hat{X}_{st1} - \hat{X}_{st2}) \right]$$

4.6.3 Estimates of Relative Standard Error (RSE):

$$R\hat{S}E(\hat{Y}) = \frac{\sqrt{V\hat{a}r(\hat{Y})}}{\hat{Y}} \times 100$$

$$R\hat{S}E(\hat{R}) = \frac{\sqrt{M\hat{S}E(\hat{R})}}{\hat{R}} \times 100$$

4.7 Multipliers:

The formulae for multipliers at stratum/sub-stratum/second-stage stratum level for a sub-sample and schedule type are given below:

sector	sub-stratum	formula for multipliers		
		segment 9	segment 1	segment 2
Schedule 0.0				
rural	all	$\frac{Z_{st}}{n_{stm}} \times \frac{1}{z_{stmi}}$	$\frac{Z_{st}}{n_{stm}} \times \frac{1}{z_{stmi}}$	$\frac{Z_{st}}{n_{stm}} \times \frac{1}{z_{stmi}} \times D_{stmi}^*$
urban	for million plus cities (except Mumbai)	$\frac{Z_{st}}{n_{stm}} \times \frac{1}{z_{stmi}}$	$\frac{Z_{st}}{n_{stm}} \times \frac{1}{z_{stmi}}$	$\frac{Z_{st}}{n_{stm}} \times \frac{1}{z_{stmi}} \times D_{stmi}^*$

rural	all	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times \frac{E_{stmi9j}}{e_{stmi9j}}$	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times \frac{E_{stmi1j}}{e_{stmi1j}}$	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times D_{stmi}^* \times \frac{E_{stmi2j}}{e_{stmi2j}}$
urban	for million plus cities (except Mumbai)	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times \frac{E_{stmi9j}}{e_{stmi9j}}$	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times \frac{E_{stmi1j}}{e_{stmi1j}}$	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times D_{stmi}^* \times \frac{E_{stmi2j}}{e_{stmi2j}}$
	for other strata	$\frac{N_{st}}{n_{stmj}} \times \frac{E_{stmi9j}}{e_{stmi9j}}$	$\frac{N_{st}}{n_{stmj}} \times \frac{E_{stmi1j}}{e_{stmi1j}}$	$\frac{N_{st}}{n_{stmj}} \times D_{stmi}^* \times \frac{E_{stmi2j}}{e_{stmi2j}}$
j = 1,2,3,, 19				

- Note: (i) For estimating any characteristic for any domain not specifically considered in sample design, indicator variable may be used.
- (ii) Multipliers have to be computed on the basis of information available in the listing schedule irrespective of any misclassification observed between the listing schedule and detailed enquiry schedule.
- (i) For estimating number of villages possessing a characteristic, $D_{stmi}^* = 0$ in the relevant multipliers and there will be only one multiplier for the village (see paragraph 7.2.1.1 in this context).

4.8. Treatment for zero cases, casualty cases etc.:

4.8.1 While counting the number of FSUs surveyed (n_{sm} or n_{stm}) in a stratum/sub-stratum, all the FSUs with survey codes 1 to 6 in schedule 0.0 will be considered. In addition, if no SSU is available in the frame for a particular FSU then also that FSU will be treated as surveyed. However, if the SSUs are available in the frame of the FSU but none of these could be surveyed then that FSU has to be treated as casualty and it will not be treated as surveyed.

4.8.2 *Casualty cases*: FSUs with survey code 7 as per schedule 0.0 are treated as casualties. In addition to this, an FSU, although surveyed, may have to be treated as casualty for a particular schedule type and a particular *second stage stratum* as given in the following para:

4.8.3 Similarly, FSUs with survey codes 1 and 4 as per schedule 0.0 having number of enterprises in the frame of j-th second stage stratum greater than 0 but number of enterprises surveyed according to data file, considering all three segments together, as nil (i.e. $E_{i9j} + E_{i1j} + E_{i2j} > 0$ but $e_{i9j} + e_{i1j} + e_{i2j} = 0$) will be taken as casualties for j-th second stage stratum

All the FSUs with survey codes 1 to 6 as per schedule 0.0 minus the number of casualties as identified above will be taken as the number of surveyed FSUs (n_{stmj}) for that sub-stratum \times second stage stratum.

When casualty for j-th second stage stratum occurs for a particular segment but not for the other segment, the FSU will not be treated as casualty but some adjustments in the value of E for the other segment will be done as follows:

- (i) Suppose for segment 1, $E_{i1j} > 0$ but $e_{i1j} = 0$ while for segment 2, $E_{i2j} > 0$ and $e_{i2j} > 0$. In that case $D_i^* \times E_{i2j}$ will be replaced by $(E_{i1j} + D_i^* \times E_{i2j})$ in the formula for multiplier of segment 2.
- (ii) Suppose for segment 1, $E_{i1j} > 0$ and $e_{i1j} > 0$ while for segment 2, $E_{i2j} > 0$ but $e_{i2j} = 0$. In that case E_{i1j} will be replaced by $(E_{i1j} + D_i^* \times E_{i2j})$ in the formula for multiplier of segment 1.

However, segment 9 need not be clubbed with segment 1 or segment 2 if segment 9 enterprises are surveyed but no enterprises could be surveyed from segments 1 / 2.

It may be noted that n_{stmj} would be same for segments 1 & 2 of an FSU.

4.9 Treatment in cases of void second-stage strata/sub-strata /strata/NSS region at FSU or enterprise level

4.9.1 A stratum/sub-stratum may be void because of the casualty of all the FSUs belonging to the stratum/sub-stratum. This may occur in one sub-sample or in both the sub-samples. If it relates to only one sub-sample, then estimate for the void stratum/sub-stratum may be replaced with the estimate as obtained from the other sub-sample for the same stratum/sub-stratum.

4.9.2 When a stratum/sub-stratum is void in both the sub-samples, the following procedure is recommended:

Case(I): Stratum/Sub-stratum void cases at FSU levels (i.e. all FSUs having survey code 7):

- (i) If an rural sub-stratum is void then it may be merged with the other sub-stratum of the stratum.
- (ii) If a rural/urban stratum (district) is void due to all FSUs being casualty, it may be excluded from the coverage of the survey. The state level estimates will be based on the estimates of districts for which estimates are available and remarks to that effect may be added in appropriate places.

Case (II): Stratum/Sub-stratum void case at second stage stratum level (i.e. all the FSUs are casualties for a particular second stage stratum):

An FSU may be a casualty for a particular *second stage stratum* although survey code is not 7. If all the FSUs of a stratum/sub-stratum become casualties in this manner for a particular *second stage stratum*, the stratum/sub-stratum will become void. In such cases, sub-strata will be merged with other sub-strata for all the second stage strata as in *Case (I) above*.

However, if whole district/stratum becomes void in this manner for a particular second stage stratum, adjustment for this type of stratum void case may be done according to the following guidelines.

The adjustment will be made involving other strata/sub-strata (within NSS region) of the State/U.T. Suppose A, B, C and D are the four strata in the State/UT/Region and stratum C is void for j-th *second stage stratum*. If \hat{Y}_{aj} , \hat{Y}_{bj} and \hat{Y}_{dj} are the aggregate estimates for the strata/sub-strata A, B and D respectively, then the estimate \hat{Y}_{cj} for stratum/sub-stratum C may be obtained as $\left(\frac{\hat{Y}_{aj} + \hat{Y}_{bj} + \hat{Y}_{dj}}{Z_a + Z_b + Z_d} \times Z_c \right)$ where Z_a , Z_b , Z_c and Z_d are the sizes of strata A, B, C and D respectively.

5. Reference to the values of Z_{st} , N_{st} , n_{st} , z_{sti} , D_{sti} , D^*_{sti} , E_{sti1j} , e_{sti1j} , E_{sti2j} , e_{sti2j} :

- (a) Values of Z_{st} , N_{st} and allotted n_{st} for the whole round are given in appendix Table 2 for rural sector and in Table 3 for urban sector.
- (b) n_{st} should not be taken from the tables. The values of n_{stm} for each sub-sample are to be obtained following the guidelines given in para 9 above. It includes uninhibited and zero cases but excludes casualty cases.
- (c) The value of z_{sti} for the samples selected by PPS is to be taken from the column of sample list under the heading “selection size” or from item 15,

block 1, schedule 0.0. Value of D_{sti} is to be taken from item 18 of block 1, sch 0.0. D^*_{sti} is to be calculated from the value of D_{sti} .

- (d) Values of E_{sti1j} , E_{sti2j} are to be taken from col.(4), block 6a and 6b of sch 0.0 for respective segments.
- (e) The value of e_{sti1j} and e_{sti2j} should not be taken from col (8), block 6a and 6b of sch.0.0. The figures should be obtained by counting the number of enterprises in the data file excluding the casualty households.

1301	A computer refers to a desktop or a laptop computer. It does not include equipment with some embedded computing abilities such as mobile cellular phones, personal digital assistants (PDA) or TV sets.
1302	The Internet is a worldwide public computer network. It provides access to a number of communication services including the World Wide Web and carries email, news, entertainment and data files, irrespective of the device used (not assumed to be only via a computer - it may also be by mobile phone, games machine, digital TV, etc.). Access can be via a fixed or mobile network.
1303	A web presence includes a website, home page or presence on another entity's website (including a related business). It excludes inclusion in an on-line directory of any other webpages where the business does not have control over the content of the page.
1304	An intranet refers to an internal communications network using Internet protocols and allowing communication within an organization (and with other authorized persons). It is typically set up behind a firewall to control access.
1305	Orders received include orders received via the Internet whether or not payment was made online. They include orders received via websites, specialized Internet marketplaces, extranets, EDI over the Internet, Internet-enabled mobile phones and email. They also include orders received on behalf of other organizations – and orders received by other organizations on behalf of the business. They exclude orders that were cancelled or not completed.
1306	Orders placed include orders placed via the Internet whether or not payment was made online. They include orders placed via websites, specialized Internet marketplaces, extranets, EDI over the Internet, Internet-enabled mobile phones and email. They exclude orders that were cancelled or not completed.
1307	Narrowband includes analogue modem (dial-up via standard phone line), Integrated Services Digital Network (ISDN), Digital Subscriber Line (DSL) at speeds below 256 kbit/s, and mobile phone and other forms of access with an advertised download speed of less than 256 kbit/s. Narrowband mobile phone access services include CDMA 1x (Release 0), GPRS, WAP and imode
1308	Fixed broadband refers to technologies such as DSL, at speeds of at least 256 kbit/s, cable modem, high speed leased lines, fibre-to-the-home, powerline, satellite, fixed wireless, Wireless Local Area Network (WLAN) and WiMAX.
1309	Mobile broadband access services include Wideband CDMA (W-CDMA), known as Universal Mobile Telecommunications System (UMTS) in Europe; High-speed Downlink Packet Access (HSDPA), complemented by High-Speed Uplink Packet Access (HSUPA); CDMA2000 1xEV-DO and DCMA 2000 1xEV-DV. Access can be via any device (mobile

	cellular phone, laptop, PDA, etc.
1311	A LAN refers to a network connecting computers within a localized area such as a single building, department or site; it may be wireless.
1312	An extranet is a closed network that uses Internet protocols to share securely a business' information with suppliers, vendors, customers or other business partners. It can take the form of a secure extension of an intranet that allows external users to access some parts of it. It can also be a private part of the business' website, where business partners can navigate after authentication.
1314	VoIP refers to Voice over Internet Protocol
1317	Includes downloading/requesting forms online, making online payments and purchasing from, or selling to, government organizations. It excludes getting information from government organizations.
1318	Includes electronic transactions with a bank for payment, transfers, etc. or for looking up account information.
1319	Includes electronic transactions via the Internet for other types of financial services such as purchasing shares (stocks), financial services and insurance.
1321	Includes providing online or emailed product catalogues or price lists, product specification or configuration online, after-sales support, and order tracking online.
