PREFACE

Housing is reflection of nations economic and social well being and it is one of the crucial development indicators of any economy. Data on housing statistics collected in a systematic manner is of immense importance for planners and other users. I am sure that this publication includes the wide range of housing statistics data within its limitation. The secondary data included in this report were collected from concerned local body registers by the field level officers of Economics and Statistics Department. Un-registered and other buildings (non-agricultural) are not covered in this report.

Number of buildings newly constructed in Kerala State during the year 2020-21 was 355874, which is 17.07% less than the previous year. This decrease in construction may be due to the pandemic covid-19. In rural area number of buildings newly constructed is 21% less than previous year and in urban area it is only 2.1%. There was a considerable amount of decrease in construction activities in rural area when compared to urban area. So it can be concluded that construction activities in rural area were affected by covid-19 much more than that of urban area.

The field level officers and supervisors have put in enormous effort in collecting and furnishing of housing Statistics from district level. I appreciate and congratulate all the officers of the District Offices and Housing Division in the Directorate for their sincere efforts and involvement in the preparation of this report. I hope that this publication will help the planners and researchers who need data on housing characteristics in order to create developmental plans.

Any suggestion for improvement of this report is highly appreciated.

INTRODUCTION

Housing statistics provides data and indicators periodically for measuring the change in housing characteristics over time, and carrying out local, regional and international comparisons. This publication helps to measure the progress and development in the housing field, in terms of number of buildings, building type, roofing pattern as well as the ownership of the dwelling occupied by a household.

Meaningful formulation of housing schemes and policies requires authentic and reliable data. This collection brings together all documents relating to new building constructed and completed in 2020-21. This report contains data pertaining to the number of newly constructed buildings, its sectorwise classification viz; rural and urban, type of ownership and type of roofing, density of newly constructed buildings, and comparison with the data of previous years, etc. Data are available at panchayat/municipality/corporation level. The database will be a guideline factor based on which the housing policies of the state and central have to be evolved and its efficacy monitored.

As per the recommendations of National Statistical Commission and direction from the government of Kerala, Department of Economics and Statistics has been collecting, collating, compiling, validating, analyzing, disseminating and publishing panchayat level building statistics (Rural Sector) since 2001-02. Total		1751525	1793457	429033	536383	2329840

From 2015-16 to 2020-21, 2329840 buildings have been constructed in Kerala State. Among these 1793457 are residential buildings and 536383 are non residential buildings. 97.66% (1751525) of residential buildings are dwelling houses and 79.99% (429033) of non residential buildings are commercial buildings. Numbers of total buildings, residential buildings, dwelling houses have been constructed since 2015-16 are least in this year 2020-21.

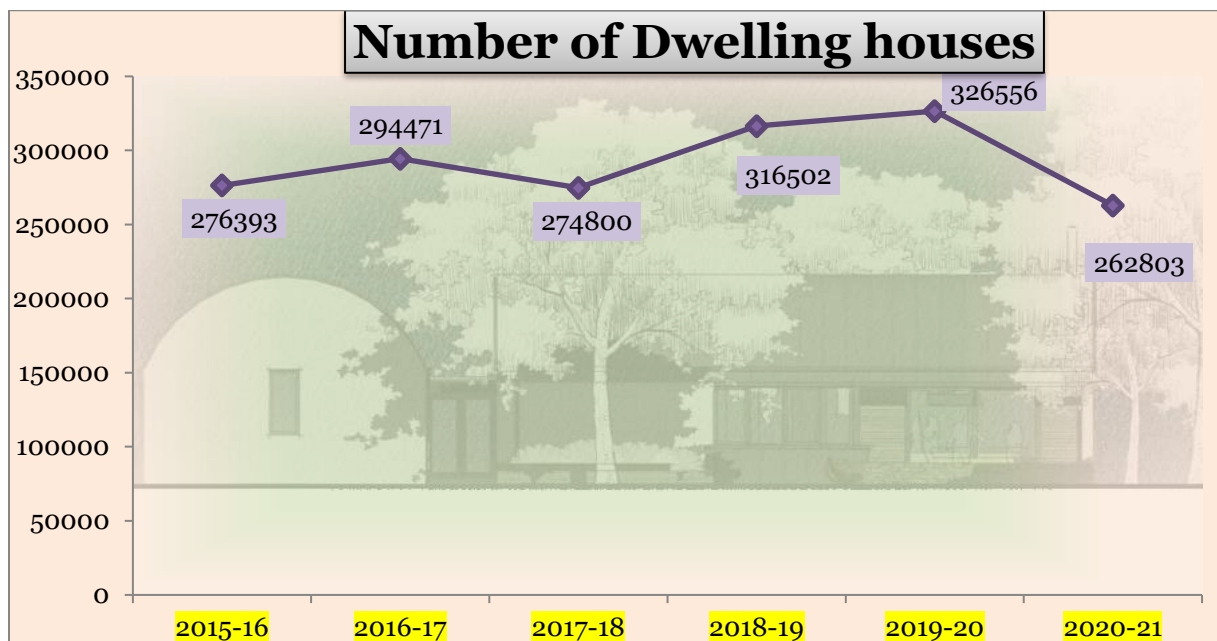

Total number of buildings have been constructed in each year since 2015-16 shows an oscillating tendency. Total number of buildings completed in each financial year increases from 2015-16 to 2016-17, then it decreases from 2016-17 to 2017-18. Then it again increases from 2017-18 to 2019-20. This increase in number buildings constructed in two years may be due to the impact of “Re-build Kerala” programme implemented by Govt. of Kerala after the flood occurred in the month August 2018. The reasons for the variations in number buildings may due to reconstruction activities in post flood situation and Govt. sponsored programmes. In this year 2020-21 the percentage of decrease in total number of buildings is 17.07% with respect to previous year. This may be due to the effect of the pandemic Covid-19 which hit Kerala first time on the month of March 2020. Then the lock down period started and it affected the construction sector badly. The percentage of fluctuation in total number of buildings newly

constructed in each financial year with respect to previous year since 2016-17 is ie between 2015-16 and 2016-17 is 6.96%, and between 2016-17 and 2017-18 is -4.78%, and 2017-18 and 2018-19 is 13.27%, and 2018-19 and 2019-20 is 2.13%, and 2019-20 and 2020-21 is -17.07%. Number of buildings newly constructed is least in this year 2020-21, since 2015-16. It means the pandemic COVID-19 affected the construction field of Kerala badly.

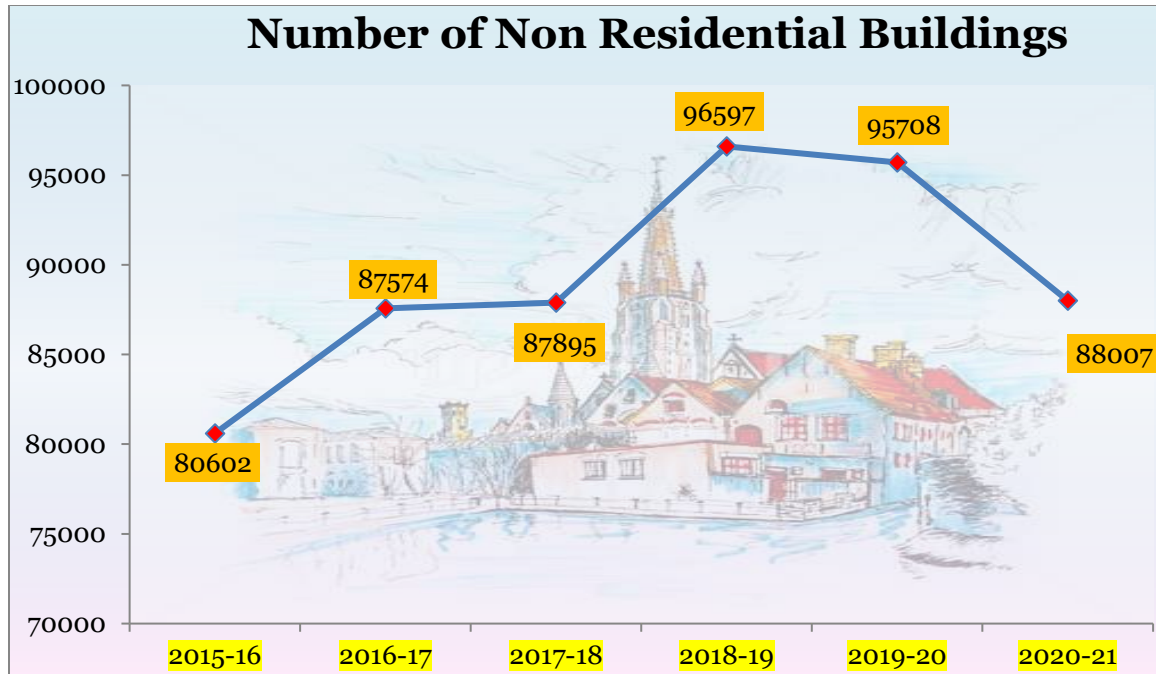

Residential buildings constructed in each financial year since 2015-16, show an increasing tendency except for the financial years 2017-18 and 2020-21. The increase in number of residential buildings in 2018-19 to 2019-20 is the result of “Rebuild Kerala” initiative by Govt. of Kerala. So the reasons for the variations in number buildings may due to reconstruction activities in post flood situation and Govt. sponsored programmes. This year 2020-21 percentage of

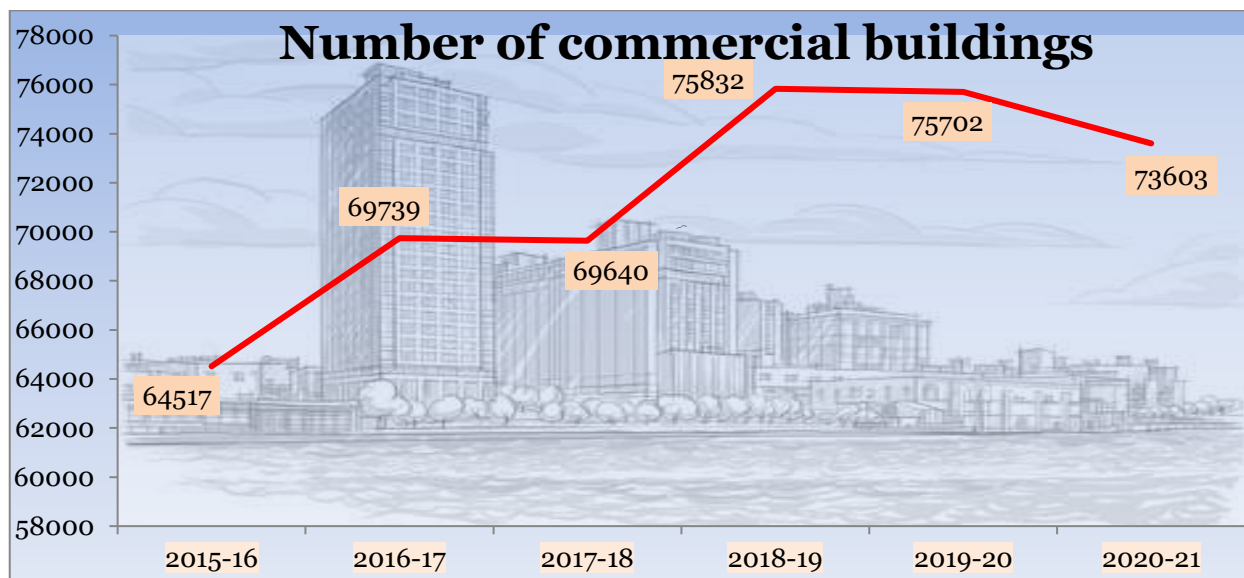

decrease in the number of residential buildings constructed is 19.66% with respect to previous year. Number of residential buildings constructed is least in this year since 2015-16. This decrease is due to lock down and financial crisis arised as the result of the pandemic Covid-19 attack.
