GOVERNMENT OF KERALA

A LOOK AT
BUILDING MATERIAL PRICES AND WAGES
IN KERALA
(1995 – 2000)

DEPARTMENT OF ECONOMICS AND STATISTICS
Thiruvananthapuram
2003

Preface

Housing is one of the crucial development indicators of any economy. Data on housing activities collected in a systematic manner is of immense importance for planners and other data users. "A Look at building Materials Prices and Wages in Kerala" is an attempt to consolidate and interpret time series data on prices of building materials and wages of Construction Workers for the period 1995-2000

The report was prepared under the guidance of Sri. P.C. Jain, Additional Director. Sri.B. Sreekumar, Assistant Director prepared the report with the assistance of Sri.N. Vinayan, Research Officer, Sri. Vasantha Krishnan Nair, Sri.K.K. Yacob, Smt. S. Lathika Kumari, U.D. Compilers, Smt. B.K. Shamju, L.D. Compiler and Sri. S. Saseendran, U.D. Typist. It is hoped that this report would be of some use to those interested in the field of housing statistics.

M.R BALAKRISHNAN
Director

Thiruvananthapuram

1. Introduction

Food and housing are the basic needs for a man to sustain. Housing is not merely an amenity, but an essential necessity for the healthy life of a community. Each and every person desires to have a house of his own. In order to keep his living in a better way. To cater to the aspirations of the people, the Government have been introducing various housing schemes from time to time. For effective implementation of these schemes, the Government requires proper planning and policy formulation and this could not be achieved without reliable and up to date statistical database.

Housing in the early years of planned economy, in the country, depended entirely on the housing statistics collected as part of the decennial Population Census. Later on National Buildings Organisation (NBO) of the Works and Housing Ministry, Government of India, now under the Ministry of Urban Affairs and Employment, Government of India, addressed itself to the task of collecting housing statistics at State level through the State Directorates of Economics and Statistics and a system was evolved for the collection of House Building Statistics from the Municipal Authorities and the Public Works Department on a regular basis.

2. National Buildings Organisation (NBO)

National Buildings Organisation (NBO) collects data on house building activities both in the private and public sectors, in Urban areas of the country and the prices of various building materials and wages of building labour from specified locations all over the country. In addition to these, the NBO collects data on building cost index, social housing, building permits and completion certificates issued, housing finance institutions etc. The NBO also compiles data relating to shelter indicators, urban infrastructure, environment statistics, disaster management etc from various central, state, local agencies and disseminates them to the planners and data users. The estimates of housing shortage, both at the national and state levels are projected by the NBO. Further, the NBO is also engaged in data collection as required by the national and international agencies such as World Bank, United Centre for Human Settlements (UNCHS) etc. Surveys and studies on the Socio Economic aspects of housing are also organized and conducted by the NBO.

3. The Role of Directorate of Economics and Statistics (DES)

The Directorate of Economics and Statistics is the co-ordinating agency for the collection and compilation of housing statistics and building material prices in the State. The State Housing Statistics Unit was set up for the first time in 1967 at the Directorate. The unit consists of one Research Officer, one Research Assistants, two U.D Compilers and one Assistant Director heads the unit. As in the case of Directorate, Housing Statistics cells have been setup in the Office of the Chief Engineer, Buildings and Roads and in the Directorate of Municipalities. The cell in the Chief Engineer's Office consists of one Research Officer, and three L.D. Compilers whereas in the Municipal Directorate has one Research Assistant and two L.D. Compilers. It is the function of these cells to make available to this Directorate periodical returns on building constructions on a regular basis.

4. Objective of this Hand Book

The objectives of this hand book are to have a look at the prices of building materials, price fluctuations over the period 1995-2000 and the wages of skilled and un-skilled workers engaged in construction activities. This publication will be a stepping stone for many such publications in the field to be brought out in future covering various aspects of housing

Kerala is a Land with high population density and attitude of a common Keralite for his own independent house makes the problem of housing more complex. This also now leads to the issues like diminishing of agricultural lands thereby causing reduction in agricultural production, the competition among various financial institutions to disburse housing loans, the dearth for land that leads to the growing construction of flats just like in the metropolitan cities. These types of demand – supply imbalance and their remedies can be studied in depth if scientific and realistic approach were taken by the decision making authorities.

5. An over view of Prices of Building Materials

Average annual prices of some important materials in the State are given in Table- 1. It can be seen that the variation of prices over the period 1995-2000 is considerably high for some items except for paints, M.S Round Bars (10 mm) and Cement. But when we consider the prices of 2000 in comparison with the prices in 1991 and 1981, considerable increase in prices for all the materials listed can be seen. Table –1 lists the prices of some important building materials from 1995- 2000 and that of 1981 and 1991.

Table-1
Average Annual Prices of some important building materials in the State

(in Rs.)

Sl. No.	Materials	Unit	1981	1991	1995	1996	1997	1998	1999	2000

VARIATION OF PRICES

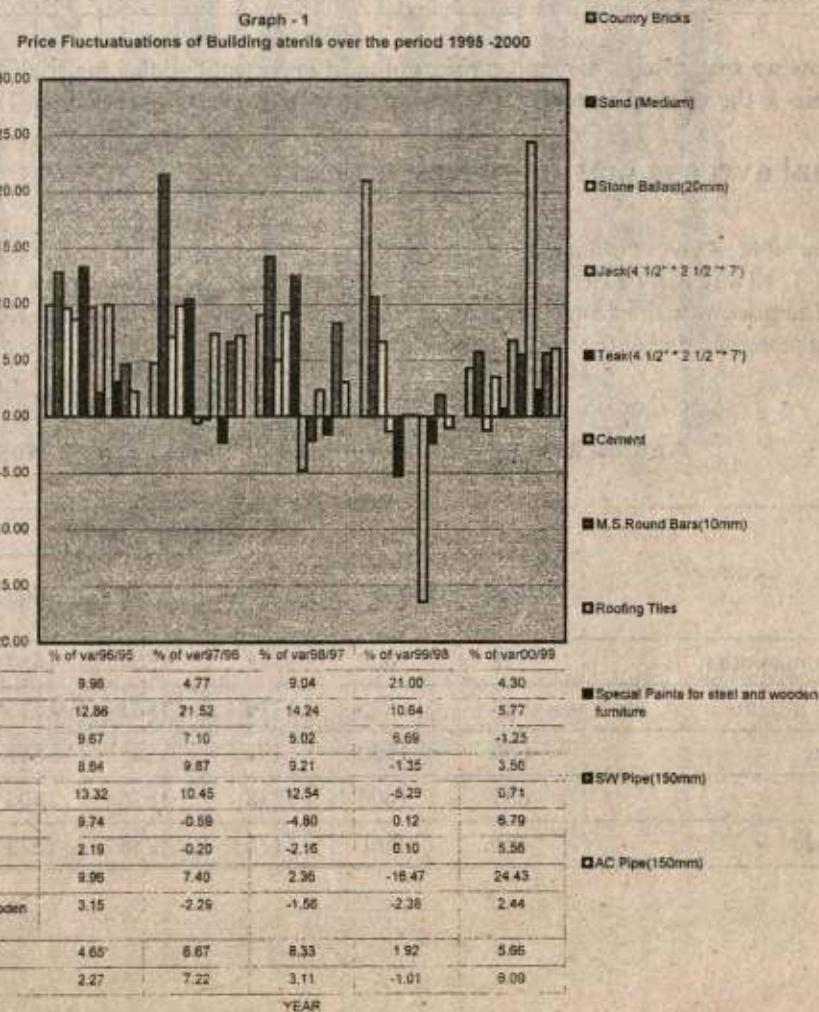

Table – 3 shows the price variations of building materials in 2000 compared with 1995, 1991 and 1981. A sharp increase is seen in the prices of these items in 2000 when compared with that of 1981.

Table-3
Price variations of building materials in 2000 in comparison with 1995, 1991 & 1981

Sl. No.	Materials	00/95	00/91	00/81
1	Country Bricks	58.56	212.13	465.04
2	Sand (Medium)	83.33	285.00	913.16
3	Stone Ballast (20mm)	29.95	91.99	644.59
4	Jack (4 1/2" * 2 1/2 " * 7")	33.16	174.22	957.61
5	Teak (4 1/2" * 2 1/2 " * 7")	34.35	147.98	892.07
6	Cement	11.04	70.15	466.35
7	M.S. Round Bars (10mm)	5.43	29.07	205.26
8	Roofing Tiles	25.64	101.56	246.25
9	Special Paints for steel and wooden furniture	-0.79	10.53	186.36
10	SW Pipe (150mm)	30.23	55.56	229.41
11	AC Pipe (150mm)	18.75	50.36	124.73

Now we shall discuss the market prices of most important building materials from among the 11 items listed in table- at the selected centers of Thiruvananthapuram, Kottayam, Ernakulam, Thrissur and Kozhikode.

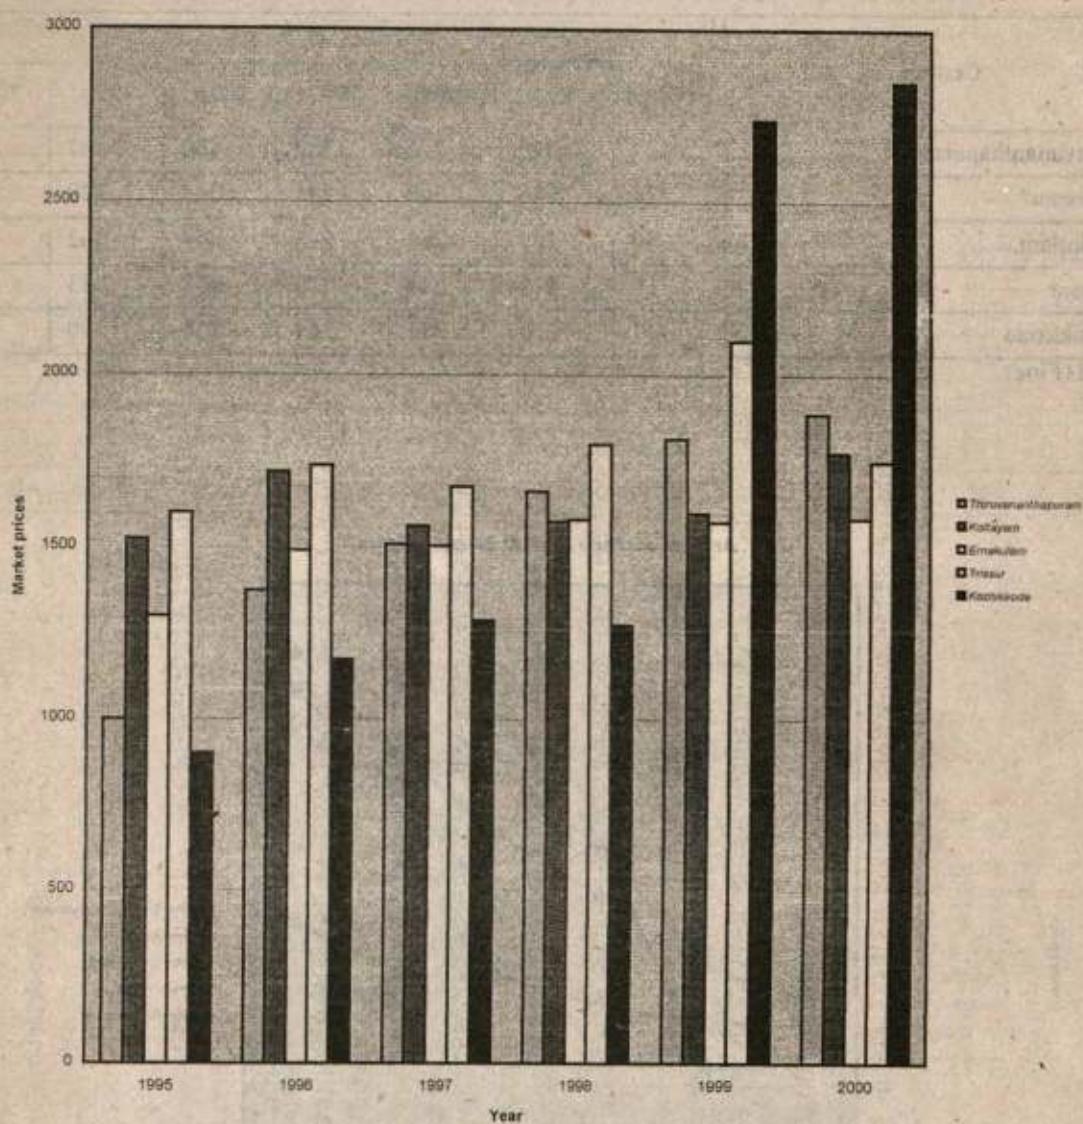

6. Annual average market prices of bricks

The table -4 gives the annual average market prices for bricks per thousand numbers for the years from 1995 to 2000 and also that of 1991. It can be seen that Kozhikode Centre is the most sensitive in terms of prices of bricks. The price variations are comparatively low at the centers of Thrissur and Kottayam. Graph –2 shows the pictorial representation of the data in table -4.

Table-4
Annual average market prices of Bricks (1000 Nos.)

Centres	Prices in Rs.						
	1991	1995	1996	1997	1998	1999	2000
Thiruvananthapuram	578	1000	1375	1509	1662	1816	1888
Kottayam	743	1525	1719	1563	1575	1600	1775
Ernakulam	660	1300	1491	1505	1581	1573	1584
Thrissur	637	1600	1738	1675	1800	2100	1750
Kozhikkode	456	900	1175	1288	1275	2738	2850

Graph-2
Annual average market prices of bricks

7. Annual average market prices of Sand (Medium)

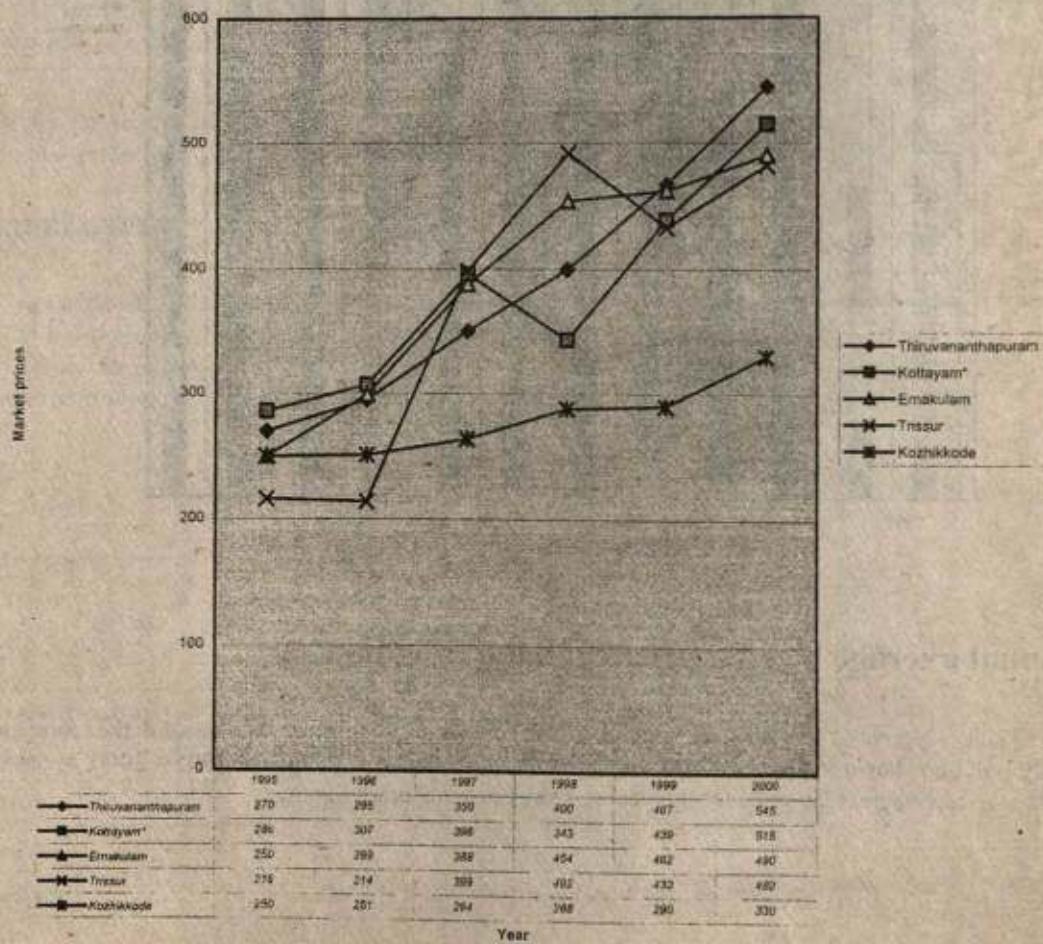

Table -5 gives the prices of sand (medium) at the five selected centers and the corresponding frequency polygon shown in Graph – 3 presents price trend of sand over the period 1995 – 2000. It can be seen that there is a steep increase in price for the item at Thiruvananthapuram Centre.

Table-5
Annual average market prices of Sand (Medium)

Centres	Prices in Rs						
	1991	1995	1996	1997	1998	1999	2000
Thiruvananthapuram	144	270	295	350	400	467	545
Kottayam*	114	286	307	396	343	439	515
Ernakulam	80	250	299	388	454	462	490
Thrissur	100	216	214	399	492	433	482
Kozhikode	157	250	251	264	288	290	330

* Sand (Fine)

Graph-3
Annual average market prices of sand

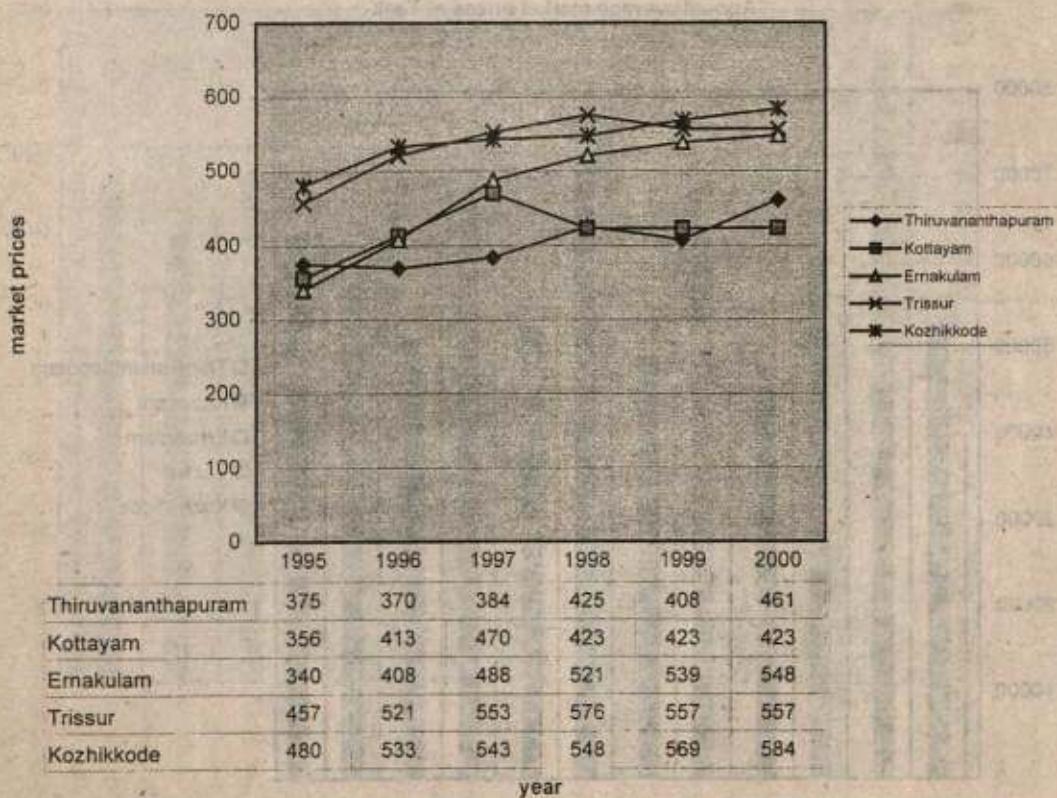

8. Annual average market prices of Stone ballast (20 mm)

The table given below and the corresponding graph shows the prices of stone ballast (20 mm) over the period 1995-2000 at the five Centres. In all the centers only moderate price fluctuations are seen.

Table-6
Stone Ballast (20mm)

Centres	Prices in Rs						
	1991	1995	1996	1997	1998	1999	2000
Thiruvananthapuram	292	375	370	384	425	408	461
Kottayam	248	352	413	470	423	423	423
Ernakulam	192	340	408	488	521	539	548
Thrissur	273	457	521	553	576	557	557
Kozhikode	385	480	533	543	548	569	584

Graph-4
Annual average market price of stone ballast

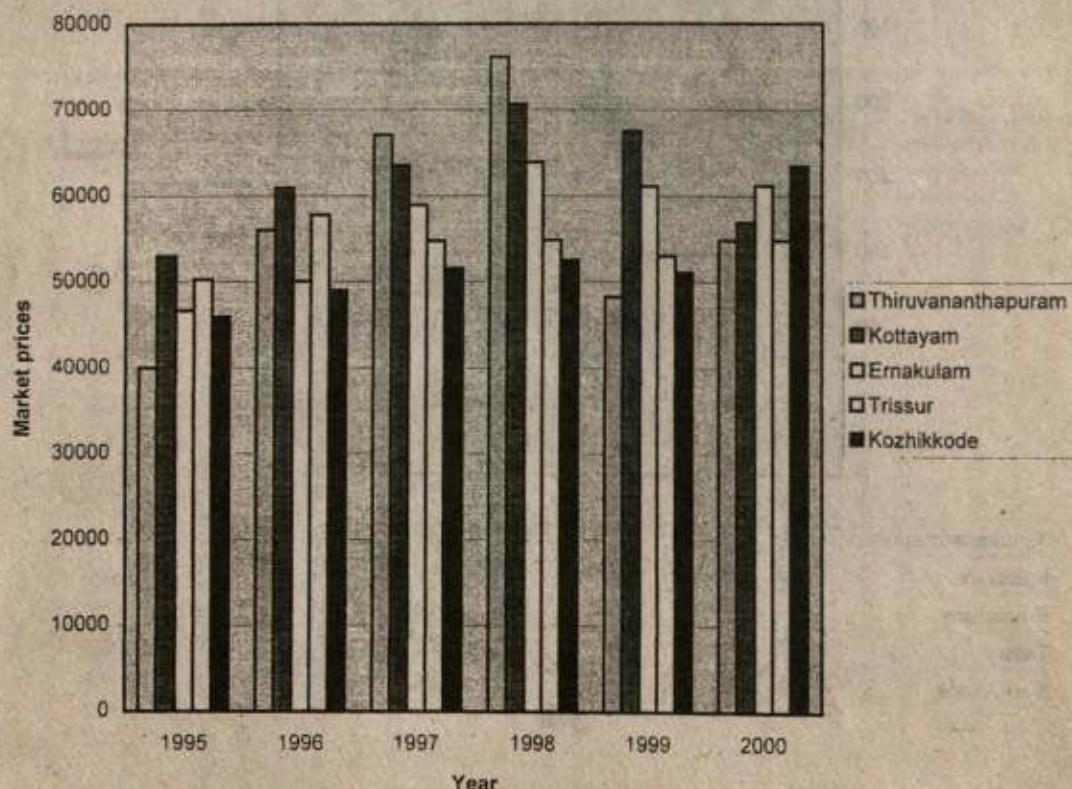

9. Annual average market prices of Teak (4 1/2" * 2 1/2 " * 7')/ Cu.mt

Annual average market prices of Teak Wood (4 1/2" * 2 1/2 " * 7')/ Cu.mt during the period 1995- 2000 is given in table -7 and the corresponding bar diagram shown as graph - 5 gives a diagrammatic representation of these prices at the selected centers. The highest price was registered in 1998 for Thiruvananthapuram Centre and the lowest was also for Thiruvananthapuram center in 1995 so that, a wide range of variation in prices is seen.

Table-7
TEAK (4 1/2" * 2 1/2 " * 7')/ Cu.mt

Centres	Prices in Rs						
	1991	1995	1996	1997	1998	1999	2000

Kozhikkode	24137	45931	48978	51556	52494	51088	63522

Graph-5
Annual average market prices of Teak

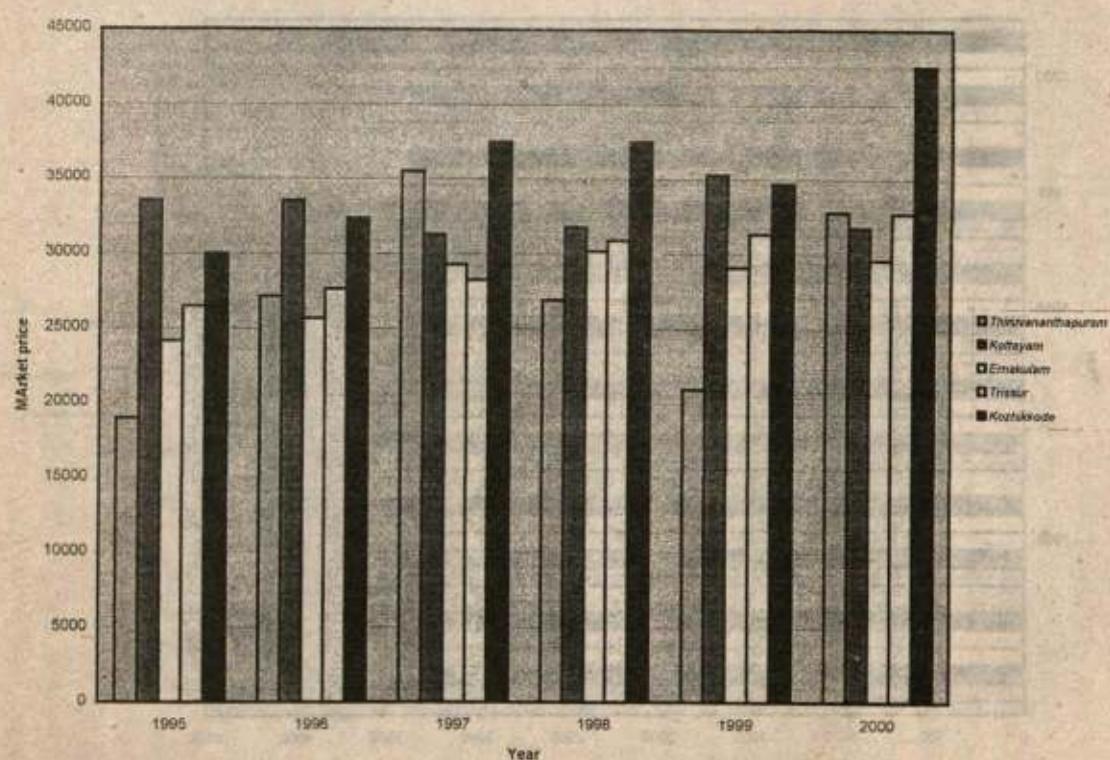

10. Annual average market prices of Jack (4 1/2" * 2 1/2 " * 7')/ Cu.mt

Another wood material that is most commonly used in the construction wood sector is Jack wood. Its prices per cubic meter are given in table -8. The data is depicted in Graph - 6. The highest price was marked for Kozhikode Centre in 2000 and the lowest was for Thiruvananthapuram in 1995.

Table-8
JACK (4 1/2" * 2 1/2 " * 7')/ Cu.mt.

Centres	Prices in Rs						
	1991	1995	1996	1997	1998	1999	2000

1 - Cement Low Strength

**Graph-7
Annual average market prices of Cement**

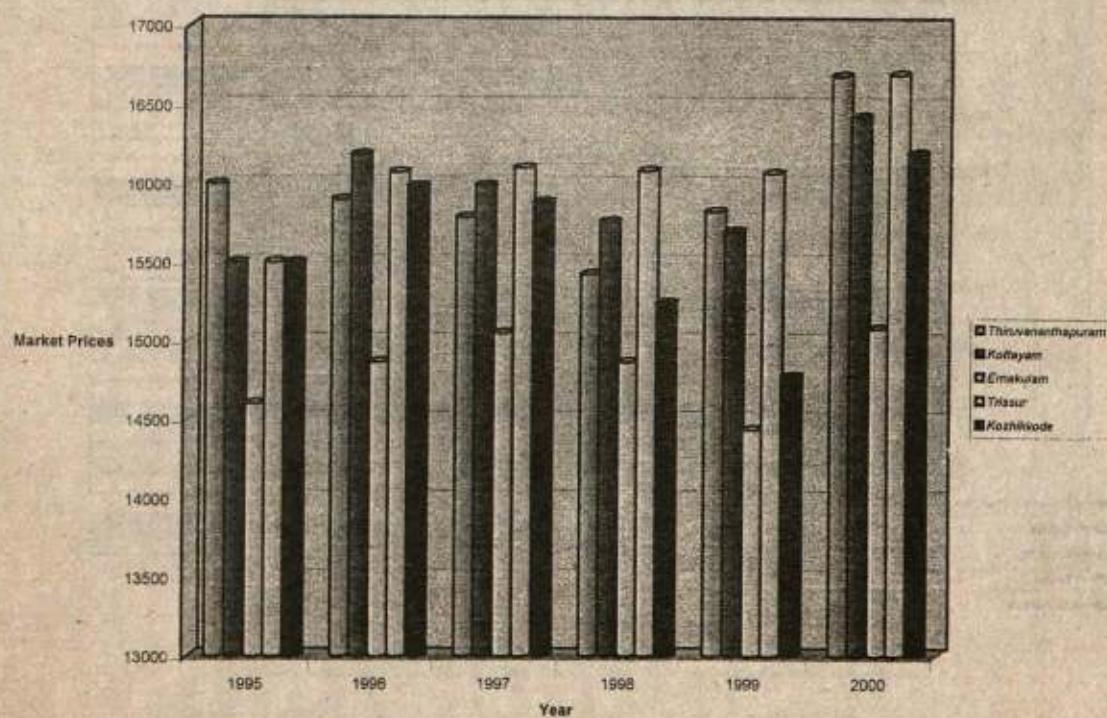

12. Annual average market prices of M.S.Round Bars(10 mm)/ MT

For M.S Round Bars (10 mm), the prices per MT shown in table – 10 did not have much variation over the years 1995 – 2000. The graph shown below indicates these prices. It can be seen that M.S.Round Bars are comparatively more expensive in Thrissur Centre.

Table-10
M.S. Round Bars (10 mm) /MT

Centres	Prices in Rs

Graph-8
Annual average market prices of M.S.Round Bars

13. Annual average market prices of Roofing Tiles (Ordinary) (1000 Nos)

The last but not the least among the building materials for detailed discussion and analysis is the roofing tiles (ordinary) per thousand numbers. Table -11 and the corresponding charts indicates the price variation of roofing tiles from 1995 to 2000. The prices in Kozhikode Centre stands distinctively as the prices given for the centre is that of Mangalore pattern roofing tiles which is more costly than the ordinary.

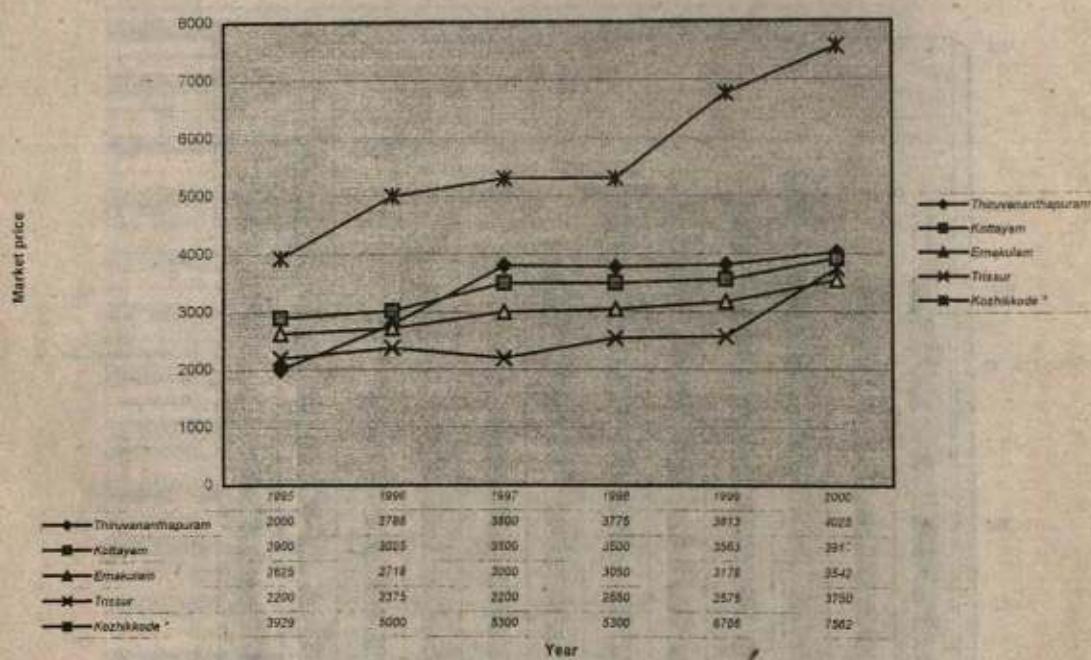

Table-11

* Mangalore Tiles

Graph-9
Annual average marker price of Roofing tiles

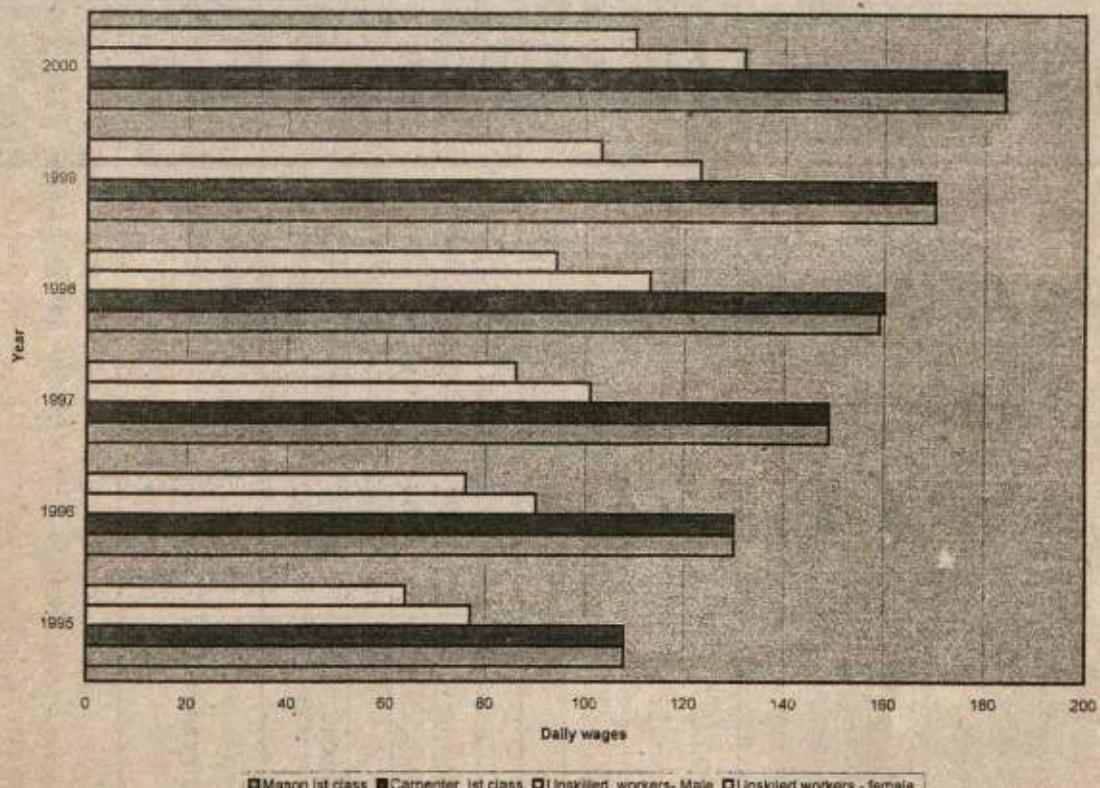

14. Wages of Skilled and Unskilled workers

The construction scenario has changed much since the persons doing the traditional works like carpentry, masonry have switched over to green pastures. As there is dearth for skilled workers in this field, the wages have also gone up accordingly. The following table and the bar diagram illustrates the rises in wages of skilled and unskilled workers.

Table-12
Wages of Skilled and Unskilled workers

Category of workers	Daily wages in Rs						
	1991	1995	1996	1997	1998	1999	2000
