2016-17

DEPARTMENT OF ECONOMICS & STATISTICS  
THIRUVANANTHAPURAM  
2019

## **PREFACE**

Housing Statistics is one of the key indicators of growth and development of any welfare State. Housing is one of the three basic needs of human being. In the context of formulation of housing policy and programmes, the need for reliable housing statistics has increased considerably.

The department has started the collection of Panchayat level building statistics (for rural area) of all districts in Kerala from 2001-02 onwards. From 2015-16 onwards we collected the data from urban area also. The information pertaining to the number of buildings newly constructed and completed, ownership of buildings, type of roofs, etc. of all districts of rural and urban sectors are included in this report.

I congratulate Labour & Housing Wing of this office for their painstaking effort in compiling these data from various primary and secondary sources.

I hope that this report will be of great use to administrators, researchers and scholars, planners and other data users. Any suggestion for improvement of this report is highly appreciated.

## **Introduction**

Housing is one of the basic necessities of life and the right to housing and adequate shelter is guaranteed in the 'Directive Principles of the Constitution of India'. Housing and building construction statistics is of prime importance in a fast developing economy. Next to agriculture, construction is the major employment indicator. Any statistics generated on this will be of great use for policy decisions and programmes of the government. Recent meltdown of the global economy, which seriously affected many less developed countries, has been linked partially to the 'developments' in housing sector. A close watch in the movement of this sector is of national importance. Any movement in this sector has powerful multiplier effects on the economy, operating through the inter-sectoral linkages in the production system.

The housing sector plays an important role in the socio –economic upliftment of a society and a crucial role in the economy of the country. Reliable housing statistics are a pre requisite for the formulation of realistic housing policies. As per the recommendations of National Statistical Commission (NSC) and direction from Government of Kerala, Department of Economics and Statistics has been collecting panchayat level building statistics (Rural sector) since 2001-2002. From 2015-2016 onwards department is collecting building statistics from all Local Bodies both rural and urban sector through district offices of Economics and Statistics.

## Type of roofing

Type of roofing is one of the indicators of standard of living of people and may be changed according to climate conditions and technology. The introduction of new materials and technology reasoned a drastic change in the roofing pattern of houses. People preferred low cost but stronger roofing pattern. As a result, thatched and tiled roofing diminishes slowly. During 2016-17, 346813(89%) of buildings were built up with concrete roof. Only 2666(0.70%) buildings were constructed with thatched roof and 10119(2.62%) with tiled roof which reflects the increasing standard of living of people in Kerala. The figures shows that 94.2% of houses in urban area and 87.5% of houses in rural area out of newly constructed buildings during 2016-17 are with concrete roof.
