INTRODUCTION

Housing along with food and clothing is the basic necessity of human beings. These are the very basic requirements because they are essential for the existence of human being. It reflects the economic status of a person in the society. Adequate housing facility is a reflection of a nation's economic prosperity and social well being.

The non-availability of adequate data on housing is a great drawback for formulation of housing policies. The serious gaps relates to housing inventory, current statistics of building activity consumption of building materials, employment generation in construction sector, data relating to building costs, methods of financing of housing, etc. Realizing the importance of the collection, compilation and analysis of housing and construction statistics, Department of Economics and Statistics has made arrangement for regular collection of housing and building statistics, and this report contains panchayat level data (rural sector only) of all 14 districts.

Need for housing & building construction statistics

Reliable housing and building Construction Statistics are important in the formulation of housing policy and programs for improvement of living conditions of especially the needy poor. Statistics in the housing and construction sector are needed for the following broad purposes

- Assessment of housing stock in the state.
- Assessment of housing condition and needs.
- Estimation of housing shortage.
- Estimation of Gross Value Added (GAV) in housing and construction sector.
- Estimation of Gross Fixed Capital Formation (GFCF).
- Evaluation of housing programs from time to time.
- Estimating the supply and demand of Construction materials, equipment and labour.
- Estimating the requirements of financial resources and for implementing the housing programs.
- Development of infrastructure like water supply, electricity, and other basic amenities.

The Housing sector plays an important role in the socio-economic upliftment of a society and a crucial role in the economy of the country. Reliable housing statistics are a pre requisite for the formulation of realistic housing policies. As per the recommendations of National Statistical Commission and direction from Government of Kerala, Department of Economics and Statistics is collecting Panchayat Level Building Statistics (Rural Sector) from 2001 – 2002 onwards. The data were collected from all Panchayats in Kerala (Rural Sector) through District office of Economics and Statistics.
