VITAL STATISTICS 1992

Department of Economics & Statistics
Government of Kerala

PREFACE

This Bulletin presents the Vital Statistics of the State for the calendar year 1992. The data relating to vital events received from the registering authorities are presented and vital events estimated.

This Bulletin has been prepared by the vital statistics unit of this Department.

Thiruvananthapuram
26-10-1996

U. Thomas Sleeba
Director of Economics and Statistics

Table	Particulars	Page No.
1	Total number of live births, deaths, still births, infant deaths, maternal deaths and their rates.	4
2	Census population of Districts-rural, urban and sex wise.	6
3	Total number of vital events in Corporations and Municipalities having a population of 30,000 and above.	7
4	Total number of vital events in Corporations and Municipalities having a population of 30,000 and above District wise.	8
5	Total number of vital events and its rates in Corporations and Municipalities.	9
6	Live Births by type of attention at delivery - Rural and Urban.	11
7	Live Births according to order of birth and literacy of mother - Rural.	19
8	Live Births according to order of birth and literacy of mother - Urban.	13
9	Live Births according to order of birth and literacy of father - Rural.	14
10	Live Births according to order of birth and literacy of father - Urban.	15
11	Live Births according to order of birth and occupation of father - Rural.	16
12	Live Births according to order of birth and occupation of father - Urban.	17
13	Live Births by order of birth and age of mother - Rural.	18
14	Live Births by order of birth and age of mother - Urban.	19
15	Live Births according to age of mother in Corporations and Municipalities -	20
16	Live Births by religion in Corporations and Municipalities -	22
17	Live Births by religion in Kerala - District - wise.	24
18	Distribution of live births in Kerala (Rural / Urban) Month wise.	25
19	Sex ratio of live births in Kerala - District wise.	26
20	Distribution of deaths in Kerala.	27
21	Deaths by age and sex.	28
22	Deaths by religion - District - wise (Rural / Urban)	29
23	Percentage distribution of Deaths due to acute, chronic diseases.	30
24	Infant deaths by sex - District wise.	33
25	Infant deaths by age and sex.	34
26	Maternal deaths by age at death.	35

VITAL STATISTICS BULLETIN 1992

The Birth and Death Act of 1969 and Rules made there under govern the registration of deaths and births in the State. The act provides for a suitable machinery for the effective registration of births and deaths. The Director of Panchayats in the statutory capacity of Chief Registrar of births and deaths control the civil registration according to this Act. The Additional Chief Registrar of births and deaths is the Additional Director of Economics and Statistics. The District Panchayat Officers are empowered to function as the District Registrars of births and deaths. The Executive Officers of the Panchayats and the Health Inspectors and Health Officers of Municipalities and Corporations are the Local Registrar of the concerned registration units. The data relating to the vital events received from the registering authorities are compiled and analysed in the Vital Statistics unit of the Directorate of Economics and Statistics.

Source of Data

As per the rules framed under the Births and Deaths registration Act births and deaths are to be registered within 21 days immediately after the occurrence of the event at the place of occurrence. The details of each event such as date of events, date of registration, sex, literacy, occupation and religion of father, age of mother, order of birth etc. are recorded at the time of registration in the registers maintained for the purpose. These details are then transferred to the prescribed birth, death, and still birth cards from the concerned registers. These filled-in-cards are forwarded periodically to the Directorate of Economics and Statistics where the data are compiled and analysed.

Limitation of the Data

The registration of vital events is not complete as cases of under registration have been detected. Moreover it is seen that the registered vital rates in the urban areas are higher than that in the rural areas. It may be due to the fact that the registration is defacto. Now most of the people in the rural areas avail the modern medical facilities that exist in the urban areas. Sometimes ignorance of the informants reporting vital events may adversely affect the quality of the data. The causes of death reported by the informants may include those reported by laymen also. This is another limiting factor. All efforts are being made to make the public aware of the importance and necessity of registration of vital events.

Processing of Data

The data contained in 5.23 lakhs birth cards and 1.63 lakhs death cards for the year 1992 received in the Directorate are processed for further analysis.

Vital Rates

The data available from the events reported are used for arriving the following vital rates for the year 1992.

- i. Crude Birth rate
- ii. Crude Death rate
- iii. Infant Death rate
- iv. Maternal Death rate
- v. Still Birth rate

(2)

i. Crude Birth rate

Crude Birth rate is the number of live births per thousand population (mid-year).

ii. Crude Death rate

Crude Death rate is the number of deaths per thousand population (mid-year).

iii. Infant Death rate

Infant Death rate is the number of infant deaths (below one year) per thousand live births per year.

iv. Maternal death rate

Maternal death rate is the number of maternal deaths per thousand live births and still births.

v. Birth and Death rates

During the year under report, details of 5.23 lakhs of registered live births comprising of 2.41 lakhs rural births and 2.82 lakhs urban births have been analysed. The number of registered births during the year has decreased from 5.58 lakhs to 5.23 lakhs and the number of registered deaths has increased from 1.57 lakhs to 1.63 lakhs during the year. The registered birth rate for the state during the year 1992 was 17.67 as against 19.08 during 1991. The rural and urban rates were 9.57 and 64.45 as against 10.77 and 66.35 during the previous year. Malappuram district recorded the highest birth rate of 22.94 during the year also. Moreover birth rate showed a decreasing trend in Malappuram district when compared to previous year. The other districts where birth rates were above the state average were Kasaragod (18.84), Kannur (17.72), Wayanad (17.97), Kozhikode (19.76), Palakkad (18.60) and Thrissur (17.71). As in the previous year, birth rate was the lowest in Alappuzha district (13.13) followed by Idukki (13.92).

In almost all the districts, birth rate showed a decreasing trend when compared to that of the year 1991.

Deaths and Death rates

The total number of death cards considered for analysis were 1.63 lakhs of which 1.13 lakhs were from rural areas and 0.50 lakhs from urban areas. The registered death rate of the state during the year was 5.49. A slight increase in the death rate is noted during the year when compared to that of the previous year 1991 (5.37). The rural and urban break-ups were 4.48 and 11.32 respectively. On an analysis of the district wise rates, Kasaragode recorded the highest death rate (8.04) and Malappuram the lowest (3.83). Death rates in the districts of Kollam, Idukki, Malappuram, Wayanad and Kannur were below the state average.

Infant Death rate

(3)

Total number of infant death during 1992 was 5152 as against 6315 in the previous year (1991). As in the previous year, infant deaths were the highest in Kozhikode district.

Maternal Death rate

Total number of maternal deaths obtained from civil registration data recorded in the state was 16 of which 9 were from rural areas and 7 were from urban areas. No maternal deaths were reported from Idukki, Ernakulam, Wayanad, Kannur and kasaragode districts. The maternal death rate in the state works out to 0.03 as against 0.09 during the previous year (1991).

Still Birth rate

The total number of still births registered during the year was 2782 as against 3413 in the previous year. It showed a decreasing trend when compared to the previous year. Kozhikode district tops the list by registering 597 still births of which 16 were from rural areas and 581 from urban areas. The still birth rate in the state during the year was 5.29 as against 6.08 during the previous year (1991).

Conclusion

Malappuram stood first in birth rate and Kasaragode in death rate.

Birth rate during the year showed a slight decrease when compared to that of the previous year, where as death rate in the rural areas showed a slight increase and urban areas showed a slight decrease. Moreover, all the vital rates were higher in urban areas when compared to rural areas. This is attributed to the fact that the registration is defacto and the better medical facilities available in the urban areas are being utilised by the rural people also. Infant deaths and still births were the highest in Kozhikode district as in the previous year.
