DEPARTMENT OF ECONOMICS AND STATISTICS
THIRUVANANTHAPURAM
1993

P R E F A C E

The growing importance of grass-root level and intermediary level planning of developmental activities warrants the necessity of population estimate at those levels. The Department of Economics and Statistics is engaged in publishing **block level statistics for planning** for each district. In this context the estimation of population for each block is of much relevance and the population figures so arrived at can be made use of while drawing up block level plans.

The booklet containing the block level population estimate for the period upto 2000 is prepared in the Vital Statistics Unit of this Department. It is hoped that the estimates will be useful for the microlevel planners and other data users.

Thiruvananthapuram,
-10-1993.

Dr. M. Kuttappan,
DIRECTOR OF ECONOMICS
AND STATISTICS.

**PROJECTED POPULATION OF C.D. BLOCKS IN KERALA
1992-2000**

...

Explanatory note:-

The Census Department has recently released the population figures of community development blocks (151) in the state for the year 1991. According to the 1991 census there were jurisdictional changes with regard to certain blocks resulting from conversion of a few Panchayats as Municipalities and inclusion of certain Panchayats from one block to another. During the intercensal period (1981-91) 18 new municipalities were formed in the state by converting a few Panchayats. Of those municipalities, Pandalam, Erattupettah, Kuthattukulam, Piravom and Mannarkad were re-converted as panchayats with effect from 1.4.1993 and Kanjirappally with effect from 1.4.1992. Eloor municipality was also changed as panchayat with effect from 1.10.1993. The Quilandy panchayat has acquired the status of a municipality with effect from 1.4.1993. Though the Kodyeri Panchayat and Andoor Panchayat were merged with the Thalasserry Municipality and Thaliparamba Municipality respectively during the period 1981-91, they were later separated out (ie. with effect from 1.4.1993) and their original status was revised. The population of each block was projected by adopting geometric growth rate in the population during the period 1987-'91. The above changes noted were also taken into consideration for arriving at the population estimate.

The annual growth rate used for the estimation of population figures of each block is shown in the appendix.
